In 1871, at Beldy Mill, Garrigill, Thomas Hutchinson, miller, aged 49, his wife Tamar 42, children, James, draper, aged 20, Hannah, dressmaker, aged 18, Isabella 11, Mary A 9, and Thomas W 5.
Tamar Hutchinson, was buried at Garrigill, 21st December 1879, aged 52.
In 1891, at Chiswick, Middlesex, George Viney, mineral water manufacturer, aged 38, his wife Isabella (Hutchinson, married 3rd quarter 1879, registered at

Lanchester, Durham) aged 31, born Alston, children, Walter 11, Maggie 9, George W 7, Thomas Henry 4, Sarah Ann 2, Samuel 3 months, brother in law, Thomas W Hutchinson, mineral water bottler, aged 25, born Alston.
At Annatwalls, near Alston, on the 26th ult., Joseph Hutchinson, lead miner, aged 33 years.
William Hutchinson, married Isabella Lowes, 9th June 1814, at St Augustine's, Alston.
In 1841, at High Plains, Garrigill, William Hutchinson, lead miner, aged 45, his wife Isabella 45, children, John, lead miner, aged 15, Mary 13, Joseph 11, Isabella 7, and Sarah 4.
William Hutchinson, was buried at Garrigill, 14th October 1841, aged 53.
In 1851, at Annatwalls, Isabela Hutchinson, lead miners, widow, aged 53, children, John, lead miner, aged 27, Joseph, lead miner, aged 20, Isabella, at home, aged 17, and Sarah 14.
Isabella Hutchinson, was buried at Garrigill, 12th March 1860, aged 60.
In 1861, at Annatwalls, John Hutchinson, lead miner, aged 39, brother, Joseph, lead miner, aged 30, and sister, Sarah, housekeeper, aged 24.
At Nenthall, near Alston, on the 27th ult., Sarah Ann Carr, daughter of Joseph Carr, lead miner, aged 2 years.

7th April 1864 (Carlisle Journal)
Deaths
At Garrigill Gate, on the 3rd inst., Mary, daughter of the late George Peart, lead miner, aged 34 years. *Born 29th January 1830, daughter of George Peart and Margaret Vipond (married at Alston, 2nd May 1816).*
Other children of George and Margaret Peart: —Thomas born 3rd August 1817, buried at Garrigill 16th August 1854, aged 37, Ralph born 10th April 1819, buried at Garrigill 6th February 1837; George born May 1822, baptism, 19th May 1822, buried at Garrigill, 9th August 1862, aged 40; Elizabeth born 7th December 1824, Ann born 8th July 1827, Margaret born 31st October 1832, Vipond, born 27th July 1835, buried at Garrigill 30th November 1848
In 1841, at East Witton, Leyburn, George Peart (buried, 13th January 1851, aged 57, St John, Garrigill), lead miner, aged 43, his wife Margaret 43, children George, lead miner, aged 15, Elizabeth 10, Mary 6, Margaret 4, and Vipond 3. In 1851, at Gate, Margaret Peart, widow, aged 57, son George, lead miner, aged 28, and daughter Ann, dress maker, aged 23.
At Howhill, on the 5th inst., Ann, relict of William Lee lead miner, aged 82 years.
In 1841, at How Hill, Garrigill, Nancy Lee (Currah, married 8th May 1806), farmer, aged 55, John Lee, lead miner aged 30, William Lee, lead miner, aged 25, Elizabeth Lee 15, and William Lee 5.
In 1851, at How Hill, Ann Lee, widow, farmer, aged 69, son William, lead miner, aged 35, grandson William Lee, lead miner, aged 15, and house servant Isabella Elliot 17. In 1861, at How Hill, Ann Lee, widow, farmer of 36 acres, aged 79, son William, lead miner, aged 45, daughter in law Elizabeth 37 (Williams wife), grandchildren John 6, Mary A 4, Margaret 3, William 1, domestic servant Elizabeth Simpson, aged 17, and lodger, William Blades, coal miner, aged 66.
See 11th November 1853

At Overwater, on the 3rd inst., Mary, relict of Jonathan Pearson, lead miner aged 65 years.
In 1841, at Holmes Foot, Jonathan Pearson, woodman, aged 45, his wife Mary (Walton, married 13th August 1825, Alston) aged 40, and Catherine aged 14. Catherine died 3rd quarter of 1846.
In 1851, at Holmes Foot, Jonathan Pearson, lead miner, aged 56, and his wife Mary 51. Jonathan died 3rd quarter of 1856. In 1861, at Overwater, Mary Pearson, lead miners widow, aged 62.
At Blagill, on the 1st inst., Atkinson Walton, yeoman, aged 56 years.
See 4th October 1845

15th April 1864 (Carlisle Journal)
PRESENTATION AT GARRIGILL.—On Friday the 1st inst., the scholars of Tyne Head School, in the Chapelry of Garrigill, waited upon their late master, the Rev. G. Monkhouse, and presented him with a valuable silver inkstand and an elegant china tea service, as a mark of their gratitude for the great interest he took in their temporal and spiritual welfare during the eight years he was master of the above school. The inkstand bore tho following inscription:—"Presented to the Rev. G. Monkhouse, by the scholars of Tyne Head School as a token of their esteem and affection, April, 1st, 1864." Mr. Monkhouse addressed the children in a very appropriate and feeling speech, pointing out to them the benefits of a good education, and the importance of a sound religious training enable them to fight successfully the great battle of life. The scholars took tea with Mr. and Mrs. Monkhouse on the occasion, and did ample justice to the good things provided for them. During the evening the church choir, accompanied by Mrs. Monkhouse on the harmonium, added greatly to the pleasure of the juvenile party by singing several psalms and hymns; and after an exciting scramble for nuts and gingerbread cakes, the children spent the remainder of the evening in playing at "blind man's buff," and took their leave of Mr. and Mrs. Monkhouse with many and hearty wishes for their welfare.

22nd April 1864 (Newcastle Courant)
Marriages
At Alston, on the 14th inst., George Wilson, Esq., Nenthall, late lieutenant in the Hon. East India Company service, to Emily second daughter of the late William Paull, Esq., Lowbyer House, Alston.
In 1851, at Lowbyer, Alston, William Paull, widow, moor master, aged 55, daughters Maria Ann 26, Emily 22, and general servant, Elizabeth Kirsopp 23.
In 1861, at Loanning Foot, Alston, Joseph M Paull, Moor Master to Greenwich Hospital, aged 34, unmarried sisters Maria A M 36, Emily M 32, all born St Austell, Cornwall, house servants, Ann Woodmass 26, and Fanny Lee 17.
See 16th March 1855, 1st January 1858, 31st May 1861, 18th July 1868, 21st December 1872, 5th June 1875, and 10th January 1880

VALUABLE LEAD MINES FOR SALE, IN THE MANOR OF ALSTON, IN THE COUNTY OF CUMBERLAND.
To be SOLD, by PRIVATE CONTRACT, in consequence of the death of the principal partner.

LOT 1.

All the LEASEHOLD INTEREST of the GRASSFIELD LEAD MINING COMPANY, in the Lead Mines and Veins of Lead Ore, which now are or hereafter may be opened, known, or discovered, within, under, or upon a certain portion of Ground situated in the Manor of Alston, in the County of Cumberland; and described in an Agreement for a Lease granted by the Commissioners of Greenwich Hospital to the Grassfield Lead Mining Company, dated the 4th January, 1860, and now held by the said Company under that Agreement for the remainder of the term of 21 years, commencing from the 1st May, 1858.

Together with the Company's PLANT used in working the same.

LOT 2.

All the LEASEHOLD INTEREST of the NENTSBURY GREENS LEAD MINING COMPANY, in the Lead Mines and Veins of Lead Ore, which now are or hereafter may be opened, known, or discovered within under, or upon a certain portion of Ground, situated in the said Manor of Alston, and described in an Agreement for a Lease granted by the said Commissioners of Greenwich Hospital to the Nentsbury Greens Lead Mining Company, dated the 20th February, 1861, now held by the said Company under that Agreement for the remainder of the term of 21 years, commencing from the 1st May, I860.

Together with the Company's PLANT used in working the same.

Mr JOSEPH RODDAM of Browngill, near Alston, Mining Agent, will show the Mines and Plant, and further particulars may be had of Mr JOHN STOKOE, Solicitor, Hexham, who will treat for the sale thereof.

Hexham, April 21, 1864.

29th April 1864 (Carlisle Journal)

Deaths

At Nenthead, near Alston, on the 20th inst., Mr John Angus, aged 50 years.

In 1841, at West Nenthead, John Angus, lead refiner, aged 25, his wife Sarah (Fleming, married 10th October 1839, Alston) aged 23, and daughter Mary Ann1. In 1851, at Hillersdon Terrace, Nenthead, John Angus, lead ore smelter, aged 37, born Stanhope, his wife Sarah 32, born Nenthead, children, Mary Ann 11, George 9, William 5, John 3, and Joseph 1.

In 1861, at Hillersdon Terrace, Nenthead, John Angus, lead smelter, aged 46, born Stanhope, his wife Sarah 42, born Hesket, children Mary A, house servant, aged 21, George, smelter, aged 19, William, lead ore washer, aged16, John, lead ore washer, aged 13, Joseph 11, Nicholas 9, Sarah J 8, Esther 6, Simpson A 4, Jonathan 1, and grandson Thomas Angus 1. In 1871, at Hillersdon Terrace, Sarah Angus, widow, aged 51, born Hesket Newmarket, children John, lead miner, aged 23, Joseph, lead ore washer, aged 21, Nicholas, lead ore washer, aged 19, Esther, domestic servant, aged 16, Simpson, lead ore washer, aged 14, and Jonathan 11. Sarah died 2nd September 1884. In 1881, at Holmes Foot, Sarah Angus, widow, aged 62, children John, lead miner, aged 33, Joseph, lead miner, aged 31, Nicholas, lead ore dresser, aged 29, Esther, kitchen maid, aged 25, Simpson, lead miner, aged 23, and Jonathan, lead miner, aged 21.

See 4th May 1861, & 6th September 1884.

Accidentally killed at Ireshope Burn Mine, Weardale, on the 25th of April, by a fall of stone, Mr John Walton, of Fourdargue, near Alston, miner, aged 29 years.

In 1851, at Donks Hall, Hannah Walton, lead miners widow, aged 59, children, Robert, retired miner, aged 34, Hannah 29, Ridley, lead miner, aged 22, John, lead miner, aged 19, George lead miner, aged 16, and nephew John Walton, lead miner, aged 14.*

As yet I have not found a marriage for John but is Nancy the wife of John?

In 1861, at Fourdargue, Nancy Walton, married, lead miners wife aged 27, sons Henry 8, and Joseph 11 months, all born at Alston. In 1871, at Fourdargue, Nancy Walton, widow, aged 37, sons, Henry, bobbin weaver, aged 13, Joseph11, and John 9. In 1881, at 10 Morning Street, Chorlton Upon Medlock, Manchester, Nancy Walton, widow, house keeper, aged 47, sons Henry, woollen rug weaver, aged 23, Joseph, woollen rug weaver, aged 21, and John,____ unemployed, aged 19.

10th May 1864 (Carlisle Journal)

FATAL ACCIDENT IN A LEAD MINE

On Saturday last, an accident which resulted in the death of young man named William Tarleton, occurred in the Goldscope Lead Mines, Newlands. About eight o'clock in the morning of the day above named, the deceased, who was employed in the mine, had, in conjunction with a comrade, placed a charge of powder in a part of their working for the purpose of blasting. After firing the fuse the two men retired, and when the powder had exploded, Tarleton returned to the place and commenced to sound the rock with his hammer. While he was so employed a large portion of the rock fell, and literally crushed him to death upon the spot. The deceased who is represented as having been a very steady industrious young fellow, was unmarried. An inquest was held on view of the body yesterday (Monday), at Braithwaite, before Dr. Bell coroner, when a verdict of "Accidental death" was returned.

In 1841, at Braithwaite, George Tarleton, tailor, aged 60, his wife Eleanor 45, children, John, weaver, aged 15, Sarah 15, William 15, Eleanor 13, and Joseph 5. In 1851, at Braithwaite, George Tarleton, tailor, aged 71, his wife Ellen 62, children, John, miner, aged 29, William, weaver, aged 27, Sarah 31, grandsons, Joseph Tarleton 14, and William Tarleton 10.

In 1861, at Braithwaite, John Kirby, lead ore waggoner, aged 56, his wife Ann 44, children, Harky, lead miner, aged 20, George, lead miner, aged 18, William, lead ore waggoner, aged 16, Ellenor 14, Henry, lead ore washer, aged 12, Jane Ann 10, Thomas 8, Barbara 6, James 4, Sarah 6 months, and brother in law, William Tarleton, lead miner, aged 33.

14th May 1864 (Morning Advertiser)

THE HARHOPE GILL LEAD MINING and SMELTING COMPANY (Limited), Weardale, Durham.

To be registered under the Companies Act, 1862.

Capital £100,000, in 20,000 shares of £5 each, 10s. per share on application, and £1 on allotment, further calls at intervals of not less than three months, and not to exceed £1 per share.

DIRECTORS

John Denton, Esq. (Merchant, Leeds), Director of the London and Hamburg Bank.

James Hastie, Esq., Stoneham-place, Brentwood, Essex.

Colonel Thomas Edmond Knox, C.B., United Service Club, Pallmall.

Capel Coape, Esq. & John Evan Tibbs, Esq., Directors of the Commercial Finance Company (Limited).

William Westcott, Esq. (Messrs. Broom, Bagshaw, and Westcott), 36 Coleman-street, London.

The Alliance Bank, London, Liverpool, and Manchester.

SOLICITOR.

George Brady, Esq., 5, Mitre-court, Temple, E.C.

BROKER.

Henry Lloyd, Esq., 6, Angel-court, Throgmorton-street, London.

Offices—75, Cannon-street West, E.C.

ABRIDGED PROSPECTUS.

This company is formed for purchasing and fully developing the celebrated Harehope Gill Lead Mine, near Wolsingham, in Durham, close to the Bishoply Branch of the Wear Valley Railway.

This locality is the richest lead mining district in the kingdom (see tabular statement compiled from Hunt's mineral statistics in full prospectus), and contains the following valuable mines, vis., Bollihope, Dryburn. Stanhope Burn, Holywell, the Great Slit, Slit Pasture, Cornish Hush, California, Sharnberry, and Pikestone.

The most important and productive lodes of this district pass through Harehope Gill Mine, viz., the Great Slit vein, which is the champion lode of Weardale, the Sun, the North Leeds, the Broad-wood, and several minor veins.

The workings at Harehope Gill Mine are being pushed on with great vigour, and are yielding larger quantities of ore than was anticipated. The Directors therefore feel confident that dividends will be paid shortly of from 15 to 20 per cent, per annum.

The Directors have entered into a preliminary contract for the purchase of the lease (about 900 acres), and extensive works and plant for £40,000, half that amount to be paid in shares.

Applications for shares to be made to the Bankers, Brokers, Solicitors, or at the Company's Offices, where specimens of the ore may be seen, and full prospectus and reports obtained.

Extracts from Report by Jehu Hitchens, Esq., Mining Engineer,

March 15, 1864.

"I particularly examined the twenty fathom level at the bottom of the twelve fathom limestone, when I found the Great Slit vein to be of great width and strength.

"I found enough in the appearance and product of these veins to satisfy me that in the bearing sills they will yield large quantities of ore.

"There is no hesitation in pronouncing this adventure to present a very fine field for mining enterprise, the more so, existing as it does in a first-class mineral district, so long celebrated for its great riches. I therefore advise a most rigorous and energetic prosecution of operations.

"In addition to the lead veins in this property, the great bed of limestone crosses out near the Burn, close to the railway; for this stone, as a flux for the different iron furnaces in the district and for agricultural purposes, there is an immense demand. Three hundred tons a day, at 6d. per ton profit, will realise £2,260 a-year, and allowing wear and tear of machinery £250, leaves £2,010 net from this source alone."

Extract from the Report of Captain J. T. Bell, M.K.

"When once the mine is in full working condition the shaft may be put down deeper in the lower limestone's; then the returns of the mine are likely to be large, yielding £40,000 or £50,000 worth of lead in a year"

Extract from the Report of John Robinson, Principal Mining Agent for forty years to the Allendale Mining Company.

"An adit level is driven at Harehope Gill from the washing floors, 400 fathoms, to cut the different veins in the coal sill. From workings now in operation ore is raised in large quantities, leaving a good profit. The veins in this royalty (Harehope Gill) are worked by Mr. Beaumont at the 'Slit' Mine, where they have the vein twenty feet wide, and have raised, within my knowledge for the last twenty years, 6,000 bings of ore annually, or 2,400 tons, worth £34,000 a-year."

3rd June 1864

Marriages

At the Primitive Methodist Chapel, Garrigill, on the 31st ult., by the Rev. Thomas Greenfield, Mr George Pickering of Bridge End, Garrigill, to Miss Ann Bell, Dryburn.

In 1871, at Bridge End, Garrigill, George Pickering, butcher and land owner, aged 37, his wife Ann 31, children, George W 2, Adamson 2 months, and domestic servant, Elizabeth Pickering 19.

Probate: 1903

George Pickering of Garrigill-house, Garrigill, Alston, Cumberland, farmer and butcher, died 15th June 1903. Probate Carlisle to George William Pickering M.D. and Adamson Pickering farmer and butcher. Effects £2750 0s 4d.

10th June 1864 (Newcastle Courant)

Deaths

At Garrigill, near Alston, on the 27th ult., aged 42, Mr John Thomason, lead miner. *See 22nd January 1864, 19th December 1874, 13th May 1876, 27th April 1889, & 30th May 1891.*

At Nentsbury, near Alston, on the 28th ult., aged 34, Mr William Carr, lead miner.

In 1841, at Low Galligill, Thomas Carr, lead miner, aged 35, his wife Margaret (Hunter, married 16th June 1825, Alston) aged 35, children William, lead miner, aged 12, Sarah 9, and Mary 1.

In 1851, at Nentsberry, Thomas Carr, lead miner, aged 48, his wife Margaret 45, children William, lead miner aged 21, Hannah 8, Margaret 5, Elizabeth 2, and Matthew 11 months. Thomas died 4th quarter of 1852.

In 1861, at Nentsbury, Margret Carr, lead miners widow, aged 55, son William, lead miner, aged 31, daughter Elizabeth 12, son Matthew 10, and grandson Robert Glendenning 6. See 1st August 1862, & 14th November 1891

At Alston, on the 1st inst., Francis Ruth, infant daughter of Mr Jonathan Hind.

8th July 1864 (Royal Cornwall Gazette)
At the Derwent Mine Company's thirty-first general meeting on Thursday, the directors declared a dividend of £5 per share payable on Sept. 30.

15th July 1864 (Newcastle Courant)
Deaths
At Alston, on the 6th inst., aged 70, Mrs Elizabeth Summerset.
In 1861, at Kates Lane, Alston, Elizabeth Summerset, widow, formerly a baker, aged 67, and lodger, Joseph Richardson, pedlar, aged 63.
At Nenthead near Alston, on the 5th inst., aged 38, Hannah, wife of Mr Thomas Lattimer.
In 1851, at Low Dyke Heads, Nenthead, Thomas Lattimer (son of Matthew & Sarah Lattimer baptised 27th December 1822), journeyman grocer, aged 28, his wife Hannah (daughter of John and Isabella Bright, baptised 30th June 1826, married at Alston 18th September 1845) aged 25, children Jane 5, Ridley Cramer 3, and Ann 11 months.
In 1861, at Low Dyke Heads, Nenthead, Thomas Lattimer, grocer, aged 38, his wife Hannah 35, children Jane 15, Ridley C. 14, Ann 10, Isabella 8 and Sarah 5.
In 1871, at Carrshield, Thomas Lattimer, widow, grocer, draper, & farmer of 6 acres, aged 48, children Ann 20, Isabella 18, and Sarah 15.
In 1881, at Carrshield, Thomas Lattimer, widow, grocer & farmer of 6 acres, aged58, daughter Sarah, house keeper, aged 25, general servant, Hannah Peart 14, and visitors, Matthew Lattimer, labourer, aged 47, and evangelist J.W. Winter, aged 23, born Durham.
In 1891, at Carrshield, Thomas Lattimer, widow, grocer and farmer aged 68, Mary H Marten, grocers assistant, aged 26, Mary J Pearson, grocers assistant, aged 23, and visitor, William Cox, aged 21, a Primitive Methodist evangelist, born Yorkshire. Thomas died the first quarter of 1901, aged 78 years.

Marriages
At Muirhouselaw, on the 26th inst., Robert Stagg Bainbridge, Esq., of Woodhorn Grange, Northumberland, to Mary, eldest daughter of William Dodds, Esq., of Muirhouselaw, St Boswell's.

3rd August 1864 (Teesdale Mercury)
LEAD MINES
… The "memory of man" is the local and usual phrase by which alone the operations of the lead-mines have been recorded. As they were carried on in remote districts, which until 40 or 50 years ago were in many places inaccessible except far ponies (for 30 years have not elapsed since Lord Lowther went in the first carriage which passed from Alston to Teesdale over Yad Moss), it is surprising that scarcely any local history exists of an authentic and detailed character. In earlier times the miners were supplied with fuel from

the neighbouring forests, as the hills, which are now barren moorland, were then thickly covered with wood. The earliest method of working lead as well as coal - mines appears to have been by shafts—by following the surface indications of ore or coal downward—the driving of levels for drainage being of latter origin. The work was drawn to the surface in kibbles or small tubs; and some of the smaller pits on the bassett or interior beds of coal present even yet what was probably the appearance of a respectable mine, in the infancy of such Operations. The general use of levels or galleries large enough to admit of horses travelling in them is said to have been introduced into the northern lead mines by Sir Walter Blackett, nearly 400 years ago, but the example was not followed for many years by other mine owners. Cast-iron rails, instead of wood, were first used in Nentforce level. Tin pipes were first used tor ventilation by Lord Carlisle and Company at Tyne bottom mine. Mr Stagg introduced iron pipes at Rampgill, and Mr. Dickinson first used lead pipes for the purpose of ventilation in the Nentforce level Any of these materials were an improvement on the wooden boxes, which rapidly decayed, and so rendered the air impure, and which moreover could with difficulty be kept water-tight Among the more important later improvements are the crushing mill of the German Buddle, and the addition of inclines flues or chimneys to carry off the smoke from the smelt mines. The flues erected in Allendale are built of masonry 8 ft. high, 6 ft., wide, and the aggregate length of the flues in the mills belonging to Mr. Beaumont is 9 miles. All the engines of Allenhead mines are worked by hydraulic power, no steam-engines being used, the springs, which rise in the mines being pressed into service. In late years a valuable and interesting improvement has been made by Mr. Hugh Pattinson in the process of separating silver from lead founded on the simple natural law that melted lead crystallises, while silver remains fluid. By this, lead containing only 3 ounces of silver to the ton may be cupelled with profit, so that from 7 to 8 ounces of silver is the average quantity now obtained from a ton. A single ingot of silver recovered by this process was shown at the late British Association Meeting at Newcastle, weighing 17½ cwt., and worth upwards of £8000.

The chief curiosity of the Allendale mines is the Blackett Level, extending for 7 m. underground, and running N. and S. to explore for lead-veins, which run E. and W.

The character of the lead-miners is much influenced by the barren and secluded moorlands in which they live, but beneath a rough exterior they have great kindness of heart and much natural intelligence. There is little poverty amongst them, for the lead miner, who works only 8 hrs. a day, and works only 5 days in the weak, obtains from 15s. to 20s. Still their earnings depend almost entirely on the produce of the mines; and as the productiveness of the lead veins is precarious, and often of short duration, great care and energy are required in the selection of places for work; and an enormous capital is constantly employed in works which require a great number of years before they can be brought into full operation, or produce any adequate return. The men work in partnerships of 2, 4, 6, or even 8 and 12; and each partnership divides the earnings of the whole among its separate members. —*Murray's Handbook*

5th August 1864 (Carlisle Journal)
Deaths
At Garrigill, near Alston, on the 28th ult., Mr. Matthew Lee Currah, miner, aged 36 years.
Thomas Currah and Catherine Lee, married 17th July 1814, at Alston.
Catherine Currah, buried 10th March 1834, aged 41, and Thomas Currah buried 13th March 1838, aged 47 at Garrigill.
In 1841, at Garrigill Gate, John Currah, lead miner, aged 20, Frances Currah aged 25, Thomas Currah, lead miner, aged 15, Matthew Currah, lead miner, aged 12, William Currah 10, and Cathrine Currah 9.
In 1851, at Crossgill, Matthew Currah, lead miner, aged 24, brother William, lead miner, aged 21, sister Cathrine, house keeper, aged 19, and nephew Walton Currah 8.
In1861, at Low Crossgill, Matthew L Currah, lead miner, aged 35, sister, Catherine, unmarried, house keeper, aged 29, nephew Walton Currah, lead miner, aged 18, niece's Frances Currah 6, and Susanna Currah 9 months.

12th August 1864 (Carlisle Journal)
Deaths
At Nenthead, near Alston, on the 5th inst., Mr William Varty, aged 35 years.
Thomas Elliot married Jane Walton, 17th November 1819, at St Augustine's, Alston.
In 1841, at Burn Bottom, Nenthead, Thomas Elliot, lead miner, aged 45, his wife Jane 40, children, John 15, Jane 13, Smith 10, Sarah 8, Robert 6, and Mary Ann 3.
In 1851, at Burn Bottom, Jane Elliott, pauper, lead miners widow, aged 52, children, Jane, dress maker, aged 23, Smith, stone breaker, aged 20, Sarah 18, Robert, lead ore washer, aged 16, and Mary Ann 13.
In 1861, at Burn Bottom, Jane Elliott, miners widow, aged 67, son Smith, outdoor labourer, aged 28, and daughter Mary A, house maid, aged 21.
Jane Elliott, of Burn Bottom, was buried at Nenthead, 17th January 1871, aged 73.

In 1841, at Burn Bottom, Nenthead, Featherston Varty, lead miner, aged 35, his wife Isabella 30, children, William 12, Featherston 8, Robert 5, Elizabeth 1, Edward Roe 6, and John Varty lead miner, aged 25.
In 1851, at Low Level, Nenthead, Featherston Varty, lead ore washing foreman, aged 47, his wife Isabella 43, children, William, lead miner, aged 22, Featherston, lead ore washer, aged 18, Robert, lead ore washer, aged 15, Betsy 10, Isabella 8, and Phillis 6.
In 1861, at Low Level, Featherston Varty, lead miner, aged 57, his wife Isabella 53, children, Featherston, lead miner, aged 28, Isabella, house maid, aged 18, and Phillis, house servant, aged 16.
Isabella Varty was buried at Nenthead 6th August 1865, aged 58.
Featherston Varty of Low Level, Nenthead was buried at Nenthead, 13th January 1867, aged 63
Jane Elliott married William Varty at Nenthead 11th July 1858
In 1861, at Swalway Cottage, Nenthead, William Varty, lead miner, aged 32, his wife Jane, 30, and son Featherston 2.

In 1871, Burn Bottom, Nenthead, Smith Elliott, labourer at the lead mines, aged 40, sister Jane, widow, house keeper, aged 42, nephew, Featherston 12, niece Sarah Jane 9, and nephew Thomas W 8.
In 1881, at Fair Hill, Nenthead, Jane Varty, widow, house keeper, aged 54, sons, Featherstone, lead mine labourer, aged 22, and Thomas W, lead miner, aged 18. See 12th July 1879

7th September 1864 (Hexham Courant)

LOCAL NEWS

On Monday as three or four men were engaged in excavating some old workings in a mine in Blanchland one of them pushed a stick against the roof and immediately afterwards a torrent of water gushed down upon them. Every moment the water increased in volume and threatened to destroy them, but assistance being speedily rendered they were taken out just before they were overpowered by its forces.

SINGULAR FATALITY

About three weeks ago a man named Joseph Cousins received severe if not fatal injuries whilst working at Stone Croft mine near Haydon Bridge by falling of a large stone. The managers of the mine have acted in the most liberal manner towards the injured man since the accident and have repeatedly visited him to see that he was properly cared for. One day last week Mr Ware went to see him and left his pony in charge of the son of the injured man, at the same time cautioning him against attempting to ride the animal. The boy however disregarded this caution and shortly after mounting the pony it ran off with him, and he was immediately afterwards thrown with great violence to the ground. The poor lad was about 14 years of age, was picked up insensible and never rallied. He died on Tuesday *(30th August)* night and his father still remains in a very precarious condition.

10th September 1864 (Newcastle Chronicle)

RIVER TYNE COMMISSION

THROWING RUBBISH INTO THE TRIBUTARIES OF THE TYNE.

Mr. HARLE asked if the Clerk had received any communications from persons in the west district of the Tyne relative to the refuse of the lead mines being thrown into the streams. He had been told that immense deposits were being made in the tributaries; and that must do great injury to the Tyne. He would give to Mr. Clayton the name of a gentleman who would supply him with the necessary information on the subject.
Mr. CLAYTON said it would be necessary to trace the deposit somewhere down the river.
The CLERK said the consequence of the refuse from the mines being thrown into the streams had been that no salmon would turn his head up the South Tyne.
Mr. HARLE said he understood that the refuse about which complaint had been made was from the mines.
Mr PROCTOR said he knew that some years ago at Nenthead, some millions of tons of rubbish were thrown into the bed of the river; and it must have been coming down the river for many years. As it was not deposited in the upper part of the river it must have. come down the river, and no doubt the Commission had to dredge it up again.

The CHAIRMAN said there was power under the old Act of Parliament to prevent persons throwing rubbish into river in such a manner. He was inclined to think that if the parties were appealed to, they would put an end to the practice. Year by year had large quantities of rubbish been thus thrown into the river.
The subject was dropped, after the Clerk had been instructed to inquire into the matter.

14th September 1864 (Hexham Courant)
Deaths
At Allendale Town, 5th inst. aged 72, Mr Ralph Stobbs, for many years a respected workman at the lead mills.
In 1841, at Allendale Town, Ralph Stobbs, smelter of lead ore, aged 50, his wife Mary (Hall, married 23rd June 1816, Allendale) aged 50, family Mary 20, Jane 10, William 10, John 5, and Sarah 4.
In 1851, at Allendale Town, Ralph Stobbs, lead ore smelter, aged 59, his wife Mary 59, and son William lead ore miner, aged 19.
In 1861, at Allendale Town, Ralph Stobbs, lead ore smelter, aged 69, and his unmarried daughter, Jane aged 32.
On 7th inst in London, Elizabeth widow of Robert Lancelot Allgood Esq. of Nunwick, Northumberland, aged 72 years, interred at Simonburn.

28th September 1864 (Hexham Courant)
FATAL ACCIDENT TO A LEAD MINE INSPECTOR.
An inquest was held at St John's Chapel on Friday evening last, to enquire into the particulars relative to the death of Mr Joseph Watson. From evidence produced it appeared that Mr Watson went to inspect a lead mine belonging to the Lead Company, and as he was walking along a narrow passage he unthinkingly stepped on one side and fell down a deep shaft and received fatal injuries. He was in this position a long time. Verdict in accordance with the evidence, "Accidental Death".
The following is reproduced with thanks to Ken Heatherington & the Weardale Museum:
1841 census Forest quarter Frog Hall 3
Joseph Watson 50 Lead Miner, wife Ann 40, children, Elizabeth12, Mary10, Joseph 7, and Frances 2.
1851 census Forest quarter schedule 87 East Black Dean.
Joseph Watson 63 Lead Miner Durham Stanhope, his wife Ann 49, children, Joseph 17 Cart Man, Frances 12, Sarah 9.
1861 census Forest quarter schedule 123 Stone Heap 2
Joseph Watson 73 Lead Miner, wife Ann 59, Sarah 19.

St John's Chapel Burial Register
Watson, Joseph, of Stoneheap. Buried at St Johns Chapel Churchyard 17th September 1864, aged 76. Died of injuries received from falling 5 Fathoms in Middlehope Shield Level. Buried by Coroners Warrant.

Deaths
At Garrigill Gate, on the 5th inst., Sophia, infant daughter of Mr Dent, schoolmaster.

12th October 1864 (Hexham Courant)
NORTH OF ENGLAND INSTITUTE OF MINING ENGINEERS
... Mr Sopwith also gave an interesting account of the operations now going on in the Blackett Level of the Allendale mines. He described the working of a boring machine procured from the Elswick Engine Works, and to which some new adaption's had been applied by Mr Westmacott.
"The machine had been made at the works of Sir William Armstrong and Co.; Mr Westmacott's attention having been given to it more especially, both in the adoption of certain principles and the arrangement of details. It might be interesting if he were to mention what was going on in the Blackett Level by the boring machine. Hand labour being very slow in this hard rock, Mr Beaumont had been desirous of expediting its progress by machinery, and they were now apparently likely to achieve success. The principle, which Mr Westmacott had adopted in this machine, was based on a close imitation of hand labour that is the jumper, instead of being propelled violently against the rock, was made to press steadily against it at the time the impact was given. The impact was given by a spring on the hammer, and a violent blow was given at the time the jumper was in contact with the rock. As soon as this was done, by an ingenious contrivance in the withdrawal of a small quantity of water, the apparatus is withdrawn one eighth of an inch, quite sufficient to allow the debris to fall down, and also to allow the free motion of the jumper, which is made in due succession to turn round one fourteenth; so that with fourteen blows there is one revolution of the jumper. From 150 to 200 blows are given in a minute; 300 could be given if necessary. At this rate the jumper has at times gone steadily in two inches per minute, through the hardest limestone, and as much as two and a half inches have been accomplished. The holes bore best when horizontal. When slightly inclined downwards the workmen were troubled with debris, but that was got out by a strong jet of water.
The machine had short flexible tubes to carry the water from fixed pipes. A column of water acted from pressure above. A clamp is fixed up against the roof and they could ship or unship it by liberating a portion of water under high pressure. The diameter of the hole was one and a quarter inch."

19th October 1864 (Hexham Courant)
Deaths
At Resting Hill, near Allenheads, 15th inst. aged 49, Mr William Hunter Bright, miner.
See 4th December 1880 & 24th July 1886

21st October 1864 (Carlisle Journal)
Deaths
At Nenthead, near Alston, on the 15th inst., Mrs Hannah Stephenson, aged 48 years. *Hannah Stephenson of Donks Hall was buried at Nenthead, 18th October 1864, aged 48.*
James Stephenson married Hannah Hornsby, 19th September 1839, at St Augustine's, Alston.
In 1841, at Welgill Dyke Heads, Nenthead, James Stephenson, lead miner, aged 25, his wife Hannah 25, and son Isaac 2 months.
In 1851, at Donks Hall, Nenthead, James Stephenson, lead miner, aged 35, his wife Hannah 34, children, Isaac 10, Joshua James 7, Matthew 5, and Andrew 1.
In 1861, at Donks Hall, Nenthead, James Stephenson, lead miner, aged 44, his wife Hannah, dressmaker, aged 44, children, Isaac, ead miner, aged 19, Joshua J, lead miner, aged 17, Matthew, lead miner, aged 15, Andrew 10, John G 8, Hannah 5, and Sarah Ann 1
In 1871, Bowlen Close, Helmington Row, Crook, James Stephenson, coal miner, aged 54, his wife Mary (Mary Ann Subdonm married 3rd quarter 1867, registered at Auckland) aged 45, children, Joseph (Sic), coal miner, aged 26, Hannah 15, Sarah Ann 11, and Step daughter, Rachel Subdon, aged 12.
In 1871, at Old Shildon, Durham, Isaac Stephenson, coal miner, aged 29, his wife Mary (Barron, married at Stokesley, 2nd quarter 1866) aged 32, children, Agnes 4, James 2, and Cauper 3 months.
In 1871, at 15 Katherine St, Willington, Durham, Robert Walton, miner, aged 52, born Alston, his wife Elizabeth 55, born Garrigill, son James, miner, aged 14, son in law, Matthew Stephenson, miner, aged 25, his wife Barbara (Walton, married 1st quarter 1869, registered at Durham) aged 21, and their daughter Hannah 1.
James Stephenson died 1st quarter 1872, aged 55, registered at Auckland, Durham.
In 1881, Jos. J, Stephenson, labourer, aged 37, born Nenthead was lodging with George Honeyman and family at 63 Gurney St, Darlington.
At Clitheroe, near Alston, on the 16th inst., Mr John Richardson, miner, aged 59 years.
John Richardson married Margaret Cousin, 8th July 1838, at St Augustine's, Alston.
In 1841, at Physic Hall, Bank Foot, Alston, John Richardson, lead miner, aged 30, his wife Margaret, aged 20, and daughter Jane 2.
In 1851, at Skelgill Plain, Alston, John Richardson, lead miner, aged 46, his wife Margaret aged 35, born Allendale, children, Jane 11, Henry 8, Joseph 6, Ann 4, and John 2.
In 1861, at Clitheroe, Alston, John Richardson, lead miner, aged 54, his wife Margaret 45, children, Jane, dressmaker, aged 21, Henry, lead miner, aged

18, Joseph, lead miner, aged 16, Ann, woollen mill worker, aged 14, and John aged 7.
In 1871, at Clitheroe, Alston, Margaret Richardson, widow, domestic servant, aged 55, sons, Joseph, coal miner, aged 26, and John, twister at woollen factory, aged 17.
In 1881, at Broomhill, Chevington, Morpeth, Joseph Richardson, coal miner, aged 36, his wife Jane 29, children, John E 7, Annie M 5, Grace H 3, Joseph 11 months, mother, Margaret Richardson, widow, aged 64, and brother John, coal miner, aged 27.
In 1891, at Throckley, Castle Ward, Northumberland, John Richardson, coal miner, aged 37, born Alston, his wife Elizabeth A 33, born Plymouth, daughter Sarah A 5 months, born Newburn, and mother Margaret Richardson, widow, aged 75, born Hexham.
Margaret Richardson died 4th quarter 1900, aged 85, registered at Castle Ward, Northumberland.

26th October 1864 (Hexham Courant)
Deaths
At Catton, 18th inst. aged 69, Mr John Craig, smelter.
In 1851, at Stone House, Catton, John Craig, lead ore smelter & farmer of 10 acres aged 55, his wife Mary (Brown, married 21st June 1823) aged 41, children Ann 24, William lead ore miner, aged 22, Joseph, lead ore washer, aged 19, John lead ore washer, aged 19, Jacob lead ore washer, aged 17, Elizabeth 12, Hannah 9, Susannah 7, and Margaret 3.
In 1861, at Stone House, Catton, John Craig, smelter & farmer of 12 acres, aged 65, his wife Mary 57, children John coal miner, aged 29, Jacob lead ore dresser, aged 26, Susannah 17, Margaret 13, and grandson Charles 4 years.
See 19th February 1881.

28th October 1864. (Newcastle Courant)
On Friday morning was issued the **report of the commissioners appointed to inquire into the condition of all mines in Great Britain to which the provisions of the act 23rd and 24th Vict. Cap.151, do not apply, with reference to the health and safety of persons employed in such mines.** It states that Dr. Peacock, at the request of the chairman, visited Alston, Nenthead, Allenheads, Weardale and Middleton in Teesdale, and examined 25 men who were suffering from different forms of disease, and 225 who were at work in various mines. By far the largest number of cases of disease, which fell under his notice, were cases of miners asthma. He says that there is a striking uniformity in the cause to which the miners attribute the impairment of their health; these are bad air, powder reek, and stour. They say, with regard to had air, that, notwithstanding great improvements have of late years been effected in the state of the mines; some of the workings are still very defective. " Powder reek" also, they think, frequently renders the air of the mines very injurious. With regard to the “stour” or dust of the mines, it is often blamed by them as a cause of indisposition, and some say that the “stour" is worse than anything else. Dr. Peacock thinks that in this respect these mines are more injurious than those of Cornwall. The other causes assigned by the miners as probably effecting them were, working too hard when they had a good bargain, working at night, and at too early an age. He did not find the climbing

ladders blamed by the men as having been injurious to them. As most of the mines are entered by day levels, the men have not usually to climb more than 15 to 30 fathoms. He adds, the mines are not apparently so hot as to exercise any injurious influence. In comparing this district with Cornwall, he was struck with the more robust appearance of the miners, and the larger proportion of middle-aged and old men among them. He considers that the diseases met with among the miners in the district correspond generally with the diseases observed in Cornwall, but present some differences. It seemed to him that miners' asthma was usually in this district a simpler form of disease than in Cornwall, and less frequently complicated by disorganisation of the lungs, He also found this affection in the north not so commonly combined with disease of the heart as in Cornwall. He does not think that the more satisfactory sanitary condition of the miners in this district can be ascribed to the mines being generally in a better state as to ventilation, and freer from 'choke-damp.' Indeed, he thinks that the reports of the men indicate a worse condition of certain parts of the mines in the north than in Cornwall. He considers the circumstances which are mainly influential in favourably affecting the sanitary state of the men working in these mines to be the comparatively short periods in each weak during which the men work in the mines, the ready access to the mines without having to climb the ladders to any extent, the natural temperature of the workings, and the length of time during which they are left free. Amongst other recommendations named by the commissioners, are the following: -That every mine should be provided with proper houses conveniently situated, in which the men can change and dry their clothes. That, as accidents are of frequent, occurrence in metalliferous mines, and principally result from miners failing from ladders, or from one level to another, they recommend that no ladder-way should be allowed in a drawing shaft without the shaft being properly divided or bratticed off from the footway, and that efficient sollars should be fixed at moderate distances in all footways, whether the ascent or descent be by ladders or stemples. That more stringent rules should be enforced in regard to blasting, with a view to preventing accidents That the boilers and other machinery should be periodically examined by the mine engineer, and that a monthly report thereon be given in to the captain or agent, to be produced by him, should occasion require. The accidents consequent upon the practice of leaving abandoned shafts and works insufficiently guarded or wholly unprotected, are so numerous, that the commissioners think it very desirable that an efficient and easy available legal remedy should be provided, in order to guard the public from this prolific source of danger. That the employment of boys underground at an early age contributes to produce disease and premature death; they therefore think ii desirable that, as a general rule, no boys under 14 years of ago should work below the surface.

9th November 1864 (Hexham Courant)

HEXHAM PETTY SESSIONS

Thomas Arnison of Peasmeadows, Allendale, lead ore smelter, was summoned to show reason against supporting the illegitimate child of Elizabeth Varty, Green Pit, Allendale. The evidence being satisfactory made out against him he was ordered to pay 2s per week and the cost of the court.

In 1861, at Green Pit, Thomas Varty, lead miner, aged 35, his sister Elizabeth, aged 38 years, and brother Joseph shepherd, aged 32. In 1861, lodging at Peasmeadows, Thomas Arnison, lead separator, aged 37, born Penrith, the 1871, & 1881 census show Thomas remained in Allendale. In 1871, Elizabeth is living with her brother Joseph, a farmer of 10 acres, at Green Pits, with her son John J. P. aged 6 years. See 10th November 1883 & 2nd August 1884.

Marriages

At St Peter's, near Allenheads, 3rd inst, Mr Joseph Kidd of Killhope Burn, Weardale, to Jane only daughter of the late Mr Henry Ridley of Kirk Houses, Allenheads.

In 1851, at Kirks House, Henry Ridley, lead ore miner, aged 53, his wife Margaret (Charlton, married 24th May 1823, St Peter's, Allenheads) aged 49, children William, lead ore miner, aged 25, Joseph, lead ore miner, aged 23, Henry, mine wagon driver, aged 20, Matt, mine wagon driver, aged 18, John, mine wagon driver, aged 14, Jane 12, Wilkinson 8, James 6, and house servant, Mary Chapman, aged 13 In 1861, at Kirks Houses, Allenheads, Margaret Ridley, lead miners widow, aged 58, children John, lead ore miner, aged 24, Jane, house servant, aged 22, Wilkinson, blacksmith, aged 17, and James, wagon driver in lead ore mine, aged 15.

In 1851, at Kilhope Burn, Jonathan Kidd, lead miner, aged 43, his wife Margaret 31, sons Joseph 7, Jonathan 6 months, and house servant, Eleanor Featherston, aged 14. In 1861, at Kilhope Burn, Jonathan Kidd, married, lead miner, aged 53, sons, Joseph, lead miner, aged 17, Jonathan 10, and general servant, Elizabeth Roddam, aged 23.

In 1871, at Lane Head, Heathercleugh, Joseph Kidd, lead miner, aged 27, his wife Jane 32, children Margaret 5, and Henry 3. In 1881, at Rush, Heathercleugh, Joseph Kidd, lead miner, aged 37, his wife Jane 42, children Margaret 15, Henry 13, and Jonathan 9. In 1891, at Helmington Hall Cottages, Hunwick, Joseph Kidd, general labourer, aged 47, his wife Jane 52, children Margaret 15, Henry, general labourer, aged 23, and Jonathan, general labourer, aged 19.

At St Peter's, near Allenheads 5th inst. John Pears of Rope Haugh to Mary eldest daughter of the late Mr John Lee of Allenheads.

John Lee married Mary Rowell, 31st May 1823, at St Peter's, Allendale.

In 1851, at Dudley, Allendale, Thomas Phillipson, labourer in lead ore mines, aged 56, his wife Mary (Lee, married 12th June 1830, St Peter's, Allenheads) aged 54, wife's son, Matthew Lee, lead ore miner, aged 27, daughter Jane Philipson, aged 20, sons Thomas Philipson, waggon driver, aged 17, and Joseph Philipson, lead ore washer, aged 14.

In 1861, at Fawside Green, Allendale, Matthew Lee, unmarried, lead ore miner, aged 37, sister Mary, unmarried, housekeeper, aged 36, nephew William Lee 6, half brothers, Thomas Philipson, lead ore miner, aged 27, and Joseph Philipson, lead ore miner, aged 24.

In 1871, at Rose Hill, Allendale, John Pears, retired lead ore miner, aged 44, his wife Mary 46, daughter Mary J 6, son in law, William Lee, lead ore washer, aged 16, nurse child Mary U Ward 1, and brother in law Matthew Lee, lead ore miner, aged 47. John Pears died 1st quarter of 1878. In 1881, at Rose Hill, Mary Pears, widow, charwoman, aged 54, daughter Mary J., 16, and boarder, John S. Liddle 1 year.

See 14th December 1864.

16th November 1864 (Hexham Courant)
Deaths
At Nenthead 6th inst aged 69 years Mrs Sarah Hornsby widow of Thomas Hornsby.
In 1841, at New Angerton, Blenkinsop, Thomas Hornsby, colliery labourer, aged 45, his wife Sarah 45 (Lee, married 16th June 1814, at Alston), children Joseph, coal miner, aged16, John, coal miner, aged 13, and Mary 10.
In 1851, at Hay Ring, Nenthead, Thomas Hornsby, retired mine agent, aged 56, his wife Sarah 55, son John, lead miner, aged 23, daughter Mary 20, and Grandson William Lee Hornsby aged 2.
In 1851, Joseph Hornsby lead miner, was living at High Grass field with his wife Elizabeth, daughter Sarah 2; and son Thomas 1. Thomas snr, died in 1853.
See 21st November 1874, 7th April 1877, 6th April 1901, & 26th October 1912

25th November 1864 (Carlisle Journal)
GROUSE POACHING. —A few days ago, while Inspector Stephenson, of the county police, stationed at Alston, was on duty at Garrigill, he met Robert Murray, miner, of Fore Green, near Alston, and considering it his duty to search him he found in his possession three grouse, a gun, powder, shot, and wadding. He seized them, and Murray will be summoned to appear before the magistrates at the next petty sessions at Alston.
Marriages
At Alston, on the 24th inst., Mr Thomas Ramsay, miner, to Miss Mary Thompson, both of Alston.
In 1851, at Butts, Alston, John Ramsay, lead miner, aged 48, his wife Mary 49, children, John, lead miner, aged 20, Mary, wool spinner, aged 16, Elizabeth 13, and son Thomas 10.
In 1861, at Edmunds Lane, John Ramsay, lead miner, widower, aged 60, children, John, lead miner, aged 29, Mary, house maid, aged 26, Elizabeth, house maid, aged 24, and Thomas, lead miner, aged 22.
In 1871, at Kates Lane, Alston, Thomas Ramsay, coal miner, age 31, his wife Mary 34, children, John J 4, and Annie M 1 month.
Mary Ramsay died 3rd quarter 1873, aged 37, registered, at Alston.
In 1881, at Front Street, Alston, Thomas Ramsay, lead miner, aged 41, his wife, Margaret, (Rutherford, widow, married 1st quarter 1875, registered at Haltwhistle) grocer, aged 45, step son, Thomas Rutherford, tailor, 23, step daughter Sarah Rutherford, domestic servant, aged 18, step daughter Margaret Rutherford, aged 14, son John Jos. Ramsay, aged 14, and daughter Annie Mary Ramsay, aged 10.
In 1891, at Front Street, Alston, Thomas Ramsay, Grocer, aged 51, his wife, Margaret, aged 57, son John Jos. tailor, aged 24, daughter Annie M, stocking kitter, aged 20, step son, Thomas Rutherford, tailor, 33, step daughter Sarah Ann Rutherford, shop assistant, aged 28, and step daughter Margaret Rutherford, shop assistant, aged 24.
Margaret Ramsay died 4th August 1893, at Alston, aged 60.
In 1901, at Front Street, Alston, Thomas Ramsay, widower, Grocer and fishmonger, aged 61, son in law, Gilbert E Graham, road surfaceman, aged

36, daughter, Annie M Graham, 30, grandchildren, Mary E Graham 4, Albert E Graham 3, and Margaret A 3 months.
Thomas Ramsay died 24th October 1903, aged 64, At Alston.
See 9th November 1839

26th November 1864 (Carlisle Patriot)

MONUMENT TO JACOB WALTON, ESQ., OF ALSTON

The inauguration of a monument to the memory of Jacob Walton, Esq., took place on Monday at Alston. The name of Jacob Walton is, to use a phrase which has now almost become hackneyed, a household word throughout the homes of the lead mining population of South Northumberland and Cumberland, and his death between two and three years ago created a wide spread feeling of sorrow and gloom.

Soon after his death suggestions were made in various quarters respecting the erection of some humble tribute to his memory, and in the June of last year the propositions took a practical shape. Several meetings were subsequently held, invariably under the presidency of Mr. W. Bainbridge, one of the principal promoters of the undertaking, and eventually an acting committee was appointed. Their labours have proved most successful, the large sum of £345 being subscribed for the present monument in a very short time. The weather on Monday was most unfavourable for the occasion, the inaugural proceedings taking place in a drenching shower of rain. Notwithstanding this however, there was a large assemblage present. At one o'clock the workmen assembled in the Market Place and walked in procession to the site of the monument, which immediately adjoins the Town Hall, in the main street. The monument is, on the whole, a small and plain structure; but, never the less, exceedingly neat. It is a round pillar of simple monumental foliage, supporting a square die, with a panel on each face, and four goulets, from which a square pinnacle rises, terminated with a finial. The pillar stands on a square pedestal and the height from the base to the top is 28 feet.

The inscription is as follows: —

“In memory of Jacob Walton, of Green Ends, who died 2nd March, 1863 aged 53 years. Erected by public subscription.” The inscription is graven on the face of the pedestal next the road in leaden letters. The material is of fine red granite, from the Ross of Mull, excepting the pinnacle and die at the top, which are grey Aberdeen granite, with panels of, polished red. A broad platform of freestone, with steps, support the memorial, and there are angle pedestals with railings, which complete the design. Messrs. Austin and Johnstone, Newcastle, were the architects; Mr McAdam, of Alston, was clerk of the works. The whole the stone and granite work has been satisfactorily executed by Mr R Bell, of Newcastle, and the iron-work by W. H. Walker and Son, of the same place. The company having arranged themselves in a body in the street opposite the spot where the memorial was erected.

Mr UTRICK BAINBRIDGE then stepped forward and addressed the assemblage in the following terms: They were met together that day, he might say, for the performance of what he felt sure would be a pleasing duty to them all—to celebrate the completion and inauguration of a memorial to the late Mr Jacob Walton, of Green Ends. There having been, shortly after Mr Walton’s death, an almost universal expression of opinion in the town of Alston and

surrounding district—in fact, wherever Mr Walton had been known— that a memorial should be erected, a committee was formed to carry the same into effect; and such committee, after ascertaining the sentiments of various parties, and fully considering the matter came to the conclusion that it would be the best mode of fulfilling the wishes of both the subscribers and the general public that the memorial should be erected in a fairly public position. The determination having been arrived at, application was made to the Commissioners of the Greenwich Hospital, the owners of the land where the memorial now stands, and he had much pleasure in stating that the present site was by them generously granted free of cost. Of the object of the memorial it was almost unnecessary for him to speak. Like the life of him it is designed to commemorate the memorial told its own tale. The late Mr Walton was to most of them as well known as himself. All that he need say was that it was commemorated to a good, useful, and, so far as the surrounding districts are concerned, a public man. He was an extensive employer of labour; and one of the most pleasing and striking traits of his character, and one which it was wished and intended the memorial should chiefly keep in remembrance, was the respect—nay, he had almost said the grateful love and esteem—always entertained and expressed towards him by his workmen. The labour of the committee bing now completed, he had the greatest pleasure on their behalf, and of that of the subscribers, in now declaring the memorial publicly inaugurated, and dedicated to the purpose for which the subscriptions have been so liberally granted.

At the request of Mr U. Bainbridge, three cheers were then given for the success of the memorial.

IN MEMORY OF
JACOB WALTON
OF GREEN ENDS
WHO DIED MARCH 2ND 1863
AGED 53 YEARS.
ERECTED BY PUBLIC
SUBSCRIPTION

MR JACOB SMITH next addressed the assemblage, and moved a vote of thanks to Mr Bainbridge for the very great interest he had taken in the promotion of the monument.
Mr ROBERT PEARSON having seconded the motion, three cheers were then given for Mr Bainbridge, who briefly responded.

This constituted the whole of the inaugural proceedings, and the company then began to separate. The procession, having reformed also began to move off, and preceded by the band wended their way to the house of Mr Cranston, Turk's Head Inn, Market Place, where preparations had been made for

THE PUBLIC DINNER

At which about 160 or 170 persons were present, amongst them being the following gentlemen: Mr U. Bainbridge, chairman, Mr Paul, Dr Arnison, Mr Henderson, Mr Walton, Mr Ware, Mr Beall, Mr Hall, Mr Dixon, Dr Hyslop, the Rev H. Robinson, John Cooper, Esq., Acomb, Joseph Dinning, Esq., Langley Mill, Jacob Smith, Esq., J. E. Walton, Esq., Mr Holmes, Mr Roddam, Mr Millican, Mr Davies, Mr Rutherford, Mr Peart, &c. After the cloth was removed, several toasts appropriate to the occasion were proposed and responded to, and on the whole a pleasant afternoon was spent.
The total cost of the erection was £335, which leaves a balance of about £10 in the hands of the treasurer.

30th November 1864 (Hexham Courant)

MELANCHOLY AND FATAL ACCIDENT AT ALLENHEADS

An accident of a truly sad and melancholy description occurred to a boy at Allenheads on Friday, ... It would seem that the deceased a youth named Thomas Graham was employed at the mines, where he had been principally engaged in driving and taking the management and charge of horses. In this vocation he was employing himself on Friday last, and when last observed by some of his fellow mates, was yoking his animal to some coal waggons and removing them along to their destination (so far as he was concerned) in the "levels." While engaged in this work he is supposed to have stumbled between the horse and the waggons and fallen between the two with his head on one of the rails. This very unfortunate circumstance caused a check to the horses but not until one of the waggons had passed over the poor lad. ... The accident is rendered somewhat more distressing by the fact that the poor boy lived with and supported his mother a widow whose husband also met with a fatal accident about 18 months ago.
In 1851, at Slagg Hill, George Graham, lead ore miner, aged 33; his wife Jane (Ritson, married 12th February 1842, St Peter, Allenheads) aged 29, children Margaret 8, Susannah 7, Thomas 3, and Ritson 1.
The 1861 census shows at Slagg, Hill, Allendale, George Graham aged 43 lead ore miner, (licensed lodging house), his wife Jane aged 40, Thomas aged 13; Ritson aged 11; George aged 9; Ann aged 7, Jane aged 1, and lodgers, Peter McConvil, book binder, aged 56, and his wife Elizabeth aged 61.
The death of Thomas's father is recorded as having occurred in the first quarter of 1863.
In 1871, at Dirt Pot, Jane Graham, widow, aged 50, children Ritson, lead ore miner, aged 21, George, lead ore washer, aged 19, Jane 11, and visitor Mary J. Nixon 6.

30 November 1864 (Hexham Courant)

At Heathery Cleugh Church, 29th ult. Mr John Elliott of Wellhope, to Mary only daughter of Mr Wm. Lonsdale, Cowes Hill.

4th February 1865 (Newcastle Daily Chronicle)
SHOCKING ACCIDENT TO A LEAD MINER IN NORTH TYNE
A sad occurrence has just taken place at Wester Hall Lead Mines, which are situated in North Tyne, about a mile and a half from Humshaugh. Among the workmen engaged in that portion of the workings known as the Grove, was a sinker named Ralph Brown. On Wednesday last Brown was engaged in blasting at the bottom of the shaft, and about four o'clock in the afternoon, one of the shots he had "set" failed to explode. During the day he had made it his duty to come up tho shaft until the explosion occurred, and had not neglected the same precaution with respect to the last shot, but after a few minutes had elapsed, and it had failed to go off, he descended the shaft again and examined the place where the shot had been set. While he was thus engaged tbs shot fired, and the consequence was, that he was almost literally blown to pieces. Shortly afterwards the accident was discovered, and the remains of the poor fellow were at once picked up and sent to bank. The coroner was subsequently acquainted with the facts attending the accident, but he deemed it unnecessary to hold an inquest, and accordingly gave an immediate order for burial. The unfortunate man belonged to Leadgate, where his wife and one child reside. He was 30 years of age.
In 1851, at Sunnyside, Crook, John Brown, coal miner, aged 45, his wife Frances 42, children, Elizabeth 21, Joseph, coal miner, aged 21, Ralph, coal miner, aged 17, and John 2.
In 1861, at Medomsley, Ralph Brown, pit sinker, aged 28, is lodging with Thomas Robson & family.

24th February 1865 (Carlisle Journal)

In 1851, at Matterdale End, Matterdale, John Bell, lead miner, aged 26, his wife Frances 25, daughter Mary 0, brothers, Thomas, lead miner, aged 22, William, lead miner, aged 20, George 10, and sister Sarah 14.
In 1861, at Matterdale End, Matterdale, John Bell, lead miner and grocer, aged 36, his wife Frances 36, and daughter Mary 10.

29th March 1865 (Hexham Courant)
FATAL ACCIDENT AT THE DERWENT MINES
On Thursday, a sad accident occurred at the Derwent mines, near Blanchland, which resulted in the loss of life to Mr John Murray, a fine young man, only 16 years of age. It appears that a number of men were working in a part of the mine called Tree Drift, in the forty fathom level, and it being found necessary to increase the supply of blasting powder, the deceased proceeded to another part of the mine to procure it, when unfortunately, in passing a hopper or work team, which was uncovered, he fell down it, and was precipitated to the depth of about 16 fathoms, from the 40 to 50 fathom level, and although he was at once taken out, his injuries were so serious that he died immediately afterwards. The deceased was the third son of Mr Joseph Murray, of The Terrace, Derwent Mines. ...

Joseph Murray (son of Joseph Murray and Jane Elliott, who married 28th November 1818, at Hunstanworth) married Mary Currey, 25th January 1845, at Hunstanworth, Durham.
In 1841, at Jeffreys Rake, Jane Murray aged 40, Joseph Murray, lead miner aged 21, and Jane Murray aged 7. In 1851, at Jeffrays Rake, Jane Murray, widow, aged 53, son Joseph Murray, lead ore miner, aged 31, daughter in law, Mary 30, grand children Joseph 5, William 4, John 2, and Margaret 9 months.
In 1861, at Jeffries Rake, Jane Murray, widow, aged 63, son Joseph Murray, lead miner, aged 41, daughter in law, Mary 40, grand children Joseph 15, John 12, Margaret 10, Thomas 8, Nicholsan 3, and Adam 1
In 1871, at Jeffries Rake, Joseph Murray, lead ore miner, aged51, his wife Mary 50, children Joseph, lead miner aged 25, Margaret 20, Thomas, lead miner, aged 18, Nicholson, lead ore washer, aged 13, Adam lead ore washer, aged 11, Hannah 9, and mother Jane Murray, widow, aged 73.

4th April 1865 (Penrith Observer)

See 11th January 1845 and 25th January 1867

23rd May 1865 (Morning Post)

IMPERIAL PARLIAMENT.
HOUSE OF LORDS. —MONDAY, MAY 22.
Their lordships met at 5 o'olock.
METALLIFEROUS MINES BILL

Lord KINNAIRD, in moving that the order for the second reading of this be discharged, stated that the report of the commissioners which he held in his hand, and upon the recommendations of which this bill was based, showed how fearful was the loss of life in our copper, tin, and lead mines, and that a great deal of it was preventable by the means provided by the bill. At 35 the miner's health began to fail, and at 50 the miner was an old man. A great loss of life was constantly occurring through the disgraceful state of the works under ground. He had hoped that the bill having been read a second time might be referred to a select committee, but a few hours only before the time when the second reading was to be moved it had been intimated to him that if not withdrawn it would be opposed by government. He thought this not good treatment, as government had assented to his introduction of the bill provided he made it sufficiently public. He had done so by having 200 copies printed at his own expense and circulated in the mining districts, and its contents made public in every local newspaper, but not withstanding this he was now, obliged to withdraw it at the instance of two or three members of parliament connected with Cornwall. It was urged that he could know nothing about the mining districts, but it should be remembered that he had for three years been in communication with the mining agents, than whom there was not a more intelligent body of men in the country. All the miners asked for was that the underground works should be made as safe as possible. He knew that there was a great objection in some quarters to the provisions of this bill, and one opponent was Mr. Taylor, of the firm of Messrs. Taylor, who stood high in the mining world, and managed their mines to the very best of their ability; but the evidence showed that even their mines were very deficient in ventilation and want of accommodation. The noble lord, after referring to the evidence in the blue books on the table, complained of the government opposition to his bill, and said that he should in consequence be prepared to withdraw it. He implored the government to consider the whole subject during the Whitsuntide recess, and hoped that they would appoint or employ practical and scientific men to examine the evidence. He could give the government the names of gentlemen who would be prepared to prove that by a different mode of ventilation the lives of men might be saved, and also that great advantages would accrue to the adventurers themselves. He might refer to the evidence of Dr. Angus Smith to show that mines might be properly tested and in a far better way than by burning a candle. In conclusion, be would observe that he believed the whole of the evils complained of might be removed. The noble lord moved that the order for the second reading be discharged.

Earl GRANVILLE said the noble lord had made a direct charge against the government for not bringing forward a bill for the regulation of these mines. Now it was competent to his noble friend to take any opinion he chose as to the conduct of the government, but he must complain of his noble friend having imputed to Sir G. Grey motives of an unworthy character, because he had not undertaken the task of bringing in a bill. It was the duty of the government not to take the course which had been adopted by his noble

friend, for he had taken that course without any communication with his brother commissioners, who in their report had not recommended any legislation upon this subject; indeed they had abstained from making any recommendation at all. That being so, it was quite premature on the part of his noble friend to bring forward this bill, and be thought he had therefore acted wisely in withdrawing it.

Lord VIVIAN thought the measure was one of the most mischievous character which bad ever been introduced into parliament, and which the noble lord had done upon his own responsibility and against the protests of all his brother commissioners, who believed that the legislation proposed would be both prejudicial and injurious. He thought that all the special cases, which had been referred to by the noble lord, might be explained in a satisfactory manner. He held in his hand a large bill which bad been circulated throughout Cornwall, and which bore the signature of “Kinnaird.” The bill set-forth the report of the commissioners and their resolutions; but the commissioners had protested against the course taken by the noble lord, for the handbill stated a measure was, as based upon the report, under consideration, and it therefore implied that it met wish the approbation of the commissioners. Now the noble lord knew that that was not the case, and he had concealed this bill from their knowledge up to the last moment. (Lord KINNAIRD—No, no.) He had authority for making that statement. At any rate, the noble lord knew that his coadjutors were opposed to this legislation, and under the circumstances to circulate such a handbill was very wrong. It was clear that the noble lord had very little practical knowledge of the subject, which he desired to legislate upon. He thought the circulating such a bill in Cornwall was an unworthy thing for a peer of parliament to do, and it was no doubt done with a view of inducing support to the measure, which he had introduced. (Hear, hear.)

Lord KINNAIRD said it was far from his intention to impute unworthy motives to Sir George Grey in reference to this bill and the approaching general election. He certainly thought that the Cornish element upon the commission was very strong, and that there was no intention to legislate upon the subject. He did not know what the feeling was of the other commissioners as regarded the handbill. There had been no demonstration in Cornwall against this bill; but he had had sufficient experience to enable him to say that the miners in Cornwall dared not to open their mouths, or to give any evidence to the commissioners. The commissioners visited several mines, and at only one of them could they induce a miner to give evidence, and that was done by himself keeping the agent engaged in conversation at another part of the mine. He was not ashamed to admit that he issued the handbill, for he thought the miners ought to know what resolutions had been agreed to by the commissioners. His belief was that this bill would have materially benefited the miners, and he again earnestly implored the government not to let the matter rest. (Hear, hear.)

After a few words from Earl GRANVILLE, which were inaudible in the gallery,

Lord PORTMAN said that as he now understood the matter the noble lord had removed the charge which he had made against the Home Secretary to the three members for the county of Cornwall, who, the noble lord said, had acted with a view to the coming general election. Now he might say that those gentlemen did not act in any fear of that election, for they were respected in the county, as was proved by their being the county members, and they were

known to look after the interests and welfare of the poorer persons residing in that county. As to the bill before the house, he thought that a more unwise measure had never been brought forward, and it had been brought before the house without reference to the opinions of the other members of the commission. The Cornishmen declined placing themselves under the guidance of the noble lord, and they deprecated most strongly the idea of sending down inspectors from the Board of Trade to tell them how to carry on the business of mining. Perhaps during the next twelve months or two years there might be a serious consideration of this subject, and then it might be seen what it would be best to do for the county of Cornwall. (Hear, hear.)
The order for the second reading of the bill was then withdrawn.

25th May 1865 (Morning Post)

TO THE EDITOR OF THE MORNING POST.

SIR, —You naturally curtailed much of what I said in withdrawing the Metalliferous Mines Bill on Monday, but I regret that you should have omitted one observation, which was to the effect that there were several mines in Cornwall as well as in the north, such as those of the London Lead Company and Mr. Beaumont's, where the comfort of the men was well attended to, and yet even in many of these it would be found, by referring to the analysis in the report, that the air was bad.
I might further have added that the only instance of furnace heating in metalliferous mines (not ironstone) we met with on the principle recommended in the report was at Burtree Pasture, belonging to Mr. Beaumont, which answered very well. —Your obedient servant,
50, Avenue-road, May 24. KINNAIRD.

2nd June 1865 (Carlisle Journal)

Deaths

At Alston on the 22nd ult., Mr Thomas Simpson, draper, aged 31 years.
At Alston, on the 24th, ult., Mr George Law, miner, aged 65 years.
In 1841, at Butts, Alston, George Law, lead miner, aged 40, his wife Elizabeth aged 45, sons, John 10 (in 1851, working as a cartman for George Dickinson), and George 5. (George died 4th quarter 1849?)

8th July 1865 (Newcastle Guardian and Tyne Mercury)
Shotley Bridge County Court
HODSON v. WESTER HALL Lead Mining Company. Mr Patrick, of Durham, appeared for defendants. This was an action for work done in working this lead mine. Defendants produced a stamped agreement, from which it was plain that the plaintiff and other four had agreed to do the work for a certain sum. A receipt for the amount was also produced. The money had been paid to plaintiff's partners, and the judge non-suited plaintiff, who ought to have sued his partners.

11th August 1865 (Newcastle Daily Chronicle)
Within the covers of the “Blue Books” is to be found a mass of information which in this busy age is too apt to be overlooked. Not the least interesting of these blue books is the one embodying the report of the Education Commission, which, under the auspices of the Duke of Newcastle, made their inquiry throughout the kingdom into the subject of education, and published their report in 1861. To that report we beg to refer such of our readers as feel an interest in the subject of education generally, and especially in reference to the Companies Education Bill, as an extract or two from it will show how the question of religious instruction may be easily and satisfactorily settled on a principle which has been long and successfully pursued In this neighbourhood. In the report there is a description of the educational arrangements of two of the largest employers of labour in the northern counties. We refer to those of the representative of South Northumberland, W. B. Beaumont, Esq., and of the London Lead Company, in both of whose extensive lead mines a population is employed which rank among the most intelligent and well-conducted of our people.

At neither of these extensive undertakings has it been deemed advisable to adopt an exclusive system of religious training, and the following brief extract from the Commissioners' report on the system of popular education maintained in Teesdale, Alston Moor, &c., by the London Lead Company, under the agency of B. W. Bainbridge, Esq., will give an idea of the course pursued:—"In the company's educational system the respective duties and responsibilities of employers and parents are fully recognised, and the religious views of the parents meet with due regard. The Bible is made the groundwork of the teaching, and the several catechisms and other books in use have been selected with the intention of avoiding sectarian peculiarities, while giving to the children a knowledge of the fundamental doctrines and principles of our common Christianity. The company likewise require attendance at Sunday School and public worship, and this to be continued on the part of the boys working for them, even if deemed necessary, till 18 years of age, when they are admissible to labour underground. No particular place of worship, however, is enjoined; nor are children here, as elsewhere, urged to church in droves. Parents take or send them to whatever place they themselves prefer, and they mingle among the congregation, to the saving of all the disturbance which usually arises from large schools in places of worship."

The best evidence of the success of this scheme of education is the fact that in an adult population of 2,536, no less than 96 per cent, of the men, and 91.63 per cent. of the women could read, and 88 per cent. of the men and 74.18 of the women could also write. At that time the percentage of children of school age at school was—boys, 94.15; girls, 76.

These two mining establishments afford illustrations of what has been done in promotion of the leading object of the Educational Bill of last session, and we invite the large employers of labour in our neighbourhood to consider how far it is desirable to have the provisions of any bill imposing a duty upon them brought into accordance with arrangements which have in practice been found to work beneficially.

18th August 1865 (Carlisle Journal)

Deaths

At Alston Workhouse, on the 11th inst., Mr James Scott, aged 77 years.

At Nenthead, near Alston, on the 14th, Ann Swerick, aged 21 years.

11th October 1865 (Hexham Courant)
FATAL ACCIDENT IN AN IRONSTONE MINE
On Wednesday, an inquest was held at the King's Head Inn, St John's Chapel, Weardale, before Mr Thomas Dean deputy coroner, touching the death of Thomas Pattinson, an ironstone miner. From the evidence adduced it appears that on Monday deceased with some other men had been working in a drift at the Slit Pasture, Ironstone mine, near Westgate, belonging to the Weardale Iron Company. The drift goes under the township road. Deceased had been passing along with some tubs of ironstone, and it is supposed the tubs had come in contact with a door stead, or one of the timbers which had given way causing a large quantity of earth and stone to come down upon him. His moans attracted two of his fellow workmen to the spot who in about half an hour succeeded in clearing away the debris from the body. When the poor fellow was quite dead. The evidence went to show that the drift was in a dangerous state from debris frequently falling, and some men had refused to work in the drift. Deceased was employed by one Vickers Hodgson who had a contract at the works. The Weardale Company had to put in the timbers and keep the place in repair. The jury returned a verdict of accidental death.
In 1861 at Woodbine Cottage, St John's, Stanhope, Hugh Pattinson, lead miner, aged 40, his wife Ann 40, children Thomas, lead miner, aged 16, Mary 13, Lancelot 8, Ann 5, and Jane 2.

21st October 1865 (Newcastle Guardian and Tyne Mercury)
LOST IN THE MIST ON WEARDALE FELLS.
On Wednesday morning week, two boys belonging to Joseph Featherstone, of White Hills, near Ireshope Burn, Weardale went out to play. One of them was seven years of age, the other three years. Some strange dogs being near the house were followed by Mr Featherstone's dog, which the children followed in their turn in order to bring it back. The children went on to Ireshope Moor, where they became be wildered and enveloped in the dense mist which has covered these moor lands for many days past. They were first missed by their parents about 11 o'clock, when search was made for them, but without success. The search was prosecuted during the night by almost all the inhabitants of the dale, and 100 or more men traversed the Moor with lights until two o'clock next morning, but their search was unsuccessful. The search was resumed at daylight next day, when the poor children were found miles from home, just on the borders of Langdon Common, in Teesdale, when, strange to say, after such an awful night of rain, they found the oldest boy alive, lying on the arm of his little brother, who was dead. They had never ceased wandering until they arrived at the place where they were found, when the younger boy was so exhausted that he was compelled to lay down. His elder brother tried to comfort him and kept up his spirits, telling him that his father would he coming to help them, which manifestations of affection and courage (to which was added the brotherly kiss) were kept up even after the poor child was dead. The elder boy was much exhausted, but is likely to recover. The event has produced a deep feeling of sorrow in the district.

29th November 1865 (Hexham Courant)

FATAL ACCIDENT AT KILLHOPE MINES

On Tuesday morning last two young men named Graham Peart and Thomas Rowell, who had gone into the mine the day before, were missing from Killhope lodging shop. Search was immediately made, and it was found that the "rise" which they had been working in had crushed together, and the unfortunate men had been driven to the bottom. Little or no hope was entertained for their safety, but on the searchers calling out, they were answered by Rowell, who, however, could make them no wiser respecting his companion further than that he had heard him groaning for some hours after the accident occurred, but where he was, he could not tell. The task of getting them extricated proved to be a most difficult process on account of the "foul" air. Light could not be got to burn, the men being in consequence compelled to work in the dark, and having a considerable portion of "whole ground" to cut before they could be reached it was not till late Wednesday evening that they were got out, Rowell being still alive, and with the exception of a few scratches, apparently little worse. Peart, however, we regret to say, was quite dead, having it is thought only lived awhile after the occurrence of the accident. Rowell it appears had succeeded in climbing so far up the rise and got security under a side where he remained during the whole of the time. A small quantity of water falling down beside him no doubt had a beneficial effect on the "foul air," and this it is thought by experienced miners saved his life. During Tuesday and Wednesday the places was visited by large numbers of people, all anxious to render every assistance that lay in their power, some never leaving during the whole of the time. Rowell we are glad to say is progressing favourably. The deceased was about 20 years of age, and unmarried.

In 1851, at High Allers, Heather Cleugh, Thomas Peart, lead miner, aged 31, his wife Hannah (Graham, married 1st quarter of 1841) aged 32, children Joseph 9, Graham 2, Emerson 1, and daughter Elizabeth Graham 12 years.
The 1861 census shows Grahams family living at Bents, in the parish of Heathery Cleugh, his father Thomas widower aged 41, lead miner; Elizabeth, 22; Joseph 19, lead miner; Margaret, 17; Graham, 12; Emmerson, 11; John, 7; Hannah 5, and a grandson Thomas aged 1.
Graham's birth was registered in the 2nd quarter of 1848, which makes his age at the time of his death only 17 years.

5th December 1865 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

LECTURES ON ASTRONOMY.—On Tuesday evening, the first of a course of lectures on "Modern Astronomy" was given by Mr. Barkas, of Newcastle, in the Wesleyan Chapel, Garrigill. U. Bainbridge, Esq., presided, and introduced the lecturer, who, by means of numerous diagrams and popular modes of illustration, kept up the interest of the audience for nearly two hours, on that part of the celestial mechanism of which the sun forms the centre. The second lecture on "Modern Astronomy" was delivered, by Mr. T. P. Barkas, in the Wesleyan Chapel, Garrigill, on Wednesday evening, the subject being the "Sidereal Heavens." Mr. Davidson occupied the chair, and the chapel was well filled. The lecture was profusely illustrated.

23rd December 1865 (Lancaster Gazette)
INGLETON
A NEW LEAD MINE. —From time immemorial relating to the old rhyme. Greygarth has been spoken of as a hill abounding in valuable metal—

"Greygarth wherever thou may stand
Thou art the richest hill in all England."

A short time ago, the neighbouring hills, by the direction of the London Lead Company, were surveyed for the purpose of selecting some favourable place for trying for lead. Four men from Middleton in-Teesdale commenced operations a few weeks since at a place called House-a-Top, about half a mile from Hunts Cross, in the parish of Thornton-in- Lonsdale. At the depth of three yards from the surface they met with some lead in an old working on the first flat, but as it was not worth pursuing they here dug a shaft eleven yards deep, and after a little further descent, should they be successful in the object of their search, it is their intention to cut a drift from north to south for the main lead vein. Long ago lead mining was carried on in this mountainous district, but eventually given up; but it is to be hoped, for the advantage of the neighbourhood as well as the lead company, that this attempt to revive the trade in the valuable ore will be attended with remunerating success.

2nd January 1866 (Carlisle Patriot)
Deaths
At Nenthead, near Alston, on the 16th ult., Mr Jos. Wailes, aged 26 years.
In 1861, at Holme Foots, Nenthead, Caleb Cousin, lead miner, aged 51, his wife Mary 49, son John D 7, stepsons, Joseph Wailes, lead miner, aged 22, and Thomas Wailes, lead miner, aged 19.
See 14th January 1843

13th January 1866 (Newcastle Guardian and Tyne Mercury)
On Friday last an accident of a very serious nature occurred near Nenthead. On the day in question, as the cashiers belonging to the mines were preparing for their journey after making their yearly payments, the horses attached to their vehicle suddenly started off, startled it is supposed by the shrill blast of the huntsman's horn, and dashed away at a tremendous pace. The driver lost all command over them, and they galloped unrestrained for several minutes, till they approached the bridge leading into the village, when the carriage struck against the wall and upset. The poll of the conveyance having been detached by the shock, the horses proceeded at full speed, but were eventually pulled up. The driver, a particularly steady man, was severely injured, but those in the carriage escaped with comparatively little harm.

THE GREENSIDE MINERS. TO THE EDITOR OF THE CARLISLE JOURNAL
Sir, —On behalf of the miners employed at the Greenside mines, I beg to express their indignation at the gross misstatement made (as reported by you in your issue of the 9th instant) by Mr. Dunne, the Chief of Police, at the Appleby Quarter Sessions, with regard to the want of lock-up for Patterdale, as he alleged they (the miners) are in the habit of taking advantage the officer's absence to cause a disturbance. We beg to ask Mr. Dunne to refer to how many cases of disorderly conduct by miners of Greenside have been brought under the magistrates' notice for the last twelve months. There are upwards of 300 men employed on the mines, and I believe, if memory serves

me right, that during that period only three have been in custody for such offence. Also the statement that pay nights they (the miners) are in the habit of coming down and causing a disturbance is most palpable falsehood, as on that night they are generally all of them at home—some of them living a distance of 20 miles away; in fact not above 40 living in the immediate neighbourhood. Excusing me for trespassing your valuable space, but by inserting the above in your next issue you will oblige your humble servant, JOSEPH HARRIS. Greenside, 25th Jan. 1866.

7th February 1866 (Hexham Courant)
Births
At Stonecroft & Greyside Lead Mines, 3rd inst, the wife of Mr Thomas Ware, Manager a son. *Harold. In 1871, at Stonecroft Mine, Newbrough, Thomas Ware, lead mine agent, 43, his wife Cleopatra 39, children Francis T. 11, Florence 7, Harold 5, Laura 2, and Maria 11 days. See 27th November 1886.*

In 1861, at Broad Lea, Ninebanks, John Whitfield, farmer of 25 acres, aged 74, his wife Hannah 72, and daughter Hannah 32. John Whitfield died 2nd quarter of 1867, aged 80, Hannah died 3rd quarter of 1864.
In 1861, at Coalcleugh, Matthew Whitfield, lead miner and grocer, aged 31, his wife Margaret (Liddle, married at Ninebanks 19th November 1853) aged 48, and son Samuel 3 years. In 1871, at Limestone Brae Cottage, Ninebanks, Matthew Whitfield, grocer and flour dealer, aged 41, his wife Tamar (Peart born Alston; married at Alston 21st February 1867) aged 46, and son Samuel 13. In 1881, at Front Street Alston, Matthew Whitfield, miller employing 1 man, and local preacher, aged 51, his wife Tamer 56, and Samuel, millers' son, aged 24. In 1891, at Front Street Alston, Matthew Whitfield, miller, aged 61, his wife Tamer 66, and son, Samuel, miller, aged 34 (died 26th February 1903). Matthew died 1st quarter of 1893, and Tamar died 1st quarter of 1898. See 7th March 1903.
At Lane Head, Weardale, 22nd inst. aged 65, Mr John Humble.
In 1841, at Lane Head, John Humble, lead miner, aged 40, his wife Frances, 35, children, Hannah 14, James 8, Frances 6, and George 3.
In 1851, at Lane Head, Heathery Cleugh, Weardale, John Humble, lead miner, aged 50, wife Frances 47, children James, lead miner, aged 18, Frances 15, George, lead miner, aged 13, Sarah Ann 6, nurse child, John Humble 4 years, and nurse child, Sarah Ann Elliott 5 years.
In 1861, at Heathery Cleugh, Weardale, John Humble, widow (Frances had died in the first quarter of 1858), lead miner, aged 59, daughter Sarah Ann 17, and grandson John Humble, lead miner, aged 17.

9th March 1866 (Carlisle Journal)
Deaths
At Alston, on the 3rd inst., Mr Thomas Little, miner aged 41 years.
See 5th February 1842
At her residence in Liverpool, on the 20th ult., where she resided upwards of 60 ears, Mrs Ann Duncan, formerly of Penrith, and sister of the late Mr William Armstrong of Alston, Cumberland.
At Appleby, on the 3rd inst., Mr William Hudspith (of the firm Hudspith and Co., drapers) late of Nenthead, in his 22nd year of his age.

16th March 1866 (Durham County Advertiser)

WEAR FISHERY ASSOCIATION

The annual meeting of the members, comprising the eastern district of the above association, was held in the Mayor's Chamber, on Friday last. …

Mr Wade, Secretary for the Wolsingham district, next made his report as follows:

… As to the nuisances running into the river or tributaries in the district, I am sorry to say that I have had several complaints …

The next subject is the lead-wash, which, during but summer, I am sorry to say, was nearly as bad as formerly; but whether this was occasioned by the want of water and lowness of the river, or from extra washing, I am not prepared to say. I have been told that the worthy manager of the London Lead Company (H. Bainbridge, Esq., of Middleton House, Teesdale) has had applied to a mine lately opened out—on a small burn running into Bollihope Burn, called Cornish Hush, from which at first much injurious wash was sent down into the Wear —a much improved method of washing, by lengthening the troughs along which the finer particles from the cuttings are conveyed and deposited as they are gently carried along. But this has not produced the beneficial results anticipated. The company expected by this means to obtain finer and more valuable lead. From the greater the distance it had to travel from the mills, it was also expected to improve the water by every particle of lead settling in the trough. If such can be accomplished, as I firmly believe it may, though it has not answered in this case, I hope that other managers will adopt at their mills a like inexpensive means of profiting their employers and, at the same time, benefiting those dwelling lower down the stream. So bad was the lead-wash in the Wear a short time ago, that the miller at the West Mill at Wolsingham could not keep any geese, they all dying from the injurious quality of the water; and I fear even yet that the same consequences might follow were the present one to try the same experiment. Nevertheless, I think some improvement on the whole has taken place, from whatever cause it may have been; and this is a source of congratulation not only for those interested in the river fisheries, but for the graziers and consumers down stream, for all have reaped the common benefit of purer water. …

14th March 1866 (Hexham Courant)

EMIGRATION FROM ALLENDALE

Several families left Swinhope in East Allendale last week bound for the United States of America many of whom have friends to go to who, have written encouraging letters to their relations at home.

A large number of families had previously left Allendale for America. Following the dispute in 1849 between the lead miners and the Beaumont company a number of miners and their families left Allendale for America leaving Liverpool on the sailing ship "Guy Mannering". Their port of arrival was New York; from there, they went to Galena in Illinois. See the appendices.

21st March 1866 (Hexham Courant)

INQUEST IN WEARDALE

An inquest was held at the home of Mr James Holmes, Cowshill, on Saturday last, touching the death of John Emerson; Rush aged 43, who happened an

accident on the 28th ult., at Cowhaust mine, by the falling of a lump from the roof. Deceased was expected to be progressing favourably to a very short while before he expired. Verdict accidental death.

In 1841, at Low Rush, Ralph Emerson, lead miner, aged 50, his wife Jane, aged 50, children, John 15, Mary 15, Jane 13, Ralph 10, and Martha 8. The 1851 census has John living with his parents Ralph, Lead miner, aged 63, and Jane Emerson, aged 62, at Low Rush, Heathery Cleugh, along with his brother Ralph lead miner aged 21, and his sister Martha aged 18.

In 1861, at Low Rush, Ralph Emerson, lead miner, aged 72, his wife Jane 71, children Ralph, lead miner, aged 38, John, lead miner, aged 31, and Martha 28.

In 1871, at Corn Riggs, Thomas Fairless, lead miner & small farmer, aged 32, his wife Martha 38, children Jane 6, John Jos 5, Sarah 3, Ralph Emerson 8 months, and boarder, Ralph Emerson, lead miner, & land owner, aged 40.

FATAL ACCIDENT AT THE DERWENT MINES

A most distressing accident occurred at the Derwent mines near Blanchland, on Friday week. It appeared that six miners employed in the 25 Fathom level in a part of the mine called Green's Shaft, were following their employment on the day in question when one of them named Isaac Peadon found it necessary to have a fresh quantity of powder for the purpose of blasting, and having requested a fellow workman named William Bell to supply him, Bell unhesitatingly proceeded to do so. Whilst he was pouring the powder from one bottle to another, it from some cause or other exploded, and the whole of the workmen with the exception of Naaman Smith, who had fortunately temporarily left that part of the mine, were most severely injured. On assistance reaching the unfortunate men, they were found in a dreadful state of suffering, the flames burning their clothes with such force as was not easily extinguished, and on being got out and taken to their respective homes and medical treatment procured, their injuries proved to be of a very serious nature. Bell we regret to say, lingered with great suffering until Tuesday when he died, and an inquest was held on the body on Thursday last, before Mr Davies, deputy coroner, when a verdict of accidental death was returned. Deceased was 55 years of age, and had been employed at the Derwent mines, where he resided, for upwards of 40 years. He was a most sober, honest, industrious man, and has left a widow and family. The names of the other injured men are, Joseph Peadon and his son Isaac, Archibald Shield, and Joseph Martindale, three of whom are progressing favourably towards recovery, but Peadon, the younger, is still in a very precarious state.

In 1841, at Boltshope Mill, William Bell, lead miner, aged 25, his wife Sarah 25, Mary 4, Sarah 2, and Elizabeth 11 months. William's wife Sarah died 1841/2.

1in 1851, at Ramshaw, William Bell, lead ore miner, aged 37, his wife Francis (Douglas, married 4th quarter of 1848, registered at Weardale) aged 43, children Mary 14, Sarah 12, Alsey 8, Martha 3, and son in law, William Douglas, lead ore washer, aged 10. Francis died 1st quarter of 1852.

In 1861, at Ramshaw, William Bell, lead miner, aged 47, his wife Elizabeth (Featherstone married 4th quarter of 1852, registered at Weardale), dress maker aged 47, daughter Mary 24, granddaughter Jane 4, lodgers William Henry Wilcock, lead miner, born Calstock, Cornwall, aged 21, and Richard Bolt, lead miner, born Winkley, Devonshire, aged 29.

In 1871, at Ramshaw, Elizabeth Bell, widow, retired dressmaker, aged 54, grandson William Bell, aged 6, and lodger, John Walton, lead ore miner, born Alston, aged 40.
In 1881, at Jameson's Mills, Hunstanworth, Elizabeth Bell, widow, aged 65, and grandson William Bell, labourer, aged 16.
In 1841, at Broken Way, St John's, Joseph Peadon, lead miner aged 20.
In 1851, at Level Gate, St John's, Joseph Peadon, lead and Iron miner, aged 30, his wife Jane (married 1st quarter of 1842) aged 27, children John 8, Thomas 6, Isaac 4, Margaret 2, Joseph Hutchinson 7 months, and lodger Job Phipps, excavator, aged 21.
In 1861, at Low Whiteheaps, Joseph Peadon, lead miner, and local Primitive Methodist Preacher, aged 40, wife Jane aged 37, children John 18, lead miner; Thomas 16, Lead ore Washer; Isaac 15, Lead ore Washer; and Margaret 12, Joseph Hutchinson 10, George 8, Mary Jane 6, Andrew S. 4, Sarah 1, and house servant, Sarah Martin, aged 16.
Joseph senior died 2nd quarter of 1868.
In 1871, at Derwent Cottages, Hunstanworth, Jane Peadon, widow, aged 47, children, John, lead ore miner, aged 28, Thomas, lead ore miner, aged 26, Isaac, engine driver at lead ore mines, aged 25, Joseph, lead ore miner, aged 20, George, lead ore miner, aged 18, Andrew, shoe makers apprentice, aged 14, Sarah 11, Eunice 8, and Hannah 7.
In 1881, at Derwent cottages, Jane Peadon, widow, aged 57, sons, Joseph, butcher aged 30, George, lead miner, unemployed, aged 28, and Andrew, shoemaker aged 24.
Archibald Shield aged 15 son of Thomas (Blacksmith) & Alice Shield, living at Whiteheaps. In 1861, at Whiteheaps, Thomas Shield, blacksmith, aged 45, his wife Alice 39, children William, lead miner, aged 18, Thomas, lead ore washer, aged 14, Archibald, lead ore washer, aged 12, Emmerson, lead ore washer, aged 10, George 8, Edward 6, John 4, Sarah Ann 2, Mary 2 months, brother in law, Emmerson Walton, lead miner, aged 40, house servant, Sarah Farbridge, aged 14, and visitor Martha Bell, aged 13.
In 1871, at Roddy Moor Pit, Crook with Billy Row, Archibald shield aged 21, and his brother Emmerson Shield aged 19, were working as labourers, lodging with William Dawson and his family.
In 1881, at High Street, Wolsingham, Archibald Shield, fruiterer, aged 31, his wife Margaret 31, children George Thos. 6, William Ed. 5, Sarah Ann 4, Alice Eleanor 3, and John Oswald 1 year.
In 1891, at High Street, Wolsingham, Archibald Shield, fruiterer, aged 42, his wife Margaret 42, children George Thomas, assistant fruiterer, aged 16, William E., assistant fruiterer, aged 15, Sarah A. 14, Alice H. 13, John P. 11, Adeline 9, Archibald 5, Charles 4, Millicent 10 months, and Frederick 10 months.

21st March 1866 (Hexham Courant)

MINE ACCIDENT AT BURTREE PASTURE, WEARDALE.

As two miners named Jonathan Peadon and Martin Thompson, both of Ireshope Burn, were in the act of "stemming" on Wednesday last, the powder very unaccountably became ignited, and the hole went off blowing the pricker, drevil, hammer, &c, right over the heads of the men with tremendous force. Fortunately, the hole did not throw her work or the consequence would most

assuredly have been of a very serious nature. As it was, they were both severely burnt and cut about the face and hands, and Peadon lost an eye and one of his little fingers. It appears the hole had in the first instance "shot her stemming" and to prevent a similar result the men unfortunately resorted to the reckless and daring practice of "double hand stemming", an act which has been very severely commented upon in the country, and more especially in a forehead so particularly hard as was the case in this instance.

In 1851, at Dyke, Heathery Cleugh, St John's, Thomas Peadon, lead miner, aged 60, his wife Hannah (Whitfield, married 6th April 1813) aged 55, children Whitfield, lead miner, aged 26, Jonathan, lead miner, aged 24, Hannah 18, and Mary Ann 14.

30th March 1866 (Newcastle Courant)

NEWCASTLE COUNTY COURT.

YESTERDAY. —Before W. BLANCHARD, Esq., judge.

ARMSTRONG V BREWIS.

This was an action to recover £50, the balance of the value of shares sold by the defendant, who is a share broker, for the plaintiff. Mr Blackwell, instructed by Messrs Hoyle, Shipley and Hoyle, was for the plaintiff; and Mr Bousfield appeared for the defendant. Mr Blackwell, in opening the case, stated that it almost amounted to fraud. In 1865, Mr Brewis was a share broker in Newcastle, and in April of that year the plaintiff went to him and said he wished to sell 100 one-pound shares in the; Cashwell Mining Company. The plaintiff said he was short of money, and that was the reason he wanted to sell. Mr Armstrong said he ought to get 30s. per share. A few days afterwards Mr Brewis said he had had an offer of 20s. per share. Mr Armstrong said he supposed he would be obliged to take it. He did not then inquire who the purchasers were. There was a request subsequently made as to the transfers of the shares, and the plaintiff was then made acquainted that the shares had been disposed of—fifty to Mr Charles Anderson, Cumberland Row, and fifty to Mr Joseph Blenkinsop, South Shields. In the following November, Mr Armstrong met Mr Anderson in Newcastle. The Latter said he had bought the shaves for £1 12s. 6d. each. The matter, after being investigated, was placed in the hands of Mr Armstrong solicitor. The plaintiff was called, and spoke to the facts as stated by Mr Blackwell. Verdict for plaintiff for the full amount of £50 being the largest amount for which an action can be brought in this court.

4th April 1866 (Hexham Courant)

Deaths

23rd May 1866 (Hexham Courant)

MINE ACCIDENT AT ALLENHEADS

As two miners named Isaac Varty and Jos. Reed were in the act of charging a hole with gun cotton on Friday last, an explosion took place, and both the unfortunate men received severe injuries on different parts of their bodies, and were also considerably burnt about the face. They were however; far less hurt than could naturally have been looked for under the circumstances, as the hole threw all her work. Both men are progressing favourably towards recovery. *The 1861 census gives the following regarding the Varty & Reed families, the injured miners may have been the fathers or sons.*
Isaac Varty lead miner 61, wife Jane 56, Isaac lead miner 27, Elizabeth 23, William shepherd 22, Hannah 20, Thomas 16
Joseph Reed lead miner 55, wife Hannah 47, Isaac lead miner 28, Ann 26, Thomas lead miner 21, Mary 19, Joseph lead miner 16, Jane 11, John 8, Elizabeth 6, Sarah 6, Margaret 4.

In 1871, at Garrigill Gate, Joseph Nall, lead miner aged 28, sister Hannah, housekeeper, aged 23, brother Thomas, lead miner, aged 21, and brother William 10 years.

At Tynehead near Alston, 25th inst. aged 42, Mr Wallace Millican, farmer.

James Millican married Elizabeth Lowes, 29th June 1820, at Alston.
Elizabeth/Betty was buried at Garrigill 15th January 1831 aged 31, following the birth of her son Thomas born 6th January 1831.
James Millican widower married Elizabeth Watson Widow 7th November 1833, at Alston.
In 1841, at Dyke Nook, West Allendale, James Millican, lead miner, aged 40, his wife Elizabeth 50, children, Ellis 20, Wallace, lead miner, aged 15, Matthew, lead miner, aged 15, James 12, Isabella Watson 15, and Joseph Watson 11.
In 1851, at Dyke Nook, West Allen, James Millican, stint farmer of 76 acres, & undertaker of drawing at lead mines employing 10 labourers, aged 53, his wife, Elizabeth 61, son Mathew, farmers son, aged 25, and niece Margaret Millican, house servant, aged 14. James Millican of Dyke Nook, was buried at Carrshield 14th February 1860, aged 62. Wallace married Francis Dixon, 7th December 1844, at Renwick, Francis died aged 24, buried 23rd June 1846, at Carrshield, they had a son Thomas born 22nd June 1846.
James, father of Wallace married for the first time to Elizabeth Lowes, 29th June 1820, at Alston, the Garrigill Wesleyan records show, the birth of a son 6th January 1831, Elizabeth died in 1831, Garrigill burial records show Betty Millican of Tynehead, 15th January 1831, following the birth of her son.
In 1851, at Carrshield, Wallace Millican (son of James Millican), mining plate layer, & blacksmith, his wife Elizabeth (Philipson, married 10th May 1848, at Ninebanks), aged 30, children Thomas 4, Elizabeth 1, Francis 1 month, and cousin Thomas Millican, miner, aged 30.
In 1861, at Pasture House, Garrigill, Wallace Millican, farmer, aged 37, his wife Elizabeth 40, children Thomas 14, Elizabeth 11, Francis 9, James 7, Joe 5, Leah 3, and Albert 1.
The 1871 census shows two further sons Jesse, born 1863, and Philipson born 1866.
A number of Wallace's children emigrated to Australia, Francis, Joseph, Albert, and Philipson (See 19th March 1887, for emigration to Canada & 26th

September 1891, marriage at St John's Church, Garrigill); they went to Charters Towers, Queensland.

The Brisbane Courier 30th March 1892: -

CHARTERS TOWERS, March 29.

This evening the friends of Mr. Joe Millican, who has just completed a term of two years as Mayor of Charters Towers, presented him with a magnificent silver coffee service, epergne and salver, which cost over £100, in recognition of his services as mayor, and of respect for him as a man.

The Brisbane Courier 9th March 1896: -

CHARTERS TOWERS, March 7.

Joe Millican, partner of Miles and Co., who is making a trip to England, received a farewell " send off." Two hundred and fifty men of all classes were present. The guest expressed his belief in a big revival in mining, and said that Mills's United' got another shoot of gold, believed to be the Brilliant Extended, and only wanted to sink to strike rich stone, while the Day Dawn Block was on splendid gold. Mr. Bearup, speaking of the deep ground, said that the Brilliant Extended had proved a. big body of stone for over 2000ft. now, and was paying expenses, and with the promise of doing better.

See 5th September 1896 for a report of his visit to England.
Joseph Millican died at Sydney, 10th August 1934.

Sydney Morning Herald, 11th August 1934: -

MILLICAN: -The Relatives and Friends of the late JOE MILLICAN are kindly invited to attend his Funeral; to leave the residence of his daughter (Mrs. T. Mills), 7 Park-road, St. Leonards THIS SATURDAY, at 1.45 p.m., for the Methodist Cemetery, Rookwood (Old Portion).

The Brisbane Courier 8th July 1887

Francis Millican has been appointed by the executive as clerk in the police office at Charters Towers, in the room of John Francis, who has been transferred to the mining registrar's office at the same place.

The Brisbane Courier of 24th March 1900 lists Francis as being appointed as a magistrate. The Sydney Morning Herald of 1st May 1907, printed the Prospectus of the Ambrose Silver Copper Mines Ltd, in which Mr. Joe Millican, Mining Agent, Charters Towers, and Mr. Francis Millican, Mining Agent Charters Towers are listed as two of the five directors.

1st June 1866 (Carlisle Journal)

Deaths

At Nentsbury, near Nenthead, on the 27th ult., Hannah Erwin, widow of John Erwin, aged 58 years.

See 17th February 1844, 24th February 1844, 27th April 1866.

At Nenthead, on the 29th ult., Elizabeth Spark, wife of William Spark, aged 30 years.

In 1861, at Whitehall, William Spark, lead miner, aged 26, his wife Elizabeth (Barron, married 23rd February 1861, at Nenthead), aged 25. GOVERNMENT EMIGRANTS IN NEW ZEALAND

Mr W. Forster of Dipton Mill has forwarded us the following extracts of a letter received from his son, who emigrated to New Zealand about two years ago, and complains of the treatment which Government emigrants receive on landing in that country: -
"You will see by my address that I am now in New South Wales, Australia. I have been here fourteen weeks. I left Auckland, New Zealand, in June last. Auckland is no place for miners. I like this place very well. I am working in the coal works here. There is an immense quantity of coal worked and shipped here, and many hundreds of men employed. We earn on average about £2 5s per week. There are many North of England men, or "Geordies," as they are called, in this district. Places have all received English names. This place (Lambton Colliery) is in the county of Northumberland. We are four miles from Newcastle, six miles from Hexham, eight miles from Morpeth, and two miles from Wallsend. I can only give a very general description of the surrounding country; it is all wood, or 'bush,' as far as I can see. A great deal of cattle farming is carried on; but the cattle are dying daily for want of water and grass, for in some districts there has been no rain for fifteen months. I only wish I had Dipton Burn here, for the rain water preserved in the rainy season is the best that can be got. Wages here for mechanics and miners are from 9s to 10s per day, labourers from 6s to 7s. Provisions, taken together, are very little dearer than in England. The rascality of the New Zealand Government, and the delusion they practice on the working men of England, ought to be

published, in order to warn working men in future, who wish to better their position by emigrating, to be careful how they trust the fair promises of Government agents. They advertised in several of the British newspapers for mechanics, miners, agricultural labourers, female servants, &c. assisted passages were to be obtained, and plenty of work, and good wages on landing in New Zealand. Thousands took passages to better their position; I being one among the number. Our ship was among the earliest of the emigrant ships bound for Auckland, N. Z. Of course, we had to see the superintendent of Government emigration on landing. "What trades are you men?" he asks pompously. "Miners sir." "Oh, oh, you'll do well here." "Can you give us any information where we will find work as miners either in coal, iron, or copper mines?" "I will give you a note to take to the superintendent of works; he will give you a job of breaking stones on the roads!" That was bettering our positions a vengeance! The fact of the matter was there were no mines in the country, only one bit of a coal mine to supply two or three small steamers on the Waikato River; and scores of miners had come under the promise of finding abundant employment at their own trades. But owing to such a rush of emigrants arriving daily, there was not work for the half of them, or for any other trade, and scores of poor men were starving."

15th June 1866 (Carlisle Journal)
Deaths
At Alston, on the 7th inst., George Law, aged 21 years.
At Holmefoots, near Nenthead, on the 9th inst., George Moor, aged 58 years.
In 1861, at Kings Head, Nenthead, Mary Natress, widow, aged 54, children Mary, dress maker, aged 26, John, lead miner, aged 24, Emanuel, lead miner, aged 16, and boarder, George Moor, lead miner, aged 53. See 23rd February 1866
At Garrigill Gate, on the 9th inst., Hannah Richardson aged 37 years.
At Nenthall, near Alston, on the 10th inst, Frances Elizabeth, daughter of Thomas Gill, schoolmaster, aged 12 years.

20th June 1866 (Hexham Courant)
Deaths
At Leadgate near Alston, 12th inst, aged 64, Mr Joseph Bramwell, lead miner.
In 1851 living at High Aimshaugh, Alston, Joseph Bramwell lead miner 46, his wife Margaret (Lee, married 10th July 1825) 46, and children, Joseph lead miner 19, John 13, Henry 12, Mary 12, William 9, Thomas 7, Margaret 5.
In 1851 the twin daughter of Joseph and Margaret Elizabeth & Ann, born 10th June 1834 are working as domestic servants in Alston. Ann married Ralph Armstrong in 1861.
In 1861 living at Leadgate near Alston Joseph lead miner & farmer 57, (Margaret his wife had died in 1860) Joseph lead miner 29, Ann 26, Mary 22, Wm lead miner 19, Margaret 15, Aney E granddaughter 5. His son Henry is married to Sarah (Pearson married 1861) and they have a daughter Phoebe A. P. aged 1 year.
John married Catherine Spottiswood in 1863 and in the 1871 census is listed as a lead miner and farmer of 8 acres.

FATAL ACCIDENT AT STONECROFT

This (Tuesday) morning a fatal accident occurred to Mr Wright, engineer at the above mines. The deceased, who was about 50 years of age and has left a wife and family, accidentally fell down the shaft, and was killed on the spot. Dr Stainthorpe surgeon to the mine was in immediate attendance, but of course, his services were of no avail. An inquest will be held upon the body.

27th June 1866 (Hexham Courant)

SAD FATALITY AT STONECROFT MINES

On Wednesday afternoon, an inquest was held at the house of Mr Surtees publican, Newbrough, before L M Cockcroft Esq., coroner, on the body of John Wright, who was killed on Tuesday morning at the above mines. It appears that the deceased, who was employed as engineer, was being lowered steadily down the shaft by a man named William Potts, when a piece of wood, which had been placed above a perpendicular post to support some spouting which had been put up above the shaft, fell and struck the deceased, knocking him off the loop and precipitating him headlong down the shaft-death of course being instantaneous. Deceased struck the beam or woodwork on the bottom level with his head, and then rapidly turned over into a "sump", a pool ten fathoms deep. It is surmised that the deceased would be about 14 fathoms below the surface when struck by the wood, a glimpse of the wood being caught by the man Potts when four or five yards above the surface. The entire depth of the shaft is about 45 fathoms. The usual mode of ingress and egress is a rope and loop worked by a small crane, and in which the poor fellow was seated in the ordinary manner with both his legs through. William Lee, miner, who was on the bottom level when the accident occurred perceived something strike against the beam, and fall quickly into the water, but could not recognise what the object was. Afterwards saw the deceased's hat and the piece of wood floating on the surface. The body was grappled for and eventually recovered. The piece of wood was produced, which must have been fixed in a wet state, and the dry weather and the jerking of the ropes loosened it and caused the lamentable accident. No blame was attributed to anyone. The jury returned a verdict of "accidental death". Deceased who was about 47 years of age was a steady, careful man, and leaves a wife and family to lament his sad and untimely end.

The 1841 census shows John an Engineman living at Ryton with his wife Mary and son James 1.
In 1851, at Bar Moor, John Wright, Colliery Engine wright, aged 31, his wife Mary aged 33, children James 11, and Alice 1 year, all born at Ryton. In 1861, at Ryton, Mary Wright, married aged 43, son James, _____ clerk, aged 21, and Alice 11.
In 1871, at Bar Moor, Mary Wright, widow, aged 53, and her daughter Alice aged 21. Alice married Robert Young Batey.

The 1881 census has Robert a Coal fitter living with his family and his mother in law Mary, at Beech Cottage, Ryton: Robert Young Batey, aged 32, his wife Alice 31, Minnie 8, John Wright 5, Eva Alice 3, and mother in law Mary Wright, widow, aged 63.

Probate Records give: Letters of Administration of the personal estate and effects of John Wright late of Stonecroft in the county of Northumberland Engineer deceased who died 19th June 1866, at Stonecroft aforesaid were granted at Newcastle upon Tyne to Mary Wright of Stonecroft aforesaid Widow the Relict of the said deceased she having been first sworn.

SHOCKING AND FATAL ACCIDENT NEAR WEST AUCKLAND.

On Wednesday, an inquest was held at the Board, West Auckland, before Mr Thomas Dean, deputy coroner, on the body of Ann Caine, 48 years of age, wife Mr John Caine. Lead mining agent, of Melsonby, Yorkshire, who was killed the previous day under very melancholy circumstances. It appeared the deceased and her husband were driving home from St. John's Chapel Weardale, in a dogcart. After they passed West Auckland, on the road to Royal Oak, and near to Humberbeck, they were looking round on the surrounding scenery, when the reins became entangled with the animal's tail. Mr Caine immediately caught the reins, but he only got hold of one and his wife, in her fright, seized hold of him. The result was that the vehicle was drawn to the side of the road, and upset in the hedge side, and the occupants were both thrown out underneath the dogcart. Mrs Caine appeared to have gone over witness's head to the ground. He asked her if she was hurt, and she replied she had got a blow above the eye; but before he got her out she was unconscious, and never recovered from that state. This was about eleven o'clock, and she never rallied, but died two hours afterwards, after being conveyed to West Auckland, The jury returned a verdict in accordance with the above facts.

10th July 1866 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

6th CUMBERLAND (ALSTON) RIFLES.

On Friday week, the members of this corps enjoyed the annual treat provided for them by their respected Captain. They assembled in front of the Town Hall, Alston, at half-past 4 p.m., and, headed by their band, proceeded on the march to Lovelady Shield. On arriving there the Captain took the command, and in accordance with an invitation received from the assistant-surgeon to the corps they went to Nenthead, where they received a cordial welcome from Dr. and Mrs. Carson. Seats were arranged in front of the house, and an ample supply of refreshments was provided. This being the first visit of the Volunteers to Nenthead, their presence created no little stir amongst the large and closely-packed population of this village. Before leaving they fired a few rounds in volleys, with blank cartridge. On their return to Lovelady Shield they sat down to a most sumptuous supper, having the honour to be waited upon by the fair hands of the lady

visitors present. Ample justice having been done to the good things which had been provided for them, several games were heartily gone into—croquet, bowls, quoits, Aunt Sally, &c. Subsequently they were regaled with a good supply of punch, when several toasts were given and responded to. On the lawn in front of the house a tent had been pitched for the band, and during the evening to its enlivening strains the favourite dance formed not the least source of amusement to many present. The following were among the visitors present on the occasion : —H. P. Burns, Esq., Rey. J. and Mrs. Bowstead, Mrs. Carson, Miss Friend, Misses Dickinson, Spency Croft, Miss Milburn, Raise, &c. Before leaving, the volunteers mustered in front of the house, and gave three hearty cheers for Captain and Mrs. Dickinson, whose kindness and hospitality they have shared on so many occasions, and it was not till a late hour they reached Alston, highly delighted with their treat.

20th July 1866 (Carlisle Journal)
Deaths
At Shield Hill, Garrigill, on the 17th inst., Thomas Spark, aged 40 years.
In 1851, at Gate Head, Garrigill, John Hetherington, lead miner, aged 42, his wife Dorothy (Nee Vipond, married 13th January 1838, at St John, Garrigill) aged 31, children, William 12, Ann 11, Thomas 9, Dorothy 4, Hannah 2, and mother in law, Ann Vipond, farmers widow, aged 75.
Thomas Spark married Ann Hetherington, 23rd December 1860, at St John, Garrigill..
In 1861, at Shield Hill, Garrigill, Thomas Spark, lead ore miner, aged 35, and his wife Ann aged 20.
Ann Spark married Joseph Milburn, 3rd qtr., 1868, registered at Penrith.
In 1871, at Brook Street, Penrith, Joseph Milburn, shoe maker, aged 45, his wife Ann 30, step son, George Spark 7, step daughter Dorothy Ann Spark 5, and daughter Esther Milburn 1.

A YOUNG MAN SHOT DEAD BY HIS COMPANION

In Allendale. —A most melancholy gun accident occurred at Middlehope, a short distance from Allenheads on Thursday week, about seven o'clock in the evening. Three young men, each about eighteen years of age—namely, Christopher Stobbs, Thomas Noble, and John Ashman—met at the house of the parents of the first named, for the purpose of going out to shoot small birds. Stobbs was requested by the others to get his gun down and then let them have a few shots before dark. He immediately reached up to the joists near the fire, and while in the act of stepping down again with the gun in his hand, and unfortunately with the muzzle within a few inches of Noble a face, it unhappily went off, the contents going direct into his (Noble's) forehead near the right eye. The unfortunate young man fell to the floor and died almost instantly. It appears the gun, which is a very old one, had been charged and laid up some days before, but without any cap being put on, and not set at full cock, and the cause of it going off in such an unaccountable manner, and at such an unfortunate moment, seems to be quite a mystery. Deceased and Stobbs having been daily and faithful companions for many years, the feelings of the latter may be more easily imagined than described.

14th September 1866 (Carlisle Journal)
NENTHEAD NEW SCHOOL.—The London Lead Company having completed their new school at Nenthead, a magnificent building, at an enormous cost, have, with their usual liberality, given the teachers and scholars a trip to Silloth. It came off on Friday last under the superintendence of their worthy and respected teacher, Mr. John Heslop, who on every occasion evinces the utmost regard for the welfare of the children. The Nenthead Union Brass Band, under the efficient leadership of Mr. John Sanderson, accompanied the trip. Tea was provided by Mrs. Baxter, of the Albion Hotel, In a most sumptuous manner, and at a very moderate charge, and the hospitable way in which the whole of Mr. Baxter's family conducted themselves towards teachers and scholars was the theme of universal admiration, and for the future many a parent and guardian of the children of Nenthead will be most happy to make a call at the Albion Hotel. Very great credit is due to Mr. Millican, the newly appointed District Agent for Nenthead, for the admirable arrangements in getting horses and carts to take teachers and scholars, to the number of nearly four hundred, from Nenthead to Alston; and the way in which he exerted himself, mentally and bodily, for the enjoyment of all connected with the trip argues well for his future career and for the comfort of all connected with him.

Addison Robinson, aged 31, was buried at Nenthead, 27th December 1866.

11th January 1867 (Newcastle Courant)

NORTHUMBERLAND EPIPHANY SESSIONS

The court resumed its sitting on Friday morning, at the Moot Hall, in this town, before C. W. Orde, Esq., of Nunnykirk (chairman), and other magistrates.

ALLEGED RIOT AT BAYBRIDGE.

JOSEPH TRETHEWAY (30;) JAMES HUSBAND (22), JOHN BRAVEN (22), THOMAS CURTIS (21), WILLIAM TREWARTHA (21), BENNET TOY (25). JOHN SQUIRE (26), and WALTER ARSCOTT (29), all Cornish miners, were indicted for unlawfully and riotously assembling together with divers other persons to the number of twenty-five, to the disturbance of the public peace, and unlawfully and with force injuring and damaging a certain house, at the parish of Shotley, on the 17th of November last. Mr Bruce prosecuted; and Mr BLACKWELL, specially retained, instructed by Mr Taylor, solicitor, Hexham, defended all the prisoners. From the opening statement of the learned counsel it appeared that on Saturday evening, the 17th November, about half-past seven o'clock, a riot took place in a public house kept by Mr George Mawson, of Baybridge, near Blanchland. At the time there were only the landlord, some members of his family, and two men, named Murray and Wilkinson, in the house. After a time a party of 25 men went into the house. They partook of a quantity of ale, and then commenced being noisy arid breaking the glasses. On this the landlord refused to give them any more drink. The prisoner Squire spoke to Wilkinson about this time, and said, "We are the stronger party, and we will take the place," and the prisoner Toy said to Murray, " You had better go because there is going to be a row here." Upon this the row commenced, the glasses being broken, the windows, doors, fire-grate, chairs, and other articles smashed, and the, prosecutor, Murray, and Wilkinson, struck during the fracas. Matters assuming a serious aspect, Mr Mawson, his wife, and two daughters, took refuge in an upstairs room, and whilst there they heard the furniture being smashed downstairs. Near to the house there was a large heap of stones, to which some of the men resorted, and began to throw them through the various windows into the House, and on the disturbance being quelled, nearly a cartload of stones were taken up inside the house. Altogether damage done to the house was about £20. In the meantime the prosecutor's son went for the assistance of the police to Blanchland. The police, accompanied Thomas Mawson back to the public house, but he was no sooner observed than he was thrown down by the prisoners, but succeeded in taking refuge in one of the rooms. He afterwards escaped from the house, and went back to Blanchland, and having obtained assistance, he returned, and quelled the riot. After the prosecutor, Thomas Mawson, and P.O. Beaty had been examined, the counsel for the defence and prosecution and the Bench had a consultation, after which Mr BLACKWELL called Mr Josiah Renfry, who stated that he was the manager of the Derwent mines. He knew the prisoners, and their conduct had been good and orderly whilst employed at the mines. —Mr BLACKWELL thought the ends of justice would be satisfied if the prisoners withdrew their former pleas and pleaded "guilty", to the charge of assault, not however being rioters, and they could be discharged on their own recognizances to appear for judgment when called upon. He might state that the two men who had been out on bail had been to Cornwall and had come back to take their trial. — The prisoners then withdrew their plea of "not guilty" and pleaded "guilty"—The CHAIRMAN said the riot was a serious one, but there did not appear to have been any malignant spirit shown; it was more a drunken row than a. deliberate riot, and coupling that with the fact that the men had conducted themselves- well in the county, and that also with the exception of two men who had been out on bail, they had been in

prison for one month, the Bench were of opinion that the ends of justice would be met by releasing the prisoners on their own recognizances of £25 each, to keep the peace for six months, and to come up for judgment when called on. This concluded the business of the present Sessions,
In 1851, at the Miners Arms Inn, Baybridge, George Mawson, cartwright, aged, born Stanhope, 46, his wife Mary aged 46, born Stanhope, children Thomas, cartwright, aged 21, Mary 16, Isabella 12, Hannah 10, Margaret 7, Elizabeth 4, and Sarah Ann 1. In 1861, at Baybridge, George Mawson, innkeeper, aged 56, his wife Mary 56, children Mary, dressmaker, aged 26, Hannah, dairy maid, aged 20, Margarit, dressmaker, aged 17, Elizabeth 14, Sarah 11, grandson William Mawson Bell 1, lodgers Utrick Chelter, lead miner, aged 19, born West Allen, Matthew Bulman, lead miner aged 18, born Allendale, and Hugh Robinson, lead miner aged 21, born Allendale. In 1871, at Blanchland, George Mawson, innkeeper & cartwright, aged 66, his wife Mary 66, daughters Margaret 27, Elizabeth 24, grandchildren William M Bell 11, Agnes Walton 8, and Mary Mawson 6.

13th February 1867 (Hexham Courant)

FATAL ACCIDENT AT THE DERWENT MINES

On Friday last, an accident happened at the Derwent mines by which a man, named Errington Gibson, who resided at Readon, near Blanchland, lost his life. Deceased, with another person, worked in the forehead in a part of the mine known as Westgarth's shaft, but on the day named his fellow workman not arrived at the mine, he was thus employed by himself, and being blasting he got a shot ready to fire, which for some cause or another "fired in his hands." The unfortunate man was thrown to a distance of seven fathoms, and although some workmen in another part of the mine got to his assistance immediately, he was found quite lifeless, being most severely shattered. The body was removed to Jameson's mill, where an inquest was held on Monday, before Mr Favell, coroner, and a verdict of "Accidental death" was returned. Deceased, who was thirty-two years of age, has left a widow and three children.

Errington Gibson was born in Liverpool, the son of William and Mary Gibson, both originally from Alston, William was a Clog and Paten maker. In 1851 at Ellershope, Allendale William Gibson, Clog and paten maker, aged 41, his wife Mary 42, children William, lead miner, aged 20, Errington, lead miner, aged 17, Hannah 15, Mary 13, John 10, Jeffery 8, Ann E 4, and Jane 2. Errington Gibson married Elizabeth Bowman at Stanhope, 2nd quarter of 1856. In 1861, at Stanhope, Errington Gibson, lead miner, aged 27, his wife Elizabeth 23, children William 4 and Mary A. 1. The 1871 census gives – his widow Elizabeth aged 33; children, William 14; Mary Ann, 12; Isabella 8, and John E. 3; living in Newbiggin, Blanchland.

Elizabeth was the daughter of William and Isabella Bowman of Holyfield Burn, Stanhope, William was a lead smelter – roaster.

20th February 1867 (Hexham Courant)

27th February 1867 (Hexham Courant)
FATAL ACCIDENT AT STANHOPE LEAD MINES
On Wednesday, John Philipson, a miner, 37 years of age, whilst at work in the Stotsfield Burn mine, Stanhope, was killed under the following circumstances: - The deceased went to work at the usual time on the 19th inst., and shortly

after commencing a large quantity of earth and stones gave way, burying him in the rubbish. Although assistance was at once obtained, and every exertion used, it was 32 hours after the accident before the body could be recovered, on account of the immense quantity of earth, which had fallen upon him and around him. His body when got out was in a frightful condition, the arms and legs broken in several places, and his head cut open to the brain. Deceased was married, and leaves a wife and five children to lament his loss.

In 1841, at Bog House, John Philipson, lead miner, aged 35, his wife Mary (Lee, married 13th June 1829, St Peter, Allenheads) aged 30 children John 10, Ann 7, George 4, Mary 2, and Hannah 2 months.

In 1851, at Shorney know, Allendale, John Philipson, farmer of 30 acres, aged 49, his wife Mary 43 children John, Ag. Labourer, aged 20, Ann 17, George 15, Mary 12, Hannah 10, and Thompson 7.

In 1861 at Lott Head, Swinhope, Allendale, John Philipson, lead miner, aged 30, his wife Elizabeth (Whitfield, married 28th June 1860, St Peter, Allenheads) aged 30, children Mary A. 8, John 7 months, his brother Thompson Philipson, excavator, aged 17, and house servant Mathilda Reed, aged 14.

In 1871, at Lotment Head, Allendale, Elizabeth Philipson, widow, farmer, aged 40, children, John, 10, George 8, Margaret 6, and Elizabeth 4.

2nd March 1867 (Westmorland Gazette)

SHOCKING ACCIDENT TO A MINER. —A serious accident happened early on Wednesday morning last to a miner of the name of Johns, who was at work in the Staveley Head lead mine. The unfortunate man and another were alone in the level together and had drilled a hole in the forehead of the rock, intending to blast. From some cause other the charge of cotton got fixed before it reached the bottom of the hole, and the man, after trying to punch it in with the proper wooden instrument, unfortunately took up the iron stamping rod to thrust with. It appears that the iron struck a spark from the rock and instantly the powder exploded, tearing down as much rock as if the blast had been property finished. The workman's left hand was torn from his arm and scattered in pieces over the working; the iron bar which he had in his hand was thrown five or six fathoms and broken into three pieces. It seems almost miraculous that the man escaped alive. The other workman had, just the moment before the explosion, been standing at the hole, which he left to get something necessary for completing the work, and thus escaped without a scratch. The injured man was slightly scarred over the face and breast, and received a deep cut on the right arm. Mr. Dobson, of Bowness, was sent for immediately and amputated the arm above the wound, and we understand the poor fellow is progressing favourably. We are sorry to add that he has large family of young children depending upon him.

6th March 1867 (Hexham Courant)

Births

At Wincanton, Somerset, 28th inst, the wife of Thomas Sopwith jun., of Linacres, Spain, of a daughter.

LEAD MINE SHARES FOR SALE
TO be SOLD, by AUCTION, at the House of Mr Greenwell, Black Bull Inn, ALSTON, Cumberland, on SATURDAY, May 1867, at Three o'clock in the

Afternoon precisely, seven (13ths) SHARES of DOWPOT SYKE MINE, in the MANOR of ALSTON, county of Cumberland, and two (100ths) SHARES of GREENHURTH MINE, also near Alston.
The Dowpot Syke Mine from which there is now being raised a considerable quantity of Lead Ore, is situate about One and a Half Miles from the Town of Alston aforesaid, close to the main road leading to Alston, and in a rich part of the district for Lead Ore. The sett joins Hudgill Burn, which was the richest Mine in Alston Moor, and lies between Holyfield and Guttergill Mines, both of which have been very productive and paid good dividends.
Further particulars may be known on application to Mr Peart, Mining Agent, Alston, who will show the Mines; or to Mr Forster, Solicitor, Brampton.

FATAL ACCIDENT AT AN IRONSTONE MINE IN WEARDALE.
An accident which was attended by instant death occurred on Thursday morning at West Slit, Ironstone Mine, in Weardale to a man named John Race about 56 years of age. Deceased was in the act of preparing a shot in the mine, when for some cause or other a large quantity of rubbish and stone fell from the top before the shot exploded burying him. When dug out he was dead.
Deaths
At Brooke Cottage, Rookhope, 15th inst. aged 70, Margaret wife of Mr John Bowman.
In 1851, at Linzgarth, John Bowman, roaster of lead ore, aged 52, wife Margaret 54, children Whitfield, lead miner, aged 31, Mary, dress maker, aged

20, Susan 10, Jane E. 12, and Ann 10. In 1861, at Brook Cottage, John Bowman, roaster of lead ore, aged 62, children Jane E., house maid, aged 23, Whitfield, iron stone miner, aged 41, Ann, house maid, aged 21, Margaret Bowman 6 years. At the time of the census Margaret, was staying with her unmarried niece Hannah Bell, dressmaker, aged 27, at Roughside.

In 1871, at Sunnyside, Nenthead, Sarah Richardson, widow, aged 66, and visitor, Elizabeth Bell, married, aged 66.
At Nenthead, on the 26th ult., Thomas Liverick, aged 39 years.
See 9th June 1848

5th July 1867 (Newcastle Daily Chronicle)
ALLEGED FELLONY AT ALLENDALE
Four young men, named JOHN COULTHARD, JOHN WALTON, JOHN ACKWORTH, and ROBERT PEART, were indicted for having stolen, at Allendale, on the 21st of June, about 24 canes and 18 walking sticks, the property of Jacob Blacklock. Mr. Greenhow, instructed by Mr. Pattinson, was for the prosecution, and Mr. Blackwell, instructed by Mr. Wm. Taylor, was for the defence. The prosecutor is a hawker living at Nenthead and on the 21st ult. he had a stall at Allendale, on the occasion of the half-yearly pay, and amongst the articles he exhibited for sale were canes and oak sticks. In the evening the unsold goods were packed in Blacklock's cart, but on arriving at Nenthead two bundles, containing 24 fancy canes and 18 oak walking sticks, ware missed. The prisoners were afterwards found in possession of three canes and three sticks, which the prosecutor said were part of the stolen property. —Mr. Blackwell said he thought this was a policeman's case, and he had no doubt that the jury would come to the same conclusion. He also contended that the sticks had not been dearly identified, because as he pointed out, one of them appeared to have been in use for some time. —The jury found the prisoners not guilty, and they were discharged.

16th July 1867 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Deaths
At Dufton, on the 1st inst., Mr George Liddle, miner, aged 69 years.

In 1841, at Dufton, George Liddle, lead miner, aged 40, his wife Mary (Bowman, married 3rd July 1830, at Dufton) aged 35, children, Mary 10, Elizabeth 8, George 6, Joshua 4, Thomas 2, and William 2 months.
Mary Liddle was buried at Dufton, 21st June 1858, aged 53.
In 1861, at Dufton village, George Liddle, widower, lead ore miner, aged 63, sons Thomas, lead ore miner, aged 22, and Christopher, lead ore miner, aged 16.
At Knock, on the 7th inst., Mr Henry Cherry, miner, aged 53 years.
In 1861, at Knock, Henry Cherry, lead miner, aged 46, born Brough, his wife Esther (Fleming, married 22nd January 1861, at Dufton, daughter of William Fleming) aged 33, and daughter Ann 20.
Esther Fleming married Matthew Richardson, 24th December 1868, at Dufton.
Esther Richardson, was buried 13th April 1870, aged 42, at Dufton.

17th July 1867 (Hexham Courant)
Deaths
At Jeffries Rake, 4th inst. aged 71, Mr Robert Currey.
In 1841, at Boltshope Mill, Hunstanworth, Robert Currey, lead miner, aged 40, William Currey 15, Robert Currey 15, Mary Currey 14, John Currey 11, Matthew Currey 9, Cicily Currey 7, Ann Currey 5, Hannah Currey 3, and Joseph Currey 1.
In1851, at Roughside, Edmondbyers, Robert Currey, widow, butcher, born Shotley, Northumberland, son John Curry, lead miner, aged 22, daughters, Cicily 17, Hannah 13, and son Joseph 11.
In 1861, at Wood House, Espershield, Robert Currey, Ag. labourer, aged 65, daughter Hannah Currey 23, son Joseph, lead miner, aged 21, and granddaughter, Mildred Currey 10 months.

19th July 1867 (Carlisle Journal)
Deaths
At the Workhouse, Alston, on the 13th inst., John Davidson, aged 69 years.
At the Workhouse, Alston, on the 15th Mary Thompson, aged 29 years.

22nd July 1867 (Newcastle Daily Chronicle)
VISIT OF THE SALMON FISHERIES INSPECTORS TO TEESDALE.
On Saturday, Messrs. Frank Buckland and Spencer Walpole visited the lead mines In Teesdale. Mr. Joseph Dodds (the respected under sheriff of the county of Durham), as on the previous day, acted as pioneer and director of the movements of the party. The first point visited was
WIREGILL
The rich lead, mines in which discharge their "hush" into a brook that meets the Tees a little blow Middleton. The mine is leased by the London Lead Company, whose manager, Mr. R. W. Bainbridge, with his sons, Messrs. Henry and Charles Bainbridge, had made arrangements to accompany the inspectors and party over the principal mines of the company in Teesdale. The party having been joined by Mr. Wm. Lee, overman of the underground department of the Wiregill mine; Mr. Jacob Redshaw, washing agent of the company; and Mr. Joseph Pattinson, mining agent in the underground department, proceeded to inspect the crushing mill, and afterwards the machinery performing the operations of "plunging," "hodging," and washing,

An adjournment was then made to the "settling pits," which extract the lead from the water after it has done its work in the other departments of the above ground operations of the mine. At this mine, which is one of the richest in the possession of the company, there are three sets of settling pits, through which the water, or "hush," passes in succession, and as a proof that they do that work efficiently, Mr. Bainbridge informed the inspectors that from experiments made it was found that the "hush" in the first series of pits possessed 5 per cent, of lead, in the second only 2 per cent, and In the last this was reduced to the small proportion of ¼ per cent. After selecting samples of the water and sediment, the Inspectors partook of refreshments in one of the buildings appertaining to the mine, after which the inspection was brought to a close. According to the programme prepared by the directors of the tour of inspection, it was determined that one party should cross the hills to the Coldberry mines, while the other visited the Newbiggin and Pikelaw mines. For this purpose, a party of fourteen was told off. Including Mr. S. Walpole. Mr. R. W. Bainbridge. Colonel Scurfield Mr. Joe. W. Pease, M.P., and Mr. H. Bolam (agent to the Duke of Cleveland). Bidding good-bye to their fellow-tourists for a time, they proceeded on their mission of inspection.

THE COLDBERRY MINES

These mines arc situated on a shoulder of the Pikelaw ridge, and derive their water supply, an indispensable adjunct to lead mining, from reservoirs formed near the top of the fell. The operations are carried on both by hand labour and by machinery, at several parte of the hill, the water descending from the reservoirs visiting the various places where the "plunging," "hodging," and washing processes were being performed, and passing through various sets of "settling" pits until it was finally discharged into an immense reservoir close to the burn, into which the "hush" is turned at stated periods by means of a dam, after bring allowed ample time to settle. The proportion of lead found in this tank has about the same proportion—¼ per cent, as at the Wiregill Colliery pits. At both of these places the inspectors recommended the erection of another series of "settling" pits as likely to further purify the "Hush" before it was finally discharged into the neighbouring burns The party afterwards ascended to the mouth of the mine, inspecting the various modes of separating the mineral on their route. At the entrance to the mine is the crushing machine, through which the blocks of ore are passed before the washing operation is gone through. The process Is performed by a machine which was first invented in America, for the purpose of crushing stones for road making, and known as Blake's a machine. A similar apparatus is in operation at tie Wiregill mines. The work above ground at both of these place is done by lads, who with the miners reside at Middleton, and have consequently, in some instances, four or five miles to walk over mountain roads to their work. Carriages being in waiting for the party, the road along the northern shoulder of the fell to Middleton was taken, this point being reached at a little past one o'clock. The party afterwards made their way to the High Force. The second party, headed by Mr. Frank Buckland, and having Mr. Dodds as director and pioneer, proceeded in the conveyances to Newbiggin, and afterwards to the mine bearing that name, and situated on the southern slopes of Pikelaw.

NEWBIGGEN MINE.

This mine is the property of Messrs. Wilson and Crawhall. The work is performed by hand labour, and is not so extensive as the operations at Coldberry, on the opposite face of the ridge. The ore is obtained from the lode by means of a burn which, descending as it does from-a higher altitude, is dammed up until a sufficient weight of water is obtained, and is then turned loose down the sides— of the hill, when It lays bare the ore beneath the surface. The separating process is performed by "cradling." after leaving which the "hush" is transferred into a series of settling pits, from which it passes to the Tees at the foot of the fell near the village of Newbiggin. Before leaving this point. Mr. Jos. Dodds handed round a letter he had received from the secretary of the Severn Board of Conservators, which enclosed plans showing a superior mode of filtering to be obtained by means of catch-pits provided with gravel and charcoal. Mr. Buckland asked whether the system of forcing upwards the "hush" when separating the lead, by means of a force-pump, might not be adopted with advantage.

PIKELAW MINE

This mine, which is also known in the neighbourhood as Collinson's Hush, from its owner. Is situated in a ravine (formed by "washing") near the top of Pikelaw. This was the last place to be visited after leaving the Newbiggin. The work Is done be hand labour, and consists of laying the vein bare by flushing with water, and then gathering the ore by hand picking, and afterwards submitting it to the process of washing as in other places; the “hush,” alter leaving the settling pits, running down the side of the fell to the Tees, as in the case of it neighbour at Newbiggin. No particular recommendations were publicly made at either of these mines beyond the exercise of the utmost care in providing settling pits and keeping them in a thoroughly efficient state.

The whole party, on concluding their labours for the day, partook of dinner at the High Force Hotel, Colonel Scurfield occupying the chair, while Mr. Henry Pease officiated as vice-chairman. The company subsequently returned to Darlington, thence to Darlington and Durham, which the inspectors reached about ten o’clock, thus closing their tour of inspection of the lead mines of Weardale and Teesdale.

23rd July 1867 (Cumberland Pacquet and Ware’s Whitehaven Advertiser)
Deaths

At Shield Hill, Garrigill, on the 9th instant, William Herdman, aged 70 years.

In 1841, at Shield Hill, Garrigill, William Herdman, lead miner, aged 45, his wife Isabella 45, Children, Thomas, lead miner, aged 20, William lead miner, aged 15, Ann 13, and Joseph 9.

Thomas Herdman married Hannah Bell, 26th February 1843, at St John, Garrigill.

In 1851, at Middle Houses, Garrigill, William Herdman, lead miner, aged 54,born Allendale, his wife Isabella 55, born Alston, children, William, lead miner, aged 28, Friend, lead miner, aged 25, Joseph lead miner, aged 19. Also at Middle Houses, Thomas Herdman, lead miner, aged 30, his wife Hannah 26, children, Ann 6, Isabella 4, and Mary 2.

In 1861, at Shield Hill, William Herdman, lead miner, aged 64, his wife Isabella 69, children, Friend, lead miner, aged 35, and servant Elizabeth Carr, house servant, aged 27. At Middle Houses, Thomas Herdman, lead miner, aged 39,

his wife Hannah 36, children, Mary 12, Friend 9, Thomas 7, Elizabeth 5, Lewis J 2, and Margaret Z 1 month.

Elizabeth Bell was buried, 24th April 1879, aged 65, at Garrigill.

14th August 1867 (Hexham Courant)
MINE ACCIDENT AT ALLENHEADS
A serious accident occurred on Thursday last at the above named place to a young man named Christopher Ashman, Somerset Cottages, under the following somewhat peculiar circumstances: - It appears he had been about to fire two holes together at one heading, and was using Saltpetre matches which were slightly damp. After igniting the first hole he turned round and endeavoured to light the other, which, however, would not burn; necessitating him to nip the first one out again, which it would seem he had not thoroughly done, for whilst he was preparing another match the hole exploded without the slightest warning, and when it is considered that the unfortunate man was standing close to the heading and the hole threw all her work, it seems a perfect mystery how he was spared with his life. His hip, left side and arm are all severely bruised and burnt, and although his sufferings are still very great, it is hoped that he may survive.
In 1851, at Pry House, Allendale, John Ashman, lead miner, aged 27, sister Frances 24, brothers, Thomas lead miner, aged 22, and Christopher, lead miner, aged 19.

In 1861, at Middlehope, Allendale, John Ashman, lead mine inspector, aged 37, brother Christopher, lead miner, aged 29, sister Frances, housekeeper, aged 34. Frances married Thomas Varty, 2nd quarter of 1864.
In 1871, at Allenheads, John Ashman, mine inspector, John a Mine inspector, his wife Barbara (Prest, married 2nd quarter of 1866) aged 39, brother Christopher, lead miner, aged 39, and domestic servant, Hannah Reed, aged 15. In 1881, at West End, Allendale, Mary Pearson, widow, dressmaker, aged 40, children Jane 13, Liddle 11, Joseph 8, and boarder, Christopher Ashman, lead miner, aged 49 (Christopher died 18th January 1882).

21st August 1867 (Hexham Courant)

SUDDEN DEATH AT WEST ALLENDALE

On Friday at Dryburn, West Allendale, Rachael, wife of Ridley Robinson, died very suddenly of heart disease. Deceased had occasion to go into a neighbour's house to look after some of her children when she fell down and died so suddenly that before Mr Montgomery, surgeon could arrive life was quite extinct. She was 39 years of age and leaves five very young and helpless children.
In 1861, at High House, Ninebanks, Ridley Robinson, master shoemaker, aged 33, his wife Rachael (Keenleyside, married 22nd April 1854, at Ninebanks) aged 33, children Rachael 5, Mary Ann 3, and Jane 1.
In 1871, at Ninebanks, Ridley Robinson, widow, shoemaker, master employing 3 men and 1 boy, 43, children Rachel 15, Mary A 13, Sarah 9, Jane 6, Matthew 4, and housekeeper, Mary Wilkinson, aged 45.

28th August 1867 (Hexham Courant)

At Catton, 10th inst, aged 26 Hannah wife of Thomas Milburn, miner.

In 1861, at Catton, Thomas Millburn, lead ore miner, aged 26, his wife Hannah (Craig, married 4th quarter of 1859) aged 19, and daughter Elizabeth 1. In 1871, at Newbrough, Thomas Milburn, lead ore miner, aged 36, his wife Isabella (Scott, married 4th quarter of 1870) aged 35, daughters Elizabeth 11, and Jane A. 8 years.

18th October 1867 (Durham County Advertiser)

FATAL ACCIDENT IN A LEAD MINE.

An accident which terminated fatally occurred on Tuesday in one of Captain Beaumont's lead mines. A man named John Hodgson, 45 years of age, engaged at the Burtree Pasture Lead Mine, was preparing a shot, when it exploded, injuring so seriously that he only lived about half an hour, dying before medical assistance could be obtained. The deceased belonged to St John's Chapel.

In 1851, at Wearhead, St John, Stanhope, John Hodgson, lead miner, aged 31, his wife Esther (Smith, married 3rd quarter 1844, registered at Weardale), aged 31, children, William 5, Phebe 4, and Ann 1.

Esther Hodgson died 3rd quarter 1855, registered at Weardale.

In 1861, at Wearhead, St John, Stanhope, John Hodgson, widow, lead miner, aged 41, children, William lead miner, aged 15, Pheobe 14, Ann 11, Robert 9, and John 6.

In 1871, at Stanhope, John Philipson, lead miner, aged 25, born Allendale, his wife Ann aged 21, son John William aged 2 months, and boarder John Hodgson, lead miner, aged 16.

In 1871, at Wearhead, William Hodgson, lead miner, aged 26, sister Phebe 25, and brother Robert, lead miner, aged 8.

30th October 1867 (Hexham Courant)

ON FRIDAY, A SERIOUS ACCIDENT happened to a girl named Mary Nattrass at Daddry Shield, Weardale. Whilst engaged trimming a lamp she accidentally set fire to the oil or naphtha with which it was charged and a terrific explosion resulted. The poor girl was severely burnt about the face and body, and it is feared that her sight is permanently injured by the catastrophe.

FATAL ACCIDENT NEAR STANHOPE.

On Thursday last a frightful accident, which has since terminated fatally occurred to Percival Maddison, an ironstone miner, at Reed Shaft, near Stanhope. The unfortunate man in the course of his duties was ascending the shaft of the man when by some means or other his leg was caught by the gearing, and laid open from thigh to ankle. He was at once taken to Brandon Walls, near Rookhope where medical attendance was procured, but mortification set in, and resulted in his death on Saturday night.

The incident occurred at Stanhope Burn Ironstone mine, whilst riding in the cage ascending to leave the mine Percival was sitting with his knee over the edge of the cage, and it was when they approached the top his leg was severely torn. Evidence at the inquest indicated that he was taken to Dr Arnison at Stanhope, and then transferred to his home at Brandon Walls.

Hannah Ward was buried 21st July 1856, aged 41, at Garrigill.
In 1861, at Ashgill Side, Thomas Ward, widower, lead miner, aged 52, children, Jane, house keeper, aged 17, Hannah 12, Thomas 7, and Sarah 5.

13th November 1867 (Teesdale Mercury)

MIDDLETON IN TEESDALE.

On Friday night, the 1st inst., an interesting gathering took place at the Cross Keys Inn, the occasion being the presentation of a Testimonial to Mr. John Thompson, late secretary to the Middleton Corn Society, on his retirement from its successful management for upwards of 19 years. A substantial supper was served up by Mrs. Raine, in her usual excellent style, and after the cloth was withdrawn, R. W. Bainbridge, Esq., presided, and proved the usual loyal toasts which were drunk with all the honours. He then proposed the Bishop and Clergy and Ministers of other denominations. John Makens, Esq., vice chairman, proposed the Army, Navy, and Volunteers, coupling there with the name of Captain Bainbridge. In speaking of the past history of the British Army and Navy, and the noble deeds of valour they had performed, he said that the Volunteers he had no doubt would if called upon by circumstances show themselves equal to any emergency. Captain Bainbridge in responding observed the history of the volunteers was in the future, and that every man would, he believed, be found ready to do his duty in defending the shores of Old England, and our happy hearths and homes. The Chairman then gave the toast of the evening, in a speech of some length, in which he traced the history of the Advance Money system of the London Lead Company in the relation to the wants of the times, and the prices of provisions, shewing the kindly efforts of the late Robert Stagg, Esq., in raising the workmen's advance money from twenty to forty shillings per month; in order to enable the workmen to approach nearer to the ready-money system of trade, instead of the damaging long credit principle which had previously prevailed, and had left poor families in the hands of tradespeople and which operated equally against the interests of the latter in creating a long list of bad debts. He then alluded to the Middleton Corn Association, and the part the Lead Company had taken in a time of great distress, in providing sound foreign grain at cost price for their Workmen. This gave rise to the idea amongst the working men of an association for supplying themselves with good breadstuffs at the lowest possible prices, for this purpose a granary was built in 1841, at a cost of £200, towards which the Lead Company contributed £100, and advanced to each workman who chose

to become a member a sum sufficient to pay his entrance fee, and thus place the manager in a position to buy their first monthly grain with ready cash, and give the society a fair start. The association, however, had languished from various causes, amongst which might be reckoned the mistaken notion that because the dealers soon began to sell only a fraction higher than the Corn Association that the latter was doing no good; forgetting that the association was the very means of bringing down the markets, and thus benefiting the whole neighbourhood. About the year 1848, Mr John Thompson was chosen to undertake the management of the Society, which was upwards of £400 in debt, and through his steady and persevering efforts its affairs soon began to look up, and confidence was restored; the members were supplied with flour at 3d per stone on an average below the local prices. The society had now capital account amounting to £1133, and about £200 of the above debt had been recovered; and the late manager, on his retirement from his official connection with the association, had handed over his books without the society incurring the loss of a single penny during his long term of office. Whatever debt had been incurred by poor members, Thompson had taken the burthen upon himself, having kindly given credit to individuals in cases of necessity upon his own responsibility. The Chairman then alluded in terms of the highest praise to the upright, manly character of Mr Thompson, remarking that he had ample opportunities of observing and knowing him since his connection with the Corn Society. So much had he been impressed with his character, that he was only deterred from making him an overlooker in the Lead Company's mines from the thought that the loss to the Society would be but equal to the Company's gain, and his place not so easily filled at the time. It gave him great pleasure to present to Mr Thompson the testimonial which had been so generously subscribed to by his fellow townsmen and others, as a mark of the high respect in which he was held by them. The Testimonial consisted of Benson's Commentary on the Holy Scriptures, in six handsomely-bound volumes, and a purse containing thirty sovereigns. As Mr Thompson has long been a consistent member of the Wesleyan Society, the above commentary by an esteemed Wesleyan minister was peculiarly appropriate. The presentation was made amidst the hearty applause of the large company, and the Chairman concluded his speech by proposing health and long life to Mr Thompson. Mr Thompson rose, and in a most feeling manner expressed his thanks for that kind and hearty acknowledgment of his efforts to serve his fellow townsmen. It had been to him a matter of deep concern to take in hand the Society's affairs but he had determined from the first to do his duty, and being well and promptly supported by the committee he had been enabled to bring their affairs into a satisfactory state. He thanked the Giver of all good that until two years ago he had enjoyed unbroken health, having during seventeen years been personally able to discharge every duty devolving upon him, but during the last two years his health had failed, and he had been obliged to give up his office as secretary to the Corn Association. When his life seemed to hang in the balance he instructed his friends, in case of his death, to see that his books were properly done-up, and every penny due to the society paid. However, it had pleased God to restore him to a measure of health, and he had the satisfaction to wind up his own affaire, and to the best of his knowledge he had made all straight and satisfactory, although, in so doing, he had to make sacrifices, but be believed that "he that giveth to the

poor lendeth to the Lord." He was resolved to carry out the principles inculcated in the blessed Book with which he had been kindly presented; he considered it, with one exception, the greatest boon that had been given by God to man. He begged heartily to thank his friends for their kindness, which he would ever gratefully remember, and hoped that following the gracious directions given in those sacred volumes, they might all meet to realise its promised blessings in a better world. Mr Jacob Readshaw, jun., in an appropriate speech, proposed the next toast—" Success to the London Lead Company in all their enterprises, and thanks for all past kindnesses, especially shown in times of distress, and for their hearty co-operation in every effort made for the mental, moral, and religious improvement of the inhabitants." Capt. Bainbridge gave "the Committee of Management of the Corn Association," to which Mr John French responded. Mr W. Lee proposed the health of corn buyers of the present and past times, which was responded to by Mr A. Lowes. The health of Mr Wren, of Stockton, with whom the association had dealt with upwards of 19 years was next drunk. "The host and hostess," was then given in graceful terms by Mr C. E. Bainbridge, and the "health of the chairman and vice- chairman" having been severally proposed and acknowledged, the proceedings terminated.

26th November 1867 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Deaths
At Alston, on the 18th inst., Elizabeth Kindred, aged 78 years.
John Kindred married Elizabeth Pattinson 13th July 1811, at St Augustine's, Alston.

3rd December 1867 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
PRESENTATION.—A large and respectable company met in the Garrigill School Room on the 22nd ult., as to witness the presentation of a purse of gold to Mrs. Wallace, as a testimonial of the respect which she had gained from numerous friends during the long period she taught school at the village of Garrigill. Her very advanced age being in her 84th the year, and her increasing infirmities having rendered it necessary for her to relinquish her duties, it was thought only right that some public acknowledgment of her services should be made. Mr. Shaw, of Shield Hill, and Mr. Moffatt, of Crossgill, took the matter up, and by their praiseworthy efforts a substantial sum was soon realised. The purse itself, which was made and presented by Miss Watson, of Crossgill, is a beautiful specimen of artistic skill. in On one side of it, on a yellow floss silk ground, a neat device of flowers is presented; and, on the reverse, the following inscription is embroidered on a green floss silk ground:—"Presented to Mrs. Ann Wallace, by her friends, for her valuable services as schoolmistress at Garrigill, for upwards of 39 years. Nov. 22nd, 1867." In the afternoon, the old lady and her scholars, headed by the Garrigill brass band, playing 'See the Conquering Hero Comes," walked in procession from her house to the school-room, where, by the kindness of Mrs. Shaw they were plentifully regaled with tea. The tables were profusely supplied with plum cake, seed loaf, tea cakes, tartlets, biscuits, &c. The attentions of Mrs. Moffatt and Miss Shaw to the little folks were unremitting, and ample justice was done to the good cheer provided. After tea the public were admitted, and the schoolroom was speedily packed in every part. Mr. Shaw was called to the chair, and Mr. Dent to the vice-chair, and the latter having opened the meeting by a few appropriate remarks, Mr. Shaw then, in a neat and concise speech, presented the testimonial to Mrs. Wallace, who replied in a very touching and feeling manner, by thanking Mr. Shaw, Mr. Moffatt, the band, the public, and everybody, having special reference also to the hand of Providence in guiding her through life. Very able and eloquent addresses were afterwards given by Messrs. R. Richardson, J. Irving, and J. Henderson. During the proceedings the band discoursed some their choicest music in their best style, and both speeches and music elicited the applause of the audience. The usual formalities having been gone through, the company separated, highly pleased with the evening's entertainment.

6th December 1867 (Carlisle Journal)
Marriages
At the Primitive Methodist Chapel, Alston, on the 5th inst., by the Rev. G. Hutchinson, Mr Matthew Stephenson of Nenthead, to Miss Elizabeth Scott, Blagill.

FATAL ACCIDENT IN A LEAD MINE

An accident happened in a lead mine at Nenthead near Alston, on 16th inst., which has caused the death of a man named George Hutchinson, 51 years of age. The deceased was engaged stopping up a hole, charged with powder, when unfortunately, the powder exploded. He sustained severe injuries on his head and various parts of his body, and he died Wednesday.

See 25th February 1843, 25th December 1867, 7th August 1880, and 31st December 1887.

Deaths

At Weardale, at West Black Dean, 10th inst. aged 24, Mr Thomas Peadon.

In 1861, at West Black Dean, John Peadon, lead miner, aged 47, wife Adah 43, children Thomas 17, Pheobe 10, and servant Adah Walton, aged 14.

ALLENHEADS

Two young men named Joseph McMillan and Christopher Short, in good employment at the lead mines, left this place quietly a few days since, and have written to their parents that they are on board ship at Liverpool bound for North America. The motive of this voyage is a mystery.

Thomas Short married Jane Rodham, 31st May 1823, at St Peter, Allenheads, Thomas died between 1841 & 1851.

In 1841, at Dirt Pot Shield, Thomas Short, lead miner, aged 40, his wife Jane 35, children Mary 17, Hannah 15, Nicholas, lead ore dresser, aged 13, Thomas, lead ore dresser, aged 11, John, lead ore dresser, aged 9, Jane 7, Ann 4, and Isaac 1. In 1851, at Dirt Pot Shield, Allendale, Jane Short, lead miners widow, aged 48, children, Thomas, lead miner, aged 21, Ann 14, Christopher 8, and Roddam 4. In 1861, at Allendale, Jane Short, miners widow, aged 58, children Ann 23, Christopher, lead miner, aged 18, Roddam, lead ore washer, aged 14, and granddaughter Mary 3 years. Jane snr., died 4th quarter of 1869.

In 1871, at Rose Hill, Allendale, Roddam Short, lead miner, aged 24, his sister Jane 37, and niece Mary Short 13.

John McMillan married Mary Whaly, 4th June 1842, at St Peter, Allenheads.
In 1851, at Kids House, Allendale, John McMillan, Ag. Labourer, aged 33, his wife Mary 32, children Ann 8, John 6, Joseph 4, and Hugh 1.
In 1861, at Kidds House, Allendale, John Mc Millan, jobbing surface labourer, aged 43, his wife Mary 42, children Ann 18, John, enginewright, aged 16, Joseph, jobbing surface labourer, aged 14, Hugh 11, George 8, and Thomas aged 4.
Mary died 4th quarter of 1865
In 1871, at Allenheads, John Macmillan, widow, labourer for lead mines, aged 53, sons, George, joiner, aged 18, and Thomas aged 14.

STONECROFT AND GREYSIDE MINES

On Wednesday last, honours were done to the festive season by the Stonecroft and Greyside Lead Mine Company giving all the boys (about 100) employed by them at the dressing floors &c., a bountiful supply of the good old English fare, roast beef and plum pudding; and if one was to judge from the manner in which the juveniles acquitted themselves in the disposal of the good things, he certainly would say they highly enjoyed themselves. Dinner being over amusements were entered into and oranges were distributed.

SEASONABLE BENEVOLENCE

On New Years Day, all the widows of Nenthead, to the number 63, were invited by Tinniswood Millican, Esq. to take tea together which he provided for them, in a room fitted for the occasion. The tea was of a first rate quality, and the tables graced with a great variety of rich cake, which was quite an unusual treat to many of the recipients. The trays were presided over by the following ladies, Mrs Millican and Mrs Walton, Nenthead House; Miss Teasdale and Miss Cail, West Nenthead; Mrs Dalton and Miss Dalton, Foulard House; and Mrs Walton of Donks Villa. Those of the widows, who could not attend through old age and infirmity, and also several poor people, had a liberal supply sent to their homes and all who were present were quite cheerful and thoroughly enjoyed themselves, and at the close wished their generous donor and family long life and happiness, not forgetting the ladies for their kind attention.

Deaths

At Alston, 23rd ult. aged 63, William Latimer.
In 1861, at the Butts Alston, William Lattimer, unmarried, Cartman, aged 57.
At West Nenthead, 23rd ult. aged 24, Sarah Ann Ward.
See 29th September 1863, & 24th May 1884.

11th January 1868 (Hexham Herald)

Deaths

At Nenthead, 27th ult. aged 54 years, Frances wife of Mr Robert Nicholson.
In 1841, at Nentsbury, Robert Nicholson, lead miner, aged 28, and his wife Frances (Stephenson, married 4th March 1841, at Alston) aged 27.
In 1851 Robert Nicholson lead miner aged 38, living at Nenthall with his wife Frances 37, and children Ann 8, John 7, Joseph 4, Mary 2.
In 1861 living at Strellas, Nenthead, Robert Nicholson lead miner aged 48, with his wife Frances aged 47, John lead miner 17, Joseph lead miner 15, Mary 12, and Thomas 8. In 1871, at Pasture House, Nenthead, Robert

Nicholson, widow, lead miner, aged 58, children, John, lead miner, aged 27, Mary 22, and Tom, draper & grocer, aged 17.
See 29th May 1869, 4th May 1872, 15th November 1873, and 21st April 1883.

NENTHEAD

MINING PAY. Some of the men employed by the London Lead Company, have had upwards of £100 to draw at the annual "pays" which commenced here on Wednesday. There were men who had a "lucky" season; generally, the miners as usual had very small sums to get. A little liberty is always taken at this season and on the present occasion it has resulted in a few brawls. Nothing serious has however occurred and the tradesmen drive a profitable business.

8th February 1868 (Hexham Courant)
Marriages
At St Peter's Church, Allendale, 5th inst, Mr Wm J Walton, East Woodburn, Reedswater, to Mary youngest daughter of Mr Wm Walton agent, Allenheads smelt mills.

Marriages
At Nenthead by special license by the Rev H Robinson, Mr Nicholas Harrison now of Weardale to Mrs Phoebe Emerson of Nenthead late of Weardale.
In 1871, at Wearhead, Nicholas Harrison, retired farmer, aged 78 and his wife Phoebe aged 70.

18th February 1868 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Deaths
At the workhouse, Alston, 6th inst., Hannah Vipond, aged 68 years.
Daughter of Thomas Vipond and Frances Emerson, born 29th January 1800.
At Nenthead, 7th inst., Catherine Toppin, aged 80 years.
In 1851, at Catton, Catherine Toppin, aged 63, son William, joiner, aged 41, and granddaughter, Ann Toppin 3.
In 1861, at Bankfoot, Nenthead, Catherine Toppin, born Allendale, housekeeper, aged 73, son William, joiner aged 51, and granddaughter Ann Toppin aged 13.
At Alston, 9th inst., Margaret Reid, aged 33 years.
Wife of Thomas Reid, a Tailor.

22nd February 1868 (Hexham Herald)
Marriages
At St John's Chapel 16th inst, by the Rev James Green, Mr J H Forster of Carlisle to Miss Mary Jane Roddam only daughter of Mr W Roddam of Kings Arms Inn St John's Chapel Weardale.

At Nenthead 15th ult. by the Rev Henry Robinson, George Phillipson of Allenheads to Margaret Robinson of Nenthead.
In 1851, at Welgill, Dykeheads, Nenthead, Thomas Robinson, lead miner, aged 38, his wife Elizabeth 34, children John 13, Margaret 12, Hannah 9, Mary 6, and Elizabeth 1. In 1861, Margaret Robinson, aged 23, was working for William Tatters and family, at Gossip Gate, Alston, as a house servant.
In 1841, at Ellershope, George Phillipson, lead ore miner, aged 30, his wife Mary (Heslop, married 31st July 1830, at St Peter, Allenheads, buried at St Peter, Allenheads, 22nd May 1849, aged 43) aged 30, children Henry 9, Nicholas 7, Ann 5, Thomas 3, and George 9 months. In 1851, at Park House, Allendale, George Philipson, widow, lead miner, aged 43, children Henry, lead miner, aged 19, Nicholas, day labourer, aged 17, Ann 15, Thomas 12, and George 10.
In 1861, at Spring House Cottages, Allendale, George Philipson, widow, retired lead miner, aged 54, daughter Ann, house keeper, aged 25, sons, Thomas, lead miner, aged 22, George, labourer and quarryman, aged 20, grandson George Philipson 2, and house servant Jane Short, aged 27
In 1871, at Dirt Pot, Allendale, George Philipson, quarryman, labourer, aged 30, his wife Margaret 32, children Thomas W 4, Mary 2, and Elizabeth H 1. In 1881, at Ropehaugh, Allendale, George Philipson, limestone quarryman, aged 44, his wife Margaret 42, children Thomas W. 14, Mary 12, Elizabeth H. 11, Margareta 9, and Jane 4.

3rd March 1868 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Deaths
At Alston, on the 19th ult., William Kirk, aged 23 years.
In 1851, at Front Street, Alston, William Kirk, Tea dealer & grocer, aged 43, born Gatehouse, Scotland, his wife Ann (Whitfield, married 28th November 1843, at Kirkoswald) aged 31, born Kirkoswald, sons W. Wd 6, and G. Ann 2.
William Kirk snr., died 1st qtr 1852, registered at Alston.
In 1861, at 6 George Street, Westgate, Newcastle, Lodgers, William W Kirk, accountants clerk, aged 16, born Alston, and John P Kirk, assistant chemist, aged 25, born Alston.
In 1861, at Main Street, Alston, Ann Kirk, widow, grocer, aged 42, daughters, Grace A 12, and Jane 9.
Ann Kirk, died 21st March 1887, at Alston.
At Garrigill Gate, on the 23rd ult., William Armstrong, aged 35 years.
In 1861, at Ashgill Side, Garrigill, William Armstrong, lead miner, aged 28, his wife Mary 28, and son Christopher 6 months.
See 23rd April 1892

3rd March 1868 (Penrith Observer)
PRESENTATION AT NENTHEAD.—Mr. Tinniswood Millican, of Nenthead, having retired from his office as District Agent to the London Lead Mining Company in Alston Moor, the company's workmen decided upon presenting him with a testimonial as a mark of the respect in which he has been held by them, and for the manner in which he has promoted their best interests during the many years he has been placed over them. A goodly sum having been raised in subscriptions, it was decided the testimonial should take the shape of

a gold watch and chain, and on Friday, the 21st inst., a large number of the workmen assembled in the company's new school-room, at Nenthead, for the purpose of witnessing the presentation. R. W. Bainbridge, Esq., of Middleton House, the company's superintendent, in an appropriate speech, presented the testimonial to Mr. Millican, and after that gentleman had expressed his thanks, and a vote of thanks had been proposed to Mr. Bainbridge for officiating on the occasion and carried, the proceedings terminated. The Nenthead Brass Band was in attendance.

7th March 1868 (Hexham Herald)
Weardale.

7th March 1868 (Hexham Herald)

MURDER IN WEARDALE
THE SHOCKING CHILD MURDER IN WEARDALE.
VERDICT OF WILFUL MURDER.

On Tuesday an inquest was held at the house of Mr William Roddam, Kings Arms Inn, St Johns Chapel Weardale before Mr W. D. Trotter on the body of the infant child of Margery Nattrass, which came to its death at the hands of its mother in such a shocking and horrible manner, on Thursday last as reported in our columns on Saturday. The case has caused considerable excitement throughout the dale in as much as it is the first murder that has ever been committed in the dale within living memory. It appears that the murderess is the second wife of Joseph Nattrass who is a lead miner and lives on a small farm of his own at Huntshield Ford, a short distance from St Johns Chapel and about nine miles from Stanhope, in Weardale. The body of the murdered infant presented a horrible spectacle when viewed by the jury. The following was the evidence taken at the inquest. Mr Hutchinson, solicitor, of Stanhope, watching the case for the defence: -

Mary Ann Gibson, single women said she had lived servant with Joseph Nattrass since the Martinmas term, Mr Nattrass is a married man and his wife's name is Marjory Nattrass. Mrs Nattrass was confined on the 19th February of a girl. Mr Nattrass's family consisting of five boys and one girl lived with them. The youngest was about seven years old, the rest grown up. The eldest being near twenty was living with Mr Nattrass when he married last time December 18 1867. The two lived happily together. Never saw any quarrel between them, Mr Nattrass is a lead miner, farms his own property and is in comfortable circumstances.

On Thursday morning at about eleven o'clock, witness was going into the house from the dairy when she met Mrs Nattrass with the baby in her arms and asked where she was going, and she replied into the dairy, as she wanted some things. Witness passed on. She heard the child cry immediately after, went towards the dairy, and saw Mrs Nattrass standing at the door with the baby in her arms. It was bleeding. She ran and told a neighbour to come as Mrs Nattrass had killed the baby. She saw it was dead from the appearance of it. Mary Vickers came and they sat Mrs Nattrass on a chair with the child still in her arms, and then sent for Dr Hewitson. When Mrs Nattrass went to the dairy there was no one else there but her self. She had seen the baby several times that morning and it was quite well. Mrs Nattrass was up the second day of her confinement; but though she had been going about the house from that time, she was not quite strong. Noticed she was low, and from her way thought she was not right in her mind. On the 14th ult., witness went into the dairy and saw Mrs Nattrass striking matches in broad daylight. There was a quarter barrel of powder on the floor. The eldest son George Nattrass had taken her to task about being with child before she was confined; and after she was confined, he left the house, but came back next day by his father's advice. Never heard her husband find fault with her, and could not assign any reason for her to be in a low way. Had seen Mrs Nattrass on the Sunday previous with a laudanum bottle. Could give no reason to account for her committing the act. When Dr Hewitson came, he took the baby from her arms.

By the jury: Mrs Nattrass left the house on Wednesday night with the baby in her arms, and got 200 yards away. She had no boots on her feet and the child had no extra clothing on. Witness followed her and endeavoured to get her back. She would not come. Witness got Mark Nattrass, her stepson to go after her and he brought her back. She had left the house in a similar state four days previous to being confined, between eleven and twelve o'clock at night, and her son Matthew brought her back. She did not want to come back she was going to her mother but they persuaded her. On the last occasion, she went out with her boots on and came back without them. Saw knife after Mrs Nattrass came from the dairy. It was covered with blood, and was lying on the dairy table. Had heard George Nattrass say when he left the house that it was not on her account that he left the house. He blamed his father more than her.

Mary Vickers, widow living at Huntshield Ford said she was called into Joseph Nattrass's, on Thursday morning last, about a quarter past ten. Mrs Nattrass met her at the door with the child in her arms. The child was bleeding very much. Witness said, "Oh Margery, what have you done that for?" She answered, "To send it to heaven." She told her if she had only brought it into her, she would have nursed it up for her. She seemed very fond of the child. She seemed very much dejected, and had trouble on her mind.

Mr Charles Christopher Hewitson M.R.C.S., surgeon living in St Johns Chapel said he was sent for to Nattrass's on the 27th of February, about noon and went directly. When he got there, he saw the child. He found the neck was cut nearly severing the head from the body. The cut might have been done by some sharp instrument, and considerable force had been used. He attended Mrs Nattrass during her confinement, and the child was a healthy child. He had no doubt, whatever that the child's death was caused by the wound in the throat. The knife produced might inflict the wound providing considerable force had been used. He never attended her at any time previous to her confinement. Never considered it necessary to give instructions to take more than ordinary care of her. He thought her rather low spirited and disinclined to talk, but thought it arose from her natural disposition. He had no ears of her losing her reason.

John Duck, sergeant of police at St Johns Chapel deposed to having taken possession of the knife produced.

Samuel Robinson, superintendent of police at Stanhope gave evidence as to having taken Mrs Nattrass into custody on the 28th ult. He took her in a cab to the police station at Stanhope. On getting into the cab she said, "Don't take me away; forgive me." On arriving at Stanhope, he had, her placed in a good bed and had taken great care of her since. She seemed rather troubled in mind, but appeared in her conversation to be perfectly sensible.

The coroner having summed up the jury, after a short consultation returned a verdict of "wilful murder" against Margery Nattrass the mother of the child.

Joseph Nattrass first wife was Hannah Dixon, Children George Dixon, born 1849; Mark born 1851; Joseph born 1853; John born 1855; and Hannah born 1861. His second wife Margery was living at Sunniside, Stanhope at the time of her marriage to Joseph, their marriage took place at Westgate Primitive Methodist chapel on 18th December 1867, the certificate shows Joseph aged 49, the son of Mark Nattrass, Lead Miner deceased, and Margery aged 37 years, widow, father James Dixon, Lead Miner deceased.

Household at Huntshield ford on the 1851 census: Joseph (32), Hannah (30), George Dixon (2), Mark (6 months)
Household at Huntshield ford on the 1861 census: Joseph (42), Sarah (29, Josephs sister), George Dixon (12), Mark (10), Joseph (8), John (6), Matthew (4), Hannah (9 months), Mary Ann Peart (11 nurse)
Household at Huntshieldford on the 1871 census: Joseph (53), George Dixon (22), Joseph (18), John (16), Matthew (14), Hannah (10), Sarah J. Greenwell (21 servant born Alston)
Margery was a widow. Her first marriage was to Robert Tarn at Middleton Teesdale parish church on 4th March 1858, the marriage certificate shows that Robert was aged 25, a bachelor the son of Joseph Tarn, deceased, Margery aged 25 years a spinster, father James Dixon, a miner, witnesses were Sarah Dixon & William Porter. Robert was baptised at Middleton Teesdale 31st March1833, child of Joseph and Ann Tarn (married at Romaldkirk 22nd April 1826, Ann Parkin) he was one of 5 children, Joseph born 1828, William born 1830, Hannah born 1835, Ann born 1836. Robert died in the 3rd quarter (July – September) of 1858. Dr Hewitson in his testimony stated that he "had heard prisoner had had an attack of the same disease about ten years ago"; perhaps not surprising having lost her husband after such a short time.

The Court case held at Durham assizes was reported in the Newcastle Weekly Chronicle Saturday 18th July 1868. The assizes session began on the 9th July; Margery's case was heard on Saturday 11th July 1868.
Margery Nattrass, 36, was charged with having murdered her female child at Stanhope on the 27th February. Mr Campbell Foster appeared for the prosecution, and Mr Meynell for the defence. The case for the prosecution was this Prisoner was a widow last year, and her husband a miner, a widower. The latter had a family of six children from 20 to 7 years of age. Nattrass and the prisoner were married in December, and about two months off her confinement. On the 19th February, she was delivered, and of course, some scandal took place in the neighbourhood, and the matter was commented on in the husbands' family. She progressed rapidly towards recovery, and eight days after her confinement she got down stairs. On the same day she went out into the dairy with the child in her arms, and shortly afterwards a cry was heard. On leaving the dairy about two minutes afterwards, the servant Mary Ann Gibson, saw her enter the kitchen closely pressing the child in her arms. Blood was running down her dress, she went out of the house but Gibson persuaded her to go in again, and attempted to take the child from her. The woman refused, and the girl called in a neighbour, Mrs Vickers, and a doctor was sent for. On his arrival, the child was dead, its throat having been so fearfully gashed that it was impossible for it to live. Previous to the coming of the doctor (Mr. Hewitson), which did not take place for nearly an hour, the woman sat with the child firmly clasped in her arms, and once attempted to give it a suck. Mrs Vickers asked her why she had done it, and she replied that she did so to send it to heaven. The witness Gibson, as were the others, was cross-examined as to the prisoners' apparent state of mind previous to, and a few days after her confinement. Witness said she had been in low spirits. On two occasions, she had strayed out at night, and she had frequently seemed as if she did not know what she was going to do. Once she saw her lighting matches over a small barrel

of gunpowder, which was kept in the dairy. She had noticed her conduct to be very peculiar, and had watched her. – Re-examined: She mentioned the matter of the gunpowder a few days afterwards to the prisoners' husband, not at the time. She had not been instructed by her master nor by any one else to watch the prisoner. – Joseph Nattrass, younger son of the husband, corroborated Gibson's evidence as to the murder, and Mrs Vickers spoke to the conversation she had had with the woman. – The eldest son, George Nattrass, said he had told the prisoner that report said she was in the familyway. She replied. Yes, it was true, upon which he remarked if he had known it sooner they should have married sooner. Some unpleasantness followed, and he left his fathers house for a time. Sergeant Duck produced the knife, and Superintendent Robinson, who charged her, said she became violent when at Stanhope station, and said, "Let me go, forgive me." – Dr Hewitson said he had attended the woman in her confinement on the 19th February. He thought her dull and disinclined to talk, and such he took to be her natural disposition. When he took the dead child from her she said. "I can't tell whatever possessed me to do it." And then she turned aside her head as though she could not bear any further thought of it. Could not form any decided conclusion about her state of mind. – By Mr Meynell: Had had cases of puerperal mania. Attacks about this period of confinement were not very uncommon. Sometimes they came on before, sometimes after confinement. The most common time for them to come was four or five days after, and sometimes very suddenly. A disposition to murder their children was a marked symptom of the disease. Women suffering from the disease could recognise persons and things and answer questions; perhaps they might not at all times give correct answers. Sometimes they might be quite coherent. The attacks went off as quickly as they came on, and after that, a woman again would become perfectly sane. He knew of such attacks lasting for a few weeks, and sometimes not so long. Getting up too soon after confinement might bring on an attack providing the woman was subject to them. Had she had trouble before the woman would be more liable. – Re-examined: Had heard prisoner had had an attack of the same disease about ten years ago. When he saw her, she seemed quite right and rational. – Dr Arnison, who saw the prisoner at the police station, said her pulse was at 110, with great heat in her head. When he put questions to her, it was with great difficulty he could get a reply. She answered coherently. She was very reluctant to give an answer. He should think there was something the matter with her brain. The woman appeared quite sullen. He supposed she was recovering from an attack of puerperal mania. – His lordship here submitted to the jury whether they had not sufficient evidence to assure them as to the prisoners' state of mind at the time she killed the child. – The jury at once declared the prisoner was not guilt on the grounds of insanity. – His lordship said that proper care would be taken of the woman.

In the census of 1871, Margery was recorded as an inmate at Broadmoor Criminal Lunatic Asylum; Berkshire aged 41, birth about 1830.

The following are extracts from the work by Dr. Hilary Marland:

Maternity and Madness: Puerperal Insanity in the Nineteenth Century.
Centre for the History of Medicine, University of Warwick, Coventry CV4 7AL, England. Posted April 2003.

Two forms of puerperal insanity were recognised, mania and melancholia, 'the one attended with great excitement and furious delirium, the other characterized by the features of low melancholy'. Mania was said to occur more frequently and attracted greater attention, not least because of its flamboyant form and its associated contravention of all the codes of decent female behaviour and maternal duty. Gooch referred to the rumbustious behaviour of women afflicted with the disorder: 'the patient swears, bellows, recites poetry, talks bawdry, and kicks up such a row that there is the devil to play in the house'
It was agreed that, although mania was more flamboyant and disturbing, the melancholic form was most difficult to cure and could become entrenched, with the women lapsing into a lingering depression, 'drollery' or dementia. It was such women that we find languishing years after admission in the wards of large public asylums, and who finally died there. The stories, taken mainly from case notes, of puerperal insanity form a sad collection, of miserable depression or excitable and disruptive mania, suicide attempts, self-harm, infanticide, terror, delusions and misery, often compounded by poverty, physical exhaustion and domestic violence

For poor women, the asylum may have functioned as a refuge, a place where they could rest, receive proper food and a break from the hardships of their lives - and asylum superintendents often framed their care in these terms - and for all women, the gentle therapeutic regime may have allowed them a period of respite, a break from household duties and mothering.

Janet Smith was admitted to the Royal Edinburgh Asylum on April 1st 1853, one of the 155 cases of puerperal mania to pass through the doors of the institution between 1846 and 1864.25 A married woman, aged 23, a member of the United Presbyterian Church, naturally of a frank and cheerful disposition, temperate, active, quiet, and of average intelligence, though of a 'nervous temperament', it was recorded in the Asylum case books that:
Ten days ago after a severe labour she was delivered with the aid of the forceps of a living child: a few days after this her mind became gloomy &she wept much; this was followed by sleeplessness, restlessness and a disposition to be noisy & obstinate & destructive of clothing: she rhymes over the letters of the alphabet for hours at once, she often sings, she inclines to run about the room...
Jane was confused, incoherent, and remained on admission noisy and disruptive, singing and laughing in turn, and repeated a few words for hours on end at the 'height of her voice'. She was confined to bed, given laxatives and stimulants, warm baths; her head was shaved and blisters applied to the nape of her neck. Slowly Jane improved, gained weight and became more restful. In May, however, she relapsed, and was described as being furious, noisy, mischievous, destructive and dirty, using profane

and obscene language, abusing everyone who came near her, spitting in their faces. Her husband and brother were allowed to visit but made no impression on her. By July, she again showed signs of improvement, was more tranquil, started to work and rested better at night. In October, a more abrupt change occurred: she began to ask after her friends, husband and child, was cheerful, kind and industrious, and 'regained her natural disposition'. She was discharged cured on 26 October, after seven months in the asylum.

Like many women suffering from puerperal insanity, Jane Smith subsequently became ill again and was readmitted to the Edinburgh Royal Asylum in October 1855. The case notes explained, that since her discharge two years previously she had remained well, but 'Fourteen days ago she was confined and 4 days after she became insane'. Admitted sleepless, imagining her dead mother was alive, taking no notice of her child, violent and abusive, this time her recovery was more rapid. By December the casebook, reported Jane as being 'tidy, active and useful', gaining in strength and flesh, powerful indicators of recovery. Yet, the asylum doctors chose to wait, and to allow Jane to convalesce fully, and only discharged her as recovered a few months later in March 1856.

The 1881 census states that Margery Nattrass widow, was an Innkeeper at Wearhead, Stanhope, in 1891 she is listed as living in St John's Chapel.
The register of deaths for Jan/Feb/March 1902 gives Margery Nattrass born about 1830, aged 72 years of Weardale.

14th March 1868 (Hexham Herald)
Deaths
At Nenthead 6th aged 52 Ann Barron very suddenly.
George Barron married Nancy Hind 19th March 1840, at Alston
In 1841, at Dykeheads, George Barrow (Barron), (son of Cowper Barron and Hannah Armstrong, married at Alston 15th May 1794), lead miner, aged 36, his wife Ann 26, sons Couper 6 months, and William 6 months.
In 1851, at Wellgill, Dykeheads, George Barron, lead miner, aged 47, his wife Sarah (Ann) 36, children Cowper 10, William 10, Sarah 8, Hannah 6, Ann 4, and George 1. In 1861, at Overwater, Nenthead, George Barron, lead miner, aged 56, his wife Ann 46, children Cowper, lead miner, aged 20, William, lead miner, aged 20, Ann 14, George 11, and Mary 8.

5th May 1868 (Hexham Courant)

WEDDING FESTIVITIES AT ALSTON

On Thursday last, the inhabitants of Alston Moor were early attracted by the sound of a battery of six guns, which were fired repeatedly during the day at Rodderup Fell Mines, on the occasion of the marriage of Thomas Wilson Esq., of Shotley Hall, in the county of Northumberland, with Elizabeth, youngest daughter of the late Sir Samuel Cunard, Bart. In honour of whom a treat was

given at Rodderup Fell Mine, near Alston, to the numerous workmen and others connected with this mine, in which Mr Wilson is a principle partner, and with which Messrs Wilson and their friends have been connected now for half a century. Joined by the workmen from Hudgill Burn and Blagill Mines, in which also Mr Wilson is a principle partner, the men marched in procession from Leadgate to the Mine, preceded by the Rodderup Fell Company's Band, and bearing numerous banners. At one o'clock the company, to the number of about 220, sat down in a spacious tent, 112 feet long, and well decorated with flags, erected under the superintendence of Mr Isaac Walton, of Brownside House, to an excellent dinner, to which ample justice was done. The chair was taken by T. W. Crawhall, Esq., supported by Captain Dickinson, Sergeant Dickinson, and Mr William Sixsmith, and Messrs Isaac and Joseph Walton, occupying the vice chairs. After dinner the chairman, in an appropriate speech, proposed the health of Mr and Mrs Wilson, which was most heartily responded to, and after the usual toasts the company retired to the Green to amuse themselves with sundry games, for which prizes were offered, and won as follows, viz: - For wrestling-1st, Henry Dowson; 2nd, William Kirsopp. Pole leaping-1st, Henry Dowson. Wheelbarrow race-1st, John Nicholson. Foot race-1st, George Dickinson. Race in couples-1st, Henry Vipond and J Kirton. Long leap-1st Henry Dawson, &c., &c. concluding a little before dusk with an excellent foot race by the boys. While the workmen were thus employed, about 50 of the wives and daughters of the Rodderup Fell Company's tenants were regaled by an excellent tea in the Company's schoolroom at Leadgate. The whole proceedings were carried out in an excellent spirit, and were only slightly marred by the very high wind, which, however, only succeeded in curtailing the speeches but not the sports.

The marriage took place on Thursday 30th April at Nunmonckton, Yorkshire, where the brides, Elizabeth the youngest daughter of the late Sir Samuel Cunard had been residing for a short time. It was also reported at this time that Mr Wilson on his estate at Shotley Bridge had built waterfalls and an artificial lockworks arranged by Mr John Hancock of Newcastle.

15th May 1868 (Durham Chronicle)

OPENING OF THE TEES VALLEY RAILWAY

This event was consummated on Tuesday, amidst great rejoicings. In the early part of the day. Col. Hutchinson, R.E., the Government Inspector, made his final inspection,, and at one o'clock a train started from Darlington for the purpose of opening the line. The train contained the directors, railway officials, and several other gentlemen, amongst whom we observed the Rev. T. Witham, chairman. and Messrs H. Pease, R. Thompson. T. Richardson, W T. Scarth, directors of the line; Col. Hutchinson, Messrs W. R. Hunter (Newcastle), W. Copperthwaite (Malton), J. Wilson, Col. Maude, M. Headlam. T. F. Scarth, W. Watson, T. D. Ridley. H. Hodgson (London), T. F. Mackay. C.E., W. Cudworth, M.I.C.E., G. G. Boulton, T. Jones, C.E., G. Stephenson, W. Smith, R. Pickering, W. Bouch, R. T. Richardson, R. Bainbridge, and the Rev. J. L. Lowe. At Barnardcastle there was a large augmentation, and from that station the line may be said to commence, because independent access is afforded by means of the South Durham line from a point a little west of the Tees Viaduct. The splendid view from the viaduct was much admired, the ruins of the Castle forming a conspicuous object, the foliage of the woods, just

breaking out in all its freshness, giving an additional charm to the extensive and romantic landscape. The first sod of the new line was cut at Middleton-in-Teesdale on the 9th September, 1865, by his Grace the Duke of Cleveland. The works have since been carried on by Messrs Boulton and Jones, contractors, under the care of Messrs Nimmo and Macnay, C.E., of Westminster, the company's engineers The line is 7¾ miles in length, and leaving the South Durham at Towler Hill, it passes on to the charming little village of Cotherstone, famous for its cheeses. Here a neat little station is provided. The ruins of an ancient castle of the Fitzhughs are situated on a promontory overlooking the Tees, and Percymire Castle, a huge rocky precipice, is a conspicuous landmark on the Manrood side of the river. Leaving Cotherstone, the Balder stream is crossed by a graceful viaduct of nine arches of 30 feet span. This structure is 100 feet in height, and is built of stone, with arches of fire-brick: a neat iron hand-railing is fixed on the parapets. The view is magnificent, the banks being thickly wooded, and to the east an extensive landscape opens out. Woden Croft is near, and the reader will mark the Saxon origin of these names. The line has now attained a high level, skirting the Moor on the left, whilst on the right the scenery continues beautiful along the course of the Tees towards Eggleston, where the mansion of Mr T. Hutchinson may be seen. No station has as yet been erected at Romaldkirk, and it is considered that great inconvenience will result to that important village until that accommodation is provided There is nothing of importance to note until we reach the Lune Viaduct— a stately structure of five arches, and 50 span and 60 feet in height, built of similar materials to the Balder. Here the view is also magnificent, and Southkirk occupies an elevated position on the north side, and the banks are beautifully fringed with trees. The public road passes at the foot of the viaduct, and from this point the best view of it is obtained. The long straggling village of Mickleton is provided with station accommodation. A straight run then brings us to Middleton-in-Teesdale, the terminus of the line. The station is a neat, but small structure, occupying a commanding position at some height above the town, and near the old toll-bar. We understand that the Whinstone Dyke passes close to the line, and is favourable for being worked as a valuable material for road-making. Middleton-in-Teesdale is prettily situated on the Durham side of the valley. The population of Middleton is about 2000, and the principal occupation is provided by the London Lead Company, who have extensive lead workings in the district. The mineral wealth of Teesdale is well known; and now that railway facilities are afforded, the ironstone and other minerals will have proper means of transit to the consuming districts, thereby increasing the trade of the neighbourhood and adding to its wealth. The country through which the line passes is not less remarkable for the charming loveliness of its scenery of wood and dale and rounded heights of blue-capped hills, than for its mines of mineral wealth; and not to the agriculturist, the manufacturer, and commercial speculator alone will the new line prove highly advantageous, but to the tourist also, to whom it will afford an excellent opportunity of exploring the dale, and viewing at his leisure the many and picturesque charms of landscape beauty with which it is so profusely studded. The cost of the line is about £8000 per mile, and reflects credit both on the engineers and contractors, for the mode in which the line is laid out and constructed. The viaducts have cost £5,000 each. The demonstration at Middleton consisted of

sports, a gala, several tea meetings, a ball, and a public dinner at the Cross Keys Inn. The town was gaily decorated with banners, triumphal arches, &c The directors and friends dined at the King's Head Hotel, where a sumptuous banquet was provided by Mr John Smith The chair was occupied by the Rev. T. Witham, of Lartington Hall, chairman of the company The line will be worked by the Darlington section of the North Eastern Railway Company.

16th May 1868 (Hexham Herald)
Deaths
At Alston 8th inst, aged 73 years William Archer, Groom.
In 1841, at the Butts, Alston, William Archer lead miner, aged 44, his wife Hannah (Hutchinson, married at Alston, 15th March 1827) aged 40, children Jane 12, William 8, Hannah 5, Thomas 4, and Eleanor 1 year. In 1851, at Town Foot, Alston, William Archer, aged 56, his wife Hannah 50, children Jane, factory girl work, aged 22, Wm, factory boy work, aged 18, Hannah 16, Thos 14, Eleanor 11, Adam 7, and John 5.
In 1861, at Kate's Lane, Alston, William Archer, widow, groom, aged 66, children Jane, house keeper, aged 32, William, labourer, aged 28, Adam, lead miner, aged 17, John, groom aged 15, and grandson William Archer 9.

26th May 1868 (Hexham Courant)
A WEARDALE MAN DROWNED IN AUSTRALIA.
In the Illustrated Australian News of March 30th, is reported a fatal accident which occurred on the 7th of that month to a Weardale man, the son of Mr Ralph Coulthard, late of New Close, Westgate, Weardale. "Three young men, named John Graham, Peter Bell, and Harry Coulthard got a small boat for the purpose of fishing in the Thomson River, at a place called Stockriders, about 2 miles from the copper mines". On their return in the evening, the boat filled with water and capsized. Graham who could swim saved Bell but lost sight of Coulthard, and they went for help. Coulthard's body was recovered an hour later; he was 22 years of age.
Thompson River Copper Mine, Gippsland, Victoria, near the town of Walhalla (better known for its rich goldmine), the mine was close to where Coopers Creek joins the Thompson River.

The Argus (Melbourne)

Saturday 9 November 1867

THOMSON RIVER COPPER-MINE

The following is a copy of the reply sent by the manager of the Gipps Land Tributer's, Copper-mine Company to a circular letter recently issued from the Mining department: -

Cooper's Creek, Happy-go-Lucky,

Oct. 29 1867. '

Sir, In accordance with your request, I have the honour to furnish the following in formation of the Thomson. River Copper mine, and works in connexion therewith, and I to beg to state, as the same is intended for publication in the work now being prepared by the Secretary of Mines, I have taken every, care in its compilation.

The ground upon which the mine is situated comprises an area of 640 acres. Adjoining this on the northern boundary, and along the course of the lode, a separate lease of 390 acres has been granted to the present company. The character of the country is mountainous, and the situation' of the lode where ore, is now being broken possesses an altitude of 330ft. to the Thomson River, which runs at a horizontal distance westward of 120ft., thus affording excellent facilities for future tunnelling operations.

The size of the lode is not yet proved. Thirty feet in width has, however, been discovered without striking the hanging wall.

The lode is composed of ferruginous quartz, oxide and sulphuret of iron, and sulphuret, carbonates, and oxides of copper, In general appearances the lode bears a resemblance to, those of the minus of Devon and Cornwall. …

Two reverberatory furnaces have been erected on the western side of the river, which works are connected with the mine by means of tramways and shutes. Fifty tons of ore have been smelted, yielding 214 cwt. of regulus, worth from forty to fifty per cent.

When the two furnaces mentioned are in operation, from fifty-five to sixty tons of regulus, of fifty per cent, will be realised monthly. It is, however, intended, to reduce the ores to a higher per cent, via: - rough copper of ninety per cent, and afterwards to refine the same upon the ground. For fuel wood is used, there being an abundance in the immediate locality, which, by means of tramways, can cheaply conveyed to the works

A limestone formation, and also clay for common bricks, exists in the immediate neighbourhood of the smelting works, which is of great advantage.

I am, Sir, yours respectfully,

Fred Richards. Mining Manager.

See 30th July 1870, and 19th August 1882

14th July 1869 (Teesdale Mercury)

Sir,—On passing through the clean little town of Middleton-in-Teesdale the other day on my way to the romantic and rugged scenery in the neighbourhood of High Force and Caldron Snout, I enjoyed a delightful walk through the wood attached to the residence of Mr Brown, the Duke of Cleveland's land bailiff, and wended my way to the lead mine called Skears, worked by the enterprising London Lead Company. The distance from Middleton to this mine is about a mile, and the scenery in the vicinity will well repay the visitor the time spent in travelling the distance. On returning, I crossed a wooden bridge, and passed through the Lead Company's plantation and peeped into their workshops, which appeared to be fit up with due consideration for the comfort of the workmen, I speedily come to the residence of R. W. Bainbridge, Esq., the superintendent of the London Lead Company's extensive works, and walked on about two hundred yards to what I took to be a school-room, and which I was informed had been used for that purpose, but was now converted into a wash house for the benefit of their workmen's families, and the public generally. I was astonished to find such a well arranged and neat establishment, and my chief object in writing this letter, is to draw the attention of visitors to the neighbourhood like myself to the facilities afforded at this said establishment for enjoying a really good and refreshing bath at the nominal charge of fourpence. In connection with the wash house, which is fitted up with every convenience in the way of copper boilers, washing and wringing machines, mangle, drying closets, &c., there are three bath rooms, not small pent up places, but commodious and well lighted and ventilated. The manager is very obliging and intelligent, and keeps everything in clean and orderly style. Hot, tepid, and cold baths may be had, and also a shower bath, at a rate which is merely an acknowledgement to what is paid for similar baths in some of our large towns. It is evident the concern has not been got up with a view to large pecuniary returns, as the penny per hour for washing &c., and the low rate for baths justify. I am sure the efforts made by the Lead Company for the comfort and welfare of their workmen, and the educational facilities afforded for their families, are worthy of the highest imitation by the large employers of labour in our country.

I am,
Yours truly,
A VISITOR.

18th July 1868 (Hexham Courant)

MARRIAGE FESTIVITIES AT ALSTON

On Tuesday evening, the artisans and labourers usually employed by the Greenwich Hospital, assembled at the Turk's Head Inn, to partake of a supper given to them by Mr Paull, the Moor Master, on the occasion of his marriage,

which took place at Bedford on that day (14th July 1868). In order to show their appreciation of Mr Paull's kindness, the workmen literally covered his residence with flags, and salvoes of cannon were ever and anon fired by them,

Frederick Paul married Elizabeth Mary Drake (Baynham), 3rd quarter 1857, at In 1861, at Sunderland, Frederick Paull, M.R.C.S. Eng. L.S.A. Practicing general practitioner, aged 30, born Devonshire, his wife Elizabeth D aged 29, born Devonshire, son Henry B aged 2 born Sunderland, and sister in law Constance B Baynham, landed proprietor, aged 32, born Devonshire.

Plymouth. Frederick Paull, surgeon, of 54 Fawcett Street, Sunderland, died 2nd June 1866.

J. M. Paull married Elizabeth Mary Drake, relict of the late Frederick Paull, Esq., surgeon, Sunderland. See 16th March 1855, 1st January 1858, 31st May 1861, 22nd April 1864, and 5th June 1875.

28th July 1868 (Hexham Courant)

Marriages

At Alston at the Parish Church, John George Millican Esq., Solicitor, Alston, to Louisa Jane daughter of the late Joseph D. Stagg Esq., of Middleton in Teesdale.

See 24th August 1878, 23rd April 1898, and the Robert Stagg Family.

SHOCKING FATAL ACCIDENT IN A LEAD MINE

On Saturday, an inquest was held at the Blue Bell Inn, St John's Chapel, Weardale, on the body of Thomas Raine, lead miner, who came to his death from a shot in a lead mine, on Thursday last. Deceased was in the employment of the London Lead Company, and worked with his brother William at Bolihope Mine. On Thursday, whilst at work, deceased and his brother had two holes drilled in the rock, which they had charged with powder ready to fire, and whilst deceased was in the act of lighting the match of one of these holes it fired and killed him on the spot. Evidently, the squib containing the powder had caught fire. Deceased's brother was not far distant when he heard the shot, which he knew had gone off before deceased had time to be a safe distance. On going to the place, William found his brother dead. Deceased's face and head were severely bruised. Deceased was the son of Mrs Elizabeth Raine, of Prize Hill, Weardale, where he has resided for some timer, but was a native of Teasdale, unmarried, and 25 years of age. He was a steady young man and much respected. The jury returned a verdict of "Accidental death."

Thomas parents were William Raine (father Gibson Raine) and Elizabeth (Cousin), both of Middleton, Durham, who married 1st September 1842, at Middleton in Teesdale. William and Elizabeth had 8 children, Thomas, Elizabeth, William, Matthew, Hannah, Gibson (born 1856, died 1863) Mary and Rebecca. In 1851, William and Elizabeth Raine were living with Elizabeth's parents.

In 1851, at Rough Rigg Head, Matthew Cousin, lead miner, aged 66, his wife Hannah, aged 69, son Matthew, lead miner, aged 21, son in law, William Raine, lead miner aged 35, daughter Elizabeth Raine, aged 30, grandchildren, Thomas 8, Elizabeth 6, William 4, and Matthew 1.

In 1861, at Birkdale Hamlet, Dufton, William Raine, farmer of 100 acres, aged 45 (died 2nd quarter 1866), his wife Elizabeth 40, children Thomas, farmers son, aged 18, Elizabeth 16, William 14, Mathew 11, Gibson 4, and Mary 2
In 1871 at East Hotts, Stanhope, Elizabeth Raine, widow, farmer of 9 acres, aged 50, children William, lead miner, aged 24, Matthew, lead miner, aged 20, Hannah 16, Mary 12, Rebecca 9, and Matthew Cousin, retired lead miner, and land owner, aged 47.

7th August 1868 (Carlisle Patriot)
Deaths
At the Workhouse, Alston, on the 17th ult., Ann Varty, aged 44 years.
At Ayle, Kirkhaugh, on the 30th ult., Jane Wilson, widow, aged 76 years.

7th August 1868 (Newcastle Journal)
FIRES IN ALLENDALE. —In common with many, other places the heather on the moors in Allendale is being burnt in a manner the like of which is perhaps not in living memory. The expansive tract of moorland between East and West Allen has been burning at several different places for upwards of seven weeks. There can be little doubt but the fire had its origin from the hand of an incendiary, whose object, not improbably, would be to only consume some particular portions of coarse, long heather, for the purpose of making it grow finer, and thereby more suitable for the grazing of sheep, &c. The extremely scorched state of not only the ling but the moss too, has rendered the extinguishing of the devouring element all but impossible, and the fire, which has now swept over many hundreds of acres, still continues its devastating work, bidding defiance, as it were, to all the efforts that have as yet been brought to bear against it. Numbers of workmen have been engaged for several weeks endeavouring to beat it out. Ditches have been cut, and water conveyed in barrels, all of which has been of little avail; and there seems little prospect of a total extinction until the ground receives a thorough drenching with rain. The principal thing in the meantime is the protection of Mr Beaumont's extensive plantation, one of which (Acton) has been in imminent danger. The heather and moss, which is the principal sustenance of the mountain sheep, has been so extensively and completely destroyed that the sheep farmers are fully alive to the serious loss they have sustained, and, we understand, are now more anxious to have the fire stopped; and if, as is pretty generally surmised, all this trouble and expense has been caused by some of them deliberately igniting the heather to suit their own individual purpose, there is little doubt they will learn a lesson they will not easily forget before they get their stock through the ensuing winter. The smoke, for miles on the leeward side of the fires, has been disagreeable in the extreme, and the inhabitants residing in the vicinity have often been obliged to either sit with closed doors or submit to have their houses! rendered anything but comfortable.

8th August 1868 (Hexham Courant)
Deaths
At Markclose, near Alston, 24th ult. aged 53, Mr Robert Nattrass.
In 1841, at the Butts, Alston, Nancy Nattrass, widow, aged 62, Robert Nattrass, lead miner, aged 25.

MOUNTAIN ON FIRE IN CUMBERLAND

A fire has been raging on the mountain between Nenthead and Weardale for several days past, and is doing a great deal of damage to herbage, &c. The fire commenced burning about 2 miles above Nenthead, near Alston, and was burning in a westward direction with great force. The London Lead Company engaged a number of men to suppress the flames and have succeeded in doing so; but the fire still continues on the Durham side.

15th August 1868 (Hexham Courant)

Deaths

At Coalcleugh, 10th inst., aged 37 much respected Mr Joseph Hetherington.

In 1841, at Cross Dyke, Joseph Hetherington, millwright, aged 50, children Ann 20, Hannah 15, Jane 13, Joseph 11, Leah 8, and Lucy 8.

ALSTON

MINERS TRIP TO NEWCASTLE

The great local event came off on Friday last week, when about 230 persons from Alston, Garrigill, Nenthead and surrounding neighbourhoods, availed themselves of the opportunity – so rarely offered to the district – of spending a few days at some distant place, with return tickets. The trip which had its origins shortly after the opening of the Alston branch has ever been well patronised. Some years the number of passengers has been four hundred and upwards, but there are now a considerable falling off, arising in a great measure from want of choice of place, there being many who have attended the miners' and other trips to Newcastle until the town has become quite familiar to them. …

There is a wide spread impression that with very little trouble by some of our local gentleman and shareholders of the railway, return tickets might be procured available by the first train in the morning and to return after the principal proceedings of the day are over. …

1st September 1868 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

The following is the statement given of the cost of in-maintenance and out-door relief in the Unions of Cumberland for the half year ending at Ladyday 1868:

	In Maintenance	Out-door Relief	Total
Alston with Garrigill	£87	£429	£516

In 1901, at Heatherycleugh, Stanhope, Elizabeth Peadon, widow, farmer, aged 69, children, David S, lead miner, aged 36, Margaret E 22, and grandson William Peadon, quarryman Whin, aged 19.
Elizabeth Peadon died 4th quarter 1904, registered at Weardale.

7th November 1868 (Hexham Courant)
SALE OF LEAD ORE AT NEWCASTLE
On Friday a sale of 135 bings of lead ore, produced from a lead mine called Cashwell mine situated in Alston Moor, took place at the White Hart Inn, Newcastle. The parties who competed for the purchase of the ore were Messrs. Shield and Dinning of Langley; Washington Chemical Company;

Locke, Blackett and Company, Walker Parker and Company; Mr John Warwick and Jacob Walton and Company. The last named company was declared to be purchasers at the price or sum of £5 3s per bing. A similar sale of 320 bings of lead ore took place on the 24th ult. at the Turk's Head Inn, Bigg Market. The latter parcel of ore was the product of a flourishing mine near Alston called Rodderup Fell, belonging to Messrs. Wilson Crawhall, and Company, and was bought by Messrs. Shield and Dinning, at about the price of £4 14s per bing.

7th November 1868 (Kendal Mercury)
On Wednesday week, as George Armstrong, miner, Patterdale, working at the Greenside Mines, was in the act of charging a hole in the rock, which had previously missed fire, with powder, an explosion took place, when the unfortunate man was knocked down, and much burned in the face, and it is feared his eyes are injured; his arms and hands were also much scorched and cut. Dr. Martindale is in daily attendance on the sufferer, who is recovering as well as can be expected.

13th November 1868 (Newcastle Courant)

NEW LEAD ORE MINE AT THORNBROUGH

A rich vein of lead ore was cut on Tuesday by the sinkers at the new mine at Thornbrough, below Corbridge. The Company commenced operations about

9 months ago, and now that ore has been reached, the speculation looks prosperous.

R. A. Fairburn (Allendale, Tynedale and Derwent Mines, British Mining No. 56, May 2000) states that the Thornbrough Mining Company took a 21-year lease of the mine in 1872, but no production was recorded, and that the mine closed in 1885. The chief agent from 1876 to 1878 was Joseph Walton. In 1880, it was John G. Millican. See 30th January 1869

17th November 1868 (Hexham Courant)

ACCIDENT IN A LEAD MINE

Last week a serious accident occurred to two miners while engaged in blasting in the London Company's lead mines at Nenthead near Alston. The names of the sufferers are Caleb Dryden of Nenthead and Thomas Lowe, of Clitheroe, near Alston, who were working together, and when in the act of charging a hole an explosion took place. Dryden is severely burnt and cut about the face and eyes, and one of his arms is much shattered. It is feared that he will be deprived of the sight of one of his optic members. Lowe is not so much injured as his fellow workman.

In 1871 Census, Caleb Dryden (son of Caleb & Mary) Lead miner 45, was living at Overwater, Nenthead with his wife Agness (Barron married 1849, daughter of John & Jane [Irwing] Barron) aged 40, and their children, John Lead ore washer 13, Mary Ann 6 and Watson 2.

Agness died in 1873; in 1881 Caleb Dryden Masons labourer 55, was living at Castle Bank (market hall), Tow Law, Wolsingham with Mary Ann, general servant 16, and Watson 14. John his eldest son had married Margaret (Featherstone married at Settle in 1877) and in 1881 was a Plate Layer (Mid Railway), living at Selside Cottages, Settle, Ribblesdale, with their children Sarah A, aged 1, and Robert F. 3 months.

Thomas T Lowe son of Teasdale (son of William & Eunice) and Margaret Lowe (Daughter of Thomas & Hannah Walton, married Teasdale in1832), in 1861 the family consisted of Teasdale Lead miner aged 65, his wife Margaret aged 47, and their children, Eunice aged 23, Teasdale, lead mines 18, Thomas, lead mines 13, John Lead mines 11, William 5. Thomas senior died in 1867.

In 1871 the family were living at Clitheroe, Alston, Margaret widow, farmer, Teasdale Cart driver 29, Thomas T. Lead miner 27, Phoebe aged 25, John Lead miner 22, Joseph Cartman19, William 16, Thomas W 6. Also living with them were Sarah A. granddaughter aged 8, Thomas W. grandson aged 6.

In 1891 Thomas (Thompson) was married to Ann aged 49 they were living at Gossip Gate, Alston and Thomas was working as a Cartman.

See 11th February 1871, 29th April 1876, 6th June 1885, 20th June 1885.

SAD ACCIDENT AT STONECROFT MINES

ONE MAN KILLED AND ANOTHER INJURED.

Yesterday shortly after Midday, a sad accident occurred at the Stonecroft Lead Mines, situate some three or four miles from Haydon Bridge and which are worked by a company. Two miners, father and son, named respectively Joseph Bailes and William Bailes, were engaged at their usual work in one of the workings of the mines, when a fall of lead ore took place, partially burying the unfortunate men killing the elder of the two instantaneously. When extracted from the fallen debris, though suffering from injuries about the chest

and head the son did not appear to be seriously hurt. It is believed the "bunnion" or woodwork that supports the roofing at this part of the mine had given way. ... The deceased Joseph Bailes was about 68 years of age and leaves a widow and a family (but the members of the family have all attained to manhood or womanhood) to lament his untimely loss. William Bailes, the son of the deceased is about 30 years of age, and has a wife and two children. ...

In 1841, at Loaning Head Toll Bar, Jacob Bales (Jacob Bales married Sarah Elliot, 21st May 1797, Alston), independent, 70, Sarah Bales 14 (daughter of Joseph and Ann), Jane Brown, housekeeper, aged 35, George Brown 14, and Thomas Brown 10.

Children of Jacob and Sarah Bales: —

Hannah born 7th May 1798, John born 27th November 1799, Joseph born 30th November 1801, Jacob born 16th October 1802.

In 1841, at Skelgill Gate House, Joseph Bales, lead miner, aged 39, his wife Ann (Lee, married 25th December 1825, Alston) aged 38, children, Jacob A., lead miner, aged 13, John, labourer, aged 11, Hannah 8, Joseph 6, and William 2.

In 1851, at Skelgill Plains, Alston, Jacob Bales, widow, lead miner, aged 85 (died 1st quarter of 1855), his married son Joseph, lead miner, aged 49, daughter in law, Ann aged 49, grandsons, Jacob, lead miner, aged 23, John, lead miner, aged 21, Joseph, lead miner, aged 16, William, lead miner, aged 12, and Thomas, aged 8.

In 1861, at Main Street, Alston, Joseph Bailes, lead miner, aged 59, his wife Ann 59, & son Joseph a lead miner aged 25 (emigrated to Australia). In 1871, at Walton Place, Haydon Bridge, Ann Bailes, widow, aged 66, and boarder James Pearson, joiner, aged 20, born Allendale.

In 1861, at Haydon Cottage, Haydon Bridge, Joseph Bowman, lead miner, aged 36, born Alston, his wife Hannah 29, born Alston, children Sarah Ann 11, born North America, Isabella 8, born Alston, Joseph 5, Elizabeth 3, Jacob 1 (all born Alston), lodgers William Bales, lead miner, aged 22, and Thomas Bales, lead miner, aged 19.

Thomas married Jane Reed at Haydon Bridge 3rd quarter of 1864.

In 1871, at Heworth, Thomas Bales, labourer at chemical works, aged 29, and his wife Jane aged 32.

In 1861, at Haydon Bridge, George Walker, tailor and draper, aged 51, his wife Ann aged 52, children Hannah, dress maker, aged 22, Robert, tailor, aged 20, Cuthbert, Ag. Labourer, aged 18, and William, tailor, aged 13.

William married Hannah Walker in 2nd quarter of 1865, registered at Hexham.

In 1871 at No. 1 William Street, Felling, William Bales, foreman at chemical works, aged 31, his wife Hannah, aged 31, born Haydon Bridge, and son George Walker Bales, aged 3, born Haydon Bridge. Hannah died 2nd quarter of 1871, aged 32.

In 1881, at Parkers Terrace, Haydon Bridge, Ann Bailes, widow, housekeeper, aged 80, and grandson, George W. Bailes, aged 13. In 1891, at South Side, Haydon Bridge, Robert Wear Walker, single, tailor and draper, aged 50, brother William, single, tailor & draper, aged 43, nephew, George Walker Bailes, tailors assistant, aged 23, and mother in law Ann Walker, widow, retired laundress, aged 83.

I suspect that William remarried in the first quarter of 1873, to Jane Wynne. In 1881, at Flint, Flintshire, William Bales, chemical labourer, aged 40, born Alston Moor, his wife Jane 35, born Mostyn, Flint, , children Joseph Jesse 7, Annie 3, and William Wynne 1. Also in 1881, at Eyton Terrace, Flint, Thomas Bales, foreman in Alkali works, aged 39, and his wife Jane, aged 41, born Haydon Bridge.
In 1891, at 47, Chester St, Flint, Thomas Bales, chemical foreman, aged 48, and his wife Jane aged 50.
In 1891, at 24 Chester Street, Flint, William Bales, welders process foreman, aged 50, his wife Jane 45, children Joseph, clerk, aged 17, Ann 13, William Wynne 11, Mary Jane 5, and Thomas Davies 4. William died 2nd quarter of 1899, aged 58.
In 1901, at White House, Earl Street, Flint, Jane Bales, widow, aged 56, children, Joseph, chemical process foreman, aged 28, Annie 23, William Wynne, painter, aged 21, Mary Jane, confectioner, aged 17, and Thomas Davies 10.

17th November 1868 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Deaths
At Nenthead, near Alston, on October 26, Mary Readshaw, widow, aged 87 years.
Thomas Readshaw married Mary Pletts, 30th May 1807, witness, John Pletts, at St Augustine's, Alston.
Thomas Readshaw, was buried, 28th December 1838, aged 56, at Alston.
In 1841, at White Hall, Nenthead, Mary Readshaw aged 57, Tamar Readshaw 17, and Thomas Readshaw, lead miner, aged 15.
In 1851, at Fair Hill, Nenthead, Mary Readshaw, pauper, lead miners widow, aged 67, daughter Ann Readshaw 31, and grandson, Thomas aged 1.
In 1861, at Fair Hill, Nenthead, Mary Readshaw, lead miners widow, aged 77, daughter Ann Readshaw 41, and grandson, Thomas aged 11.

21st November 1868 (Hexham Courant)
FATAL ACCIDENT IN A LEAD MINE
On Tuesday, another of those unfortunate mine accidents which have of late been of so frequent occurrence took place at the Brownley Hill Lead mine, Alston Moor. The victim in this instance was a man of the name Daniel Thompson, who lived at Haggs, not far from the mine where the accident occurred, and was working with his partner Jonathan Smith, of Greenends. The men were engaged in blasting. Thompson fired a hole which, not getting work, he was in the act of adding more powder, when it exploded, and he was killed on the spot the "dreevil" or driver (an instrument used in blasting) having been literally driven through his head. Smith, who it is feared, has lost an eye, is not otherwise much injured. Thompson has left a widow and two children to lament his loss.
In 1841, at Green Ends, Nenthead, Jonathan Thompson, lead miner, aged 35, his wife Agnes (Harrison, married 16th August 1828) aged 30, children, William 10, Thomas 8, Henry 5, Robert 5, and Daniel 1.
In 1851, at High Galligill, Nenthead, Jonathan Thompson, lead miner, aged 45, his wife Agnes 41, children William, lead miner, aged 30, Thomas, lead

miner, aged 18, Henry, lead miner, aged 15, Robert, lead miner, aged 15, Daniel, lead miner, aged 10, Ann 8, Jonathon 6, Walton 4, Harrison 8 months, and house servant Ann Boud, aged 21.
In 1861, at Low Grassfield, Nenthead, Agness Thompson, widow, Stay maker, aged 51, sons Robert, lead miner, aged 25, Daniel, lead miner, aged 21, and Walton, lead miner, aged 14.
See 27th April 1866
In 1871, at Over Burn, Nenthead, Agnes Thompson, widow, lodging house keeper, aged 60, son Walton, lead ore miner, aged 22, granddaughter Isabella Thompson, spinner, aged 13, boarder Frances Wright, joiner, aged 48, boarder Robert Kidd, carpet weaver, aged 23, and lodger John Hutton, carpet weaver, aged 25.

1st January 1869 (Carlisle Patriot)

ALSTON

On Christmas Day H. W. Friend, Esq, of Harbut Lodge, again repeated his accustomed sumptuous entertainment of roast beef and plum pudding to the whole of the inmates of the Alston Workhouse. The rooms of the workhouse were decorated with suitable mottoes on the occasion, and the inmates highly appreciated this repetition of the numerous annual treats so kindly afforded them by their considerate and respected entertainer.

GARRIGILL

On Christmas Day the poor of this chapelry were kindly treated by Mrs Baylee, of Alston Vicarage, to a good dinner of plum pudding and roast beef, accompanied with a plentiful supply of nut-brown ale. The dinner was prepared and served up under the superintendence of Mrs Monkhouse, of Garrigill and ample justice was done to the good old English cheer Those who, on account of old age and infirmity, were unable to attend at the Parsonage, had dinners sent to their own homes.

Marriages

At Garrigill Church, on the 23rd inst., *Sic*, by the Rev. Geo. Monkhouse, Mr Robt. Hodgson, jun., The Hole, Tynehead, to Miss Ann Storey, of Tynehead House.

15th January 1869 (Carlisle Patriot)

GREAT AGES.—There are living in the Chapelry of Garrigill nine persons—four males and five females— whose united ages amount to 751 years. The youngest of the males is 80 years, and the youngest of the females 84 years. Some of the parties are wonderfully strong and active, especially the eldest of the females, who attained her 90th year last Midsummer, and who is still able to do her household work with comfort. This chapelry has from time to time produced both men and women who have reached ages almost patriarchal. John Martin died here in April, 1834, aged 103 years, and Mary Martin, his wife, in November 1836, aged 105 years, It is a fact worth relating that when a public tea party was held on the Village Green, after the passing of the Reform Bill of 1832 old Martin and his wife were present on the occasion. They were then in their 102nd year; the old man said grace, and the old woman had on her wedding dress.

26th January 1869 (Penrith Observer)

NENTHEAD POULTRY AND BIRD SHOW.

The annual show of this society was held on Friday, the 15th inst., in the handsome new school-room at Nenthead, built by the London Lead Company, and kindly lent for the occasion. Notwithstanding the unfavourable state of the weather, the attendance of spectators was very good. In a district so high above the sea-level—in fact, higher than Kirkstone Pass, upon which is erected "The Traveller's Rest," at a higher elevation, it has always been understood, than any other inhabited house in England—it was surprising to see so large and excellent a collection of birds; and the fact speaks volumes for the industry and skill of the miners and others who exhibited on this occasion. By the gentleman from Leeds, who acted as judge, and who is widely known for his ability in that capacity, the show was pronounced a very superior one. The poultry pens were arranged in a long double line down the centre of the room and the caged birds in their little tenements occupied the whole of one side and the ends of the building. There was a large entry of the latter, and they formed a very pleasant feature in the exhibition, and drew forth high encomiums from the judge. Great interest is manifested by the miners in rearing the little songsters; and nearly every one of their houses has its sweet warbler. The total number of entries was 172. Unfortunately a large number of entries from Yorkshire and other distant places arrived after the list was closed. The society, it is satisfactory to add, is in a prosperous state; and next year the committee will be in a position to offer more liberal prizes. The awards of the judge gave unqualified satisfaction. After the show the committee and others dined at the Miners' Arms inn, Nenthead, where an excellent spread was provided by Mr. John Walton, the worthy landlord. …

A WEARDALE MAN KILLED IN AUSTRALIA.

The "Australian Primitive Methodist Miscellany" for October 1868 contains a brief memoir of Joseph Ridley, who came to his death from a fall of earth, whilst pursuing his daily employment in a tunnel, working for gold. Deceased was a native of Weardale. He was born at Newlands near Stanhope in the year 1833 and emigrated to Australia twelve years ago. He was a member of the Victoria Primitive Methodists, and also a local preacher in that society. He married Miss Berry of Campbell's Creek, whom with 4 children he leaves to mourn his loss.

Australian mining records give the following: Joseph Ridley killed 25th June 1868 34 years old, married with 4 children, the mine was in the Castlemaine region, Guildford, Vaughan, Church's Flat, Bald Hill.

Marriages

At Chicago Illinois, North America, 14th ult. Mr R. B. Scott late of Alston Cumberland to Miss Euphemia only daughter of Wilfred Brandon Esq., Banker Chicago.

13th February 1869 (Hexham Herald)

Deaths

16th February 1869 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

PIGEON SHOOTING AT GARRIGILL.—On the 29th January, Mr. Joseph Watson, Rice View, Garrigill, afforded his sporting friends a day's sport at pigeons, of which he had a plentiful supply. The sport was patronised by a great number belonging to the neighbourhood and surrounding district. Although the day was very unfavourable for spectators, and most doubtful for the sportsmen, the shooting was excellent. The prize (to which the entrance money was added) was divided between Thomas Spark and Thomas Watson, both of Alston, third prize to John Millican, Garrigill. The next three prizes were divided between Thomas Spark and Thomas Todd, both of Alston, and William Lee, of Garrigill. A sweepstake was afterwards shot for, the prize being divided between Richard Hetherington and Thomas Elliott, both of Garrigill. The day following another sweepstake was shot for, and won by Richard Hetherington and William Lee. After all was finished, competitors and others sat down to an

excellent dinner, the serving up of which reflected great credit on the worthy host and hostess. The arrangements throughout gave great satisfaction.

20th February 1869 (Hexham Herald)

SERIOUS ACCIDENT AT FALLOWFIELD MINES.

Yesterday a young man, belonging Hexham named Peter Winslow *(Winsley?)*, had a narrow escape from being killed at the above mines. It appears that the injured man who was engaged in putting a tub into the cage at the shaft bottom, and the boy, whose duty it is to draw up the tubs, mistaking the signal from below set the engine in motion before the tub was properly secured. The consequence was that the tub tilted over while at considerable height and fell upon Winslow, rendering him completely senseless. The poor fellow was immediately brought to bank and conveyed home. ... it was discovered that the poor fellows kneecap was dislocated and the lower part of his thigh was fractured a little above the joint. What adds to the painfulness of the case is the fact that the young man is the sole support of his aged parents.

In 1871, at Victoria Yard, Hexham, Barnard Winsley, labourer gardens, aged 60, his wife Susan 60, and son Peter, plasterers labourer, aged 19.

NEW ZEALAND AND ITS HISTORY

A correspondent kindly forwards us the following letter, which we have great pleasure in publishing as a more truthful and interesting exposition of affairs in

that colony, we have seldom read. The letter is apparently written with no attempt at effect but with a shrewd observation of men and things, which cannot fail to strike the attention of the reader. The writer is a native of Allendale, and we give a short sketch as a preliminary of his rather eventful life. Beginning life as a shepherd boy in Allendale in which position he gained the esteem and respect of his master, we next find him in the employment of Mr Shield, the Allendale carrier of that day, and postmaster of the present day. The lad being of a very observing and thoughtful turn of mind anxious to improve himself and to see the world found little on the "roads" for intellectual advancement, and when six months had expired he left to the South. Railways were then just beginning to be made, and he found employment with Brassey & Co., the first railway contractors. With them he remained-being promoted to a place of trust, several years in the South of England, Wales, Spain, and America. Having had little education in his youth, and become possessed of a little money he returned to England, and placed himself under a teacher in Newcastle, to make good this defect, and remained there about twelve months. After this, he returned to America, and we believe, became a contractor himself along with another party, but it does not appear that he benefited by the step, and as it was about the time when the civil war broke out he returned again to this country. Shortly after his arrival, the gold diggings in New Zealand attracted his attention and he set out then with his wife and family, and we now leave him to tell his own tale: -

"Auckland, Remnora, New Zealand"

My Dear Friends, I have long been for writing to you. You must think that I have quite forgotten you all, but I have not; I have thought of you many a time since I came here, and the reason that I have not written before is that I would like to have had something worthwhile to send you. It is now five years and six months since we landed here, and I do say that I have been very much taken in with this country. In the first place, it is a long way from England, and the information that you receive in England about this part of the world is through some Government agents, and three parts out of four are lies, but you do not know this until you come here. I now proceed to give you, in detail, what I have seen and heard and done since I came.

We had a passage of 15 weeks. The ship was a good one, but not a quick sailor. We had about 120 passengers on board, English, Scotch, and Irish. My wife and family all stood the sea very well, considering that they had not been to sea before, and we all landed in good health. New Zealand is composed of three islands; the province of Auckland is the north island, the middle island is Canterbury, and the south island is "Stuart's Island". Auckland stands on a narrow neck of land between the Manukau Harbour, on the south side and the Waitameta, on the north side. It is laid out for a large town, but at the present time, there are about 10,000 inhabitants in it. In the year 1840, Jan 29, this Auckland was formed into a British colony. Three ships came here from Great Britain about that time to form it into the Britain of the south. I will try to give you a true account of what they were composed as near as possible; and their characters I will try to illustrate them by some that we all know and you will see what a lot they are composed of. I will take first old Will Carr and Sam and that lot, and then Toby Glen, John Hodgson, and Jack Herdman, and among this lot a few decent men that would do right, but the few is on the side of the minority; and at different times a few old escaped

convicts from Sydney and Tasmania, and now and then a few men that have failed in England and elsewhere, and you have the men that were to form the Britain of the south at once. The chief part of these men had no money nor no learning and no particular trade, and there they were, and when they landed they were had to work in making the roads and building a fort to protect themselves from the natives; and when they had to get their pay for their work there was no money to pay them with, so they paid them in land. Now, that land has become the city of Auckland, and it has made those worthless fellows the leading men of the place; they are members of Parliament and the aristocracy of the place, and they are a nice lot of fellows I do assure you; and these men are the lawmakers and rulers. This place was under the sole control of the British Government up to 15 years back; and the colonists at that time clamoured to have a constitution of their own to manage their own affairs and no doubt poor old John Bull was quite tired of them too, and gave it to them, and since then they have made a very nice mess of their affairs.

GOVERNMENT

Two Houses-Lords and Commons. The members are elected for four years, Whigs and Tories. One party that has been in power has borrowed money, and the other party has done the same, and now the National Debt of New Zealand is about £11,000,000. Each province has to pay its portion of the interest of this money, and with the revenue falling off so much, and this interest to meet, there is little left to make any improvements with. There are no statesmen amongst these men, and they have done some of the most stupid things possible. They have thrown the public money away right and left, and now they are short of funds to meet their liabilities, and nothing will do but direct taxation; this poll tax that is put on they cannot gather it, and they are at their wits end. In fact the Government is nothing else but a regular humbug and a mass of corruption and vile swindlers, and it is a fact that some of the greatest swindling has come to light that ever was known in any land; and when I came here I could not see what was to keep up the place but troops. House rent is very high, firing and living high, no roads made into the country where people could get on to the land and settle; and three months after we landed the war broke out, and the cause of the war was the over reaching disposition of the old colonists to get hold of native land; and that was the cause and nothing else. I was eyewitness to this. The General had 10,000 troops of the line, 9,000 militia, and all the latest improvements of implements of war; the Minnie rifle, the Enfield rifle, and from the 12lb. Armstrong gun up to 110lb. large gun, and commissary to back him, against a few almost naked savages, who, without commissariat, and only old flint and steel guns, fowling pieces, hedge slashers, their powder bad, living on fern roots and potatoes, beat him in almost every engagement, and where the natives lost one man we lost ten one way and the other, a very discreditable affair altogether for us. And you British taxpayers have to pay for this. Poor old John Bull is a nice, good-tempered old fellow, but he has been rightly done by these Auckland scoundrels.

LAND IN GENERAL

The face of the country is very broken and the land is very patchy. You may find from 10 acres up to 100 of very good and then very poor and bad land close to it, and a good deal of swamp land. Thousands of acres of this swamp can never be drained without great outlay, as it lies below the level of the sea,

and there is no natural grass on any of this land. In fact, I have seen some of the poorest land in this country that ever I did see in any part of the world I was in, and some so good that it would grow anything. Wheat has not been fairly tried yet. Almost all our breadstuff has come from California; in fact, we import almost everything, and export next to nothing, and we manufacture little or nothing but lies and bombast.

FARMS AND FARMING

There are some good farms near Auckland, but the farming is of the worst description, and this is a dreadful place for weeds growing. The old English Red Dock and Scotch Thistle are dreadful pests, and with the climate being so warm, they grow very fast, and ten times the size that they do in England. I have seen a thistle in a field not far from where we are living that a full grown four year old bullock might stand in the back side of it and scarcely be seen, and the seed of these thistles flies away all over the country. The English white thorn for hedge purposes grows well here, and the oak-and in fact all English wood-grows well here.

CATTLE

Here is the Durham short horn breed imported, the Herefordshire breed, Alderney cow, Irish and Devonshire, and a breed of cattle imported from Sydney of very large bone. They are mixed between Irish and Devon, and all thrive well. Cattle lie out all the year round. There is plenty of grass in the winter. Beef at this time is from 6d to 8d per lb, and it has been as high as 1s.

SHEEP

We have the Leicestershire pure breed, the Lincolnshire breed, Cheviot, Southdown, the pure Merino, and half-breed and mixed breeds without number. Mutton is from 6d to 8d per lb; wool from 8d to 1s 3d per lb at the last sales.

HORSES

We have the English draught horse and Scotch draught of all colours, shapes, and sizes; the English racer and hack; and as for Asses, we are rather short of them with the long ears, but have plenty of them with the short ones.

PIGS

We have the Hampshire short nose, the Irish long nose; and in fact, all sorts.

TIMBER

This New Zealand bush is composed of a great variety of different sorts, some very useful timber, and others fit for nothing but to burn. The Koori pine is the largest tree that I have ever seen; plenty of the 140 feet without a branch, 6 and 8 and 10 and 13 feet diameter, but the New Zealand bush is one of the most terrible places that ever I was in to travel through for underwood. The houses are all mostly built from timber.

MINERALS

The place has been very much shaken with volcanic eruptions; in fact, it seems to me that the whole of these islands have been thrown up out of the sea some time or another. We have coal, steel sand- (the steel sand is supposed to be the best in the known world, and mountains of it), limestone, iron ore, gold and copper; I do not hear of much lead, and with all this mineral, they import all their iron from home.

SEASONS

The seasons are just the reverse of yours at home; the longest day in England is the shortest here.

MONEY

All the English coin goes here in full value, the same as it does at home.

BANK INTEREST

Is ten per cent, but money has been up from that to 15, 20, 30, and 35 per cent. After the troops were withdrawn everything came down in a crash, and all commercial things seemed in convulsion, banks failing, merchants failing, and everything at a complete stagnation for over two years.

THE CLIMATE

Is very good, although a good deal of rain falls in the winter, and we have consequently much damp weather. The climate is the only thing that I like about the place; I hate the mean, dirty way they have of doing business, and all men say the same that have travelled and seen the way things are done in other countries.

THE NATIVE RACE

It is supposed that they came from the island of Aratonga, five thousand miles from the mainland of New Zealand. They are men of large bone, strong and warlike, with long black hair. They run about almost naked, just with a blanket and a mat round their shoulders, and that is the dress, except those that are a little higher up in the world, and then they come out great swells. It would have been a great blessing if they could have been civilised, but there is no hope for it now.

THE COUNTRY

The country is not opened up with roads, and people cannot get on to their land to settle on it. They expended £119,000 on a worthless five miles of railway that has never been opened, and engines and carriages are all lying rotting. They tried to get my old masters Messrs Brassey and Co., to finish it for them, but they had no security to give them, and they would not have anything to do with it, and there it stands as a monument of imbecility and humbug. There are plenty of farms for sale at the present time, but few people have got money to buy them with. There have been hundreds of people ruined by coming to this country, and solely through the bad management of the Government, and confidence went down to nothing. But through the gold field that has been found at the Thames confidence has now revived a little. Gold has been found in that district for thirty miles along the coast and ten miles inland, and there is some very good claims, but it is all quartz and requires considerable expense and labour. The gold has been found at the level of the sea, one hundred feet below it, and as high as 1,500 to 2,000 feet above that level. I have been down at the diggings nine months but I did not succeed in finding gold; I am at the present time manager of a claim for a party, and I live in hopes of doing something better. This quartz reefing is veins of rock, or spar, as we call it at home, and the gold is found in it. It is then taken and crushed by stampers. The sand runs away, and the gold is picked up by quick silver. The veins run from a penny piece in thickness up to five or six feet, and at times more than that. It is a dreadful rough country where it is found, full of deep gullies and glens. There are about 10,000 men at the diggings, and there have been two new towns built within the last twelve months near the place. We bought a piece of land two miles from the town of Auckland, and built a house on it. I have had several small contracts, but nothing to any good, in fact, I do not see nor hear of any person doing any good that came out about the time we did. We have got 137

acres of land about 80 miles from Auckland; it is very good land, situated on the banks of one of the finest rivers in New Zealand, but there is no direct road to it from Auckland. A ton of goods would cost more to get to it than it would cost to get it from London to Auckland. There are hundreds of people just in the same fix with their land. Mrs Dent has kept a grocer's shop ever since we have been in Auckland, and we are thinking of moving down to the diggings, which are about fifty miles from Auckland. We can sail it in five hours.

HOME INQUIRIES

I have heard there is a railway being made up Allendale, and when you write, tell me which way it has gone and who were the contractors of it. I would like to know how the level from Allendale Town to Allenheads is getting on, whether they have ever got through with it or not. *(Talking of the Blackett level)*

THE MAORIS AND CONFISCATION

The Maori prisoners that were taken during the war were sent to Chatham Islands, but made their escape to the main land of New Zealand, and our colonial force was sent to intercept them. The news has just arrived to night that there has been a desperate fight, six of our men being killed and five wounded. This may lead to another blaze of war. There have been altogether confiscated from the natives 583,000 acres, comprising 43,000 acres of first class, at 15s per acre; 216,000 acres of second class at 10s per acre; and 324,000 acres (inclusive of 155,000 acres of swamp) of third class, at 5s per acre. This is what we have got for all the blood we have shed, and all the money we have robbed the British taxpayer of, and I think the cost of the war was three millions sterling, and all to gratify a few old, low colonists. Some of the old colonists would like to compare this country with America, but there has been more real progress made in some of the Western States of America in four or five years than has been made in the province of Auckland altogether. We have got here a lot of very low and unprincipled men and men of principle will not allow themselves to assist in managing the affairs of the country, so you see how it is.

WHOLESALE PRICES

Flour, £24 per ton; potatoes, £6 per ton; butter, 1s 6d per lb.; bacon, 1s per lb., colonial sugar, 6d per lb., eggs, 1s 3d, and 1s 6d per dozen; tea, 2s 6d to 3s per lb., candles, 7d and 8d per lb.

October 28th, 1868.

5th March 1869 (Newcastle Courant)

INQUESTS AT NEWBROUGH. —On Saturday, Mr Cockcroft, coroner, held an inquest at the house of Mr Richard Surtees, Newbrough, on the body of Thomas Jackson, aged 20 years, a lead miner. The deceased was employed at Stonecroft and Greyside lend mines, and on the 18th of February was working along with his father underground, when a stone fell from the side of the mine and hit the deceased on the back of the head, producing concussion of the brain, from which he died on the 20th of the month. Verdict, "Accidental death."

In 1861, at Greyside Farm, Newbrough, Joseph Jackson, lead miner, aged 51, his wife Susannah 46, children Emerson, lead miner, aged 18, Hannah 15, Thomas, lead miner, aged 12, Sarah 10, Mary Ann 4, Jane 1, and lodger, Ralph Shipley, horse keeper, aged 22. In 1871, at Stonecroft mines, Joseph

Jackson, engine man at lead mines, aged 60, his wife Susan 56, daughters Sarah, dressmaker, aged 20, and Jane 11

6th March 1869 (Hexham Courant)
Marriages

In 1851, James aged 9 and Isabella aged 7 were visiting Mary Dixon and her family at Faw Side House, Allenheads. William their father, widow, lead smelting agent, aged 34, born Warkworth, was at Linzgarth, Stanhope, with his son, John Michael aged 2.
The 1851 census shows Mary Dixon, unmarried, dressmaker & milliner, aged 27, her unmarried sisters Ann aged 25, Eliz, dressmaker, aged 23, Jane 9, unmarried brothers, John, lead ore dresser, aged21, Joseph, lead ore dresser, 19, Stephen, joiner, 17, Thos, surveyor, 16, visitors James Johnson 9, and Isabella Johnson 7.
In 1861, at Linzgarth, Stanhope, William James Johnston aged 44, manager of lead smelting works, aged 44, born Northumberland, Warkworth, his wife Ellen aged 28 (died 1863?), born Leicestershire, sons James Armstrong employed in lead smelting works, born Allendale, aged 19, Charles aged 2, born Linzgarth, Rookhope Henry aged 4, born Linzgarth, Rookhope, Durham, daughters, Isabella, Cr. aged 17, Margaret Jean, 13, Ellen 1, born, Linzgarth, Rookhope.
Thomas Steel the Smelting Agent at the W. B. Lead works at Allendale, living at Pods Bank in 1861, died in 1864.

In 1871, at Pods Bank, Allendale, William James Johnson widow agent, aged 54, unmarried daughters, Margaret Jean, aged 23, Ellen C. aged 11, granddaughter Isabella Jane aged 1, born Rookhope, and nephew, Charles Henry Small aged 16, born Boston Lincolnshire.
William James Johnson died 3rd June 1898, at Dunedin, New Zealand, aged 84.

WEARDALE

DEPARTURE OF EMIGRANTS. On Monday morning last, at an early hour an interesting scene was witnessed at St John's Chapel, owing to some twenty young men belonging to Weardale taking their departure for America. The emigrants were all fine young men, from twenty to six and twenty years of age, and whilst bidding adieu to their comrades, parents, brothers, sisters and sweethearts, to the many country people who had gathered at St. John's to witness their departure the scene was affecting. The emigrants went by way of Middleton in Teesdale, and from thence to Liverpool, where they took shipping on Wednesday.

6th July 1869 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
GARRIGILL GATE FRIENDLY SOCIETY.— The annual gathering of the members of this most useful provident society took place on Friday, the 25th ult. The business. portion of the proceedings was transacted in the forenoon, The accounts of Mr. William Thomason, the indefatigable secretary, had been audited by Mr. Robert Den, and Mr. Benjamin Wallace, of Garrigill, and they were found to be in a highly satisfactory state. The number of members is 314, and they possess a capital of £854 10s. During the past year there was an

excess of expenditure over income, but as it only amounted to a few shillings, it is immaterial as effecting the position of the society. As an instance of what great results may be achieved by unity of action, we may mention that during Mr. Thomason's secretary-ship—a period of sixteen years—the sum of £7,290 5s. 1½d., has been paid for sickness, deaths, and management,—and the latter is an insignificant item, as the total amount paid to the secretary, stewards, beadle, and for coal and other incidental expenses has only averaged £7 annually. The festivities of the day commenced at half-past two when the Garrigill brass band entered an appearance upon the village green, and they were soon surrounded by a large number of the members and their friends. A procession was formed, headed by the band, followed by many young ladies and gentlemen and the members of the club, and the rear was brought up by a company of visitors evidently bent upon enjoyment. A march round the village, and the ordinary interchange of courtesies, brought four o'clock, the time appointed for tea. The tables were very tastefully laid out, bearing a profusion of bouquets and other floral devices, and the attendance of the ladies lent additional interest to the scene, The company numbered 265, and nothing was wanting that could add to their enjoyment, Shortly after six o'clock the chair was taken by Mr. William Hutchinson, of Garrigill. A commodious platform had been erected. The Chairman complimented the company upon their very numerous attendance, he enlarged upon the great amount of good this society had effected, and he strongly urged upon all young persons the necessity of joining it,—thus providing against the deprivations which too frequently accompany affliction. Mr. Hugh Henderson also pointed out the great importance of making early provision against the loss of labour by sickness, and he showed that many of the rising generation owed a debt of gratitude to this society for the manner in which they had been benefitted by their parents and friends having participated in its funds. A vote of thanks to the ladies for presiding at the tables concluded this portion of the proceedings. Later in the evening, many of the members supped together, and the utmost harmony prevailed.

10th July 1869 (Hexham Herald)

BLANCHLAND

BELDON MINES. The above mines have been recommenced by a new company, who have purchases the "lease" &c., from the old company, and as a little fresh blood is infused into the undertaking this time, we hope they will go on in a persevering manner. At present a new commencement is being made by sinking a shaft on the Reading side of the fell, and as Mr Barron, the agent is quite certain of finding ore on either side of the shaft bottom we hope to be able in a short time to have the pleasure of reporting favourably of their future operations. We hope the veins when found will prove rich and valuable alike to shareholders and workmen.

We are sorry to add that the Derwent mines are only poor at present. ...

20th July 1869 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

GARRIGILL.—The teachers and scholars of the Primitive Methodist Sunday school at Garrigill had a trip to Gilsland on the 12th instant, that being the day which the general trip to Carlisle and Gilsland took place. The party arrived at

Alston, headed by the Garrigill brass band, which played a selection of music previous to the departure of the train. Arrived at the scene of the day's pleasure, no time was lost in visiting the various places of interest with which the whole district abounds, and at intervals during the day both vocal and instrumental music enlivened the proceedings.

Marriages

At the Wesleyan Chapel, Alston, on the 10th inst., by the Rev. John Newton, Mr Joseph Currah, of Crooks, Garrigill, to Miss Elizabeth Varty, of Alston.

Institute of Mechanical Engineers

THE ALLENHEADS EXCURSION.

The party of members bound for Allendale and the works of Mr. W. B. Beaumont, M.P. left the Central Station by special train at half-past nine o'clock. About forty gentlemen elected to join this excursion, and but for the threatening state of the weather many more would doubtless have availed themselves of this opportunity of visiting these famous lead mines. As the party journeyed between Newcastle and Hexham rain fell heavily, and there was a strong prospect before them of spending a very unpleasant day. But fortunately a change occurred before mid-day, and the afternoon was sunny and highly enjoyable. About half a mile pest Hexham the special left the main line of the Newcastle and Carlisle Railway, and took to the Allen dale Branch. Here the locomotive labours up steep gradients almost the whole distance for which the line is as yet constructed; and as the passenger reaches the high land bordering the easterly bank of the Allen, a succession of splendid views are disclosed, Near the Langley are the ruins of the ancient castle of that name, and at Staward the thickly wooded banks of the vale present a moat romantic appearance. The present terminus of the railway is al Catton Road, about fourteen miles from Hexham, and here bleak fells rising ridge above ridge confront the traveller. Allenheads, the destination of the excursion, being nine miles farther up the dale, provision had to he made for the conveyance of the party thither by road. To this end a stage coach usually running in Weardale, a couple of drags, and a long spring waggon, drawn by four horses, had been secured, and the excursionists were conveyed in them from Catton Road to Allendale and back at a charge of 6s. each.

It had been arranged that the party, after leaving Catton, should separate for a time into two divisions. It was intended that the first section should visit

Holmes Linn and examine the hydraulic engines fitted up there, and the new boring machine brought to the place for inspection, while the second hand of excursionists should pay a visit to the famous "Blackett Level" the adit of which is near Allendale Town. The arrangements were fully carried out so far as regards the first section of the party, but those intending to proceed underground were not able to fulfil their intention, it being found that there was not time to conduct them through so as to allow of their arrival at Allenheads In time for dinner. The works in the Blackett Level are too well-known in the north to need anything more than passing mention. When finished it will be about seven miles in length, extending from Allendale Town to the mines at Allenheads, but not half of it has yet been tunnelled. It is intended to drain the mines by means of this level, and it may also possibly be used for the conveyance of material and other purposes. At intervals along the dale shafts are sunk down to the tunnel; the first from Allendale Town is that at Studdon Dene, which is 13½ fathoms deep; the second is at Holmes Linn, 32 fathoms deep: the third third at Sipton 33 fathoms deep; and the fourth at Breckon Hill, 71½ fathoms deep. The shaft at the mines at Allenheads is 103 1-3rd fathoms deep. It will be noticed that the ground rises very rapidly from Allendale Town to Allenheads. The mouth of the adit is 679 feet above the level of the sea, while the main shaft at Allenheads is 1,400 feet above the sea level. The shaft visited by the excursionists was the one at Holmes Linn. Sir Wm. Armstrong guided the party over the works and explained the construction of the splendid hydraulic winding and pumping engines used at the shaft. No steam is used for compression, but power is stored in a large accumulator and used when required. After inspecting the large gin and the pumping engine, the party adjourned to a meadow close by the river ride, where Mr. Westmacott explained the details of the new hydraulic boring machine, which he has invented and patented. In previous machines the stroke has been made by percussion of the boring tool against the rock; this occasioned great liability to breakage of the instrument, and a rapid wearing smaller of the cutting surface. To obviate these defects Mr. Westmacott's invention places the boring iron close against the rock, and it is struck with a hammer using a force of half a ton. The cutting end is shaped almost like the letter H, and a revolving action being given to the iron, the hole made is a circular one. The blow given to the hammer is from a powerful spring, which is worked in a very ingenious manner, and can be set going with great rapidity. Upon a trial of its speed upon a block of hard stone set up on the river's bank it bored a hole of nine inches in length In two minutes fifty-five seconds. The machine is very compact, and comes within small compass. It is the only one at present in work, but so far its performance is understood to have been highly satisfactory, and yesterday it elicited expressions of the highest approval from several of the engineers present when it was shown. After about on hour spent at Holmes Linn the party proceeded back to their conveyances, and continued their journey on to Allenheads. Up hill aides at unpleasantly acute angles the party journeyed on their way, the occupants of the waggon being jolted and shaken as if an intimate mixture of the occupants was desired. The broad possessions of Mr, Beaumont spread out on every hand, bleak and bare enough of surface, but rich with mineral wealth below, and as extensive in acreage as the patrimony of one of the bygone German princelings. On the road processions of carts passed by, some bearing the finished "pieces" of

lead stamped with the well known initials “W.B.'' and the year of manufacture 1869 while others carried piles of bags filled with the picked and broken ore on its way to the refining furnaces. Wind-blown urchins, brown as the heathery moors which frowned on every side, ran out of comfortable roadside cottages to see the procession pass, and sturdy lads and lasses busy haymaking on the hillsides which rise immediately from the level of the road, intermitted their labours for a few moments to stare and wonder who the intruders could be. At length Kilhope Law rises grandly in front, and nestling close to the foot of the immense mountain ridge, the town of Allendale, with the above ground plant of the lead works, is seen. Mr. W. B. Beaumont and Lady Margaret Beaumont are at present absent on the Continent, but Mr, T. Sopwith, F.RS. C.E. chief engineer and agent of the mines, with Mr. Curry and other officials, gave a warm welcome to the visitors, and no time is lost in conducting them over the works at bank. First is seen the splendid hydraulic engine at the winding house, constructed by Sir William Armstrong nineteen years ago; Mr, Sopwith informs the visitors that it has bean in continual use since the date of its erection on the spot, and that he “does not think has cost a sovereign in repairs during that time.”

Then the processes fur breaking, picking, cleaning, and separating the ore are witnessed in operation in a large range of buildings, after which the party adjourn to the Mine Offices. The excursionists were soon called together in the chief engineer’s room, and Mr. Sopwith proceeded to give a brief description of the district, illustrated by maps, models, &c. He expressed the pleasure it gave him to see the President and so many of the members of the Institution of Mechanical Engineers at Allenheads, and was sorry that Mr. Beaumont and Lady Margaret Beaumont were not present to give them a hearty welcome. He was sorry that the short space of time at their disposal would not permit them to take a leisurely view of what was to be seen, and for himself, he would detain them only a very short space. He then pointed out the position of Allenheads upon the map of England and the geological features of the locality. With regard to the rainfall at the place, whereas in the greatest part of the level ground of England the annual fall was from 23 to 25 inches, at Allenheads they had from 50 to 60 inches per annum; and one year they had as much as 70 inches of rain. With reference to the geology of the district, he mentioned that If they looked at the strata best known to them— the carboniferous or mountain limestone, which lay below the coal at Newcastle— they would find that, although they had ascended a considerable height above the sea yet the same strata formed the summit of these hills. At Crossfell the bed of limestone—many feet below them where they now stood-cropped cut to form the summit of the Pennine Chain. From a point near Cullercoats to the Pennine Chain-on a portion of which they were now standing—ran the well-known 90-fathom dyke. Soon after leaving the coast the dyke travelled in nearly the same direction as the Tyne until it bore away and met the great Pennine fault near Crossfell The ground then about here had evidently been deposited level, and a gradual rise as shown by the plans, had taken place. [Plans exhibited] He pointed out the veins or fissures of the strata in which the ore was worked, and called particular attention to a remarkable subsidence, which occurred a few miles from that place. Of the contents of those veins of ore the visitors might have formed some conception from their visit of that

clay. They found a good deal of amorphous and crystalline quartz with some zinc and lead.
The quantity of metal produced from their works in a year, if placed along in eight stone pieces would reach nearly a hundred miles. He then passed onto speak of the hydraulic machinery with which the works were fitted. The establishment of Sir William Armstrong, at Elswick, was formed about the same time he (Mr. Sopwith) came to take the management of those mines, and he availed himself of the science and skill of that gentleman-or rather he recommended Mr Beaumont to avail himself of them-and he could now point out the Gin engine, which had been at work for nineteen years with the same regularity as they now saw it, as a specimen of the work of the firm. And he might say that that was the general character of the entire machinery supplied by Sir William. At the last meeting of the Mechanical Engineers in Newcastle, he (Mr. Sopwith) took occasion to speak of the efficiency of hydraulic machinery, and he would now only say "ditto" to what he said then. (Applause.) The reservoir, by which water was collected for the use of their hydraulic engines were several in number, one of them was 8½ acres in extant, and contained 16 millions of gallons. The machinery employed about the immediate neighbourhood of where they stood, apart from the Blackett level engines, amounted to about 200 horse power. The Blackett level engines might be approximated at 300 horse power, so that they had about 500 horse power altogether, The number of accidents in the Allendale mines amounted to no more than about one life In two years. In conclusion, he referred to the importance of getting improved mechanical means for boring rock. At. Holm's Hill they had seen the boring machine invented by Mr. Westmacott, and he had to state that it had done very well during the time it had been in operation. (Applause.) …

21st August 1869 (Hexham Courant)

NETHER HEARTH MINE NEAR ALSTON CUMBERLAND

This mine is now being worked in a spirited manner, with a splendid prospect of success, and is at the present time producing considerable quantities of ore from surface work, from which more has been obtained than from any mine in the district, upward of 1,700 bings having been raised by the present Company. Principally from one vein. In one portion of the sett upwards of 80 Bings of ore were raised by three men in one week, a fact almost unparalleled in the history of mining adventures. The mine has never been tried in depth, and experience has proved that mines, when rich at the surface are always much richer in lower sills. In the adjoining sett - Teesside - a shaft was sunk only 20 fathoms and 2,500 bings of ore raised in a length of ground only 50 fathoms on one vein, and this where the surface work was comparatively poor. The present company are now sinking a shaft to make this trial, and there is no doubt when it is completed, one of the richest mines ever opened will be the result (Mining Journal)

Deaths
At Low Mill, Allendale, 18th inst aged 64 years Mr Joseph Dickinson Lead ore smelter.
In 1861, at Low Mill, Allendale, Joseph Dickinson, lead ore smelter, aged 56, his wife Tamar 57, children Joseph, lead ore smelter, aged 23, Tamar 21, and Ester Jane 10.

7th September 1869 (Penrith Observer)
NENTHEAD FLOWER SHOW
The twentieth show of the Nenthead Floral and Horticultural Society took place in the School-room of the London Lead Company, at Nenthead, on Friday, the 27th ult. The weather was all that could be desired, and the show did credit to those on whom fell the arduous duty of organising it, and to the village generally, and, but for some unfortunate dissentions, which all must deplore, amongst the late committee and exhibitors, might be made even better than it is at present. The Nenthead band was in attendance and enlivened the proceedings by playing at intervals during the time the exhibition was open.

10th September 1869 (Morning Post)
GUN-COTTON AS A MINING AGENT
(From the Pall Mall Gazette.)
Among the papers presented to Parliament last session, and which have received lets attention than we think they deserve, are some documents which formed the return to a motion for “the production of so much of any recent reports on gun-cotton, or other explosive substances, as may convey information to guide the employment of such substances for mining purposes.” Considering that the Nitro-glycerine Bill is likely to have the desirable effect of turning the attention of miners into another channel, we shall probably be serving some useful purpose if we give the substance of these reports and state upon what sort of authority they rest. In February, 1864, a special committee was appointed by Lord de Grey to “inquire into the properties of guncotton as a substitute for gunpowder,” in its warlike and industrial applications. The committee consisted of Major-General Sir E. Sabine, R.A., president; Major- General Hay, Captain Brandreth, R.N., Lieutenant- Colonel Boxer, R.A., Lieutenant-Colonel Lovell, R.E., Commander Liddell, R.N., Mr. F. A. Abel, Mr. Thomas Sopwith, Professor Stokes, Professor Miller, and Dr. Gladstone—members; with Major Miller, R.A., as secretary. The appointment of the committee was at the instance of the distinguished officer who was nominated president, and who, in an able memorandum dated January 19, 1864, presented on the part of the British Association, defined in general terms the direction which such an inquiry as that which the committee was appointed to institute ought to take. The basis of General Sabine’s

memorandum was the success, which was reported to have attended the Austrian experiments with gun-cotton, and the statements, which had been made as to the advantages, which, in its application to ordnance, gun-cotton had been found in the course of those experiments to possess over gunpowder. The committee sat until May, 1868, when it was somewhat summarily dissolved, the authorities having apparently become impatient at the absence of any decisive results. It seems to have been expected that the question of the supersession of gunpowder would be effected in a moment; that the committee would, offhand, report either for or against gun-cotton. A glance at the number of points enumerated in General Sabine's memorandum, and a very slight knowledge of the subject, ought to have satisfied any one that this was impossible; that many experiments and an inquiry extending over several years would be necessary before a conclusive opinion could be expressed one way or the other. Considering the magnitude of the subject and the comparatively short time that they were engaged upon it, we think that the committee did some really good work. They elicited some facts and made several experiments, which cannot fail to have an important, if not a decisive, bearing upon the future possible application of gun-cotton to ordnance purposes. But with this part of the subject, and with the general conclusions of the committee, we hope to deal on another occasion. What we are now move immediately concerned with is that portion of the investigation which had reference to the employment of guncotton for mining purposes, and which forms the substance of the parliamentary papers now before us. On this Part of the question, which is much less difficult and complicated than the portion, which deals with the use of gun-cotton for artillery and small arms, the experiments appear to us to have been tolerably conclusive. These experiments were made mainly in mines and quarries on the property of Mr. Beaumont, M.P., who offered every facility for the purpose. These mines are situated in the neighbourhood of Allenheads, in Northumberland, and being under the management of Mr. Sopwith, a member of the committee, nothing was wanted to make the experiments as complete and satisfactory as possible. The experiments may be divided into three main series— 1st, the experimental use of gun-cotton in the form recommended by Baron Von Lenk—namely, hollow rope, carefully prepared; 2d, gun-cotton in the granulated and compressed form, as proposed by Mr. Abel; 3d, compressed gun-cotton, fired by means of detonating primers.

The Lenk gun-cotton was found to be much more powerful than the gunpowder tried in comparison with it, in the proportion of about five or six to one. But it was at the same time very much more costly, being about seven times the price of the gunpowder, weight for weight. On the other hand, the space occupied by the gun-cotton was much less than was required for the gunpowder, an advantage which was, however, to some extent neutralised by the superior adaptability of the gunpowder to the irregularities of the blasting-holes in unsound ground. The absence of smoke with gun-cotton is a distinct advantage, but against this is to be set the difference in the character of the vapours from the exploded guncotton when the combustion is imperfect, and which are reported to have been “unpleasant and irritating to the throat and eyes.” The committee examined several superintending inspectors and practical miners as to the comparative advantages and objections connected with the use of gunpowder and gun-cotton. This evidence is printed with the

papers, and it exhibits on the whole a general feeling against this description of gun-cotton. The miners admitted its superior destructive power and other advantages; but they objected strongly to the gases, and in some instances appeared to think the gun-cotton “less safe” than powder—more liable, that is to say, to accidental ignition. Further, the property, which the gunpowder possesses of finding its way into cavities, was recognised as a considerable practical advantage in vein workings.

The second series of experiments was made with granulated and compressed gun-cotton, prepared from pulp. Gun-cotton in either of these forms is a far more perfect substance than the rope cotton, and, as might have been anticipated, it proved itself “decidedly more effective as a blasting material” than the latter. In the case of the granulated cotton this was attributed partly “to the greater rapidity of the gun-cotton when in the form of light granules,” and partly to the circumstances that the granules generally filled up the blasting-hole better than the rope; in the case of the compressed gun-cotton which was used in the form of small lozenge-shaped fragments, its superiority both to the rope and granulated cotton was ascribed “to the fact of its occupying less space, and therefore affording room in a hole for a proportionally larger amount of tamping, and also bringing the destructive agent well in rear of the work to be performed.” The compressed gun-cotton was preferred to the granulated material, not only on account of its superior destructiveness, but because there is some risk with the latter of small particles lodging on the sides of the holes. The broad results were expressed in these words:

“It appears from these trials that the employment of gun-cotton, either in the compressed or granular form, as experimented with, is likely to be of material use for quarrying, mining, and general engineering purposes, and that in the effective power of the explosion, and the comparatively small space which it occupies, it possesses decided superiority over gun-cotton charges in the form of rope.”

The most important series of experiments, however, was the third, which was undertaken by Messrs. Sopwith and Abel in February last. In the interval which has elapsed since the dissolution of the committee the discovery, which we some time since more specifically described, had been made that gun-cotton, when exploded by detonation instead of by simple inflammation or ignition, developed a totally new and much more powerful action. Among other important characteristics of guncotton exploded in this way is one, which possesses for the miner a very great importance. The gun-cotton need no longer be closely confined, and the dangerous and troublesome process of tamping may therefore be wholly dispensed with. We wish that our space permitted of our reciting these experiments in detail. As that is impossible, we must content ourselves with recording one or two of the more remarkable results, and stating the general conclusions to be drawn from them. In one instance an unsound hole was recharged and an effective blast accomplished. Upon this experiment it is observed that “recharging of unsound holes is a new feature, for neither gunpowder nor gun-cotton, when used in the ordinary manner, would have accomplished such results as were obtained.” A 20-inch hole going sideways into the face of the rock at an angle of about 45 degrees was charged with 2.6 oz. of compressed cotton, which was fired by detonation. The rock “ was torn open in all directions,” and in the inspector's

notes this was recorded as an “extraordinary good result.” A 24-inch hole bored vertically from a horizontal surface at 4½ ft. from one face and 2½ ft. from the other, the rock being fast on the other two sides, was charged with 4.34 oz. of cotton. The height of the rock from the floor of the quarry was 2ft 5in. The entire block of rock was broken up level with the ground, and several of the fragments were scattered. “This hole had been pronounced enormously strong; it could not have been attempted with powder, and the work done was magnificent.”
The mining inspector who witnessed these experiments stated that the results “quite exceeded anything he had ever seen, and were quite beyond what he could have credited had he not been an eye-witness thereto.” An interesting illustration is given of the different results obtained by the use of the detonating primer as compared with the explosion of gun-cotton by an ordinary fuze. “A disk of gun-cotton weighing one ounce was laid upon a large slab of sandstone, and fired by means of the ordinary fuse. It merely ignited with a sudden burst of flame, without much noise, entirely without violence, and quietly burnt away in about 30 seconds, doing no injury to surrounding substances; but when the same quantity was laid on the same stone was fired by means of a detonating primer, the whole mass instantaneously exploded with a report as loud as a cannon, with an amount of destructive energy which could with difficulty be understood by anyone who had not seen and carefully examined the result; not only was the stone shattered and broken into many pieces, but those portions of it which were immediately under the charge were literally ground and crushed into sand.” When it is added that this substance is perfectly safe to store, transport, and handle; that its combustion when fired in this way is so complete that no noxious gases are given forth; and that the primers are “quite harmless, as much so as ordinary percussion caps for fowling-pieces,” we shall have said enough to direct the attention of engineers to these papers, which contain matter worthy of their earnest consideration. The French, stimulated by the results obtained in this country, are about to commence some mining experiments with this material in a few weeks. Of the possible military applications of gun-cotton we must speak on another occasion.

18th September 1869 (Hexham Herald)
Deaths
At Nenthead, 13th inst., aged 51 years, Mr Thomas Tatters, Lead Miner.
In 1851, at Overwater, Thomas Tatters, lead miner, aged 32, his wife Jane 28 (married 1st February 1845, Alston), children Thomas 3 and Ann 1.
In 1861, Thomas Tatters, lead ore miner, aged 43, living at Overwater, Nenthead with his wife Jane 40, children, Thomas 13, Ann 11, Elizabeth 3, and his two brothers also lead miners James 42, and George 37.
In 1871, at Overwater, Jane Tatters, widow, aged 50, son Thomas, lead miner, aged 23, daughter Elizabeth 13, boarder, George Tatters, lead miner, aged 47.
At Nenthead, 15th inst., aged 47 years, Mr William Hill, Lead Miner.
Son of James & Margaret Hill, in 1861 living at Wellgill, Dykeheads with his wife Mary (Thompson married 1842, daughter of Sarah & John) aged 46, and children Mary Jane 18, James lead miner 14, William 5, and Hannah Sarah 11 months. Their son John Thompson Hill born 1844 had died in 1852.

25th September 1869 (Hexham Courant)
Deaths
At Garrigill, near Alston, 20th inst. aged 62 Mr Moses Smith, Lead miner.
Married Margaret Moreland at St John Garrigill 19th December 1835 and in 1861 living at Low Nest, Garrigill, the family consisted of Moses (born Yorkshire) and his wife Margaret aged 47, and their children, Elijah lead miner 24, Sarah 17, Joshua lead miner 15, Margaret 12, Elizabeth 9, Wilkinson 7, David 4, Thomas V. 1.
The 1841 census shows a son Wilkinson aged 10; the register of deaths has a Wilkinson Smith recorded as dying at Alston in 1851, and 1854.
Moses Smith baptised 20th April 1806 at Marrick, Yorkshire, father Wilkinson Smith married Ann Hodgson at Marrick on 6th January 1803.
In 1841 Wilkinson Smith 60, lead miner and his wife Ann 60 were living in Garrigill with Ann 20, David 20, Aaron 15, Elizah 13, Silas 2. Moses father died 1851 or 1854.
At Alston 17th inst, aged 85, Mrs Hannah Walton, late of the Swan Inn Alston.
In 1841, at Circus Lane, Alston, Thomas Walton, labourer, aged 55, his wife Hannah 50, children Jane 15, and Ann 12. In 1851, at Alston, Hannah Walton, widow, innkeeper, aged 65, and daughters Jane, dressmaker, aged 25, and Ann 22. See 2nd December 1837.

2nd October 1869 (Kendal Mercury)
Deaths
On the 20th ult., at Glenridding House, Patterdale, Mr Wm. Barron, agent at the Greenside Mines, aged 54 years.

In memory of William Barron, Mining Agent, who died 20th Sep. 1869, aged 54 years.
Also of Jane his wife, who died 11th Feb, 1878, aged 63 years.
Interred at Woodhouse Lane Cemetery, Leeds.
Also of Jane Barron, their only daughter, who died Jan 21st 1918.
Interred In the foresaid cemetery.

9th October 1869 (Hexham Courant)
Marriage
At Kendal at St Thomas Church 30th ult., Mr Thomas Wilson of Shotley Bridge to Margaret Isabella Featonby of Crook Hall, Lanchester.

15th October 1869 (Newcastle Courant)
THE ALLENDALS ROAD TRUSTEES AND MR BEAUMONT. —On Tuesday morning about half-past eight o'clock a number of men in the employment of the Allendale Road Trustees, headed by the surveyor. Mr Lee, Curry Hill, West Allen, made a determined attempt to pull up the rails forming the level crossing to Allen Smelt Mills from Catton Road Station, on the Hexham and Allendale Railway, but a strong force of employees from the mills prevented the attacking party putting their project into execution. It appears that ever since the formation of the railway, the crossing has been used for the conveyance of minerals to the mills, and the greatest care has always been taken to prevent any accident occurring. A man is invariably in attendance, and there has never been the slightest approach to an accident. The party acting for the trustees were about eight in number, and were provided with picks and shovels. Mr Johnson, of the Smelt Mills, however, was at hand with a strong force, and lost no time in acting on the defensive. The aggressors were quite outnumbered, and very soon gave way. There were a great number of persons present, and considerable excitement was created by the affair. Not one of the road trustees was present.

VALUABLE DWELLING HOUSES. SHOP, LAND, AND PREMISES IN THE PARISH OF ALSTON, CUMBERLAND, FOR SALE.

TO BE SOLD, by AUCTION, at the House of Mr Graham. Crown Inn, Alston, Friday, November 19th, 1869, at Two for Three o'clock in the Afternoon, by Mr ROBERT PEARSON, Auctioneer, a MESSUAGE or DWELLING HOUSE, called SWALLWAY COTTAGE, now occupied as Three Dwelling Houses and Outhouses, a small Plantation behind the same, and Three Closes or Inclosures of Meadow and Pasture LAND adjoining each other, and containing in the whole 6 acres 2 roods and 17 perches, or thereabouts, situate at WEST NENTHEAD, and now in the occupation of Robson Madgen and Frances Hetherington and Ann Walton, as Tenants.

An ALLOTMENT of LAND situate at a place called GREENGILL, near West Nenthead aforesaid, on the Road between Nenthead and Garrigill, containing by admeasurement 85 acres, 2 roods and 31 perches, or thereabouts, now in the occupation of Robson Madgen, Geo. Hetherington, and Wm. Hetherington, as Tenants.

THREE DWELLING HOUSES and OUTHOUSES and TWO CLOSES or INCLOSURES of Meadow and Pasture LAND adjoining each other, and containing 10 acres, 3 roods and 12 perches, or thereabouts, situate Fiddler Street, near West Nenthead aforesaid, and now in the occupation of Wm. Hetherington, Geo. Hetherington, and Thos. Teasdale, as Tenants.

THIRTEEN DWELLING HOUSES, situate at OVER WATER, West Nenthead aforesaid, and now in the occupation of Thomas Hornsby, Robert Percival, Ann Hornsby, Elizabeth Hopkin, Elizabeth Irwin, Mary Watson, Jos. Robinson, William Hall. William Robinson, Mary Ann Hind, Stephen Armstrong, Mary Hill, and James Fitzsimons, as Tenants.

MESSUAGE or DWELLING HOUSE, Outhouses, and 10 Acres 3 Roods and 14 Perches, or thereabouts, of Meadow and Pasture Land, situate at Skelgill, within a mile of the town of Alston, and adjoining the road from Alston to Nenthead, and now in the occupation of Isaac Todd as Tenant.
A MESSUAGE or DWELLING HOUSE, now used as TEMPERANCE HOTEL, and MESSUAGE or DWELLING HOUSE and SHOP adjoining thereto, with the Gardens and Stable behind the same. And also a STABLE, BARN, and BYER, and a COTTAGE HOUSE above the Stable, situate in the Potato Market, in Alston aforesaid; and also a CLOSE or INCLOSURE of LAND, containing Two Acres, or thereabouts, situate behind the same, and also extending behind and adjoining the Houses and Premises situate on the whole of the East side of the Potato Market aforesaid. The said premises being now in the occupation of Jonathan Parmley, Joseph Hind, Mrs Little, and Agnes Thompson as Tenants.
The whole of the Premises are of Leasehold Tenure, held for the remainder of terms of 1,000 years, each, which commenced respectively in or about the year 1621. Small yearly Lord's rents are payable for part of the Premises.
The Property in Alston is situate in the most eligible business part of the town; and at Nenthead there is constant demand for houses by the many persons employed about the Lead Mines there. Many of the houses have been recently built, and the whole are in a good state of repair. There is Grouse in the Allotment, situate at Greengill.
The Tenants will show the Premises, and particulars of the lots in which the property will be offered, and other information, may be known on application at the Office of BAINBRIDGE & MILLICAN, Solicitors, Alston. Alston, 9th Oct., 1860,

23rd October 1869 (Hexham Courant)
Marriages
At Stanhope, 9th inst. Mr Ralph Tinsdale, to Miss Mary Jacques.

23rd October 1869 (Hexham Herald)
Marriages
At the Wesleyan Chapel, Allendale Town, 21st inst., Mr John Armstrong to Ann, daughter of Mr John Bulman of Carrshield.
In 1861, at Greenly Cleugh, Ninebanks, John Bulman, farmer of 50 acres & blacksmith, aged 49, his wife Margaret 50, children, Henry 14, Barbara 12, and Ann 10.
John Bulman of Carrshield died 21st September 1872 aged 57, his wife Margaret died 10th April 1886, aged 75; burial at Ninebanks.
In 1871, at Carrshield, John Armstrong, lead miner, aged 30, his wife Ann 20, and son Simpson 10 months.
In 1881, at High House Chapel, Allendale, John Armstrong, lead ore miner, aged 40, his wife Ann 30, children, Simpson 10, Margaret Ann 9, and Andrew aged 3.
In 1901, at Greenly Cleugh, Whitfield, John Armstrong, farmer, aged 60, his wife Ann 50,children, Margaret Ann 29, Andrew, coal miner hewer, aged 23, Henry, 16, and Wilkinson 13.

In 1911, at High Greenly Cleugh, Whitfield, John Armstrong, farmer, aged 70, his wife Ann 60, sons, Henry, farmer, aged 26, and Wilkinson, boot maker, aged 23.

Deaths

At Hilltop, Nenthead, near Alston, 15th inst., aged 17 years, Elizabeth daughter of Mr Matthew Pattinson stonemason & Bricklayer.

See 5th April 1879, and 27th May 1882

30th October 1869 (Hexham Courant)

Deaths

At kirk Houses near Allenheads aged 73 Mr Thomas Shaw.

In 1841, at Kirk Houses, Thomas Shaw, lead miner, aged 40, his wife Ann (Watson, married 23rd June 1821, Allendale) 40, children Barbara 15, Roger, lead ore dresser, aged 13, Jane 7, Ann 3, and Maria 10 months.

In 1851, at Kirk Houses, Thomas Shaw, lead miner, aged 53, his wife Ann 31, children Mary 27, Roger, lead miner, aged 23, Jane 17, Ann 14, Maria 10, grandsons Thomas Shaw 7, Matthew Robson 7, and visitor Ann Bell, dress maker, aged 19.

In 1861 at Kirk Houses, Thomas Shaw, lead miner, aged 63, his wife Ann 61, daughter Jane 26, grandson Thomas Shaw lead ore miner 17, son in law Joseph Glendining 27, a carter, daughter Mary Glendining 37, and grandchildren Sarah Ann Glendining 4 John W Glendining 2, and Mary J Glendining 3 Months.

2nd November 1869 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

Deaths

At Nenthead, 28th ult., aged 34, Mr Robert Doyle, lead miner.

Son of Robert & Agnes Doyle, Robert was born Easington Lane, Durham. In 1861 living at Whitehall, Nenthead with his mother Agnes, the 1861 census gives, Agness Doyle lead ore miners widow aged 50, children Robert lead ore miner 26, Hugh lead ore miner 23, Ann 14, Cowper 11, and Mary 9. His father Robert was born in Dublin, Ireland, and was buried at Nenthead, 29th June 1855, aged 47.

See 22nd April 1882, and 20th May 1893

At Hole, Tynehead, near Alston, on the 24th ult., John Hodgson, lead miner, aged 19 years. *See 1st January 1869, & 28th April 1877*

At Annatwalls, near Alston, on the 25th ult., Jacob Grey, farmer, aged 65 years.

20th November 1869 (Hexham Herald)

Marriages

At Nenthead, 14th inst., Mr Wm. Angus to Miss Mary Ann Walton, both of Nenthead. Mr George Hetherington to Miss Mary Walton, both of Nenthead.

7th December 1869 (Hexham Courant)

SALE OF LEAD ORE IN NEWCASTLE

On Friday last a sale of 100 Bings of lead ore (raised and produced from a very productive lead mine in Alston Moor called Cashwell mine) took place at the White Hart Inn, Newcastle. Messrs Shield & Dinning (offered £4 16s 6d

per Bing), Messrs Jacob Walton and Co (offered £4 16s 6d per Bing), being the highest bidders were consequently declared to be the purchasers of the ore.

11th December 1869 (Hexham Herald)

WEARDALE

A Weardale man killed in Australia. The Australian mail just to hand brings the sorrowful news to Weardale of a much respected young man Nathan Race Watson of St John's Chapel, having received a fatal injury in the Nightingale Co's Gold Mine Australia. A fortnight after the accident he died leaving a wife and three children.

Nathan Race Watson son of William & Ann Watson in 1851 William Watson 53, lead miner, wife Ann 51, children, George lead miner 26, William lead miner 24

Joseph lead miner 18, Nathan lead miner 15, Jonathan 12, Susannah 9.

Nathan married to Emma Jane Hopkins (born about 1840) in 1862, Emma (daughter of William, cabinet maker, and Jane) originally from Walcott, Bath, Somerset, died 1890, Melbourne.

The accident occurred in the Nightingale Company mine, in Ballarat, Victoria the accident recorded as occurring on 9th November 1869.

16th December 1869 (Newcastle Daily Chronicle)

Died

RAMSHAW, Derwent Mines, 1st inst., aged 52 Mr Thomas Currey. Deceased had been assistant agent for the Derwent Mines Company for upwards of twenty years in which capacity he discharged his duties in a manner that gained him the entire confidence of his employers, whilst by the whole of the workmen he was greatly esteemed and respected, and his death is deeply lamented.

ALSTON

CHARLES LANGHORN'S CHARITY. On Christmas Eve the sum of £22 10s 6d was distributed at Alston amongst a number of poor women, chiefly widows, the amount distributed to each being regulated according to the circumstances and necessities of the respective recipients, and was apportioned in sums varying from about 10s to £1 each. The amount thus divided which is paid every Christmas Eve, and which is laconically called "Charley's money" is the interest of £777 bequeathed (according to will bearing date 26th June 1802) by Charles Langhorn, then of Nenthead near Alston to "such poor persons having legal settlement in the Parish of Alston, as shall not have received Parochial relief within one year next preceding". The will, which, however did not come into operation until about the year 1818, contained a proviso directing his trustees to pay the money only to parties residing within a certain district in the parish. How far the testator's wishes have been carried out in this respect it is needless to enquire, but it is certain the bulk of the money is paid to persons residing at or near Nenthead. Langhorn in his time, was a working miner in the lead mines at Nenthead, was also a bachelor, and it would appear without relatives. It would also appear that lead mining in that period indicated was not like the mining at the present time, but rather perhaps in some respects like gold digging at the present day.

7th January 1870 Carlisle Express and Examiner)

COUNTY SURVEYOR'S REPORT.

The following report of Mr. Cory, County Surveyor, was read and confirmed: — Gentlemen,— Nenthead and Nenthall Bridges.—A very heavy flood occurred last November and washed away a great part of the penning or paving protecting the foundations of Nenthead Bridge. It also scoured a hole below the abutments of Nenthall Bridge. Steps were at once taken, with the sanction

of the local justices, to prevent any damage arising to the bridges themselves. As soon, however, as the season allows, it will be necessary to construct more permanent protection than that at present put in. The cost for both bridges will be about £57.

8th January 1870 (Hexham Herald)
Marriages
At St John Lee, 30th ult., George son of Mr George Henderson, mining agent, Acomb, to Elizabeth Jane eldest daughter of Mr Joseph Sharp Innkeeper, of the same place.
At Alston at the Primitive Methodist Chapel, the Rev. J. Hulme jun., Minister of the Alston circuit, to Miss Anna, eldest daughter of Jonathan Walton Esq., of Donks Villa, Nenthead.

Matthew White of the Butts Alston, died 25th October 1907.

15th January 1870 (Hexham Herald)
NENTHALL
George Wilson Esq., of Nenthall, entertained his tenants to supper on the evening of Thursday last, and on the following evening, a similar treat was, by the same gentleman given to a number of youths of the neighbourhood.
NENTHEAD
Industrial Cooperative Society.
This society held its third quarter meeting in the room of the Nenthead band on Saturday evening. The report showed that the discount on members purchases the quarter was 1s 6d in the £1. The old officers were re-elected for the ensuing half-year. A sumptuous repast, open to the public, was

afterward served up and about 230 partook of the beef, ham, and other provisions of excellent quality, which was supplied by the society. …

18th January 1870 (Penrith Observer)

NENTHEAD.—A fire took place at Nenthead Wednesday last, which, although it proved trivial in its consequences, might have been attended with serious results. At Whitehall the London Mining Company have built a number of cottages for the convenience of their workman, and the tenant of one of these, Mr. Thomas Brown, had a greenhouse behind the house he occupies. It appears that a pipe connected with the stove heating the greenhouse had been overheated and had set fire to the woodwork, which, when the fire was discovered at eleven o'clock at night, was all ablaze. It transpired that close to the scene of the fire a quantity of gunpowder used by the miners for blasting purposes was kept by the men, and it was the first object of those who came to render assistance to remove it. This having been affected at considerable risk, the bystanders directed their attention to extinguishing the fire, which, however, destroyed the greenhouse and a large quantity of valuable plants. Mr. Brown was one of the principal prize takers at all the local flower shows.

NENTHEAD PAYS.—The annual pay of the workmen employed by the London Lead Mining Company was made at Nenthead, on Wednesday last. This being the "red-letter" day in the year to the inhabitants of the village and neighbourhood, there was the usual amount of joviality. The stormy weather, however, materially interfered with the various enjoyments. We believe the pays have not this year been so good as in the last few years.

THE HIGHEST INHABITED HOUSE.

TO THE EDITOR OF THE "PENRITH OBSERVER"

SIR,—In your last week's issue appeared a weather report from what is stated to be "the highest inhabited house in England." It appears that the house referred to is that on Kirkstone Pass, and which the report states to be "1,500 feet above the tide mark." The ordnance survey for the pariah of Alston shews that there are many inhabited houses in that district much more than 1,500 feet above the sea level. For instance, there is a farm-house called Priorsdale which is 1,776 feet ; Little Gill Cottage, Ashgill, 1,612 feet and a house near Nenthead, called Fair View, owned and inhabited by James Dickinson, a miner, at the great elevation of 1,882 feet above the sea level. Believing that there may be some to whom the above facts may be interesting, I shall feel obliged if you will give this letter an insertion in your paper.—Yours, &c., W.

NENTHEAD POULTRY SHOW.

The sixth annual exhibition of the Nenthead Poultry and Bird Society was held in the London Mining Company's New schools, at Nenthead, on Friday last. The number of entries was very large, and altogether this was one of the most successful shows the society has held. As usual, the cage birds, in the rearing of which many of the lead miners in tho locality take so much interest, formed an important attraction; and it may be a subject for consideration whether ere another year the prizes for this class should be increased. The weather, although unpromising in the morning, was favourable, and the number of visitors to the show large. Mr. Hutton, of Leeds, was the judge, and his decisions gave satisfaction. …

22nd January 1870 (Hexham Herald)

NENTHEAD

FATAL MINE ACCIDENT. A sad accident occurred here on Monday last. A miner, named Smith Barron, was killed in one of the Lead Company's mines known as Rampgill mine, a very old working. He was crushed to death by a fall of stone and debris. One arm and leg was broken, and his head was crushed in a fearful manner. An inquest was held on Tuesday, at the house of Mr John Walton Innkeeper, Nenthead, before Mr Carrick, coroner for East Cumberland, and a verdict of "Accidental Death" was returned. Deceased was only 28 years of age, leaves a widow and two young children to lament their sudden loss.

See 16th November 1866, 3rd June 1871, and 14th June 1884.

Deaths

Nenthead, 18th inst., aged 56, Mr Walton Wilkinson Lead ore miner.

See 11th October 1861, and 12th December 1868

At Acomb, 15th inst., aged 48 Mr Thomas Walton, late of Alston.

In 1851, at Town Head, Alston, Thomas Walton, lead miner, aged 30, his wife Mary aged 34, sons Christopher 8, born Allendale, John 6, born Allendale, and Thomas 1, born Alston.

In 1861, at Town Head, Alston, Thomas Walton, lead miner, aged 42, his wife Mary 45, sons Christopher, lead miner, aged 18, John, lead miner, aged 16, and Thomas 11.

In 1871, at Hearty Cleugh, Ninebanks, Allendale, Elizabeth Smith, widow, farmer of 8 acres, aged 70, sons Joseph Smith, lead miner, aged 49, John Smith, lead miner, aged 41, James Smith, lead miner, aged 35, daughter Jane Swindle 50, grandsons, Christopher Walton, lead miner, aged 24

John Walton, lead miner, aged 22, granddaughter Elizabeth Swindle 12, and domestic servant, Ann Swindle, aged 20.

26th January 1870 (Teesdale Mercury)

MIDDLETON-IN-TEESDALE

A

MUSICAL ENTERTAINMENT

In Aid of the Funds for the Erection of a new Wesleyan Chapel in this Town
Will be given on Friday Evening, 28th inst.,
in the
London Lead Company's School Room,
kindly lent for the occasion by
R. W. Bainbridge, Esq.

The programme will consist of Selections from Mozart, Handel, Haydn, and other eminent composers, performed by the Wesleyan Choir, and accompanied on the Pianoforte and Harmonium by the Brothers Mathews, of Liverpool and Glasgow

MIDDLETON-IN-TEESDALE.

It is almost unnecessary to refer our readers to an advertisement in another column, announcing a musical entertainment in the London Lead Company's School-room, on Friday evening next, as the affair has already gained universal publicity. We would only say that the object of the concert is a good one, and its claims ought to be recognised by all right- minded people, irrespective of sect or creed. As regards the execution of the programme, we

venture to say that none will be disappointed, but many agreeably surprised. The valuable services of Mr M. J. Matthews, of Glasgow, who is at present visiting his friends in this town, prior to his leaving this country for New York, have been obtained, and his performance on the harmonium alone, cannot fail to be a treat seldom afforded in small country towns like Middleton.

29th January 1870 (Hexham Courant)

SHOCKING ACCIDENT NEAR MIDDLETON IN TEESDALE.— Two men killed

On Saturday, an inquest was held at the Cross Keys Inn, Middleton in Teesdale, before Mr Thos. Dean, deputy coroner, on the bodies of two young men named John Beadle, 18 years of age, and John Collinson, 15 years of age, who lost their lives on the Thursday previous under very melancholic circumstances at Coldberry Lead mine. It appeared that the young men were at work in the mine on the above date, and were engaged in filling hoppers with lead ore, when suddenly a stone measuring 12 feet by 8 feet, and 2 feet thick, came down from the roof and completely covered Beadle; Collinson was struck on his back, and partially covered by stone. Assistance was soon at hand, and the stone raised, but both the unfortunate young men were found to be dead, and the bodies frightfully mangled. The stone it appears had been "yowled" only half an hour previously to its falling, and sounded all right, and the place appeared quite safe, and there was plenty of timber close at hand had it been considered necessary to shore it up. There appeared to be no blame whatever to any one, and death had been caused purely by misadventure. The jury accordingly returned a verdict of accidental death.

John Beadle son of Joseph and Ann Beadle of Skears.

In 1861, at Skeers, Middleton, Joseph Beadle, lead miner, aged 51, his wife Nanny aged 39, children Joseph, lead ore washer, aged 16, Thomas, lead ore washer, aged 13, John 9, William 6, and Margaret 2.

John Collinson son of William and Jane Collinson of Stoney Gill. In 1861, at Stoney Gill, William Collinson, lead miner, aged 42, his wife Jane 36, children George 10, Mary Ann 9, John 6, Elizabeth 3, and Thomas 1 year.

Deaths

At Nenthead, 21st inst. aged 62, very suddenly, Mr Joseph Robson, Tailor.

Skelgill near Alston, 8th inst., aged 41, Mary wife of Mr Thomas Todd, lead miner.

AGED 48 YEARS

SOURCE:BILLIONGRAVES

Magesterial Inquiry held this 13th day of July 1883 at Glenorchy Weir near Glenorchy touching the death of Bartholomew Rundred.

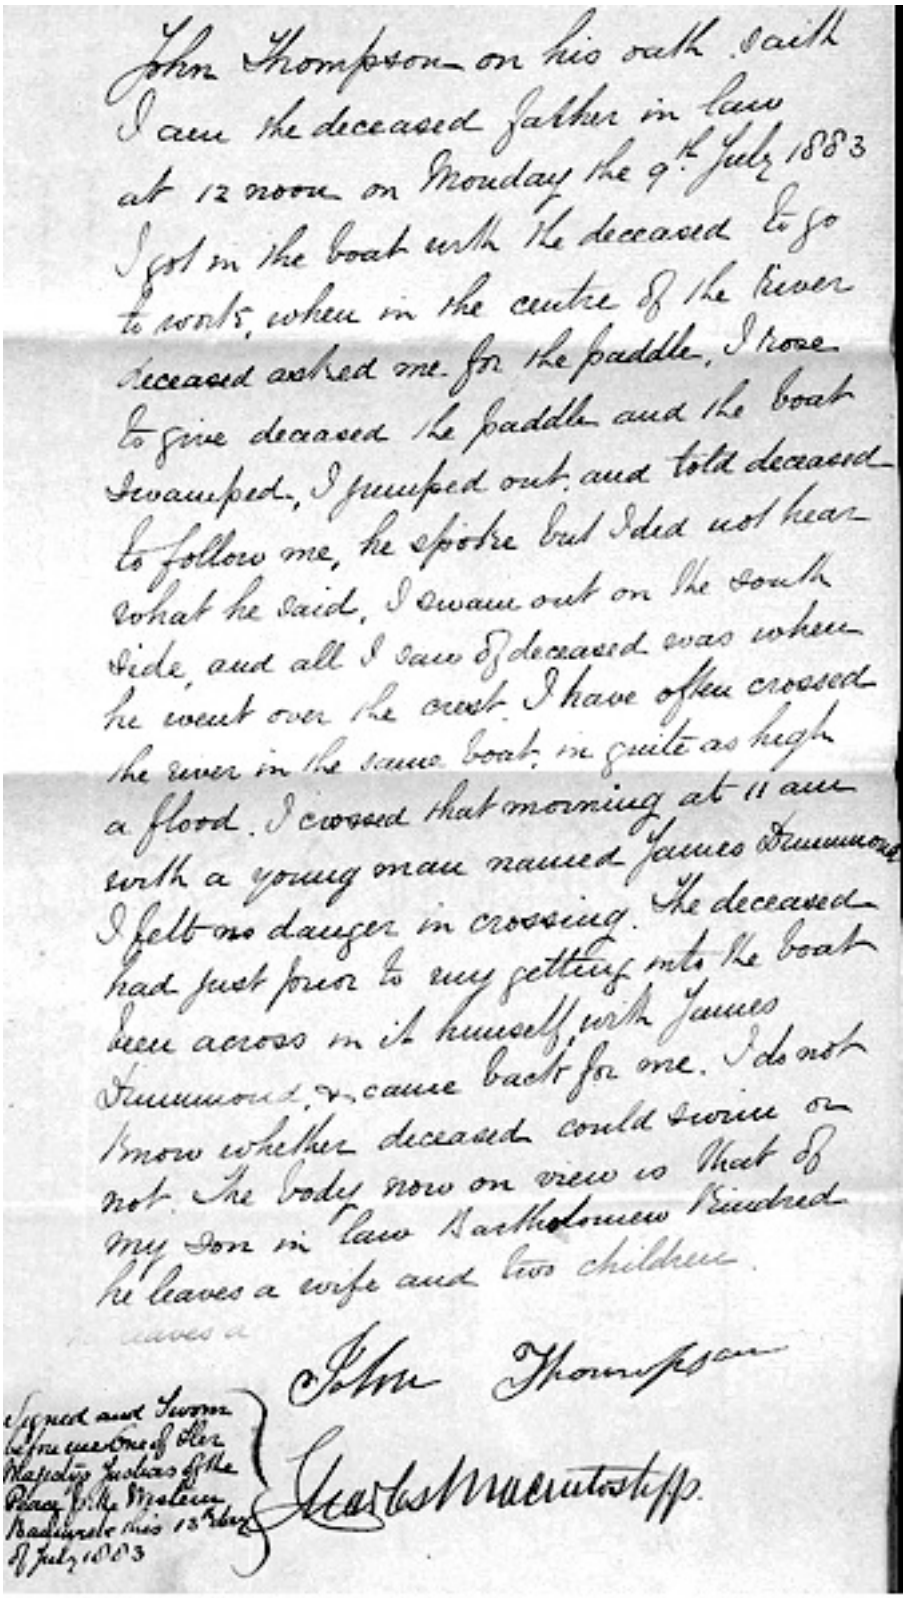
William Drummond on his oath saith; at 12 noon Monday the 9th day of July 1883 I saw deceased and his father-in-law John Thompson get in a boat at the north side of the River Derwent for the purpose of going across to their work at the South side about 8 yards east of the Weir and when in the centre of the River, Thompson stood up in the stern of the boat for the purpose of handing the paddle to Rundred, while doing so the boat lurched backwards and Thompson fell backwards beneath them. Thompson first jumped from the boat & called out the deceased immediately jumped into the water and attempted to swim to the boat I do not think he swam more than about 8 or 9 yards until he sank. They would be about 70 or 80 feet from the South west of the Weir I did not see the body again till I saw it going over the weir, he appeared then to be lifeless.

William Drummond

Signed & Sworn before me One of His Majesty's Justices of the Peace for the Western Districts this 13 day of July 1883:

Charles Meredith Esqre.

Image 1. Courtesy of Public Record Office Victoria ©



John Thompson on his oath saith
I am the deceased father in law
at 12 noon on Monday the 9th July 1883
I got in the boat with the deceased to go
to work, when in the centre of the river
deceased asked me for the paddle, I rose
to give deceased the paddle and the boat
swamped, I jumped out and told deceased
to follow me, he spoke but I did not hear
what he said, I swam out on the south
side, and all I saw of deceased was when
he went over the crest. I have often crossed
the river in the same boat, in quite as high
a flood. I crossed that morning at 11 am
with a young man named James Simmons
I felt no danger in crossing. The deceased
had just risen to my getting into the boat
seen across in it himself with James
Simmons, & came back for me. I do not
know whether deceased could swim or
not. The body now on view is that of
my son in law Bartholomew Kindred
he leaves a wife and two children.

John Thompson

Signed and Sworn

Having this 13th day of July 1883 at the Glenorchy Weir near Glenorchy held a Magisterial Inquiry into the cause of the death of Bartholomew Kindred and from the evidence brought forward that the deceased was accidentally drowned on Monday the 9th day of July 1883. "No blame being attached to anyone" I suggest that the Wimmera Water Trust procure a good boat for the use of the Weir and that the same be intimated to the Engineer of the Trust.

Charles Macintosh J.P.

12th February 1870 (Newcastle Journal)

ALSTON WOOLLEN MILL

On Wednesday last, a meeting of the inhabitants of Alston and neighbourhood was held in the Town Hall, Alston, for the purpose of considering the desirability of forming a joint stock company, with limited liability, for the purpose of taking and working the woollen mill in that town. Amongst those present were Mr J. P. Walton, of Green Ends; Mr J. M. Paull, W. Bainbridge, solicitor; Mr James Millican; J. G. Millican, solicitor, of Alston; Dr Savage; and the Rev. H. Robinson, of Nenthead.—On the motion of Mr Roddam, of Browngill, seconded Mr J. M. Paull, Mr Bainbridge was elected chairman.—it appeared from the opening statement of the chairman, that a committee had been appointed by a previous meeting of those favourable to the scheme, for the purpose of obtaining all information necessary in deciding upon the possibility of forming such company, and the report of the committee, together with that of Mr E. Bushar, of Kendal (a practical manufacturer, whom the committee had called to their aid), having been read, Mr Paull proposed that a joint stock company (limited) be formed, for the purpose of taking and working the mill upon the basis of the committee's report; and the proposition having been seconded, was unanimously carried. It proposed to make the capital about £8000, in shares of £1 each; and over 2,000 shares were taken at the meeting.

15th February 1870 (Hexham Courant)

EMIGRATION TO CANADA

Sir, - The Ontario Government still offers 200 acres free to bona fide settlers; 100 to unmarried persons over 18. Don't take up the grant on first arrival. Beware of Quebec crimps and land sharks everywhere. Be entirely guided by the Canadian Government emigration agents. Emigration clubs, with weekly payments, are multiplying greatly. Mine in Clerkenwell assisted 651 needy persons last season, - of whom satisfactory accounts have been received, - and should any sympathetic friends send me subscriptions towards raising £1,000 (as some have already done) 427 more poor people will go in April. To intending emigrants I say, go early- and let your motto be "Piety, sobriety, and industry," `strike out into the country - don't hang about the towns. I would strongly advise your going west of Kingston into Ontario. Mr Dixon, the Canadian Commissioner, 11 Adam Street, Adelphi, W.C., will give you all information, and a valuable little book. If you can afford £6 6s (half price under 8) go per Montreal steam ships (Messrs Allan, Liverpool) if not a great boon is now offered, the Canada shipping Company (Messrs Tapscott, Regent Road, Liverpool), are sending on March 25, April 6, and 20, and throughout the season good iron sailing vessels, of 1,400 tons burden, taking 25 days to Quebec, £4 over 12; £2 10s under; babies a year and under 10s. Messrs Montgomery, 5 Ingram Court, Fenchurch Street, will send one of these vessels from London on March 25th, for £4 10s over 12, &c. For ship's kits, &c., see "Emigration for poor folks," written expressly by myself, 2d by post. Take some bacon, sausages, tea &c., for the voyage - remember the guardians have ample power to help poor emigrants - and we pray the government will nobly come forward to aid the unemployed, but well charactered persons, in their present distress.

May God bless the cause I have so much at heart, for the sake of the suffering poor, is the affectionate greeting of

Your obedient servant
A. STYLEMAN HERRING
Incumbent of St Paul's, Clerkenwell
45 Colebrook Row, London, N., Jan. 1870.

19th February 1870 (Hexham Courant)
Marriages
At Alston at the Wesleyan Methodist Chapel, 15th inst., Mr Thomas Millican of Witton Park Durham to Miss Esther Smith of Alston.
Deaths
At Annetwalls 13th inst., aged 22, Mr Edward Baverstock, Lead Miner.
Son of William John Baverstock and Jane (Wilson marriage registered Penrith, 1844) born in Kirkoswald, his father died in 1850, Jane remarried in 1852 to Jonathan Spark (registered Alston) Jonathan died in 1868. In 1861 Jane was living in Garrigill, with her children: Jane Spark 46, William J. Baverstock 15 Edward Baverstock 14, Joseph Baverstock 12, Elizabeth J Spark 8. Her husband was lodging at Plunda Heath, Haydon Bridge, listed as a lead miner aged 41. The 1871 census has Jane and her family living at Low Annetwalls.

22nd February 1870 (Hexham Courant)
Deaths
At Nenthead, 17th inst., Mr Jacob Blacklock, ironmonger.
In 1841, at West Nenthead, Joseph Blacklock, innkeeper, aged 45, his wife Ann (Hall, married 21st December 1815, Alston) aged 40, children Joseph, lead ore washer, aged 17, Hannah 10, and Jacob 3. In 1851, at Overwater, Joseph Blacklock, widow, grocer & innkeeper, aged 59, sons Joseph, widow, lead miner, aged 27 (Joseph married Ann Latimer, 24th February 1848, at Nenthead, Ann died 10th March 1848), Jacob 13, and house servant, Martha Robinson 26.
In 1861, at Overwater, Joseph Blacklock, widow, innkeeper and grocer, aged 38, and niece Ann Armstrong aged 12.

Marriages
At St John's Church, Castleside, Durham, 15th inst., Mr Thomas Bramwell lead and coal agent, to Miss Hannah Martindale both of Leadgate Alston.
In 1851, at West Foreshield, Anthony Martindale, lead miner, aged 44, his wife Nancy (Shield, married 25th December 1834, at Alston) aged 43, children Mary 13, Thomas 10, Elizabeth 7, Hannah 5, and Anthony 7 months.
Anthony Martindale died 20th January 1857, aged 50.
In 1861, at Newshield Gate, Nancy Martindale, widow, toll collector, aged 53, children Thomas, lead miner, aged 20, Hannah 15, and Anthony 10.
Nancy Martindale, died 1st qtr., 1863, registered at Alston.
See 24th January 1857, 13th December 1884

In 1851, at High Aimshaugh, Alston, Joseph Bramwell, lead Miner, aged 48, his wife Margaret (Lee married 19th July 1825, at St Augustine's, Alston) aged 48, children, Joseph, lead miner, aged 19, John, lead miner, aged 13, Henry, lead miner, aged 12, Mary 12, William 9, Thomas 7, and Margaret 5.
In 1861, at Leadgate, Alston, Joseph Bramwell, widower, lead miner & farmer, aged 57, children, Joseph, lead miner, aged 29, Ann 26, Mary 22, William 19, Margaret 15, and granddaughter, Aney E Bramwell 5.
In 1861, Thomas Bramwell, aged 16, was working in a meat & flour shop, for William Richardson, miller & farmer, at Kirkoswald.
Joseph Bramwell of Leadgate died 12th June 1866, aged 64, and Margaret his wife died 6th July 1860, aged 55 years.
In 1871, at Church Croft Terrace, Alston, Thomas Bramwell, coal agent, aged 26, his wife Hannah 25, and son John J 7 months.
In 1881, at Whitlow, Kirkhaugh, Thomas Bramwell, farmer of 360 acres, employing 2 servants, his wife Hannah 35, children, John Joseph 10, Emily Ann 8, Anthony Allen 5, Margaret 3, Edith Mary 4 months, brother Joseph, farm servant, aged 47, and domestic servants, Catherine Dodd 18, and Lily Ann Walton 14.
Hannah Brumwell, died 1st June 1883, at Kirkhaugh
In 1891, at Front Street, Alston, Thomas Bramwell, widower, coal agent & farmer, aged 46, children, Emily Ann, house keeper, aged 18, Anthony A 15, Margaret 15, and Edith M 10.

In 1901, at High Gill House, Alston, Thomas Bramwell, widower, farmer & coal agent, aged 56, children, A. A., shepherd, aged 25, Emily A 28, Edith Mary 20, and 2 servants.
In 1911, at Gill House, Alston, Thomas Bramwell, widower, farmer, aged 66, son Anthony Allen 35, and daughter Edith Mary 30, and 3 servents.
Thomas Bramwell of Tower Hill, Alston, retired farmer, died 11th March 1919.

1st March 1870 (Penrith Observer)
ALSTON WOOLLEN MILL.—A meeting of the shareholders of the company in course of formation for the purpose of taking the Alston Woollen Mill and working it as a carpet and woollen mill was held in the Town Hall, Alston, on the evening of Wednesday last. There was a large attendance of shareholders. Mr. Bainbridge, solicitor, was elected chairman. The meeting agreed upon a prospectus, and appointed the following gentlemen as provincial directors:—Mr. J. P. Walton of Green Ends House, Alston; Mr. Edward Basher of Kendal; Mr. J. M. Paull, Lowbyer House, Alston; Mr. J. Cowper, Accomb, Hexham; Mr. U. Bainbridge, Alston; and Mr. J. J. Millican, Nenthead House. The Carlisle and Cumberland Banking Company were appointed bankers, and Mr. G. Millican, of Alston, solicitor to the company. There is a considerable increase in the number of shares taken up since the last meeting; and no doubt so soon as the prospectus is in the hands of the public the inhabitants of the district will come forward and join the company. As the prospectus agreed upon states, there are many advantages that the mill possesses calculated to make it a paying investment. It is situated in the midst of a wool district yielding the class of wool that would be used in the kind of manufacture proposed, there is an abundant supply of water power to carry the machinery, labour is cheap in Alston, and the town is now easily accessible by rail.

1st March 1870 (Hexham Courant)
CLUB DINNER AT WESTGATE, WEARDALE.
The anniversary of the Westgate Miners Sick club took place recently, and about 80 of its members sat down to a sumptuous repast, served up in the usually excellent style of Mrs Walton, the worthy hostess of the Miners Arms inn, Westgate. J. J. Roddam Esq of Newton, Stanhope, representative of the ecclesiastical Commissioners, in the district presided, and was supported by J. C. Cain Esq., of Weardale House; Mr V. Hodgson of Wear Villa; and other gentlemen. ...

1st March 1870 (Carlisle Journal)
THE HOLYFIELD LEAD MINING COMPANY (LIMITED).
THE FIRST GENERAL MEETING of this COMPANY, which has just been registered, was held at the Registered Office, No. 60. ENGLISH STREET, CARLISLE, on THURSDAY last, the 24th Feb. instant.
Mr. R. PERCY ROBERTS (the Secretary) read the notice convening the meeting.
Mr. HUGH PATTINSON, of Alston, was called to the Chair, and in his opening remarks stated that it afforded him much pleasure to be able to state that the prospect of the Mine had unmistakable evidence of turning out one of the best mines in the Alston district. The present Shareholders are quite aware that the "Holyfield" is not a newly opened mine, but one that from mere surface

working had turned out something like 20,000 binge of ore. What, then, may we not expect of such a mine when worked as we are now doing, in depth? It must also be remembered that the Holyfield is situated in the finest beds of the Alston district, and adjoins the far-famed “Hudgilburn” the shareholders of which Company realised their fortunes, and he believed the “Holyfield” would ultimately prove as satisfactory. I must inform the shareholders that we have had water to contend with, but this only gives additional weight to prove the value of the workings, for I have never heard of a really first-class mine but had water to contend with. Wallace, in his splendid work on mining lays this down, I believe, as a law or certain index; or, in other words, where there is large quantities of lead there is also water. We shall, however, easily I am glad to say, manage to keep the workings free from water, and it is proposed by the manager, Mr. Peart, to put in a Whimsey, which will entail but a trifling coat. As to the number of shares unsold the number is about 3,000, 2,000 of which we can offer to the public and retain 1,000 for shareholders who have expressed a desire to increase their shares.
After which the Directors and Auditors were appointed.
Mr. John Peart, the captain of the mine, stated that his last visit to the area took place about ten days ago, and that the appearance of the mine was very promising indeed. The lead continued to bear through the several strata already cut through in sinking the sump, and lead being in fact discovered in the Quarry Hazle, which he had not expected, specimens of which were shown at the meeting. He considered the prospects of the mine most cheering, and entertained the strongest expectations that the mine would turn out to be a most profitable speculation.
As Mr. Peart is a gentleman of great practical experience in mining matters and has an intimate knowledge of the Alston district his opinion is entitled to great weight.
All the shares already subscribed for were duly allotted.
The usual vote of thanks was accorded to the Chairman; and the meeting, which was a most satisfactory one to the shareholders present, then terminated.

2nd March 1870 (Teesdale Mercury)
SHOCKING AND FATAL ACCIDENT at Bollihope Lead Mine.—On Saturday sen., an inquest was held before Mr T. Dean, deputy coroner, at the Black Bull Inn Frosterley, on the body of Ralph Collinson, who met his death in a shocking manner at Bollihope Lead Mine, on the Thursday previous. It appears that the wagons containing waste and bouse are drawn up the mine by the water apparatus, and deceased was employed to push them some distance from the mine along a tramway, and tip them. On Thursday, he and a younger brother had been in the act of tipping a wagon, when, either from deceased being stronger than the other and lifting with more force, or some other means, the wagon swung round and struck the deceased, and they both fell over the team together, amongst the rough slag, a distance of nine or ten feet. A man working near ran and jumped over the team, and found deceased lying on his back, and the wagon resting on the thick part of his thigh. On being extricated, he was found to be sadly mutilated, and quite dead. From the statement of deceased's brother who was employed with him, it appeared that when they coupled the wagon up one of the soles did not hit the rail, and this

caused it to fall down side ways and strike deceased, and he fell down with the wagon over the team. It appears that the platform at the team is not sufficiently wide for a man to stand safely on when tipping, and the jury, in returning a verdict of accidental death, recommended that the platform be made wider.

ARKINGARTHDALE.

Emigration. — Early on Monday sen., twenty-four of the inhabitants of this neighbourhood took their departure on route for America. The reason, as far as can be learned, why so many of the inhabitants are leaving their native place, is through the deficiency of work in the lead mines, and an expected change of lessees. At present the men are only working three days a week, owing to the scarcity of lead ore.

Jonah Collinson baptised 19th April 1818, son of John & Jane Collinson of Stanhope.

In 1841, at Peak Side, Stanhope, Robert Collinson, lead miner, aged 25, Jonah Collinson, lead miner, aged 20, Jane Collinson, aged 20, and Sarah Proud aged 11.

Jonah Collinson married Hannah Gowland (daughter of Ralph Gowland) at Stanhope, 20th May 1844.

In 1851, at Peak Side, Newlandside, Stanhope, Jonah Collinson, farmer of 20 acres, aged 34, his wife Hannah 28, children, John 5, Mary 3, Ralph 1, and niece, Sarah Proud, house servant, aged 21.

In 1861, at Allotment House, Wolsingham, Jonah Collinson, lead miner, aged 43, his wife Hannah 38, children, John, lead miner, aged 15, Mary 13, Ralph 11, Jane 9, Elizabeth 7, Thomas 5, Hannah 2, and Robert 1 month.

Hannah Collinson died 4th quarter 1870, aged 47.

In 1871, at Allotment House, Frosterley, Wolsingham, Jonah Collinson, widower, lead miner, aged 53, children, John, lead miner, aged 25, Jane 19, Elizabeth 17, Thomas, lead miner, aged 14, Hannah 12, Robert 10, and Hopper 7.

In 1881, at Allotment House, Wolsingham, Jonah Collinson, farmer of 150 acres, aged 63, children, John, lead miner, aged 35, Elizabeth, housekeeper, aged 27, Thomas, lead miner, aged 24, Hannah, housemaid, aged 22, Robert, lead miner, aged 20, and Hopper, shepherd, aged 17.

Jonah Collinson died 1st quarter 1886 aged 68.

Hopper Collinson died 4th quarter 1889, aged 25.

In 1891, at Harehope Farm, Wolsingham, John Collinson, widower, farmer, aged 45, son John J 10, brothers Thomas, agricultural labourer, aged 34, Robert, agricultural labourer, aged 30, sister Hannah, housekeeper, aged 32, and servant Mary Phillipson, domestic servant, aged 22.

In 1901 at Harehope House, Wolsingham, John Collinson, widower, farmer, aged 55, brothers, Thomas, farmer, aged 44, Robert, farmer, aged 40, son, John J, farmers son, aged 20, sister, Hannah, housekeeper, aged 42, and servant Mary Phillipson, domestic servant, aged 32.

In 1911 at Harehope, Frosterley, Wolsingham, John Collinson, widower, farmer, aged 65, brothers, Thomas, farmer, aged 54, Robert, farmer, aged 50, son, John Joseph, farmers son, aged 30, sister, Hannah, housekeeper, aged 52, and servant Mary Phillipson, dairy maid, aged 42.

8th March 1870 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

IN COURSE LIQUIDATION
WYTHBURN LEAD MINING COMPANY (LIMITED).
The MINES in HELVELLYN MOUNTAIN, CUMBERLAND,
FOR SALE, BY TENDER,
On MARCH 18, 1870,

Under the voluntary winding up of the Company, the LEASE OF THE MINES, from Sir HENRY RALPH VANE, Bart., at 1-16th Royalty; the minerals in store; work-men's tools; iron rails laid in the levels; self-acting incline railway, 600 yards long, well laid on wooden sleepers; large drum wheel, and best steel wire rope; iron wagons, &c.; extensive dressing floors; crushing mill, with 30-horse power turbine waterwheel jiggers, buddles, sheds, shops, counting house, ore house, and powder house at distance, well secured; a large well secured reservoir or dam to supply the turbine and dressing floors, &c., &c.

Lithographic plans and sections, and some mineral specimens, may be seen at the offices of JOHN DARLINGTON, Moorgate street-chambers, Moorgate street. London, E.C., also at the *Cumberland and Westmorland Advertiser* Office, Penrith; and 17, East Parade, Leeds.

The Liquidator reserves the right of declining to accept the highest or any tender, and, as an inducement to careful inspection if the property, offers £10 each (to cover the cost of sending to have the property examined) to the two highest tenders from those who have actually inspected the mine and works.

Ten per cent, deposit on signing the agreement, and 10 per cent, additional for immediate possession of the works and mine, which are still in operation—an important consideration as to immediate returns, particulars of which can best be obtained by actual inspection.

The purchase to completed within three months from the time signing the agreement.

Some of the heavy shareholders in this company are disposed to take an interest in a new company, to be conducted upon modern and improved principals, whereby speedy profitable results are confidently expected.

Tenders to Mr. W. WHEELHOUSE, liquidator, sent on or before March 18, to the office of Messrs. BUTLER and J. E. SMITH, Solicitors to the Company, 17, East Parade, Leeds.

*Easy access to the Mine, from Windermere or Keswick daily by Coach which passes close to it.

12th March 1870 (Hexham Herald)
Deaths

At Swinhope, 5th inst., aged 70, Mr Henry Phillipson, lead miner.

In 1841, at Swinhope Shield, Henry Philipson, lead miner, aged 40, his wife Sarah (Keenleyside, married at St Peter's, Allendale, 1st December 1827) aged 30, children Sarah 11, Jane 9, Nicholas 6, John 4, and Ann 1.
In 1851, Henry Philipson lead miner 51, wife Sarah 44, children Sarah dressmaker 20, Nicholas lead ore washer 16, John 13, Ann 10, Elizabeth 7, Henry 4, Margaret 4 months.
In 1861, at Black Lott, Swinhope, Henry Philipson, lead miner, aged 61, his wife Sarah 53, children Sarah, dressmaker, aged 31, John, lead miner, aged

23, Elizabeth 18, Henry, lead miner, aged 14, Margaret 10, and granddaughter, Jane A Philipson 4.

19th March 1870 (Hexham Courant)
Marriages
At Alston Primitive Methodist Chapel, 13th inst. Mr John Bell to Miss Elizabeth Yeats, both of Alston.
In 1861, at Edmunds Lane, John Bell, lead miner, aged 25, his wife Hannah (Vipond, married 22nd August 1858, Alston) aged 22, son Isaac 2, and daughter Jane 1 week. Hannah died 1864/5.
In 1871, at Physic Hall, Bank Top, John Bell, lead miner, aged 33, his wife Elizabeth 23, children Isaac 12, Jane 10, Thomas 7, Hannah 6, and Margaret A 7 months. In 1881, at Iveston, Leadgate, Durham, John Bell, iron stone miner, aged 45, his wife Elizabeth 32, children Isaac, iron stone miner, aged 21, Thomas, driver, aged 17, Margaret A. 10, Dora 8, Eliza 6, Polly 4, and Eunice 2

In 1891, at Iveston, Leadgate, John Bell, coal miner, aged 56, his wife Emma 44 (born Lunedale, Yorkshire), children, Thomas, coal miner, aged 26, Dora 19, John H., pony driver at pit, aged 13, Eunice 12, and Isabella 10.

29th March 1870 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Alston
SERIOUS ASSAULT ON A WIFE.—A lead miner named John Gill of Alston committed a violent assault on his wife on Sunday week. He had been drinking during the day, and his wife, apprehensive of his conduct from her previous experience, had her brother in the house with her. On the return of Gill, his brother-in-law left, and immediately the former took a razor, and rushed at his wife with it. She struggled with him, and having got out of the house, called her brother back. In the meantime Mrs Gill had received three severe cuts on the hand from the razor. and her brother was also violently kicked in endeavouring to rescue her. Gill was taken into custody, and brought before the Rev. 0. James, J.P., on Monday but admitted to bail in the sum of £20 for his appearance at the Alston Petty Session, on the 1st of April.

1st April 1870 (Carlisle Journal)
THE ALSTON CARPET AND WOOLLEN MILL COMPANY, LIMITED.
To be Incorporated under the "Companies' Acts, 1862 and 1867," whereby the liability of the Shareholders is limited to the amount of their Shares.
CAPITAL £8,000, IN SHARES OF £1 EACH, WITH POWER TO INCREASE.
Deposit on application 2s per share; 3s. per share on Allotment; 5s. per share at the end of two months from Allotment, and the remainder if required; but no call to be at a less interval than two months, nor to exceed 5s. per share.
PROVISIONAL DIRECTORS.
John Pears Walton, Esq., Green Ends House, Alston.

John Cowper, Esq., Acomb, Hexham.

Joseph Michell Paull, Esq., Low Byer Houes, Alston.
Utrick Bainbridge, Esq , Loaning House, Alston.
John Joseph Millican, Esq., Nenthead House.

BANKERS

The Carlisle and Cumberland Banking Company.

SOLICITOR.

J. G. Millican. Esq., Alston.

OFFICES

Alston, Cumberland.

ABRIDGED PROSPECTUS.

The Company is formed for the purpose of taking on lease, or otherwise acquiring the woollen mill with the machinery, and the dwelling House, land, and premises, held therewith, of Mr. J. P. Walton, situate at Alston, in the County of Cumberland, and for carrying on in the said mill and premises the manufacture of cheap carpets and woollens.

There are many advantages connected with the Alston Wool Mill that recommend it as a profitable investment: —

1. It is situated in the midst of a district which would supple a good proportion of the class of wool adapted to the manufacture it is proposed to carry on.
2. There is a constant and abundant supply of water for working the machinery.
3. Labour is cheap in Alston.
4. Railway communication to all parts of the Kingdom is close at hand.

And the present is considered a most favourable time for entering upon such an undertaking.

Detailed Prospectuses and Forms of Application for Shares may be obtained of the Bankers at their Alston Branch, and the Solicitor.

5th April 1870 (Hexham Courant)

Deaths

At Alston Post Office, 3rd inst, aged 74 Mrs Isabella Watson, widow of the late William Watson, carrier and lead agent.

In 1841, at Market Place, Alston, William Watson, innkeeper, aged 40, wife Isabella (Lee, married 9th December 1821) aged 40, children Phillis 15, Elizabeth 15, Jane 10, William 6, and Thomas 3.

In 1851, at Front Street, Alston, William Watson, grocer and lead ore agent, aged 54, wife Isabella 55, children Elizabeth 26, Jane 20, Isabella 18, William L., carpenters apprentice, aged 15, Thomas 13, and niece Mary Snowden, dress maker, aged 22.

In 1861, at Main Street, Alston, Isabella Watson, widow, grocer, aged 64, children Jane, assistant grocer, aged 30, Isabella, house maid, aged 28, William L. carpenter, aged 25, and Thomas, agent for lead merchant, aged 23.

In 1871, at the Post Office, Alston, Phillis Errington, widow (Husband William Errington, married 1st quarter of 1850, In 1851, at Front Street, Alston, William Errington, draper & grocer aged 28, and his wife Phillis aged 28. William died 1853/55), post mistress, aged 48, brother William L. Watson, joiner aged 35. Also Henry Lupton, draper and grocer aged 38, his wife Isabella, aged 38m, son, William 7, and daughter Isabella 10 months.

5th April 1870 (Cumberland Pacquet and Ware's Whitehaven Advertiser)
Friday, at the ALSTON PETTY SESSIONS, before T. Wilson, Esq., Shotley Hall; the Rev. O. James, Clargyll Hall; and T. Horrocks, of Brisco Hill, Carlisle, John Gill was charged with committing violent assault upon his wife, Dorothy Gill, the morning of March 20. Mr. Cant, Penrith, appeared for the defendant. Dorothy Gill stated that at about 12 o'clock on the night of March 19th, her husband came home drunk. Her brother was in the house at time. Shortly after her husband came her brother went to attend to cow which was near calving, and which was in a byre in the neighbourhood. After looking at the cow he returned in company with Thomas Sparke. They sat over the fire and chatted for some time, some of them smoking their pipes; after which her brother and Sparke went out. Her husband then got up and took razor from the place where he usually kept it. She was frightened, and ran to the door and shouted to her brother and Sparke to come back. Sparke took the razor from her husband, and while giving it to her, her husband pushed at her brother with his foot, and hitting Sparke's hand with the razor in it, she got her hand cut. In reply to the Bench, prosecutrix said her husband made no remark when got up and took the razor. He used no threatening language nor violence, nor had previously threatened her with violence; hut she was frightened when she saw the razor. On being pressed as to what she complained of, and why she sent for the police and had her husband apprehended, because she had accidentally cut her hand while taking the razor from another party, she said she did not send for the police, but Mr. Story coming in inquired of her father if the police had not been sent for, on which her father sent for the police, who came and apprehended her husband. She did not send for the police, nor did she want her case known; all that she wanted was to live in peace and quiet. —Mr. Cant argued that there was no case to proceed with. The complainant had slated on oath that no assault had been committed, nor had any violence or threatening language been used, so that there was no necessity for proceeding further. The Bench remarked that was necessary to hear further evidence as to why defendant had been apprehended and brought before them. Unless something more was shown, the police officer might be proceeded against. He ought, at any rate, to allowed state the grounds on which the apprehension was made. Mr. Cant offered, on behalf of defendant, to give written surety that if the case was dismissed at the present stage no proceedings would be entered against the police. It was decided to hear the officer's statement. Police Sergeant Johnstone stated that about hall-past eight the morning of March 20, information reached him that an assault had been committed, and his services were required. On proceeding to where the woman was he received her statement. Witness was proceeding to give her statement when Mr. Cant objected, contending that he must confine himself entirely to what he saw. They already had the woman's statement on oath, and had nothing do with any previous statement. The Sergeant continued — She had three cuts on her hand, which she stated— (Mr. Cant again interposed). He afterwards saw the defendant and took him into custody. The defendant stated that he took the razor and rushed his wile merely to frighten her, and not with the intention of doing her any harm, and that she got her hand cut in the struggle, but he did not state by whom. Defendant was sober when witness first saw him, had been drunk when the assault was said to have been committed. The case was dismissed.

John Gill married Nancy Hetherington, 22nd May 1825, at St Augustine's, Alston.
Ann Gill, was buried 3rd December 1839, aged 36, at St Augustine's, Alston.
John Gill, senior, died 4th quarter 1887, aged 89.

8th April 1870 (Carlisle Patriot)
ALSTON.— Amongst the successful public vaccinators who have this year been awarded grants by the Right Hon. the Lords of her Majesty's Privy Council, we are glad to be able to include the name of Mr Stuart Carson, of Alston, the public vaccinator for the Nenthead and Garrigill district, to whom a premium of £9 10s has been granted as an acknowledgment of his great success in this branch of his profession.

13th April 1870 (Teesdale Mercury)
MIDDLETON-IN-TEESDALE.
ACCIDENT. —A serious accident occurred on Monday sen., at the Wiregill lead mined, about five miles from this town. Two men, named John Scott and William Edmundson, were preparing a shot for blasting, whilst in the act of charging it, Scott, having got his "scraper" fast in the hole, inserted the "pricker " with the object of loosening it. An explosion was the consequence, and Scott being close to the hole, received the contents in his face, his eyes being so much damaged that it is feared he will lose his sight. Edmundson was also slightly injured. The two men were brought to the town, where the wounds were attended to by Dr. Makens.

16th April 1870 (Hexham Courant)
Deaths
Alston, 7th inst Mary Ann, wife of George Eals, Miner.
Mary Ann Shield aged 24, married George Eals 2nd quarter of 1868, at Alston, daughter of John and Mary Shield. Her mother, Mary Hutchinson (daughter of John & Ann) married John Shield 23rd Jan 1845, John Shield died in 1848.

19th April 1870 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
NENTHEAD INDUSTRIAL CO-OPERATIVE SOCIETY.—On Saturday week the fourth quarterly meeting of the Nenthead Industrial Co-operative Society was held for the despatch of business and to report progress, which showed the society to be extending their business. The amount on members' purchases for the quarter was announced to be 1s. 9d. in the pound, which gave general satisfaction. A spirited conversation ensued as to the practicability of building a new shop and warehouses as soon as an eligible site can be obtained.

23rd April 1870 (Hexham Herald)
Deaths
At Nenthead, 30th ult. aged 63, Mr John Walker.
Son of John Walker and Mary Robson (married 16th February 1799, Alston), baptised 21st December 1806, Alston. John Walker of Welgill Dykeheads, was buried at Alston 30th November 1837, aged 68.

See 16th April 1870 & 3rd June 1871

ROMAN COINS FOUND IN WEARDALE

A few days ago, three well-preserved Roman coins and several others of less value, and also a massive gold ring, were turned up at Westgate, Weardale, in the bed of the Middlehope Burn, a north running tributary of the River Wear. A party of workmen locally known as “washers,’ in the employment of Mr Beaumont, have been employed these last few weeks in “hushing” the bed of the stream alluded to in order to be enabled to pick up any lead ore from the debris that have come from The Slitt, a lead mine some distance further up the burn. Amongst the several coins found at different times in Weardale are a fine specimen of a golden noble and golden angel, a two-penny piece of Cromwell, one of Charles ll, a penny of James ll, and other similar.

21st May 1870 (Hexham Herald)

ALSTON
LOCAL EMIGRATION.

Our Alston correspondent writes as follows: -

A respected friend whom I have been often indebted for information, has placed at my disposal a very interesting document containing passing remarks on emigration penned at different intervals during the past 40 years, with nearly a complete list of emigrants from the locality during that period, the vessels they sailed in, date of sailing, their destination, with returns and deaths, so far as has been ascertained. As the document contained much of local interest, I regret that for present I cannot avail myself more fully of its contents. The entire number of emigrants to America 189, to Australia, New Zealand and other parts, 293. The number of emigrants from the locality since 9th March 1870 is 32, the last seven of whom left the Alston station on Tuesday morning last. They were Mr M. Dickinson, who had previously a very successful sojourn of eleven years in Australia and from which country he returned about two years since; Mr Jacob Walton, well known, throughout Hexham circuit, as well as in this locality, as a most acceptable Primitive Methodist Preacher, who with Messrs Robert Martindale, of Alston, and Robert Scott and Robert Davidson of Blaygill were bound for California; the destination of the other two, William Watson of High Plains, and George Dickinson of Nest being America. They were accompanied to the station by a number of friends and acquaintances, who seemed to grieve much more than the emigrants themselves of the prospect of a long separation from home and friends to whom they were ardently attached, and the trial and deprivations to be undergone in search of competence in a foreign clime.

27th May 1870 (Carlisle Patriot)

Marriages

At Garrigill Church, on the 19th inst., by the Rev. G. Monkhouse, Mr Stephen Shield, Garrigill Gate, to Miss Elizabeth Hodgson, second daughter, of Mr John Hodgson, yeoman, Side House, Tyne Head. *See 30th September 1893*

At Garrigill Church, on the 22nd inst., Mr Walton Shield, of Nether Craig, to Miss Mary Davidson, of the same place.

In 1851, at Pryhead, Garrigill, John Shield, lead miner, aged 64, his wife Mary (Watson, married 8th January 1818, at St John Garrigill) aged 60, children, Elizabeth 25, and Walton, lead miner, aged 18.

John Shield was buried 24th December 1855, aged 69, at Garrigill.

Mary Shield was buried 30th January 1860, aged 69, at St John Garrigill.

In 1861, at Nether Craig, Mary Davidson, widow, landed proprietor, aged 38, children, Joseph, lead miner, aged 18, Mary A 15, niece Jane Shield 1, and boarder, brother, Walton Shield, lead miner, aged 28.

In 1871, at Turnings, Garrigill, Walton Shield, lead miner, aged 38, his wife Mary 32, daughters Sarah 12, and Mary Jane 7 months.

In 1881, at Turnings, Garrigill, Walton Shield, lead miner, aged 48, his wife Mary 42, children, Mary Jane 10, Frances 8, Elizabeth 6, and boarder, Alice Holdon Currah 4 months.

In 1891, at Garrigill Gate Foot, Walton Shield, lead miner, aged 58, and his wife Mary 52.

Walton Shield was buried at Garrigill, 10th January 1899, aged 66.

In 1911, at Garrigill, Mary Shield, widow, aged 72, daughter Mary Jane, domestic servant, aged 40, and granddaughter, Annie Shield 14.
Mary Shield was buried 7th January 1912, aged 72, at Garrigill.

28th May 1870 (Hexham Courant)

ACCIDENT AT RODDERHOPE FELL MINES

An accident of rather a serious nature befell one of the workmen at Rodderhope Fell mine on Tuesday last. It appears that a shot had been fired and Coulson, who belongs to West Allendale, returned to examine the result, when a portion of the roof came down upon him, crushing him very severely. On being extricated from his perilous position, he was conveyed to the house of another workman, and the services of Dr Carson obtained with as little delay as possible, and so far, reports are favourable. The density of the smoke prevented Coulson from observing that the roof had been disturbed.

28th May 1870 (Hexham Herald)

ACCIDENT AT FALLOWFIELD MINES

An accident of a very serious nature happened in the workings of Fallowfield Lead mines on Friday last week. A young man named George Walton who is employed there was when proceeding in a part of the mine with his work severely injured by a large stone which fell upon him, providently, however not striking him with its full force, or the result would in all probability have been fatal, but grazing the side of his head and neck. The scalp was cut across the head and part of it was almost severed from the skull and his neck was also injured in a less degree. Strange to say only about 3 weeks ago the same youth met with another accident, which disabled him from continuing his work for some time. When engaged with some tubs in the mine, one of them tilted up and injured his right hand severely depriving several of the fingers of their tips. Dr Pearson, who attended him when suffering the former accident, has Walton in his charge at present, and under his care and that of his son Mr Henry Pearson, the unfortunate lad is we are lad to learn, progressing most favourably.

Deaths

At Nenthead, 22nd inst. aged 26 Mr James Hind.
In 1851, at Overwater, Nenthead, William Hind, lead miner, aged 31, his wife Ann (Hutchinson, married 8th April 1843) aged 30, children James 7, George 5, William 3, and Elizabeth 1.
In 1861, at Overwater, Nenthead, William Hind, lead ore miner, aged 41, his wife Ann aged 40, children James, lead ore washer, aged 17, Thomas 9, Ann 7, and Hannah 3 years. In 1871, at Overwater, William Hind, lead miner, aged 51, his wife Ann 50, children Thomas, lead miner, aged 19, Hannah 13, and granddaughter Sarah Elizabeth Whitfield 2. William died 1st quarter of 1873, aged 53. In 1881, at Overwater, Ann Hind, widow, aged 61, son Thomas, lead miner, aged 29, daughters Ann, farm servant, domestic, aged 26, Hannah Hind, domestic servant, aged 23, Sarah E. Hind 12, grandsons William J. Hind 5, and John J. Hind 2 months.
See 20th September 1890
Nenthead 23rd inst., aged 66 Mrs Jane Thompson.

In 1841, at Whitehall, John Thompson, lead miner, aged 34, his wife Jane (Hutchinson, married 13th September 1834, at Alston) aged 37, children Jane 6, Hannah 4, Sarah 2, and George 1 month.
In 1851, at Whitehall, John Thompson, lead miner, aged 44, his wife Jane 48, children James 15, Hannah 14, Sarah 12, George 9, John 7, and Mary Ann 4.
In 1861, at White Hall, Nenthead, John Thompson, lead miner, aged 54, his wife Jane aged 58, children Sarah, bonnet maker, aged 22, George, lead ore miner, aged 19, John, lead ore washer, aged 17, Mary A. 14, daughter Jane Price, miners widow, aged 26, grandson William T. Price 4, granddaughter Elizabeth Price 2. Jane Thompson aged 27, married John Price, aged 23, 20th December 1856, at Nenthead. John George Price died 2nd quarter of 1865. John Thompson died 1st quarter of 1861.

28th May 1870 (Hexham Herald)

ALSTON

RODDERUP FELL PAY. There are few local events which have been looked forward to with more interest and speculation for the last six months or so, than the Rodderup Fell pay, which event came off on Wednesday last, and which may justly be considered worthy a passing notice, not so much from the amount of cash it put into circulation as the system of payment of workmen's wages which is revealed, and which it is to be hoped is entirely confined to the mine in question. It is considered most convenient to large mining concerns not to make short payments, but to advance a certain sum monthly, which is called "the lenning," the amount of such advance being mostly £2 per month, the reckoning and pay being at the end of the year. The yearly system of payment is generally considered to be an inconvenience, not only to the workmen, but to the tradesmen with whom they deal, as the system of trading commonly pursued is for the workmen to divide the "lenning" among the tradesmen with whom he deals, obtaining credit on the strength of his prospects of pay for goods to the amount which he may require, in addition to what is procurable with the "lenning." When the pay is made, at the earliest opportunity after the "accounts turn" or the year is due, the inconvenience of such a system of payment is somewhat lessened, for the workmen generally finds little difficulty in obtaining credit, more especially when his prospects are good and if he be honest and truthful the tradesmen who speculate on the event can calculate with some amount of certainty on his chances of payment, and also which of his liabilities the pays will enable him to meet. But on the other hand, when there is any great delay and uncertainty, it not only puts the workmen to trouble and inconvenience but also cripples the tradesmen, who are the real sufferers by such unreasonable delays. They cannot meet their liabilities, "commercials" have to leave with their accounts unsettled, and thus the evil spreads. The pays which came off on Wednesday was not only a yearly pay, but two full quarters and more than half of the third quarter of another year has elapsed since the years pay was due. I believe I am correct in the statement that the year's accounts close in October. Thus near the close of May a great number of men are paid for work done during the year preceding last October. It appears incredible that any respectable, wealthy, and influential company, as the Rodderup Fell Company most certainly is, should resort to such a system of payment. If it be necessary, make them at Christmas? Which would allow more than two months after the closing of the

accounts. Or if it is more convenient to have the yearly pay in may, this might easily be done by making a half yearly pay for once, which would be more just than to allow nearly three quarters to stand over when the payment is made. It might further be conjectured that as eight months or so have elapsed since the pay was due, that the men would have been for some time aware of the exact amount due to them, and that there would at any rate, be few days notice when the event would come off, but it would appear that the men have little if any idea what the amount is till a day or two before the pay. The men may be blameless for there ignorance on this point, but at any rate there is a vast amount of ignorance or deception, which at times has very unpleasant results. Other evils, connected with such a system might be mentioned but perhaps sufficient has been said to point out its unreasonableness and palpable injustice.

4th June 1870 (Hexham Herald)
Marriages
At Alston Congregational Chapel Mr Francis Clemintson to Miss Ann Sparke of Physic Hall.
In 1871, at Town Head, Francis Clementson, joiner, aged 23, his wife Ann 20, and daughter Elizabeth 8 months.

10th June 1870 (Carlisle Patriot)
Marriages

18th June 1870 (Hexham Herald)

ALSTON

HOLYFIELD MINING CO LTD. This Company, the formation of which we noticed some weeks since, is now in a fair way to solve a problem, in which not only shareholders but the public at large are interested, and which has often given rise to no small amount of discussion in mining circles. Holyfield has been a productive mine, in the upper beds, and to the workings of which, many miner has turned his attention and energies either as a "bye bargain" or a "put off" till something better turned out, many a luck hit having been made in the "aud yirds" and many a bit nice ore having to be left in the lower beds, because of the heavy flow of water, which was invariably "tapped" when a certain depth was reached. The object of the new company is to ascertain the yielding capabilities of the mine in yet unexplored depths. A powerful engine worked on the "Horse Whimsy" principle has been put in, and so far answers the purpose admirably, so that in a little time we may expect to have a "knotty and watery" question forever set at rest, and the minds of intending speculators will be relieved of the harassing uncertainty as to whether or not there are rich holes below water mark in the said mine. The bare settlement of the question, is well worthy of the money spent, should there never be a single farthing of dividend, as none but an experienced "aud yirder" can realise, the vexation resulting from the abandonment of a nice string after pursuing it for fathoms with the "bouse" sometimes nearly fit for saving and what is still more aggravating, either from the magnifying qualities of water or some other unexplained cause, the pursuit has almost invariably to be abandoned just at the point where there was the utmost certainty of it paying. Independent of its being a promising speculation the spirited venture at Holyfield is watched with interest by scores of old miners not pecuniarily interested, but who have for years borne with them the indelible impression that they knew of a mine if they could only get at it, and we are glad to say it is now in a fair way of being got at.

Marriages

At Nenthead by license, 9th inst., Mr Robert Henderson to Miss Sarah Todd, both of Nentwater.

In 1841, at Lowbyre, Alston, Joseph Todd, lead miner, aged 50, his wife Hannah (Hornsby) aged 45, children Anne 11, Joseph 9, Elizabeth 6, and William 3.

9th July 1870 (Hexham Herald)

BLANCHLAND

BELDON MINE. We had occasion to report about this mine a few months ago, when the sinking of a new shaft at Reading was mentioned, but owing to the great deluge of water further operations had to be suspended until such time as an engine arrived as hand pumps were quite inadequate to lift the quantity of water which kept continually pouring into the shaft. The engine having now landed and got into capital working order, there is a good prospect of every endeavour being now made to prove the richness of the several veins, which ran through their boundary. Beside the shaft sinking at Reading, an old level has been opened out near Beldon, with the intention of being driven eventually to the Reading shaft, a distance of about 11/2 miles, and as the veins of lead are numerous in that part it is to be hoped that they will be successful in striking a valuable vein, and succeed in finding plenty of ore. We may notify that the shares are all sold (10,000 shares at £1 per share), and we anticipate having the pleasure of reporting favourably of the working of the mine, as the directors appear to be determined to give it a good trial.

Deaths

At Browngill 3rd inst., aged 54, Mr Joseph Roddam, Mining Agent, at Benty Field.
See 4th February 1848, 8th January 1858, 6th September 1873, & 25th November 1882.

3rd August 1870 (Teesdale Mercury)
LETTER FROM THE UNITED STATES. —The following letter has been received by Mr John Hardy, miner, of Middleton-in-Teesdale, who has lately returned from America, and now on a visit to his afflicted father. It is from a person who worked in the lead mines at Nenthead, in Alston Moor, and emigrated to the New World some years ago: —
Shulsburg, La Fayette County, Wisconsin, July 5th, 1870. —Mr John Hardy,
Friend John, —Presuming you are safe over the briny Atlantic, back home to the little garden patch, as the American people say, and enjoying yourself in

the land of Christian liberty; if so, John, don't forget, that you have left behind you the land of the free and the home of the brave. Let us hope that each definition will grow nearer and nearer true, until each become true to the letter. But you are at home, back to the Hude Top, enjoying your self among your friends. That is your native place; mine, as you know, is canny Cumberland, and as Artemus Ward would have said, “So far as being at, your first is concerned, I envy you muchly.” Well John, I hope you are well, and that you found your relatives in the same “fix,” and I am happy to say that I have no complaints to make in that line. Shulsburg stands in the same place where it “used to was,” (beat that for Yankee if you can). The long drought still continues, no refreshing shower has visited us since you left, until this morning we have had a little shower, just sufficient to lay the dust. The clouds are gathering heavier, and we trust refreshing rains will follow. Since you left we have had another importation from Alston Moor. My friend Wm. Kindred and three other young men nave reached here in safety, and we intend to dispose of them as follows: Friend Kindred will enjoy himself till fall; as soon as the crops are gathered, he will enter on brother Thomas' farm, Hewitson enters on wages at the McNulty Mine tomorrow morning: the other two being stone masons, we have given them papers of introduction down to Qu Salle, where masons are wanted, a bridge is building across the Illinois river at that point, several new store rooms are going up; new zinc furnaces are building; and a new school will be commenced at once which is estimated to cost 200,000 dollars. It grieves me very much to hear that the Governor and Company’s Miners at Nenthead are not so good as formerly. It is a pity that industrious men, such as the Cumberland, Durham, and Northumberland miners should ever lack steady employment or good wages. As honest labourers, I question very much whether they have equals. I can very easily imagine, how, under such circumstances, they will be anxious to ask you many questions respecting this country, be honest with them, tell them to assume their manhood, to give up the idea that because they have been brought up to lead mining they cannot learn to live by other labour. I have no doubt that the English people are anxious to do the best they can for their labourers, but their market is overstocked, and if the English labourer could only procure the means to get to the Western States of America, and be determined to begin life anew, to get a living outside mining, to aspire to own a few acres of God’s earth, and to see the first title deeds drawn up in his own name and favour, which is most certainly one of the most honourable aspirations which can have a place in man’s bosom; if he can only get the energy, the “spunk,” and be sober and industrious, and get out to this new country, and come with a determination to do anything to succeed: you can safely say that ten years of such industry and prudence will make independent farmers. Then if they be honest and honourable, as every Englishman ought to be, they may lift their heads and stand on an equal with any man who breathes the free air of heaven. To encourage such energy tell them of our new contemplated Pacific railroad, which is to stretch from the head of Lake Superior and run through Minnesota. Dakota, Nebraska, and on through Washington territory to the Pacific Ocean, opening up for settlement millions of acres of land as productive as ever bird flew over. They can have a choice of climate varying from the dry, cold, healthy, and bracing as that of Minnesota, to the salubrious climate on the Pacific coast, where cattle graze the whole your round, and

where all sorts of fruits can be raised in abundance. Point them to Oregon, a state laying between Washington Territory and California, and which is perhaps the bed grazing and fruit growing country in the world, and where only six per cent of the land has yet passed from the hands of the government. It often grieves me to think so very few of the English people are becoming owners of the soil in America, it would be well for them, and well for the British Government were it otherwise, because the American people are not, to say the least, very favourably disposed towards England The German element, who are settling here by millions, are indifferent on that point, and would be very easily drawn in, in case of any trifling dispute between the two countries. Whilst the Irish element is getting strong, and the feeling very bitter, English people, on the contrary, are generally true to the home government, consequently the more of that feeling scattered through this country where every citizen has a voice in the government, the better able to counteract the feeling in an opposite direction. Perhaps if our Pre-emption and Homestead Law- were better understood, it might prove a stimulus in that direction. Thinking you may have not studied these laws sufficiently to answer all enquirers, I will enclose a copy of them in a condensed form. Any emigrant, on his arrival in this country, can have naturalisation papers drawn in his favour for about one dollar, he will then be a fit subject to take advantage of these laws, and can select for himself 160 acres of unappropriated government land, for merely the expense consequent on making his selection, and perhaps about 12 or 15 dollars expense connected with getting a deed or patent. Of course, parties wishing to obtain land at first or government cost must go West, say on the track of the North Pacific railroad. And the best plan would be for a number to unite and go out together and settle in the same neighbourhood. Another good plan is for parties who intend to come out in a few years, to get trustworthy parties to make selections for them in those districts where the land has been brought into market by government, and offered for sale at one dollar and twenty-five cents per acre. When such selections arc well made, it is no uncommon occurrence for such selections to rise from 1.25 dollars to 5, 10, and even 25 dollars per acre in from one to three years after being located. One of the very best plans is for such who have a little means, and have been used to labour, to deposit their means, in safe hands, and procure employment on such a railroad as the North Pacific, to keep up in front, and when climate and soil suited them, to invest their means. I, with others here, have a notion of going out on some such enterprise, next spring, but of course I expect to see you before that time. With kind love to enquiring friends, I remain, respectfully yours, John Green.

(COPY.] PRE-EMPTION LAW.

The Pre-emption Act of Sep. 4th, 1841, provides that “every person being the head of a family, or widow, or single man or woman over the age of 21 rears, and being a citizen of the United States, or having filed a declaration of intention to become a citizen, as required by the naturalisation laws," is authorised to enter at the Land Office 160 acres of unappropriated Government land by complying with the requirements of said act. Which requires parties making an entry to improve it sufficiently to show that the land is appropriated in good faith. Said improvements must be made within six months after filing their declaratory statement. Then after six months actual residence, by paying the government price. Proof of residence must be made

by two witnesses. When a person has filed a declaratory statement for a tract of land, and afterwards relinquishes it to the Government, the right to file again is forfeited.

[COPY] HOMESTEAD LAW.

The Homestead Act of May 20th, 1861, provides, &c., same as in pre-emption. Under this act a person must be an actual settler for five years upon a homestead entry before a patent is issued, Six month's time is allowed to prove a residence, from date of entry. Should the father die, the mother can fulfil the requirements of the law, or should both be dead two years, after making such entry, the homestead may be sold for the benefit of the children of said settler—or they may continue residence and cultivation on the land for the period required by law, and at the expiration of the original entry a patent is issued in their own names. If a homestead settler does not wish to remain five years on his tract, the law permits him to pay for it with cash or military warrants, upon making proof of residence and cultivation as required in pre-emption cases. A party who has proved up and paid for a tract of land under the pre-emption act, can subsequently enter another tract of land under the Homestead Act, and *vice versa*.

John Green *married Elizabeth Shipley, at Allendale, 29th December 1804.*
Children of John & Elizabeth Green:
Mary born 20th November 1805, baptised 30th November 1805, Allendale.
Hannah 17th December 1807
William baptised 10th May 1817
Jane baptised 27th September 1813 or 7th May 1815, Ninebanks
Elizabeth baptised 15th March 1823
John T, baptised 15th March 1823
Ann baptised 11th November 1826
Thomas about 1829

In 1841, at Hillersdon Terrace, Nenthead, John Green, lead ore smelter, aged 60, his wife Elizabeth aged 55, and children, Elizabeth 20, Thomas E Green 12, and William Green 1.
William Green married Ann Roddam 1st October 1835, at St Augustine's, Alston.
In 1841, at Hillersdon Terrace, Nenthead, William Green, lead ore smelter, aged 30, his wife Ann aged 25, and children, Mary 4, and John 3.

16th August 1870 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

CHAPEL ANNIVERSARY.—The Wesleyan Methodists of Nenthead, celebrated their chapel anniversary on Friday week, when the Rev. J. H. Morgan, of Newcastle, preached an excellent sermon in the afternoon, and delivered a lecture in the evening, subject: "John Howard, the Philanthropist." The collections were pretty fair considering that the attendance was not large, it being on a week day when many are detained with their work; and the religious element is at a rather low ebb owing to the unsettled state the neighbourhood has been in for the last six months through the mines failing, men and families, during that interval, leaving nearly every week. Those who could raise the needful cash have emigrated to America, and the less favoured and poorer class to other fields of labour, to obtain bread for themselves and families.

PIC-NIC AND GALA DAY,—The first annual picnic in connection with the NENTHEAD Band and Cricket Club, was held in a field at Foulard, on Saturday. The weather was favourable and a large number of people were present front Alston, Garrigill, and other villages, the company being largely composed of the young of both sexes, who manifested every disposition to enter thoroughly into the enjoyments of the evening. The Nenthead and Alston Brass Bands were in attendance, and displaced their wonted ability and talent in providing the music, to which the dancers responded with a vigour and enthusiasm which did them credit. An abundance of tea and cake was obtainable at an easy charge, and every provision was made for the entertainment of visitors. As the time passed the mirth and jollity increased until the thickening shades of night terminated a gathering which seemed to be richly enjoyed by all. After tea, a cricket match was played between an 11 of the cricket club, and 22 of Nenthead and district. Jacob Walton, Esq., was the highest scorer on the 11 side, and C. E. Hudspith on the 22. Prizes were then competed for in running and throwing cricket ball. The foot race was won by Mr. Alfred Atkinson, 1st; T. A. Hudspith, 2nd ; and H. Vipond, 3rd. Twelve entries for throwing tho cricket ball, A. Atkinson, 1st, 88 yds; Wm. Lee, 2nd, 86 yds; and T. A. Hudspith, 3rd, 85 yds.

20th August 1870 (Hexham Herald)

Deaths

At Clog Hall, Nentwater, 5th inst., aged 63, Mr George Wilkinson Lead Miner.

In 1841, at Grassfield, George Wilkinson, lead miner, aged 30, his wife Jane (Swindle, married 17th December 1835) aged 30, and son Thomas 5.
In 1851, at Galligill, Nenthead, George Wilkinson, lead miner, aged 48, his wife Jane aged 44, son Thomas Wilkinson 15, lodger Henry Wilkinson, lead miner, aged 35, and niece Lydia Wilkinson 14.
In 1861, at Clog Hall, Nenthead, George Wilkinson, lead miner, and grocer, aged 52, his wife Jane 53, and son Thomas, lead miner, aged 24. In 1871, at Clog Hall, Jane Wilkinson, widow, grocer, aged 63, and boarder John Swindle, widow, separator at smelt mill, aged 53.
See 13th May 1871, and 10th September 1842.

24th August 1870 (Teesdale Mercury)

Vipond, Agent to the Green Hurth Lead Mining Company, Limited, Riggside, Harwood.

27th August 1870 (Hexham Courant)

Marriages

At Westminster at St Margaret's 23rd inst., William Hollis eldest son of Thomas Luce Esq., of Malmesbury to Emily fourth daughter of Thomas Sopwith Esq., MA. FRS., of 103 Victoria street, Westminster.

2nd September 1870 (Carlisle Journal)

OPENING OF A NEW CHURCH AT ALSTON.

On Tuesday, the new church, which has for some months been in course of erection at Alston, was opened for divine service by the Lord Bishop of Durham. The weather was very favourable and there was a large and fashionable assemblage of ladies and gentlemen. The opening service commenced at eleven o'clock, and was made full choral. Prayers were read by the Rev. Mr. Mason, of Whitfield; and the lessons by the Vicar of Alston (the Rev. W. P. C. Baylee) and the Rev. H. C. Barker, of Hexham. The Venerable Archdeacon Bland assisted at the Communion Table. The sermon was preached by the Lord Bishop, who, in appealing to the congregation for contributions, said he marvelled at the courage of those who took part in such a great work as the rebuilding of such a church as this, and venturing to start with it until money sufficient for the purpose was subscribed. £800 was still required, putting aside the completion of the tower which was comparatively unimportant, and he expressed a hope that those who had already subscribed, might yet be able to do so again and again till the good work which had been inaugurated to-day was completed. In the evening, another service was held, and the Ven. Archdeacon Bland preached a sermon. A collection was made at the end of each service, that in the morning amounting to £30. The new church is not yet complete, the gas and warming apparatus being still required as well as some minor matters in the interior ornamentation. The most important deficiency is the tower. As yet this has only been raised a height of thirty feet, but the plan is for it to be fifty-five feet high and topped with a spire of sixty feet. These arrangements will be carried out as funds allow. The church occupies almost the same site as the old one, and while the workmen were engaged in digging the foundation they discovered the foundation of the original church that was erected in the eleventh century. The upturned stones bore traces of very elaborate carving and decoration. The present church is built in the style of the thirteenth century and constitutes of a nave, south aisle, chancel, and transept, the latter forming the vestry and organ chamber. …

3rd September 1870 (Hexham Herald)

Deaths

At Croft, Nentwater, suddenly, 30th ult. aged 24, Mary Ward.

In 1841, at Coalcleugh, Thomas Ward, lead miner, aged 25, his wife Esther 35 Jonah Ward, lead miner, aged 15, Sarah Ward 15, William Ward 11, James Ward 2 months, John Fairless 5, and Thomas Fairless 3.

12th October 1870 (Teesdale Mercury)

MIDDLETON-IN-TEESDALE

The late Mr. John Hunt.—A neat pamphlet, entitled "Poems by the late John Hunt, of Middleton-in-Teesdale," has just been issued, and may be had of the booksellers of the district. The object of the publication will be best set forth in the following extract from the preface:— "In bringing the present work before the public, the wishes of the author, unhappily, cannot be consulted. It may be stated that its publication was never contemplated by him. The composer, John Hunt, belonged to the horny-handed working-class, was born and brought up at the picturesque town of Middleton-in-Teesdale, and employed at the extensive mines of the London Lead Company. Leaving school at an early age, he was placed at the ore-dressing floors during his boyhood, after which he worked inside the mines, and his hard-earned wages went to support his widowed mother, who unfortunately became such while her son was but a child. He married when comparatively young, and in due course found himself burthened with a large and helpless family, who, up to the time of his death, were dependent upon his labours for their support. He died at the age of forty-two, and during the last two years of his life suffered from the effects of an insidious consumption, which ultimately terminated his career. A widow and eight children have to mourn his loss, and are left to battle with the world, and eke out a subsistence as best they can. The design in publishing the following poems (the cost of which has been defrayed by private subscription from a few warm-hearted gentlemen) is to render assistance to a truly charitable object in relieving the wants of the fatherless and the widow. In criticising the productions of the author considerable allowance must be made for his opportunities of self-improvement. To the benevolent portion of the community this little work is respectfully commended."
John Hunt son of Richard and Elizabeth (Thompson, married 24th May 1814, at Middleton) Hunt baptised 5th February 1826. Richard Hunt was buried 10th October 1837, aged 54, at St Mary the Virgin, Middleton.
In 1841, at Middleton, Elizabeth Hunt aged 50, children, Mary 20, Richard 20, Nancy 15, Elizabeth 11 and John 15.
John Hunt married Margaret Wearmouth 4th February 1847, at Middleton.
In 1851, at Middleton, John Hunt, lead miner, aged 25, his wife Margaret, aged 23, born St John's Chapel, Weardale, and daughter Margaret aged 1.

In 1861, at Masterman Place, Middleton, John Hunt, lead miner, aged 35, his wife Margaret 31, children, Margaret 11, William 5, John 4, Sarah 2, and George 7 months.
John Hunt was buried 24th January 1867, aged 42, at St Mary the Virgin, Middleton
In 1871, Margaret Hunt, lead ore miners widow, aged 40, children, William, lead ore washer, aged 15, John, fireman on engine aged 15, Sarah 11, George 10, Joseph 8, Isabella 6, and Nixon 4.
In 1881, at Town End, Middleton, Margaret Hunt, widow, aged 56, children, William, Whin Quarryman, aged 25, John, Whin Quarryman aged 23, George, lead ore washer, aged 21, Joseph, lead ore washer, aged 17, Isabella, domestic, aged 15, and Nixon 14.
Margaret Hunt died 3rd quarter 1902, aged 75, registered at Tynemouth.

14th October 1870 (Carlisle Journal)

18th November 1870 (Carlisle Patriot)
ALSTON CARPET AND WOOLLEN MILL COMPANY LIMITED,
ON Friday last, the first ordinary meeting of the in this company was held at the Mill, Alston. The meeting was largely attended, The following were elected as directors in place of those retiring—Messrs J. M. Paull, Lowbyer, Alston; J. P. Walton, Green Ends, Alston; U. Bainbridge, Alston; J. Cowper, Acomb; J. J. Millican, and Dr. Savage, of Nenthead; and J. Peart, Alston. From a statement of the present position and prospects of the Company submitted to the meeting by the retiring directors, it appeared that the Mill premises had undergone a complete over-haul, and the machinery in the Mill at the time the company took possession had been put into good working condition, and a quantity of new machinery also procured; also that a large stock of wool suitable for the kind of manufacture which it is intended to carry on, has been purchased at reasonable prices. A large shed has been erected for the carpet and power looms, part of which has been appropriated as a warehouse an saleroom. It is intended to manufacture carpets, hearthrugs, tweeds, &c., specimens of which are already on view at the Mill. it is expected that the Mill will be in full working order by the New Year.

6th December 1870 (Hexham Courant)

DEATH OF MR JOSEPH DAWSON

We regret to announce the death of Mr Joseph Dawson of Whitely Shield, West Allendale, which event happened last Wednesday (30th Nov). Deceased was employed at the lead ore mines of W. B. Beaumont Esq. Mp., a “Masterman washer,” which past has been efficiently discharged by members of this family for three generations back. ... He was in his 55th year, ... He leaves a wife and a family of 9, four of whom are now married, to lament his loss.
In 1851, at Whitely Shield Green, Joseph Dawson, lead ore washer and farmer of 14 acres, aged 34, his wife Elisabeth (Hetherington married 28th March 1840, at Ninebanks) aged 32, children Hugh 10, Thomas 8, Jane 4, and Elisabeth 1.
In 1861, at Whitely Shield, Joseph Dawson, lead ore dresser, aged 44, his wife Elizabeth aged 42, children, Hugh lead miner 20, Thomas lead miner 18, Jane 14, Elizabeth 11, Joseph 9, John 6, Ann 4, and Samuel 2.
In 1871, at Whitely Shield, Elizabeth Dawson, widow, occupier of 27 acres, aged 53, children Joseph, lead ore miner, aged 19, John, iron stone labourer, aged 16, Ann 14, Abraham 8, and sister Frances Armstrong, miners widow, aged 56.

7th December 1870 (Teesdale Mercury)

WOODLAND.

A Concert of Vocal and Instrumental Sacred Music was held in the Wesleyan Chapel, Woodland, on Saturday evening, the 3rd inst., by the Wesleyan choir of Middleton-in-Teesdale, under the leadership of Mr Wm. Parkin; Miss Cora Parkin presiding at the harmonium in a very efficient manner. Mr M. Bowman occupied the chair. The services of the choir were tendered gratuitously. Every part of the long programme was ably sustained by the choir, some of the pieces reflecting great credit on them, especially

those sung as duets by Miss Atkinson and Miss Cora Parkin, which were rapturously and deservedly encored. The company was large, and seemed greatly delighted with the pieces, which were rendered in such a creditable manner. Before the close of the concert, Mr J. Collinson, the Lead Mining Company's Agent at Gaunless Smelt Mill, addressed the company in a brief but appropriate speech, in which he eulogised the performance of the choir, and proposed a vote of thanks to them for their services, which was cheerfully accorded them by loud and prolonged acclamation. The Chairman, on behalf of the choir responded, and thanked the company for their appreciation of the services of the choir, and also the ladies who had kindly provided them refreshments on their arrival. The Doxology being sung, the company retired well satisfied with the treat. The money received for admission amounted to £5 12s. which will be appropriated towards the liquidation of the debt incumbent on the chapel.

13th December 1870 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Deaths
At Physic Hall, near Alston, on the 6th inst., John Walton, aged 80 years.

6th January 1871 (Carlisle Patriot)

The GARRIGILL READING ROOM, held its anniversary on Saturday night. The balance in hand on the year is £3 13s. 2d., number of members 64, books circulated in the year, 768.

7th January 1871 (Hexham Courant)

Nicholas Sanderson of Allenheads was summoned for being drunk and refusing to quit a public house at Allenheads on December 2nd. PC Robertson stated "He has been out to New Zealand and only came home lately. He is a quiet man when sober." Fined 5s and costs.

LETTER FROM MR. J. JAMESON, LATE OF HEXHAM

The following letter, which cannot fail to be interesting to the numerous friends of Mr. Jameson in this district, has been handed to us for publication: -

"City of Toronto, 466, Younger Street, Ontario
Canada W., 7th Dec. 1870.

Dear Sir, Before leaving Hexham I promised to several that I would write to them shortly after my arrival here and give them an account of my proceedings, how I like the country, &c., and as I find that I have not time to write to all, will you therefore kindly permit me to address to you the following fragmentary sort of letter, the publication of such portion of that you may think interesting will oblige. After arriving here, about the 14th of June last, we remained in the City one night, and took our departure the following morning by the Northern Railway to Bell Ewart, against the solemn protests of a man who had returned the day previous from the great 'El

Dorado,' the 'Muskoko district.' Arriving at Bell Ewart all safe, we then embarked on board the 'Emily May' for Orillia, the weather being fine, made it quite pleasant sailing on the lakes. From Orillia, we went to Washago; from Washago we went by stage to Gravenhurst. This is the roughest part of the journey. I cannot attempt to give you an idea of it. Fourteen miles I may say through a dense forest, amidst huge boulders and tall pine trees up hill and down dale, and often expecting to reach terra firma sooner than you bargained for, part of the road being what is called 'Corduroy,' but I believe it is now considerably improved, and part of it planked. We reached Gravenhurst late at night and went aboard the 'Wenonah' for Bracebridge, at which place we arrived about one o'clock on Sunday morning. We remained at the Royal Hotel over the Sunday, and left on Monday morning in a team hired from the obliging landlord of the hotel, and reached our destination safe. We remained a month with our friends at Dell Brook and Lee Hall, which is about five miles from Utterston village and Post-office. Bracebridge is quite a rising place, with four large hotels and several large stores; seven or eight years ago, it was not in existence, and now it has a newspaper, the Bracebridge Advocate. I bought a hundred acres of land near to Utterston, and about a mile from Mr Matthew Armstrong's farm (late chemist Hexham), and have about twenty acres clear and under cultivation. I think it will be about two miles from St. Mary's Lake.

The scenery from the lake is beautiful, and all along the river (Muskoko) presents a magnificent scene for the painter; at Reed's Bay it widens out into what appears to be a calm still lake with the motion of the dark waters scarcely perceptible, and when you round the bend you see before you a wild turgid rapid, dashing along with impetuous fury. A little farther down Mr Machie, from Birmingham, has erected a comfortable farmhouse and buildings, and Mr Kay has selected a beautiful spot on the riverbank for his residence, which he calls Inverness House. As I could not get possession of my place until the fall, and for other reasons, I left and came here for the winter, but as we like Toronto, I think it is probable we shall remain here for some time. I have gone into business again and opened out a new grocery and liquor store, and doing much better than I expected. Dr Johnson, who boards with us, was telling me he had some conversation with Col. Maude, of London, England, who has been up to Muskoko examining the country. He is connected with one of the leading English Emigration Societies and he approves of the district being every way adapted for profitable farming. He has purchased property for himself at Bracebridge. I was sorry to read in the Courant the death of Dr Pearson. With respects to yourself and Mrs C., I remain yours obediently,

JAMES JAMESON

P.S. The weather is remarkably fine here, we having had only one fall of snow, which disappeared in a day or two.

In 1861, at Fore Street, Hexham, James Jameson, grocer, provisions dealer, aged 28, his wife Phillis (Reed, married 3rd quarter of 1854, reg. at Hexham), aged 27, and daughter Ida Mary 3 (Ida died 4th quarter of 1866, aged 8).
The Canadian passenger lists suggest that they travelled on the St David from Glasgow arriving at port 15th June 1870. In 1871, James and his family were living in St Patricks Ward, Toronto West, Ontario he was working as a storekeeper. The 1881 census shows them in the same place, James 46 is

working as a Short Hand writer, Phillis his wife aged 46, and children are living with him, James a bookbinder 18, Phillis 15, George 14, Ida 13 and Minnie 8. In 1891, James is listed as a Teacher of shorthand.

21st January 1871 (Hexham Herald)

NENTHEAD

The Lead Company's Yearly Pay at Nenthead was held on January 11th and has been the poorest that has been experienced for many years. Above £2,000, less has been paid than last and former years, which was sadly felt throughout the district among tradesmen and the labouring poor. It has fallen heaviest on the miners underground, and as the greatest number of the Company's workmen are composed of underground miners, and makes the loss to the trading community felt throughout the district. I think there was little if any interest occurred at the pays. Hawkers and Peddlers suffered a terrible onslaught by the Police, the generality of whom were ignorant of the change, which took place at the beginning of the new-year. Not having certificates, and the Police having to perform their duty, discharged the whole of those unprovided with permits for Hawking. A few who were awake to the recent alterations made a fair thing of it, in getting the business to themselves which others had to suffer, who had provided a stock of goods for the occasion being put hor's de combat, and their stock of goods partly left on hand. Upon the whole, the pays in the Market place were very thin, and also the public houses, though there were no lack of tradesmen, as their numbers was quite up to the standard of former years.

Deaths

At Nenthead, 14th inst. aged 73, Mrs Jane Elliott.

In 1841, at Burn Bottom, Nenthead, Thomas Elliot (died 1849), lead miner, aged 45, his wife Jane (Walton, married 20th November 1819, Alston) age 40, children John 15, Jane 13, Smith 10, Sarah 8, Robert 6, and Mary Ann 3.

In 1861 at The Folly, William Keenleyside joiner 45, living with his brothers & sisters, Matthew lead miner 40, Joseph lead ore dresser 39, Mary Keenleyside 37.
At Nenthead 7th inst., aged 4, Sarah Jane daughter of Mr Robinson Watson.
In 1841, at West Nenthead, Mary Watson, aged 40, children Mary 18 Robinson, lead miner, aged 16, and Jane 13.
In 1851, at Overwater, Robinson Watson, lead miner, aged 25, his wife Mary Ann (Peart, born Stanhope, married in 1849 at Nenthead) aged 22, and daughter Ann 1. In 1861, at Pipers Row, Nenthead, Robinson Watson, lead ore miner, aged 35, his wife Mary A., aged 32, children Ann 11, John 9, Thomas 7, Robinson 5, and Roddam 1. In 1871 at Overwater, Robinson Watson, lead miner, aged 45, his wife Mary Ann 42, Thomas shoe maker 17, Robinson lead ore washer 15, Roddam 11, Adam 9, Betsy 6, Mary 1. Robinson Watson died 1st quarter of 1880, aged 54, at Darlington.
In 1881, at 44 Jane Street, Darlington, Mary A. Watson, widow, aged 52, children Roddam, waiter in cocoa rooms, aged 21, Adam, railway porter, aged 19, Betsy, waiter in cocoa rooms, aged 16, and Mary 11. See 24th March 1888

14th February 1871 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Deaths
At Alston, on the 5th inst., Mr John Lowe, master of Alston Workhouse, aged 49 years.
In 1861, at Main Street, Alston, Phebe Lowe, unmarried, house keeper, aged 57, and boarder, John Lowe, lead miner, aged 39.
At Gillhouse, near Alston, Mary Richardson, aged 64 years.
In 1861, at Gill House, Alston, Ann Richardson, unmarried, farmer of 150 acres, emplying 3 labourers, aged 55, sister Mary 50, cousin John, scholar, aged 16, and 3 servants.
At Annatwalls, on the 7th inst., Sarah, daughter of William Walton, aged 16 years.
In 1861, at Annatwalls, Alston, William Walton, lead miner, aged 31, his wife Hannah 28, children Sarah 6, Joseph 4, and Amelia 1. See 31st August 1889

14th February 1871 (Carlisle Patriot)
ALSTON WORKHOUSE.
MASTER WANTED.
THE GUARDIANS of Alston with Garrigill intend at their MEETING to be held on Saturday the 18th March next, to elect a MASTER of the WORKHOUSE at Alston. He must be a Single man or a Widower without encumbrance, as no children can be received into or Boarded in the Workhouse.

Candidates must be fully competent to keep the Workhouse accounts and to perform the duties of Master in accordance with the regulations of the Poor Law Board.
The Salary will be £25 per Annum (subject to the approval of the Poor Law Board) with rations, washing, lodgings, and fuel in the Workhouse.
The Master must give Security in the Sum of £100, for the due performance of his office. Applications in the handwriting of the Candidates— naming age— accompanied with testimonials of recent date are to be sent to me before the 11th March next.
No Candidate need attend unless written to for that purpose.
By order of the Board, JOSEPH DICKINSON, Clerk. Alston, 18th February, 1871.

24th February 1871 (Carlisle Patriot)
SANITARY STATE OF ALSTON. —A meeting of the inhabitants of Alston was held in the Town Hall, on Monday last, for the purpose of hearing and considering a report drawn up by a committee appointed at a previous public meeting, for inquiring into the sanitary state of the town. The Rev W. C. P. Baylee was called to the chair. The meeting was numerously attended. The Chairman explained the object of the meeting, after which the report of the committee was read and adopted. The committee recommended several alterations and additions to the present system of sewerage and water supply, and that in connection with the latter, means should be provided for extinguishing fires, if such should unfortunately occur. They also recommended that an effort should be made to raise the necessary funds by a voluntary subscription, and suggested that a memorial, a copy of which was read to the meeting, should be forwarded to the Lords of the Admiralty and the Lords of the Manor, asking them to assist in enabling the inhabitants of the town to carry out the much-needed improvements. The memorial was adopted by the meeting.

1st March 1871 (Teesdale Mercury)
GREEN HURTH LEAD MINE. —This mine is situate in the county of Durham, at the point where this county is divided from Cumberland and Westmorland by the river Tees and Crook bum. The sett is many miles in extent, and the turnpike-road leading from Alston to Middleton-in-Teesdale, passes through it. The quantity of ore raised from shallow pits, &c., about the surface is not known. About twenty years ago a shallow level was driven 120 fms. above the scar limestone, and a rich east and west vein discovered, from which large quantities of lead ore were obtained, and a very handsome return made to the shareholders for the capital expended. In consequence of the level being driven above the limestone a sump had to be sunk into it, and the work and ore were brought to the sump foot in wheelbarrows, &c. As the workings in the vein became more distant the water increased so much, and the air became so impure, that these works were abandoned, with good ore standing both east and west in the vein. A feeble attempt was made to re-win the mine by other works, but the calls necessary to do this were not responded to, and the mine lay idle for some time, and eventually the sett was forfeited. The present company having obtained a new lease and lower dues extended a level under the scar limestone, and have also bought up a deep level between two and

three hundred fathoms. In the upper level they have cut two north and south veins, not known to exist in the sett. Workings on same veins are going on at several points, and the produce from them, although not rich, has enabled the company to erect a large amount of valuable property on the mines, consisting of lodging-houses for men, stables, covered dressing-floors, &c., without any call upon the shareholders. A water-race has been cut for nearly two miles, and sufficient water brought home for a crusher and all dressing purposes, also a branch cart-road partly made for the same distance. Exploring works have been going on to discover the east and west vein, formerly so rich near the surface, and it is believed that this has been accomplished, the vein having been heaved to the south by the north and south veins; however an east and west vein is found, with ore and mineral precisely the same in character as the “old vein’’ and appears likely to be as rich in this level at in the upper one. The same vein must shortly be discovered in the deep level—two veins are already cut, but not explored. The sett is traversed by a great number of east and west veins. Workings carried on north and south in the newly-discovered veins must discover all the east and west veins in the sett. At the north working one east and west vein has just been cut in the level 5 fms, wide, but is not yet explored. As the north and south veins contain more ore than will pay the cost of driving, it follows that all the east and west veins will be cut at no cost to the shareholders, and last year's workings left a profit of 400/., besides fitting up all erections. — *Mining Journal*

7th March 1871 (Penrith Observer)
Marriages
At Nenthead, on the 21st ult., by the Rev. H. Robinson, vicar, Mr George Hopkins, to Miss Ann Tatters, both of Nenthead.
In 1871, at Overwater, Nenthead, Elizabeth Hopkins, widow, house keeper, aged 65, sons, Joseph, lead miner, aged 23, George, lead miner, aged 25, and daughter in law, Ann Hopkins 22.
Joseph Hopkin/Hopton died 3rd November 1871, aged 23. See 11th November 1871.
In 1881, at Holme Foots, Nenthead, George Hopkin, lead miner, aged 31, his wife Ann 31, and daughter Jane 8.
In 1891, at Overwater, Nenthead, George Hopkins, lead miner, aged 44, his wife Ann 41, and son, George Charles 6. In 1891, Jane Hopkin aged 18 was working as a domestic servant for Anthony Bolton, manager of the lead smelting works at Nenthead.
In 1901, at Overwater, Nenthead, George Hopkins, horse keeper, aged 54, his wife Ann 51, and son, George Charles, labourer, aged 16.
In 1911, at Nenthead, George Hopkins, widower, lead miner, aged 64, son George Charles, lead miner, aged 26, and servant, Florence Percival, house keeper, aged 20.

9th March 1871 (Whitehaven News)
ACCIDENT TO A MINER AT NEWLANDS, NEAR KESWICK. —On Saturday morning as John Fisher who is employed at Yewthwaite Lead Mine, was engaged in clearing out the workings of the mine preparatory to its changing owners, he came in contact with the hopper of the engine, by which his was literally smashed above the elbow, and very severely lacerated below it,

causing a great loss of blood. The accident has caused a general feeling regret in the vale, as the poor man was universally respected as a good neighbour, and most sober hard working man, who, upon small wage, has nobly endeavoured to live respectably. He has a family of eight children, six of whom are quite unable from their tender years to earn anything towards their own maintenance. The arm has been set, and he is progressing as favourably as can be expected.

CALDBECK FELLS MINING COMPANY. —The half yearly general meeting of the shareholders in the Caldbeck Fells Lead and Copper Mining Company (Limited) was held on Friday at the offices of the company, Carlisle— Mr. Banks, of Highmoor House, in the chair. The report of the directors, which was adopted, showed that the expenditure on capital account had been £605 14s 10d. The revenue account showed loss of £968 17s 5d. The sales of lead ore during the half-year had amounted to £3,446 9s 9d, and those of copper ore to £728 7s 6d. The report stated that had it been possible to dress the ore obtained from the mine the accounts would have shown profit, but owing to the uncertainty and inadequacy of the water power the ore could not be dressed, and the directors were opinion that a steam engine in connection with the dressing apparatus would be necessary. In his report of the condition of the mines underground, Mr. John Taylor, who inspected them in January last, states that the levels were at that time poor, with one or two exceptions, and must be extended through the bars of unproductive ground before ore will be met with. In the deep adit level the vein had entirely failed, and did not look promising, but it might be reasonably expected that after the level had been extended a certain distance, ore-bearing ground would again be met with. The deep adit level had been driven on the new lode eastwards about fifteen fathoms through a fine piece of ore-bearing ground. A rise had been commenced in the back of the deep adit level near the junction of the north and new lodes, which is now about four fathoms, and has passed for that distance through a very fine lode with three tons of lead ore to the fathom. The rise would be carried up to communicate with the 80 fathom level as quickly as possible. Mr. Taylor said that since his report had been issued he had visited the mines. As to the level going west, which in January was very poor indeed, Captain Hawke and he had thought that in all probability the lode was further to the north, so they had taken away a piece of ground to the north, and now a very fine lode could be seen. The same policy was pursued with the 80 fathom level, and a lode had been found, which, however, he could not say was very rich.—The Chairman announced that the directors had not agreed among themselves as to the erection of a new engine. —No resolution was made on the subject. The retiring directors, Sir Robert Brisco and Mr. Banks, were re-elected, and Mr. Mulcaster was added to the board. Mr. James Irving was re-appointed auditor.

11th March 1871 (Hexham Courant)

WEARDALE

ALARMING AND DESTRUCTIVE FIRE

At five o'clock on Saturday morning last, some buildings belonging to Mr W. B. Beaumont MP. and situated at, and attached to, the Slitt Lead Mine, near Westgate, Weardale, were entirely destroyed by fire. The buildings consisted of a mine shop and stable on the ground floor, and two rooms on the second

storey. ... The fire arose in this way. Three of the workmen who were employed at the engine were heating some coal tar for the purpose of painting or tarring a large pit or shaft rope when in some unaccountable manner the tar got ignited. ...

18th March 1871 (Hexham Courant)
Deaths
At Acomb Forge, 15th inst. aged 55, Mr John Chester, lead miner, late of West Allen.
John was the son of Matthew and Sarah Chester, baptised at Ninebanks, 8th September 1816. Matthew Chester married Sarah Swindale, 20th July 1811, Allendale.
In 1841, at High, Nentsbury, Sarah Chester, farmer, aged 45, Joseph Chester, lead miner, aged 25, John Chester, lead miner, aged 20, Matthew Chester, lead miner, aged 15. In 1851, at Low Craig Nook, Sarah Chester, widow, farmer of 9 acres, aged 57, son Joseph, lead miner, aged 38, and granddaughter Sarah Shield 12. In 1861, at Nenthall, Sarah Chester, lead miners widow, aged 66, son Joseph, spelter miner, aged 49, and grandson Matthew Ridley aged 6.
Sarah died 1st quarter of 1863. In 1871, at Nenthall, Joseph Chester, retired lead miner, aged 58, son Matthew R Chester, lead miner, aged 16, and cousin Barbara Ridley, house keeper, aged 20.
Joseph died 2nd quarter of 1871, aged 58.
In 1851, at Nentsbury, Matthew Chester, lead miner, aged 28, born America, his wife Jane (Lattimer), aged 29, born Alston, children, Mary 6 (born Brampton), Sarah 5, Barbara 2, and Margaret 8 months, the last 3 girls born at Alston.
In 1851, at Haggs Foot, Nenthead, John Chester, lead miner, aged 34, his wife Jane (Graham, married at Penrith 4th quarter of 1848) aged 37, and Joseph 9 months. Jane Chester died 4th quarter 1869, aged 55, reg. Hexham)
In 1861 at Haggs foot, Nenthead, John Chester, lead miner, aged 44,born Hexham, his wife Jane 47, born Scotland, children Joseph 10, John 9, Elizabeth 8, Sarah 6, Matthew 5, all the children were born at Alston.
In 1871, at Acomb Forge, John Chester, lead miner 19, sisters Elizabeth 18, Sarah 16, and brother Matthew a blacksmiths apprentice. Joseph Chester, lead miner aged 20 the eldest son, was also living at Acomb, he was married to Margaret Isabella (Parker married 1870) dressmaker, aged 19.

24th March 1871 (Newcastle Courant)
EARTHQUAKE IN NEWCASTLE AND DISTRICT.— A distinct shock of earthquake was felt in Newcastle and district at a late hour on Friday night. From all quarters we have received communications going to show that the vibration was of a very decided character indeed. One Newcastle gentleman writes: — 'While sitting in my own house on Friday evening, shortly after 11 o'clock, family and servant having retired to rest, the house shook as if persons had been dancing in one of the upper storeys. I listened; but all was quiet. Immediately afterwards, I felt a similar, though much weaker, shock. The whole house quivered under the former visitation, and I felt certain, on reflection, that it must have been the result of some uneasiness on the part of Mother Earth herself." Mr T. P. Barkas writes to us to say that “last night

(Friday), at about 11:15, he, when in bed, felt a distinct shock of earthquake, and remarked at the time: “That is not a local shaking of the house, but a vibration of the earth's crust.” The sensation occupied about two seconds, and was as if the bed had been rendered suddenly flexible, and sank and rose with considerable rapidity, the only other probable hypothesis being that some very heavy weight had fallen in the room beneath, but such was not the case. The vibration appeared to be from North to South but the lateral motion was slight." Mr Ayton, of Hindley, informs us that all the inmates of his house felt the shock very distinctly, and others hear similar testimony to the earthquake having extended as far west as Carlisle. The earthquake, it seems, had also occurred in other parts of the country. A Press Association telegram says: — “At half-past 11 on Friday night, a slight shock of earthquake was distinctly felt in Yorkshire for some seconds. There was a violent shaking of crockery and windows. The symptoms were felt at York, Wakefield, and Doncaster, it being generally looked upon first as a distant explosion.”

1st April 1871 (Hexham Courant)

W. B. LEAD MINES

We are informed that at the end of June next, Mr Sopwith, who for upwards of a quarter of a century has acted as chief agent at the W. B. Lead mines in Northumberland and Durham will cease active connection with them. Mr Sopwith will then have completed 50 years work in his profession, and we are sure few men will have better earned their retirement than that gentleman. His life has been one of energy and industry, and although by no means in the sere and yellow leaf yet, his very active and laborious career has not been entirely without effect upon even his naturally healthy, if not robust constitution. During the past winter, Mr Sopwith has suffered somewhat severely from illness, and his medical advisors recommend cessation of those active duties, which he has so long and so honourably performed. The many hundreds of workmen with the staff generally connected with W. B. Mines will most sincerely regret the cause of retirement of one for whom they have every reason to feel the utmost respect and esteem. We trust however that in the calm and quiet of a well deserved leisure, Mr Sopwith may speedily recruit his energies and be yet spared to assist in the promotion of those educational and other measures of improvement in which he has for so many years taken a deep interest, and by which the district of the W. B. mines in Allendale, Weardale, and elsewhere have been so greatly benefited. We are glad to learn that Mr Beaumont's acquiescence in this arrangement has been of the most generous character, and marked by lasting and solid proofs of his esteem and regret.

HORRIBLE SUICIDE OF A GENTLEMAN.

A sad case of suicide occurred on Thursday at Middleton in Teesdale. Mr Joseph Pattinson agent to the London Lead Co., residing at Hude, Middleton in Teesdale, a gentleman of strict moral habits rose as usual, had breakfast, read a portion of scripture, and had family prayers; after which he went out, and appears to have gone straight into the stables, put off his coat, vest and neckerchief and deliberately cut his throat.

In 1861 living at Masterman Place, Middleton aged 58, with his wife Elizabeth 56, son Joseph 27 clerk for the lead mining company, and daughter Elizabeth 20, both Joseph and his wife originated from Garrigill. The tragedy brought

the family together in Middleton (Hude Street) as the 1871 census shows. Elizabeth Pattinson 67, Mary Readsham daughter 45, Jacob Readsham son in law 46, Joiner; Joseph Pattinson, son 37, accountant; Ann J Pattinson daughter in law 29; Elizabeth Magee daughter 31; John Magee son in law 32, Primitive Methodist Minister; Elizabeth A Pattinson granddaughter 1; Elizabeth A Magee granddaughter 3.

Deaths

At Chain Bridge near this town, 26th ult. aged 17, Sarah daughter to the late Mr William Baty, lead ore miner.

At Allendale Town, 21st ult. aged 63, Eleanor, wife of Mr John Clemitson.

In 1851, at Allendale, John Clemitson, lead ore washer, farmer of 43 acres, and butcher, aged 47, his wife Eleanor (Watson, married 1831) aged 43, children Robert, farmers son, aged18, Mary 15, Jacob J. lead ore washer, aged 13, John 11, Joseph W. 9, Thomas 7, William S. 4, Eleanor E. 2, Rebecca E. 2.

In 1861, at Finney Hill, Allendale, John Clemitson, farmer of 60 acres and lead ore washer, aged 57, his wife Eleanor 53, children Mary 25, John, lead ore smelter, aged 21, Joseph W. saddler, aged 19, Thomas, farmers son, aged 17, Wm Smith 14, Eleanor E. 12, Rebecca E. 12, and niece Mary J. Clemitson, servant, aged 15.

1st April 1871 (Hexham Herald)

Earthquake reported on Friday 23rd March, 2 shocks reported 7pm and 11 pm further shocks reported the following Friday.

Deaths

At Nenthead 29th ult., aged 31, Sarah, relict of Mr Matthew Pattinson.

Sarah Thompson a bonnet maker, daughter of John a lead miner, & Jane of Nenthead, married Matthew Pattinson in 1861, Matthew a lead ore miner died in 1867, aged 30.

5th April 1871 (Teesdale Mercury)

MIDDLETON-IN-TEESDALE.

London Lead Company's Workmen's Fund. —Some idea of the importance of this fund may be gathered from the fact that the amount of the Members' contributions in 1870 was £1838 2s. 0d. The Lead Company's donation, in 1809, was £100. The expenses of management amount but to £12 19s. 0d. yearly.

Shocking Suicide.—The neighbourhood of Middleton-in-Teesdale evinced considerable excitement on Thursday morning, on its becoming known that Mr Joseph Pattinson agent to the London Lead Mining Company residing at Hude, near Middleton, had committed suicide. The news could hardly for awhile be credited as Mr Pattinson had been so well known as an upright and honourable Christian gentleman, the equal tenor of whose long and useful life seemed to preclude the possibility of an end so tragic. The circumstances of the sad occurrence, so far as they are known are: —Mr Pattinson arose as usual on Thursday morning and had breakfast. He read a portion of Scripture and had family prayers, after which he went out, and appears to have gone straight into the stable, put off his coat, vest, and neckerchief, and deliberately cut his throat. Shortly after his wife went into the stable, and discovered the ghastly spectacle. He was in a kneeling position, with his face on the ground,

quite dead. His clothes were laid on the corn bin, and the razor with which he had committed the awful deed was lying beside him, and also a note written with a pencil on a slip of paper, but evidently whilst in a stale of great excitement, as scarcely a word was legible any further than that it was a farewell address to his wife and family, and kind remembrances to Mr Bainbridge. No reason can be assigned for the perpetration of the horrid deed, but for some few days he was very changed in manner, yet nothing of such a sad nature was apprehended by his family. Deceased, who was sixty-eight years of age, was very highly respected. An inquest was held on Friday, when a verdict was returned that deceased had committed suicide whilst labouring under temporary insanity. The remains of the lamented gentleman were interred on Sunday, and were followed to the grave by the several agents of the Lead Company, most of the workpeople, and a great concourse of the inhabitants generally of Middleton and the neighbourhood.

8th April 1871 (Hexham Courant)
Marriages
At the Independent Chapel, Alston, Mr Joseph Beaumont Hind, to Miss Jane Richardson, both of Alston.
In 1851, at Front Street, Alston, Joseph Hind, grocer & bookseller, aged 39, his wife Susan (Armstrong, married 4th March 1841, Alston) aged 30, daughter Mary 10, sons R Newton 7, J B 6, T Coke 3, and Wm A 1. In 1861, at Butts, Joseph Hinde, lead miner, aged 47, his wife Susan 41, children Mary 20, Robert N, lead miner, aged 17, Joseph B, lead miner, aged 15, Thomas L 12, William A 10, John R 7, and Isabella 6. In 1871, at Front Street, Joseph Hinde, angler, aged 58, his wife Susan 50, children Mary 30, Thomas C, coal miner, aged 23, William A, coal miner, aged 20, John R, coal miner, aged 18, Isabella 16, and grandson Ernest A 7. In 1881, at Cottage, Thirlwell, Haltwhistle, Joseph Hind, retired grocer, aged 68, his wife Susan 58, daughter Mary 40, sons Thomas L., coal miner, aged 32, William, coal miner, aged 29, grandson Ernest A. Hind, coal miner, aged 15, and grandson Edward L. Hind aged 2.
In 1851, at Butts, Thomas Richardson, carpenter, aged 33, his wife Margery A 23, and daughter Jane 3.
In 1861, at Butts, Alston, Thomas Richardson, lead miner, aged 44, his wife Margery A 33, daughters Jane 13, and Frances 5.
Margery Anna Richardson died 2nd quarter of 1861.
In 1871, at Butts, Thomas Richardson, widow, joiner, aged 54, son in law Joseph B Hind, coal miner, aged 25, daughter Jane Hind, mill reeler, aged 23, and daughter Frances Richardson, mill winder, aged 15.
Thomas Richardson died 2nd quarter of 1880, aged 64.
In 1881, at Front Street, Alston, Joseph B. Hind, coal miner, aged 34, his wife Jane 32, children Margaret A. 9, Isabella 6, Thomas 3, and John Js. 1. In 1891, at Butts, Joseph B Hind, coal miner, aged __, his wife Jane 43, children Margery A., stocking examiner, aged 19, Isabella, stocking knitter, aged 16, Thomas, wool winder, aged 13, John S 11, Alfred 6, and Robert W 3. In 1901, at 106 Richardson Street, Caldewgate, Carlisle, Joseph B Hinde, city toll collector, aged 58, his wife Jane 53, children Margaret A 29, Isabella, iron works time keeper, aged 26, Thomas, Railway fitter engineer, aged 23, John

J, stationers clerk, aged 21, Alfred, apprentice die fitter, aged 16, and Robert W P, grocers errand boy, aged 13
Primitive Methodist Chapel, 1st inst. Mr Peter Swindle, of Clog Hall, to Miss Ellen Walton of Nenthead Fields.
In 1881, at Bridge End Cottage, Nenthead, John Swindle, widow, lead smelter, aged 62, also Peter Swindle, lead smelter and farmer of 13 acres, aged 30, his wife Eleanor 30, sons John 9, and Isaac W. 4.
See 10th September 1942
Deaths
At Alston 1st inst. aged 66 Mr Thomas Sanders
In 1841, at Kates Lane, Thomas Sanders, lead miner, aged 30, his wife Sarah (Seatree, married 4th quarter of 1839) aged 20, and son William 9 months.
In 1851, at Kate's Lane, Alston, Thomas Sanders, lead miner, aged 45, his wife Sarah (Seatree, married 4th quarter of 1839) aged 34, wife's son Joseph Seatree, lead miner, aged 16, sons William 11, and Thomas 4.
In 1861, at Clitheroe, Alston, Thomas Sanders, lead miner, aged 55, his wife Sarah 45, William, lead miner, aged 20, and Thomas, lead miner, aged 14.
In 1871, at Townfoot, Sarah Sanders, widow, aged 55, son William, lead miner, aged 30, grandson Walton Lowe 6, and visitor Mary Seatre, coal miners wife, aged 51. In 1881, at Crown Lane, Sarah Sanders, lead miners widow, aged 67, son William, coal miner, aged 42, and grandson Walton Sanders, coal miner, aged 16.
At Alston 2nd inst. aged 1 week, Alice daughter of Mr John Bales.
In 1861, at Town Head, Alston, John Bales, lead miner, aged 31, wife Ann (Clementson, married 1st quarter of 1855) aged 24, children Elizabeth 4, Sarah A. 3, and boarder Joseph Clementson, lead miner, aged 21. In 1871, at the Queens Head Inn, Front Street, Alston, John Bailes, lead ore miner, and Inn keeper, aged 61, wife Ann 35, children Elizabeth 15, Isabella 10, Margaret I. 6, Mary 6, John J. 1, and domestic servant Jane Hutchinson 29. Sarah Ann aged 13, was staying with her grandmother at the Royal Oak Inn, Front Street, Alston, Elizabeth Diggles, widow, Innkeeper aged 58 and her grandmothers son Joseph Clemintson, lead miner aged 31.
In 1881, at Front Street, Swan Inn, John Bayles, innkeeper & licensed victualler, aged 51, his wife Ann 45, children Elizabeth, domestic servant, aged 24, Margaret 15, Mary 13, John 11, Thomas W. 7, and Alfred 2.
In 1891, at Swan Inn, Front Street, John Bales, innkeeper & lead miner, aged 61, his wife Ann 55, children John, lead miner, aged 21, Margaret, domestic servant, aged 25, and Alfred 12 See 19th June 1872

15th April 1871 (Hexham Courant)
Deaths
At Nenthead, 6th inst. John Hutchinson aged 10 years.
In 1851, at Burn Bottom, Anthony Hutchinson, lead miner, aged 41, born Allendale, his wife Margaret (Charlton?) aged 51, born Allendale, children John, lead miner, aged 19, born Nenthead, Elizabeth, dressmakers apprentice, aged 17, born Kenton, Jane 14, born Stanhope, and Ann 9, born Nenthead.
In 1861, at Elba, Nenthead, John Hutchinson, lead miner, aged 29, his wife Hannah (Erwin, married 2nd February 1854, at Nenthead) aged32, children Anthony 6, James J. 3, and John 3 weeks.

In 1871, at Hill Top, Nenthead, John Hutchinson, lead ore smelter, aged 39, his wife Hannah aged 42, children James E. 13, John 10, Joseph 7, Margaret A. 5, and Elizabeth 2. In 1881, at Todhills, Byers Green, Durham, John Hutchinson, plate layer on railway, aged 49, his wife Hannah 52, children Joseph 17, Margaret A. 15, Elizabeth 12, boarder Anthony Hutchinson, widow, retired lead miner, aged 71. In 1881, at Tod Hill, Byers Green, John Hutchinson, plate layer on railway, aged 49, his wife Hannah 52, children Joseph, masons labourer, aged 17, Margaret A. 15, Elizabeth 12, and boarder Anthony Hutchinson, widow, formerly lead miner, aged 71.
Anthony Hutchinson snr., died 2nd quarter of 1882, aged 72; his son John died 1st quarter of 1888, aged 56, both reg. Auckland, Durham.
In 1891, at Tod Hills, Byers Green, Hannah Hutchinson, widow, aged 62, son Joseph, mason, aged 27, daughters Margaret 25, and Elizabeth 22.

29th April 1871 (Hexham Courant)

ALSTON

RECREATION UNDER DIFFICULTIES

The Alston woollen mills seem not only to have opened up a source of employment, but also a source of enjoyment to the young folks of the locality. It had been proposed by several of the young men and women engaged in the factory to have an exploring expedition up Nent Force on Monday night. A large boat belonging to the Commissioners was to be used for that purpose, and the long dark cavern was to echo with the hum of human if not happy,

voices, but whether from want of nerve or from other considerations on the part of the would be heroes and heroines the expedition did not come off. The fire of romance, however, had been kindled, and young hearts were aglow with the thoughts of adventure. The boat was loosed from its moorings, and about twenty juveniles leaped into it, accompanied by two or three stalwart youths well fitted for the duties of command, and by the light of two candles, fore and aft they threaded their way through the vault for more than a mile. Meanwhile the first party betook themselves to an adjoining field to gaily "trip the light fantastic toe," although the thoughts of the police or a summons considerably damped their enjoyment and awakened feelings of dread in reference to the issue of their frolicking. The youthful explorers were even more unfortunate, for on returning from their subterranean tour they discovered the principle agent of the Commissioners awaiting them. The gallant fellows however did not fancy a "collision" with so important a personage but made a vigorous retreat, waggishly shouting, "will you have a ride?" The agent not to be done dispatched a man to a trap door some little distance above to cut off the retreat, and he arrived just in time to prevent their backward progress. Of course, a scene ensued, the man leapt into the water and tried to lay hold of the boat, but it was suddenly lurched aside, and he found his weight on the water. Meanwhile, an agile youth pitched the lads one after the other to the side of the cave, so they escaped unhurt and without a wetting by the trap door, and skedaddled with the exception of one, who thought he would "launch it," but launched into it to the rather serious cooling of his ardour. By the time the would be capturer gained his equilibrium the boat was minus crew, and he had to convey it alone to the desired haven. We do not believe, however, that the respected agent would feel very furious; we rather fancy he would enjoy the clever strategically exit of his expected prisoners. The above incident, which we got by report, is somewhat instructive as showing the necessity there is for better provision being made for the amusement and recreation of the youthful portion of the inhabitants of the town, more especially now that the woollen factory is brought into operation.

6th May 1871 (Hexham Courant)
Deaths
At Keenleyside Hill, West Allendale, 24th ult. aged 47, Mr John Stobart.
In 1861, at Cuds House, Ninebanks, John Stobart, coal miner, aged 37, wife Jane 36, children Hannah 13, Thomas 12, Ralph 9, Matthew 6, Ann 4, John 1, and lodger Thomas Stobbart, widow, late coal miner, aged 65

At Alston, 15th inst. aged 50, Mr John Walton, Innkeeper.
See 27th May 1871.

24th June 1871 (Hexham Herald)
WEARDALE
Weardale pays. On Saturday, last the Weardale Miners half yearly pays were held. The balance due to the lead miners in the employment of W. B. Beaumont Esq., MP. is at this time paid to them at the W. B. lead office at New House, after which the miners repair to St John's Chapel, and after the money is divided amongst the members of the Partnerships, the tradesmen look out for the settling of bills, and the spice, nuts, oranges, and fancy toy dealer cast an eye to the loose coppers which find their way into the hands of the children. The Weardale pays however, are not what they used to be years ago, when the Clothier from Newcastle, and the Hatter from Hexham were regular attenders, and when it was the only chance for the venturesome youth purchasing a gold wedding ring. In those days, the pays continued for three

days, and were held at New House where a large number of tents were erected and numerous stalls. Very few trades were represented in this country, consequently tradesmen from other parts flourished and the Weardale pays, were pays, but now there are very few trades but what have representatives on the dale, and the peripatetic local dealers anticipate all markets, and in them the foreign merchants find considerable opposition.

Deaths

At Grassfield, near Alston, 15th inst. aged 66, Mr Thomas Holmes mining agent.

See 5th June 1886

At Garrigill Gate, near Alston, 16th inst. aged 45, Mr John Irwin Lead miner.

Deaths
At Pryse House, Weardale, 25th ult. aged 10 years, Margaret, 3rd Daughter of the late Mrs Walton.

8th July 1871 (Hexham Herald)
WEARDALE
Inquest held on Mary Watson who "came to a shocking death" from burning on Monday last. Early on the morning of Sunday, the 2nd inst., deceased deliberately set herself on to the fire and was nearly burnt to death. Deceased Mary Watson who lived at a place called Grain near Cowshill was the widow of Thos. Watson lead miner, who died a few weeks ago, and the loss of her husband had caused her much trouble, which is alleged to have been the cause of the temporary insanity under which she was labouring. … She died from her burns at 7p.m. on the Monday; she was 26 years of age and left 3 children. …

The 1871 census has Thomas and Mary living in the parish of Heathery Cleugh, Stanhope, with their two children Joshua T. Watson aged 1 year and John M. aged 5 months.

18th July 1871 (Cumberland Pacquet and Ware's Whitehaven Advertiser)

At Park, Allendale, 14th inst. Thomas infant son of Mr William Graham.

28th October 1871 (Hexham Courant)

FATAL GIG ACCIDENT

An inquest was held before Mr Carrick, coroner for East Cumberland, at Alston, on Tuesday, on the body of Thomas Yeats Walton, aged 46 years, whose death was caused by a fall from a gig the previous day. It appeared from the evidence that the deceased was an occasional driver at the Blue Bell Inn, kept by Miss Errington, and on the day of his death drove Mr Boyd, grocer, Carlisle, in a gig to Nenthead and from thence to Garrigill, which later place they left about half past seven o'clock in the evening on their return to Alston. When they reached a place called How Hill, one of the wheels ran upon a heap of stones broken for the repair of the road, and the gig then preceded a distance of 60 feet when it ran upon another stone heap two feet in height, by which the gig was capsized, the driver thrown to the ground, ands alighting on his head, the base of the cranium was fractured. Mr Boyd saved himself by jumping out uninjured as the gig turned over. He at once went to the deceased and found him quite dead. Assistance was brought and the body conveyed to Alston by Sergeant Johnstone of the County Constabulary. The jury and police officers went and viewed the scene of the accident and measured the road from which it appeared that the metalled road at the first heap was 15 feet 1 inch wide, and the broken stones projected so far as to leave no more than 11 feet 7 inches clear roadway, the height of the heap

being over 20 inches. The second heap where the accident occurred projected 2 feet 5 inches, the height of the heap 19 inches, and leaving the width of the unobstructed roadway only 9 feet 10 inches. The coroner in his remarks to the jury observed that the thoroughfare of the road appeared to have been improperly obstructed by these heaps, and that in his opinion the surveyor and contractor for supplying the materials were highly culpable for allowing the stones to encroach so far upon the road, and that the case was one very closely approaching a charge of manslaughter, and would be justified in returning that verdict, but if they took a more lenient view by returning a verdict of accidental death, they, he thought might properly accompany that verdict with an expression of censure on the surveyor in the hope that such obstruction would not, in future, be allowed on that or any other public road throughout the district. The jury returned a verdict of "Accidental death". They were at the same time of opinion that the death of the deceased was attributable to the obstruction of the thoroughfare of the roadway by the heap of stones, and that the officer having the charge of the road were censurable for permitting that obstruction.

At a later court appearance, the surveyor was fined 5 shillings for each pile of stones that had encroached upon the roadway.

In 1851, at Skelgill Middle, Alston, Joseph Walton, clogger, aged 41, his wife Mary aged 39, children T Yeats, shoemaker, aged 20, Joseph, lead miner, aged 17, John, lead miner, aged 16, Mary 14, Henry, lead miner, aged 12, Jacob, lead miner, aged 11, Hannah 9, Nancy 7, Nathaniel 4, and Jane 2.

In 1861, at Main Street, Alston, Thomas Y Walton, cordwainer, aged 30, his wife Susannah (Richardson? daughter of Adam, lead miner & Susannah Richardson) aged 30, children Joseph 5, Elizabeth 4, Mary 2, and Margaret 7 months.

4th November 1871 (Herald)

LATE FATAL GIG ACCIDENT NEAR ALSTON.

Thomas Yeats Walton aged 40 was the oldest son of our respected townsman Mr Joseph Walton relieving officer for Alston with Garrigill, … the mind at times naturally reverting to the wife and seven children thus suddenly bereaved, the painful interest being if possible intensified when it became known that Mrs Walton had given birth to her eighth surviving child as the last mournful rites were being performed over the remains of her late husband. … a subscription having been got up on their behalf, and although we do not know the exact amount realised we are assured that the appeal has been very generously responded to so that they will for a time at least be placed beyond the reach of immediate want. *See 28th October 1871*

Deaths

At Pasture Houses, Garrigill, 27th ult., aged 47 Mr John Watson.
In 1861, at Pasture House, Jonathan Spark, lead miner, unmarried, aged 38, sister Jane, unmarried, aged 33, George, lead miner, unmarried, aged 30, and nephew William Spark 6.

25th November 1871 (Hexham Herald)

NENTHEAD

FATAL ACCIDENT. An accident occurred on Tuesday, the 14th inst, in one of the Lead Companies mines known by the name Dowgang mine, (named as Capelcleugh mine, in another article on this subject in the same paper) Mr Hugh Spark had been engaged in driving waggons upward of 20 years and had been exceedingly fortunate until the above named date. It is generally considered that he had been very careful, and exercised thought, when at his employment, in avoiding any mishap on his part. The accident by which he lost his life, happened about 162 yards from the mouth of the mine, and the height of the level in that part is 5ft 7in, from the top of the rail. It appears that where the accident happened there is a curve, and a new rail had been laid on one side, and when the waggon, in which the young man was riding, had been going over the new rail, it is surmised that it was jerked to one side. By this, he had been led off his guard, and in the momentary absence of mind, he had not paid attention to the attitude necessary in riding through this part of the level. Thus the fatal blow came. The Doctors in attendance pronounced his back broken, and that there was only one-way for him. He suffered until Saturday night when his mortal life terminated at the age of 33 years. The deceased was the eldest son of Joseph Spark, of Nentsbury. A Coroners inquest was held at Mr Spark's on Monday afternoon. The jury returned a verdict of "accidental death," as no blame could be attached to any party in connection with the mine. The funeral took place on Wednesday. The remains were interred in the family's burying place.

Horse Levels and Their Dangers. The following addressed to a Cumberland contemporary refers to the subject of the foregoing paragraph: - "We hear a good deal said from time to time about the necessity that exists for mine inspection, but from among all the remarks that have been made on the subject I have seen or heard none referring to "Horse Levels" in lead mines. Now I do not think that there is any department in mining of any class that requires inspection more than this. The risks incurred every day to both limb and life; by waggon, drivers in Horse levels are not simply great but monstrous! As witness the fact that the roofs of the levels are in very many instances far too low to allow the driver to sit on the top of the waggon with any degree of safety. If an inspector was to get into any of the mines in Alston Moor on any working day he would see a boy, or perchance a man sitting on the top of one of these waggons, which position he is obliged to assume in order to be able to drive the horse which draws the waggon, and, owing to the lowness of the roof, he is obliged to stoop his head low as the position of knees will allow in order to be able to pass without coming into contact with it. The inspector would also notice that the horse is often driven at a trot, while the driver peers out from beneath his cap, as well as his crouching position will allow, to see what projections to avoid, first on this side then on the other. In the ordinary avocations of life, a more perilous position cannot be conceived. One of the results of this state of things is as follows: - A man, named Hugh Spark, of Nentsbury, near Alston, while drawing waggons at Capelcleugh Mine Level on Tuesday last was caught by the collar of his coat from the roof, and being dragged backwards was frightfully injured. The Doctors say his back is broken, and there is no hope of recovery. I have heard that while repairing the waggon way at the point where the accident occurred, the workmen had

raised the rails a little higher than they were before, and the consequence is, that though the man had, in all probability, stooped as low as usual, the additional height of the rails deceived him, and hence the accident. How fearfully near he has been to such an accident during the many years that he has driven waggons in that same level is evinced by the fact that the raising of the rail an inch (more or less) has caused it now. Would it not be better if all levels were driven in future sufficiently high to enable the driver to sit safely on his seat? Furthermore, would it not be well if the proprietors of existing levels would enlarge them at the points where they are miserably low? And thus make the office of waggon driver as desirable as other ordinary ones, instead of allowing it to remain what it is, namely, the most dangerous one in connection with lead mining as practised in this country. In connection with this I would suggest that the driving of good roomy levels will cost no more than that of small ones; indeed, it may be proved that it will cost less."

Hugh Spark died 18th November 1871 aged 33 years, unmarried son of Joseph a farmer & Sarah Spark living at Nentsbury.

In 1851, at Nentsbury, Joseph Spark, Innkeeper, and farmer of 30 acres, aged 40, wife Sarah (Pickering, married 19th February 1835, at Garrigill) aged 36, children Mary A. 15, Hugh, employed in lead mines, aged 12, Joseph 3, and brother James, lead miner, aged 26.

In 1861, at Nentsbury, Joseph Spark, publican, aged 51, wife Sarah 45, sons Hugh, leads miner, aged 22, Joseph 13, grandson James Graham 6, and domestic servant Jane Brown 21.

In 1871, at Nentsbury, Joseph Spark, farmer, aged 61, wife Sarah 54, sons Hugh, farmers son, aged 32, Joseph, farmers son, aged 22, James, farmers son, aged 16, granddaughter Sarah Ann Glendinning, general servant, aged 11, visitor Mary Archer, widow, aged 50.

See 4th April 1874.

Marriages

In 1911, at Dykeheads, Mary Ann Rutherford, widow, aged 56, and son George William Rutherford, lead miner, aged 20.

13th January 1872 (Hexham Courant)

A WEARDALE MAN KILLED IN AUSTRALIA

The Australian mails have just brought the melancholy news of a Weardale man, named William Watson, brother to Featherstone Watson, of the King's Head Inn, St John's Chapel, and of Mrs Emerson, of the Duncow Inn, Newcastle, having been killed in a most shocking manner whilst working at Knight's Claim, Hawkin's Hill, Sydney. The "Tambaroora Times" of October 28th says: - "On Monday last, a man named Watson, working in (Knight's) one of the claims down Hawkin's Hill was at the bottom of the shaft when a bucket with two slabs inside fell from a height of about 100 feet, splitting the poor fellows head completely open, and resulting in his death in a very short time. The deceased who was Recording Scribe of the Sons of Temperance, was very much respected and his funeral which took place the following day was very largely attended." Weardale men have been singularly unfortunate in Australia. Within these last dozen or sixteen years about ten have been killed in the Australian Gold fields.
The Sydney Morning Herald *Saturday 28 October 1871. On the 23rd instant, a man named Watson was killed in Knight's shaft, Hawkins' Hill, Hill End.*

23rd January 1872 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

NENTHEAD PAYS.—The London Lead Company's workmen's yearly pay was held on the 10th inst., and during the week—an event looked forward to with anxiety and interest, by both workmen, and men, and women of nearly every trade, from the commercial man down to the orange and nut hawkers. The pays being much in advance of last year made the time more cheerful and satisfactory. All passed off very quietly, with no broken heads, though there might be a few aching ones.
CO-OPERATIVE SOCIETY.—The Nenthead Industrial Co-operative society have held their annual meeting in the new store buildings, for settling their accounts, and electing the officers and committee for the ensuing year. The business done in goods sold amounted to £2,117 6s 5d, the balance of profit for the year, being £57 14s. The dividend on £656 12s 6d, worth of members' purchases was 1s 9d in the £. Since January 1st, 1871, three members have been enrolled, whilst on the other hand, three have withdrawn. The society is in healthy and prosperous state, and is now fully settled in the new and spacious building. The dividend on the last quarter was 1s 6d in the pound.

27th January 1872 (Hexham Courant)

BLANCHLAND

ACCIDENTALLY KILLED.

An inquest was held at Blanchland on the 22nd inst., on the body of a miner named Thomas Bell, aged 37 years who was killed through accidentally falling down Readon Lead Mine shaft on Friday, the 19th inst. Verdict accidental death. *(Readon Mine also known as Reeding mine see Geology of The Northern Pennine Orefield, K. C. Dunham, and British Mining No. 65 R. A. Fairburn)*

Thomas married Elizabeth Oliver on 14th May 1857, at Blanchland.

In 1871 Thomas Bell, lead miner aged 36, living at Blanchland with his wife, Elizabeth 37, and children George O. 13, Mary H. 11, Lane A. 9, Thomas H. 6, Eliza 3.

27th January 1872 (Cumberland and Westmorland Herald)

31st January 1872 (Teesdale Mercury)
Letters to the Editor
DEAR Sir, —I send you the following reminiscence of the late Mr Stagg (of Middleton House), and one of his agents, which you can insert in the columns of your paper if you think proper. The first agent appointed by Mr Stagg, after he took charge of the Lead Company's affairs, was Mr John Pinkney, whom he preferred from the condition of a working miner to an office of considerable trust and responsibility. During the early part of his career, Mr Pinkney had to fight the battle of life under difficulties, his parents being in very humble circumstances. His education, obtained during the years of boyhood, was exceedingly limited, but knowing that it was both the key of knowledge, and, when accompanied by industry and perseverance, the prospect to success in life, he, with indomitable courage, applied himself to the task of self-improvement, and, by attending night-schools and embracing every other opportunity that presented itself, by the time he reached manhood he had made progress in various kinds of useful knowledge that rendered him more intelligent than most workmen of that period. During the principal portion of this time he was working sub-bargains, or labouring for the pittance of ten shillings a-week for other parties who took bargains and reaped the principal advantages but, after Mr Staler took the reins or administration, this evil, along with others of a similar character—such as sub agents or overmen being shopkeepers—was swept away; so that every workman reaped, along with his partners in the contract, the full advantage accruing from the ore they raised, according to the price fixed, and, after the money was paid, they could, without any pressure, lay it out to the best profit. Shortly after this change, Mr Pinkney obtained a bargain on his own account, and was cheerfully working the same along with his partner, when, one day, Mr Stagg sent a message by his brother-in-law. Mr Elliott, that Mr Pinkney had to wait upon Mr Stagg, who (Mr Elliot believed) was about to discharge him from the duty in which he was engaged. The industrious workmen, conscious of his own rectitude, wondering what be had done to forfeit Mr Stagg's confidence, and gravely affected at the probability of losing his work, called upon Mr Stagg at the appointed time. Mr Stagg received him affably, conversed with him upon his work, and then said his services would no longer be required in that capacity. The miner was anxious to know the reason of this—he had always done his best for his employers' interests—and he was proceeding further to urge his case, when Mr Stagg stopped him and told him, with a friendly smile, that he had done so well, that the Company had released him from his daily toil in order that he might serve them in the much more dignified position of an agent! It is scarcely necessary to say that the revulsion of feeling on the part of Mr Pinkney was great; and, after expressing his heartfelt thanks, he returned home. His

pleasure at his exaltation was shared by his numerous friends, and from that day to the moment of his death the wisdom of the choice was proved by his unswerving integrity, and the consistent course of action through which he gained the approbation of the Company and the esteem and respect of the workmen. The miners made him their confidant in their troubles, and always sought his influence as a friend to extricate them from any difficulties in which they had become involved. One anecdote, illustrative of this, I venture to give. At this time the Earl of Darlington had some of the mines on his Teesdale manors in his own hands, and wrought by his own workmen. As is frequently the case, a degree of rivalry existed between these men and those employed by the Company, and it hardly needed the stimulus of alcohol to make them blaze up in angry controversy, and words often ended in blows. The determined way in which Mr Slagg set himself against drinking and fighting, made these of less frequent occurrence than they otherwise would have been, but some of the more reckless of the Company's men occasionally forgot the proverb that "Discretion is the better part of valour," and, yielding to their pugilistic propensities, had the prospect of paying a heavy penalty, by losing their employment. Amongst those placed in this dilemma was a well known character, called Jos. Toward, brother to the one who figures in Watson's poem of "Will Toward and the Bailiff." On a certain monthly pay-day, Toward went to Mr Pinkney's house, and, being admitted, he stated to the agent that he had come to ask his advice: that "t' Lord's men" (Lord Darlington's miners) were bent on getting him into mischief, and had insulted, taunted, and "challenged " him, till he could brook it no longer. "If that be the case," replied Mr Pinkney, "give one of them a thrashing, and it will be a lesson to the rest." "Why, if ye please. Maister," rejoined the supplicant, "that's just what I've done, and I want ye to explain t' matter to Mr Stagg, so that I mayn't be turned off." After a hearty laugh at the ingenious manner in which Toward had stated his case, Mr Pinkney promised to shield him from the consequences, and succeeded in doing so. Mr Pinkney was a member of the Wesleyan Society, and a local preacher among that body. On the last Sunday of August 1824, he preached from the text, "For the great day of His wrath is come, and who shall be able to stand." On Thursday, the 2nd of September, in the midst of a thunderstorm, he was returning, with Mr Elliott, from an inspection of the mines at Middleside, and while the lightning was flashing around them, and thethunder reverberating over hill and dale, he exclaimed. "This is awfully grand," and the next moment he and his horse were struck by the lightning, and killed on the spot. The mule Mr Elliott bestrode could not be reined in, and galloped off with its rider, and never stopped until it reached its stable-door, clearing a six-barred gate on the road. Mr Pinkney's mournful death caused a profound feeling of sorrow, and the members of the deputation of the Lead Company, together with all in their employment, from the agents down to the humblest workmen, united in a sincere manifestation of sympathy with the bereaved family of the deceased. Mr Pinkney left a widow and five children, the eldest of the children being but thirteen years of age; but the Company, with the generosity which has so largely characterised their history, settled upon the widow a pension of £20 per annum, which she enjoyed for about forty years.

I am, Yours, &c.

January 25th. 1872. A SUBSCRIBER.

3rd February 1872 (Hexham Herald)
Marriages

23rd February 1872 (Newcastle Courant)
DEATH OF THE OLDEST INHABITANT OF WEARDALE. —The remains of the oldest inhabitant of Weardale, Elizabeth Carrick, better known as “Old Betty Carrick,” were one day recently interred at St. John’s Chapel. She resided at Burtree, near Cowshill, where she died on the 9th inst., in the 100th year of her age. She was born at Ninebanks, West Allen, and went early to service at a boarding school, where she had her fortune told by a deaf and dumb gipsy, who prophesied that she would go into another country and get married to a man who had no hair on his head. She went to Weardale, and was engaged as servant by Mr. Tinniswood, mining surveyor. Here she first made the acquaintance of her future husband, who, strange to say had been bald headed from the effects of fever since he had been seven years old. She was 41 years old when she married, was 29 years a wife, and 29 years a widow. Once she was in a stage coach and once in a railway carriage, otherwise her journeys were all done on foot. She was tall, strong, active, and had an excellent memory. She was 17 years of age when John Wesley paid his lust visit to Weardale, and, born in the reign of Geo. III., she lived during the reigns of Geo. IV. Wm. IV., and died in the 35th year of Queen Victoria’s.
Joseph Carrick married Elizabeth Craig, 26th March 1814, at Stanhope.
In 1841, at Stonedrass, St John’s, Stanhope, Nicholas Dawson, lead miner, aged 20, and his wife Jane aged 20. (Jane Carrick married Nicholas Dawson, 2nd quarter 1841, registered at Weardale)
In 1841, at Stonedrass, St John’s, Stanhope, Joseph Carrick, lead miner, aged 55, and Elizabeth Carrick aged 65. Joseph Carrick died 1st quarter 1843.
In 1851, at Middle Black Dean, Stanhope, Elizabeth Carrick, widow, annuitant, aged 77, born, Allendale.
In 1851, at Burtreeford, Nicholas Dawson, lead miner, aged 34, his wife Jane aged 36, children, Thomas 9, Joseph 8, Elizabeth 5, Mary Ann 3, and Jane 11 months.

In 1861, at Burtreeford, Heathercleugh, Weardale, Jane Dawson, widow, aged 51, children, Joseph, lead miner, aged 18, Mary Ann 13, Jane 10, Sarah 8, Pheby 5, and boarder, Elizabeth Carrick, widow, aged 86.
There are 4 possible dates for the death of Nicholas Dawson between 2nd quarter 1853 and 2nd quarter 1857.
In 1871, at Burtreeford, Heathercleugh, Weardale, Jane Dawson, widow, aged 46, children, Joseph, lead miner, aged 28, Mary Ann 23, nephew, Edward, lead miner & landowner, aged 31, and mother Elizabeth Carrick, widow, aged 98.

24th February 1872 (Hexham Courant)

WEARDALE

FATAL ACCIDENT IN THE MINES

Early on Tuesday morning, the inhabitants of the upper part of Weardale were shocked to hear the melancholic tidings of Joseph Fleming, lead miner, of Weardale, being killed that morning in the Burtree Pasture lead mine. It appears the unfortunate man, in the company with his partner, Thomas Pattinson, had been engaged in letting some "work" down a "rise," when it had burst through the partition into where the men were standing and crushed Fleming down covering him up with the material and bruising him in a most shocking manner, inasmuch as death must have been almost instantaneous. Pattinson, his partner, miraculously escaped, and as early as possible informed some other miners in another part of the working of what had taken place, and they hastened to render assistance, and succeeded, after considerable labours in extracting the poor fellows mangled body. Deceased practised bone setting and cow-doctoring successfully, and was a member of the Wesleyan Society. He was about 48 years of age, was well respected, and leaves a widow to mourn his loss.

In 1841, Joseph was lodging with Joseph Mulcaster lead miner, aged 55 and his family (Mary aged 50, Mary aged 28, and Thomas, lead miner aged 25) at Black Dean, St John's, Weardale.
In 1851, at Blackdean, Joseph Mulcaster, widow, lead miner, aged 67, his daughter Mary 37, and lodger Joseph Fleming, lead miner, aged 26.
In 1861, at Wearhead, Joseph Fleming, lead miner, aged 37, his wife Jane (James, married 1855) aged 37.
In 1871, at Wearhead, Joseph Fleming, lead miner, aged 49, his wife Jane aged 48.

Marriages

At Alston Wesleyan Chapel, 15th inst., Mr Alexander Furness Pattinson to Miss Sarah Graham both of Alston.

In 1841, at Eive Hill, Arthur Graham, lead miner, aged 44, his wife Sarah (Martin married 7th May 1827, Alston) aged 38, children William 12, Hannah 10, Jane 8, and Sarah 5. Arthur Graham died 2nd quarter of 1849.
In 1851, at Lovelady Shield, Sarah Graham, widow, farmer of 18 acres, aged 49, children William, lead miner, aged 22, Sarah 15, Mary Ann 18, and mother, Hannah Martin, widow, aged 78. In 1861, at Physic Hall Bank Foot, Sarah Graham, charwoman, aged 58, daughters Sarah, dressmaker, aged 25, Mary A, dressmaker, aged 19, and grandson William Graham 6.

In 1871, at Bruntly Syke, Sarah Graham, widow, formerly domestic servant, aged 68, daughters Sarah, dressmaker, aged 35, Mary Ann, dressmaker, aged 28, and grandson William Graham, drapers apprentice, aged 16.
John Pattinson married Isabella Walton 14th February 1813, at Alston.
Children of John & Isabella Pattinson: —
Sarah Ann baptised 11th July 1813, Sally baptised 5th March 1815, Hugh baptised 15th December 1816, Betsy baptised 14th March 1819, Thomas baptised 13th May 1821, Sarah baptised 15th June 1823, John baptised 8th May 1825, Isabella baptised 17th June 1827, Alexander Furnace baptised 14th June 1829, Joseph baptised 8th May 1831, Jane baptised 12th March 1833, John Walton baptised 15th February 1835, and Mary baptised 20th March 1836.
There is a record of the burial of Isabella Pattinson 22nd February 1837, aged 41, at Alston.
In 1841, at Edmunds Lane, John Pattinson (parents Hugh Pattinson and Sarah Furnace, married at Alston 29th January 1786), lead miner, aged 50, Hugh Pattinson, joiner carpenter, aged 20, Sarah Pattinson 15, Isabella Pattinson 14, Alexander Patterson 12, Joseph Pattison 10, Jane Pattison 8, and John Pattison 6. In 1851, at Bulmans Lane, John Pattinson, widow, lead miner, aged 61, children Isabella, dressmaker, aged 24, Alexander F., lead miner, aged 22, Joseph, lead miner, aged 20, Jane 18, and John Walton, apprentice blacksmith, aged 16
In 1861, at Thirlwells Lane, Alexander F Pattinson, lead miner, aged 31, his wife Esther F 27, children Isabella 3, and John 1.
Esther Pattinson died 1st quarter of 1865.
In 1871, at Townfoot, Alston, Alexander F Pattinson, widow, lead miner, aged 41, children Isabella 13, John 11, and George 8.
Alexander Furness Pattinson, died 4th quarter of 1878, aged 49.
In 1881, at Front St., Sarah Pattinson, widow, dressmaker, aged 45, and son Henry Furness Pattinson, aged 7. In 1891, at Front Street, Sarah Pattinson, widow, dressmaker, aged 55, and son Alexander F Pattinson, aged 19 (died 2nd quarter of 1892, aged 19.
At Nenthead 11th inst., Mr Thomas Wilkinson to Miss Hannah Urwin, both of Nenthead.

In 1861, at Hillersdon Terrace, Matthew Wilkinson, widow, lead ore smelter, aged 67, children Jane, house keeper, aged 30, Margery 28, Matthew, lead ore smelter, aged 26, Thomas, lead miner, aged 22, and granddaughter Sarah Wilkinson 9. Matthew Wilkinson snr., died 19th April 1862, See 29th April 1862.
In 1871, at Hillersdon Terrace, Matthew Wilkinson, unmarried, lead ore smelter, aged 36 (died 1st quarter of 1914, aged 79), brother Thomas lead ore smelter, aged 31, sister Jane, housekeeper 42, niece Sarah Wilkinson 19, nephew Matthew Wilkinson 7, and niece Mary Jane Wilkinson 5 months.
In 1881, at Low Dyke Heads, Nenthead, Thomas Wilkinson, lead ore smelter, aged 41, his wife Hannah 40, children Elizabeth 11, Mary Ann 8, Catherine 6, and George 2. In 1891, at Church Lane, Nenthead, Thomas Wilkinson, lead miner, aged 52, his wife Hannah 50, children Catherine 16, George 12, and Matthew 8, granddaughter Hannah Jane Erwin 10 months, and lodger George Erwin, retired lead miner, aged 66. In 1901, at Church Lane, Thomas Wilkinson, lead miner, aged 61, his wife Hannah 60, children Catherine, general servant, aged 26, and Matthew, carter for merchant, aged 18. In 1911, at Church Lane, Thomas Wilkinson, retired lead miner, aged 71, and his wife Hannah aged 70.
Thomas Wilkinson probably died 4th quarter of 1911, aged 72, and his wife Hannah 2nd quarter of 1925, aged 84.

LEADGATE ALSTON

PRESENTATION TO T W CRAWHALL ESQ.

On the evening of Thursday (last week), we had the pleasure of attending a large and enthusiastic meeting in the Rodderup Fell Co's school room at Leadgate, convened by the workmen of Rodderup Fell, Blaygill &c, for the purpose of presenting a handsome testimonial to T. W. Crawhall, Esq. Alston House, on his retiring the office of Superintendent of the above mentioned mines. ...

This testimonial was given by the workmen who had formed a committee to organise a collection for Mr T W Crawhall.
He was given a centrepiece for the drawing or dining room table, value £15, Mrs Crawhall was presented with a soup tureen value 5 guineas. He had held his position as Superintendent upwards of 20 years.
The period of 1867 - 1868 had been one of relative depression and falling prices, whereas after this there was an economic boom, and full employment. (In 1869 - 1873 there was an increased availability of credit principally due to the abundant availability of Australian and Californian gold; resulting in a credit boom.) Due to this prices rose quickly and it was mainly this rise in prices, which provoked the demands for increased wages. In the lead mining districts

of the North Pennines, there was a general feeling of discontent, resulting in strikes by the Beaumont miners in Weardale, the London Lead Company miners in Teesdale and the Rodderup Fell miners. These disputes were recorded in the Hexham Courant.

8th March 1872 (Carlisle Patriot)
LEAD MINING IN CUMBERLAND. —The Keswick district, celebrated for its mineral wealth, has lately been enlivened by the opening of the mines in the manor of Thornthwaite, a company having been formed to work them under the title of the "Keswick United Silver Lead Mines Company," limited. From a perusal of the prospectus, and an inspection of the well-executed plan of the ground, accompanying the prospectus. We believe that the combination of advantages which it possesses for profitable mining are not over stated in the reports the mining engineers who have reported upon it. The sett contains at present four mines, and is intersected by "all the best productive lodes of the district," comprising those which have yielded largely in the neighbouring Goldscope. Yewthwaite, Brandlow, and other well-known mines. The ground the sett occupies upwards of five square miles and was worked formerly the Romans. We hail the formation of this company with great pleasure, believing that it will only be a forerunner to others to formed to thoroughly work the rich metalliferous deposits of the country. Till lately, the central mining districts of Cumberland—rich as they are known to be—have neither been explored to any great extent, nor have they attracted the attention they deserve from mining adventurers, owing, doubtless in a great measure, to the drawbacks connected with them consequent upon their want of railway or other communication; and thus, in a district capable, and destined ere long, rival—if not to surpass—any other in the country in mineral productiveness little comparatively has hitherto been done—and that mostly on limited scale—to develop its extensive and rich metallic resources. Since the completion of the Cockermouth, Keswick, and Penrith Railway, however, these drawbacks, so far as this property is situated, are at an end. We understand there is no doubt of its success, the promoters being most influential gentlemen, and most of the shares having been taken up privately.
The allotment takes place early March.

15th March 1872 (Carlisle Patriot)
Marriages
At the Independent Chapel, Alston, on the 7th inst., by the Rev. Jonathan Harper, Mr John Craig, Blackburn Banks, to Miss Jane Watson, Shaw House.
In 1871, at Shaw House Inn, Alston, Joseph Watson, lead miner, Inn keeper & farmer of 42 acres, aged 51, his wife Jane 54, children, Joseph, lead miner, aged 23, Jane 20, William, lead miner, aged 18, Elizabeth 16, John, lead ore washer, aged 13, and granddaughter Jane Watson 3.
In 1871, at Blackburn Banks, John Craig, blacksmith & farmer of 14 acres, aged 58, his wife Elizabeth 58, born Kingwater, children, Sarah 31, and John, blacksmith, aged 28.
In 1881, at Blackburn Banks, Alston, John Craig jnr., farmer of 13 acres and Engine smith, aged 38, and his wife Jane Craig 29.
In 1891, at Blackburn Banks, Alston, John Craig, Blacksmith, aged 48, and his wife Jane Craig 39.

In 1911, at Black Burn Banks, Alston, John Craig, Blacksmith, aged 67, and his wife Jane 57.

Deaths

At Alston, on the 7th inst., Thomas Featherston, gardener, aged 24 years.

In 1871, at the Butts, Alston, John Featherston, gardener, aged 49, his wife Jane 50, children, Thomas, gardener, aged 23, Sarah 17, John W, gardener, aged 15, William, gardener, aged 13, and Elizabeth 9.

16th March 1872 (Hexham Courant)

NENTHEAD

Guddamgill estate was purchased by Jacob Walton Esq., of Green End House for £2,070.

Outdoor operations have been commenced in the lead ore washing works, where all is alive again with the busy tribes of lads. (After a winter, break due to ice &c.)

HAYDON BRIDGE

The boys employed at the Stonecroft mines as washers, to the number of between 50 and 60, struck work on Monday last for an advance of pay and shorter hours on Saturdays. No settlement has as yet been made.

Deaths

At Irestone, Weardale, 13th inst. aged 61 years, Ralph Watson Esq.

Landowner

At Fiddler Street, Nenthead, 6th inst. aged 10 months, George William, son of Mr Joseph Percival.

In 1871, at Wellgill, Nenthead, Joseph Percival, lead miner, aged 42, his wife Jane (Thompson, widow?, married 3rd quarter 1865, registered at Alston) aged 34, children, Thomas 12, Mary Ann 10, Elizabeth 5, Jane 2, and Isabella 1 year.

In 1881, at Quarry Burn, Hunwick, Durham, Joseph Percival, coal miner, aged 52, his wife Jane 44, children, Thomas, coal miner, aged 22, Elizabeth 15, Jane 12, Meggy 7, Annie 3, and Isabella 11 months.

In 1891, at Hunwick Lane Ends, Joseph Percival, coal miner, aged 62, his wife Jane 54, Meggie, dressmaker, aged 18, and married daughter, Mary A Barker aged 30.

Joseph Percival died, 1st quarter 1897, aged 68, registered at Auckland, Durham.

In 1901, at Rough Lee, Hunwick, Jane Percival, widow, aged 64, daughters, Isabella 30, Meggie, dressmaker, aged 27, and visitor, Jane Blades, married, aged 32.

In 1911, at 10 Chapel St., New Shildon, Durham, Jane Percival, widow, pensioner, aged 75.

Jane Percival died 4th quarter 1913, registered at Auckland, Durham.

30th March 1872 (Hexham Courant)

THE W B LEAD MINERS WEARDALE
AGITATION FOR INCREASED WAGES

For some time past considerable dissatisfaction has prevailed among the miners of Weardale in consequence of the low rate of remuneration they

received for their services, and they have determined at this period, having regard to the cost of living, now greatly upon the increase, to follow the example of other classes of workmen throughout the country and adopt a movement having for its object the advance of what is termed “lent money” a stated amount of cash guaranteed to his men by the employer monthly in order to meet the exigencies caused by the peculiar and uncertain nature of the work; and when, but for this “lent money” they would have frequently little or no earnings to draw.

During the past summer an attempt was made to procure an advance from the £2 a month they are now receiving to £2 10s, and some negotiations were commenced which resulted in the formation of a committee of the men, and that committee appointed a deputation to wait upon the masters agent at the New House, and there lay before him what the men wanted. A short time elapsed, when the refusal from the masters was announced, the latter stating that the request could not be complied with, and a rumour got abroad that soon there would be a change in the system of working the mines, and a ready money method of payment to be introduced at some not far distant day. Matters quietly settled down from that time, and things have gone on as usual to the present without any alteration being made. But the miners, latterly, seeing no prospect of their condition being improved, have again resolved to inaugurate an agitation for the increase of the lent money from 40s to 50s per month, and, on Saturday, a crowded and enthusiastic meeting of the W B lead miners was held in the Town Hall, St John’s Chapel, Weardale, for the purpose of adopting resolutions in furtherance of the movement for increased pay. A thousand miners were computed to be present in the hall. ...

THE CHAIRMAN (whose appointment was carried by acclamation) commenced the proceedings; and said: Nearly a quarter of a century had elapsed since a meeting similar to the present had been held at St John’s Chapel. The object then was the same as at present - namely, a struggle for the increase in lent money. (Cheers) Many connected with that movement had passed away; and not one now upon the platform beside him occupied the platform of the past. Since then things had gone on pretty smoothly, and no outward demonstration of lead miners had occurred in Weardale since that day. Every innovation in the shape of change had been received with good grace up to the present. It was during the last summer in June or July that an attempt was made to procure a further advance of lent money. The request was very moderate, and nothing was said about the rise of wages. (Applause) All they asked for was an increase from 40s to 50s per month. The committee that was formed appointed a deputation to wait upon the master’s agent, with a view to the miner’s request. The reply shortly afterwards was that it could not be complied with, and matters in consequence were allowed to drop. But as no change had taken place since then, and great struggle between capital and labour had been going on throughout the country it was time he thought, they should do something for themselves. (Cheers) Many of the masters seemed to have anticipated the wants of their men, and did not wait till requested to shorten their hours of labour or advance their wages, and give them then what they thought they should have. (Cheers) But the lead miners of Weardale had had nothing advanced to them except provisions, coals &c., which latter had considerably advanced, and many a poor man with only £2 a month could not see his way clear to secure a load of coals, and other things

were rising in proportion, so that the men were compelled to make another effort. Six or seven weeks ago, that effort was commenced, and it was arranged that the deputation of the men should see the masters, but before that, it was announced to have also a mass meeting of the men. The masters then sent word for the deputation to appear at Newhouse, and the men were told that a scheme was in progress, which was not complete, but when it was, they would again send for the men and lay it before them. In consequence of that, the mass meeting was put aside for the time being, and the men waited patiently for a new scheme. Resolutions were proposed and presented to the master's agent, but there was an answer from Mr Beaumont that he was determined to stand to the new system (to which as a whole, the men could not see their way clear), and rather than shrink from it would lay the mines in for two or three years. This seemed a very cold answer to moderate requests, especially as Mr Beaumont's workmen stood in a very different relation to that gentleman in the valley than many other classes of workmen did to their masters. (Applause) The miners of Weardale were a class of men that had not been gathered from the four quarters of the globe, as their very fathers were cradled in that valley, and for some time they could trace back their ancestors. Their grandfathers had wrought in the same mines and many a grandson was now working in the place of his forefathers at the present time - (Cheers) - so that the announcement to close the mines was very cold. The resolutions to be submitted for their approval or disapproval were founded on the petition sent to Mr Beaumont after the scheme was laid before the men, and he hoped the appointed speakers would have a fair hearing, and show to the outside public that the miners of Weardale knew how to conduct a mass meeting (Cheers). He then called upon the mover of the first resolution.

A MINER the stepped forward and moved, "That we receive the new system, with the exception of an advance to the unfortunate miner to 50s per month." After referring to the high price of food and other necessaries, he said the men could not do with their small earnings, and they wished to show the reasonableness of their request. ...

THE MOVER of the second resolution advanced to the front of the platform and said he was called upon to move. "That the miners cannot see their way clear to work without some degree of certainty, monthly, as there is so much irregularity in mining, unforeseen circumstances are such that they might have to work for two or three months without making anything, and this they cannot afford, and therefore they have again decided to appeal to the managers of the W B lead mines, Weardale. The object of their meeting together he said was to give public expression to their opinions on the new system. ...

Examples were then given of the unpredictability of lead mining, and how it was that a lead miner may work for long periods without raising very much ore, but with the hope that they would strike a rich load of ore, so that they would be able to redeem the subsistence they had received.

The speaker then said he failed to see how the workmen were to get fair play with the ready money system, except they had so much per fathom or ton for their work, and it to be weighed at the level mouth, so that a man could get what he made, and have the liberty also to remove elsewhere if not satisfied. But through sheer necessity, perhaps, he happened to be unfortunate two or three months, and could not meet the demands of his creditors, and they would refuse to speculate longer with him and his uncertainties and in all

probability he would have to leave his country without a shilling in his pocket to get work elsewhere, where he would be more fairly remunerated for his toil, (Applause.) The proposed ready money system was wrong for both men and master. ...
THE SECONDER of the resolution stood up to address the meeting. He said he had paid considerable attention to the movement in which he had been called unexpectedly to figure. There were three things connected with the agitation with which he had all along been very well pleased, namely, the oneness of opinion that he had obtained amongst them, and extremely moderate views taken, and the gentle manner they had been gone about from the commencement. They had only asked for 12s 6d per week, and this movement was only a step with the times, and a very short one, when compared with what other branches of workmen had done for themselves. ... They (the management) had intended, with respect to the 50s subsistence money, to keep a month in advance at the commencement. An unfortunate miner would under these circumstances, have to labour two months before he received the subsistence. With respect to the ready money system, it favoured the masters too much at the men's expense. It obliged the men to give their labour, and left him open to advance the unfortunate miner what he pleased. It chilled the spirit of enterprise in searching for lead ore, and placed a man too much at the mercy of one individual. After denouncing such attempt to serfdom, he said that if the new system had been really friendly to the men there would have been no need to have kept back the details. A bargain was understood to be an understanding between two men, but it had only to be acted upon in this case at the pleasure of the master, without the men having the power to gain say it. ...
The resolution was then carried amid great applause, and the large meeting separated with a vote of thanks to the chairman.

6th April 1872 (Carlisle Express and Examiner)
At Hillersdon Terrace. Nenthead. on the 25th alt. Mr. Joseph Hind, butcher, aged 56 years.

12th April 1872 (Carlisle Patriot)

THE KESWICK UNITED SILVER LEAD MINES COMPANY (Limited).

Incorporated under The Companies Acts, 1862 and 1867," by which the liability of every Shareholder is limited to the amount of his Shares.
£30,000, in 6,000 Shares of £5 each. £1 per Share to be paid on application, £2 on allotment, and the remainder as the progress the works may render necessary.
No Call to exceed £1 per Share, nor at an interval of less than three months. It is not anticipated, however, that any Call will be required.

Board of Directors.

Joseph Allen. Esq., St. Mark's-square, Hackney, and Corn Exchange, Mark-lane, London, E.C.
John Bell, Esq., M.A., Cambridge-house, The Grove, Blackheath, Kent.
Henry Dawes, Esq., 44, Sloane-street, London, S.W., Railway and Patent Rock-Boring Contractor.

Henry Molyneux, Esq., 7, Leighton-road, Kentish Town, London, N.W.
Solicitors—Messrs Kimber and Lee, 1 and 2 Great Wichester Street Buildings, London E.C.
Bankers—The Metropolitan Bank, Limited, 75 Cornhill, London, E.C.
Secretary—James Farie, Esq.
Offices—1 and 2, Great Winchester Street Buildings, London, E.C.

ABRIDGED PROSPECTUS. This Company is formed for the purpose of purchasing and working very valuable property situated in Cumberland; for which purpose subscriptions are invited for 3,000 Shares.
The Grant embraces a series of Four Silver Lead Mines, situated within short distance of each other, and can be superintended by one captain. Some of the lodes in the sett are known to be those of the " Goldscope," "Yewthwaite," and "Barrow" mines—all of which have been largely productive. Another is known as the "Brandlow Mine" lode. In that mine this lode proved so rich and pure that quantities of *Potter's ore* were sold from it, so high rate as £23 per ton. It is confidently expected that within one year from the commencement of operations the shares of the company will command very high premium, and that dividends of a high percentage will be declared.
Prospectuses, with the engineers' reports, forms of application, plans, and every information may be obtained at the Offices of the Company, 1 and 2, Great Winchester Street Buildings, London, E.C.

KESWICK UNITED SILVER LEAD MINES COMPANY, LIMITED.

NOTICE IS HEREBY GIVEN, that the LIST of APPLICATIONS for SHARES in this Company will be CLOSED on Wednesday, the 17th instant, for London, and on Thursday, the 18th instant, for the Country. By Order. JAMES FARIE, Secretary. 1 and 2, Great Winchester Street Buildings, London, E.C., April 10th, 1872.

13th April 1872 (Hexham Courant)

ENTHUSIASTIC MEETING OF THE WEARDALE MINERS.
OFFER OF EMPLOYMENT BY A NEW MASTER.

The people of Weardale are roused to the highest pitch of excitement, and on Wednesday evening, the most enthusiastic meeting ever held in this otherwise quiet district took place in the Town Hall, at St John's Chapel. Since the last mass meeting at which it was resolved to accept the new ready money system, it has clearly come out to the miners that this new system is devoid of any redeeming quality, and worthless for both men and master, and as it was announced that Mr Beaumont had arrived in Weardale for the purpose of having an interview with the delegates at the W. B. offices, at Newhouse, on the above evening the miners considered that they should meet at once at St John's Chapel and reject the New System altogether. Consequently, at the preliminary meeting of the delegates, which took place at one o'clock at the Golden Lion Inn, it was arranged that a mass meeting should take place that evening to reject the New System, and also to learn the terms, which Mr Beaumont proposed. ... After an interview of three hours, (*with Mr Beaumont at Newhouse*) the representatives of the miners returned to town, when a rush to the Town Hall took place, and in a few minutes not less than a thousand people were packed together anxious to learn the result of the interview. ... The chairman was sorry to say they had not been able to get a final settlement

with the proprietor of the Weardale mines. However there was one thing he had pleasure in stating, namely, that after the great disadvantages of the new system had been explained properly to their employer, he had swept the abhorred new system entirely away. Mr Beaumont promised 10 per cent advance in wages, but would not say that he would give them 50s lent money they had asked. He thought however, that if a little were given way on both sides they might ultimately get a settlement about the subsistence money. After making the above statement, the chairman called upon Mr Philipson, their secretary to read a paper which had been written at the direction of their employer, and which was as follows: -

"Newhouse office, April 10, 1872. The men can have their bargains on the old system if they desire it, with a view of giving time for an arrangement about lent money."

A statement, which meant that the men might take their bargains as usual, and trust to an arrangement being made about the lent money in a few weeks hence, but this statement was not well received. ... It was also remarked that a trades union existed among the employers in this district. When a person thought proper to leave Mr Beaumont's works he was debarred from getting employment under any other master in the neighbourhood. It is alleged that an agreement of some kind exists among the employers, that they are not allowed to employ one another's men. ... A gentleman, who had come up into Weardale to offer employment to the whole of the Weardale miners, was requested to step onto the platform. On rising to address the meeting, he stated that his object in coming up into the dale was to offer them employment as he had heard they were on strike. He did not wish to induce any one of them to leave his native hills, but if their master and them could not agree, he would guarantee constant employment at Haswell, Shotton, and Castle Eden Collieries. The yearly bond was done away with and they would take fort nightly agreements, so any person could leave by giving fourteen days notice. Workmen with their families who stayed twelve months would have their expenses of removal paid, and those workmen who stayed six months would receive some consideration in addition to their wages. The pitmen in his collieries worked eight hours, and made per day in the five-quarter seam 6s, in the Low main 7s, and in the Hutton seam 8s 6d. The thanks of the meeting were heartily given to the gentleman, ... Several young men, the flower of Mr Beaumont's mines, had already left the dale. As no settlement has been come to between Mr Beaumont and the miners, it was unanimously agreed to hold a mass meeting. The men were anxious for an early meeting but it was ultimately agreed to hold it at twelve o'clock today (Saturday). ... Trade is completely paralysed in the dale.

13th April 1872 (Hexham Courant)

Marriages

At Nenthead, 6th inst., Mr Jacob Erwin to Miss Hannah Whitfield both of Nenthead.

In 1851, at Overwater, Robert Whitfield, lead miner, aged 30, his wife Mary (Barron, married 4th qtr 1844, registered at Alston) aged 26, children, Thomas 6, Jane 4, John 3, and Mary Ann 7 months.

Mary Whitfield was buried 18th April 1858, aged 33, at Nenthead.

In 1861, at Pipers Row, Nenthead, Robert Whitfield, widower, lead miner, aged 40, children, Thomas, lead ore washer, aged 16, Jane 14, John, shoemakers apprentice, aged 13, Mary A 10, Hannah 8, and Sarah 6.
In 1871, at Piper Row, Nenthead, Robert Whitfield, widower, unemployed lead miner out of health, aged 50, daughter, Mary Ann, house keeper, aged 20, granddaughter, Mary Jane 3, and nephew, John Barron, tailors apprentice, aged 12. Robert Whitfield was buried 2nd June 1873, aged 53, at Nenthead.
In 1871, at Dirt Pot, Allendale, George Percival, plate layer, lead ore mines, aged 64, his wife Jane 58, and servant, Hannah Whitfield, domestic servant, aged 18.

In 1851, at Hillersdon Terrace, James Erwin, smelter, aged 50, his wife Ann (Hall, married 20th July 1826, at St Augustine's, Alston) aged 44, daughter, Hannah, straw bonnet maker, aged 22, son James 11, and grandson, Jacob, aged 2.
In 1861, at Hillersdon Terrace, James Erwin, smelter, aged 60, his wife Ann 55, son James, smelter, aged 21, and grandson, Jacob, aged 12.
In 1871, at Hillersdon Terrace, James Erwin, smelter, aged 70, his wife Ann 64, and grandson, Jacob, lead miner, aged 22.

Hannah Erwin died 2nd quarter 1876, registered at Auckland, Durham

In 1871, at High Allers, Heathery Cleugh, Weardale, Thomas Dalton, lead miner, aged 51, his wife Isabella (Graham, married 2nd qtr 1841, at Stanhope) aged 56, children, John, lead miner, aged 25, Thomas, lead miner, aged 22, Joseph, lead miner, aged 20, Isabella 18, and Hannah 13.

Jacob Erwin married Isabella Dalton 4th quarter 1878, registered at Auckland, Durham.

In 1881, at Church Hill, Crook, Auckland, Jacob Urwin, coal miner, aged 32, his wife Isabella 28, and daughter Mary A 8.
In 1891, at George St., Westoe, South Shields, Jacob Erwin, coal miner, aged 42, and his wife Isabella 38.
In 1901, at Cowpen, Blyth, Jacob Erwin, coal miner, aged 55, and his wife Isabella 48.
In 1911, at George Potts St. South Shields, Jacob Irwin, coal miner, aged 63, and his wife Isabella 58.
Jacob Irwin died 2nd qtr 1925, aged 76 at South Shields.
Isabella Irwin died 3rd qtr 1929, aged 76, at South Shields.
At the Primitive Methodist Chapel, Alston, 4th inst. Mr Thomas Carr of Bunker Hill Garrigill, to Miss Margaret Davidson of Blagill, Hill Top, near Alston.
In 1861, at Bunker Hill, Garrigill, Thomas Carr, lead miner, aged 56, his wife Deborah 60, daughter Mary 25, and son Thomas, lead miner, aged 23.
In 1871, at Bunker Hill, Garrigill, Deborah Carr, widow, aged 70, son Thomas, lead miner, aged 33, boarders Robert Rain, cartman, aged 28, and his wife Mary Rain 35. See 26th May 1871
In 1881, at Front St. South, Thomas Carr, provisions dealer, aged 43, his wife Margaret 43, and visitor Hannah Stout, lead miner's wife, aged 41. In 1891, at Physic Hall, Thomas Carr, retired grocer, aged 53, and his wife Margaret aged 53. Thomas Carr died 3rd quarter of 1896, aged 59.
In 1901, at Ivy Cottage, Alston, Margaret Carr, widow, living on own means, aged 63.

Deaths
At Rodderup Fell, 9th inst. aged 87, Martha Walton Widow.
In 1861, at Leadgate, Alston, Martha Walton (Vipond, married William Walton 9th October 1806, at Alston, children, John, William, Whitfield, Elizabeth, Thomas, Nancy and James), lead miners widow, aged 76.
In 1871, at Rodderup Fell, Elizabeth Parmley, widow (married 29th June 1837 to Edward Parmley lead miner, Edward died 1st quarter of 1864), formerly farmer, aged 54, son Thomas, lead mine time keeper, aged 28, Isabella dressmaker (apprentice) aged 15, mother Martha Walton, formerly farmer, aged 86.
See 22nd January 1864, and 6th February 1897
Alston, 7th inst. aged 75 Frances Walton, wife of Mr Toward Walton.
See 10th July 1886

20th April 1872 (Hexham Courant)

THE STRIKE OF LEAD MINES IN WEARDALE
GREAT MASS MEETING OF THE MEN

On Saturday (*13th*) afternoon a mass meeting of the Lead Miners of Weardale now on strike, was held at St John's Chapel. The meeting had been announced to commence at twelve o'clock, but in consequence of the long distances, many of the miners had to travel before reaching St John's Chapel; the chair was not taken till one o'clock. ... Although many of the miners had walked their six, eight or a dozen miles, to the place of meeting - upwards of 1,500 persons had congregated by one o'clock in the afternoon ...
MR NATHAN RACE occupied the chair, and in opening the proceedings said he could not help but on that occasion returning the meeting thanks for their kindness in again choosing him to preside over the present one. ...
They had at last secured an interview with Mr Beaumont, and that interview was satisfactory so far. They could not accomplish all that was desired but ultimately the dispute would be settled. At the mass meeting held on the 23rd of March, he (the speaker) made a statement to the effect that Mr Beaumont had said he was prepared to stand by the new system, and that rather than shrink from it he would throw the mines in. Now he was happy to tell the meeting that day that that statement made on the 23rd of March was not true. When he (the chairman) uttered those words he firmly believed they were true; the committee believed they were true; and there was no doubt but that every workman in the WB lead mines believed those words were true. But he heard the other night from Mr Beaumont's own lips that that gentleman had never said he would fling the mines in, nor ever dreamt of flinging them in for two or three years. But he wished it to be thoroughly understood by the meeting that he had every confidence in Mr Featherstone Philipson, who had communicated the intelligence to the committee. (Hear hear) ... There would he believed, soon be a settlement brought about, but in the meantime they were struggling for the 50s a month lent money, and they would have it. (Great applause)
MR JOSEPH WATSON, Hasswicks, Westgate. Up to that time they had been battling with the new system, which seemed to have been a bubble blown by one man, and which burst in his own hand on that memorable night. (Laughter and cheers) Mr Beaumont said he never wished to push any new system upon them, and to use his own words, "they had been fighting with the wind."

But the new system was held up to them as an absolute reality by Mr Cain, and as one, which would come into operation at the beginning of the present quarter. They therefore, never went to Newhouse to take their bargains on Monday last. He heard Mr Cain say that Mr Beaumont was willing to let the men have the benefit of the mines for two or three years in the hope of something better turning up in the future, but that he was not prepared to suffer any loss by the mines. Since this, however, he had heard Mr Beaumont declare that he never said anything of the kind, and never thought so. (Loud cheers) Mr Featherstone Philipson said that Mr Cain told him that Mr Beaumont would close the mines for two or three years rather than grant 50s lent money, or shrink from the "new system." But he himself heard Mr Beaumont say that he never said so, and never even dreamt of such a thing - (cheers) - and he wrote out a declaration to that effect, and declared that it might be published to the world. As regard to the promised interview he believed Mr Beaumont knew nothing about it till the Monday, when he found the letter sent by the committee, and that he then went to Newhouse on Wednesday; but he heard Mr Cain tell the deputation twice in one interview that if the men had not confidence in their master the sooner they parted the better. (Laughter) Another contradiction he might refer to was an equally glaring one. When the deputation were up some time ago hearing the document read, Mr Cain told them that lead had fallen £2 per ton during the last two or three years, and was still tending downwards in price. Well they introduced the subject on Wednesday evening to Mr Beaumont, and told him that they knew from good authority - from a person of their acquaintance, who did business in lead that the value had risen £2 per ton during the past twelve months. In reply to that, Mr Beaumont said he must admit that lead had an upward tendency. ...

Mr WILLIAM GIBSON, of Hasswicks, Westgate. At the interview on Wednesday with Mr Beaumont, he was exceedingly happy to ascertain that the gentleman was not, in point of fact their enemy. They found that their true and real enemy was Mr Cain. He had the impression that Mr Beaumont was a gentleman; he received the deputation very courteously, and listened to all they had to say with great patience, and answered nearly all that came before him in a straightforward and honourable way indeed. Mr Beaumont told them that he had long been of opinion that a little ready money in Weardale would be a very acceptable thing. No miner objected to getting plenty of ready money. Mr Beaumont told them that he had never thought of pushing the new system against the wishes of the men. ...

MR WILLIAM EMMERSON, of Westgate ... There was a sort of agreement or understanding, existing between the agents of Mr Beaumont and certain neighbouring employers say, for instance, the iron stone mines. So that it was necessary for a man to have his clearance, which is often refused by Mr Cain on the plea that a working man had no right to one. ("Mr Cain is not a man") So for Mr Beaumont to be their last employer was sufficient with but few exceptions to debar men from getting work until they had been elsewhere working, either east, west, north, or south, within seven miles of where that meeting was being held. That was tyranny. (Hear hear)

MR JOHN FEATHERSTONE, Middle Rigg. ... The price of living had so much increased since those days (when Mr Sopwith was agent) that it had become necessary that there should be a general advance of wages, and he was glad

that their master, Mr Beaumont, was willing to grant it. They would observe that he (the speaker) was in favour of the system of ten percent, as introduced by Mr Sopwith, only he would have it to take place after the miner had earned £1 per week instead of 15s. That was like each man helping his brother. ... Mr Beaumont had not thought of the system of paying the miners monthly. He never approved of it; first, because there was a deal of ground that was not payable in three months. Plenty of lengths in the Burtree Pasture Mine were not payable in three months; and not only there but in all other mines, there was unproductive ground that had to be cut through. Secondly, in the high part of Weardale, there were seasons when it would be impossible to get it washed up for months, and it would cause endless difference when the work was to be valued. Thirdly, there would be far more wood used, making a greater cost, as well as rendering the mines more unsafe; and in fact, the mines would be ruined, because it would destroy all enterprise on the part of the miners, which enterprise was of more value to Mr Beaumont and the landed proprietors and tradesmen of the dale, and to all who were interested in it, than all the agents, that ever were at Newhouse since the days of old Maughan. (Loud cheers)...

The following resolutions were then put to the meeting, and carried by unanimous vote, amid great enthusiasm.

First, “That no ‘bargain’ be taken at Newhouse until the 50s lent money be granted.”

Second, “That £1 be the standard to base the ‘bargain’ upon, and no man to be percented till he makes that sum.”

Third, “That the thanks of this meeting be given to Mr Beaumont for the gentlemanly manner in which he received the deputation.”

The “Percent System”

In 1845 when Thomas Sopwith took over as agent of the Beaumont Company mines, he increased the bargain rate so as to give an average wage of 15s a week, and raised the monthly subsistence to 40s. It was also decided that miners who were in debt at the end of the year would in future only be responsible for half their arrears. The other half was to be met by those miners who earned more than the 15s per week. These miners were to have 10 percent of their excess earnings deducted from their end of year settlement of pay. So a miner earning for example 30s per week on average would contribute 78s in that year (10 per cent of 15s x 52 weeks) to help pay off half the debt of the less fortunate miners. If these “percent” payments did not meet, the amount owed the Beaumont Company would cover the remaining amount.

The “New System”

The system suggested was that the miners were to work for £3 per Bing of ore raised, and that money, which they earned, was to be paid at the end of the month (ready money). The miners were to be paid a month in arrears, that is they would have to work two months before they received their first payment for one month. The miners found this system to be unacceptable and at the mass meeting, examples were given why this was so. “The ready money system with £3 per Bing seemed all very well; but there were many mines where if they had £6 a Bing they could not make way, and no man could work for a whole quarter of a year and make

no money - merely depending on future success. A partnership might set to work in any mine and work very well; and yet they might work a month or eight weeks without making what would pay for a "charge." What would the ready money system do for men in such a case?"

20th April 1872 (Hexham Courant)

CONCESSION OF THE DEMANDS OF THE WEARDALE MINERS

On Thursday evening, owing to the arrival of a letter from Mr Beaumont, a meeting of the delegates was summoned at St John's Chapel. In reply to the resolutions passed at the meeting of the miners on the 13th inst., Mr Beaumont offered 50s lent money, bargains to be based on £1 per week, and the percentage to be done away with after June first. The delegates however resolved to hold this proposition in abeyance until the statements made by Mr J. C. Cain to the select deputation be cleared up. A mass meeting of the miners will be held at St John's Chapel today "Saturday".

Mr J. C. Cain and Mr W. B. Beaumont

Sir will you be kind enough to insert the following letter, and oblige yours respectfully.
J. C. Cain
Weardale House St John's Chapel
Darlington April 17, 1872

144 Piccadilly, London 16 April 1872

Sir From what took place at the Weardale mass meeting I infer that the lead miners think you proposed the new system without my cognizance. Now it must be clearly understood that the whole system had my approval, and that it was put before the deputation of miners with my sanction. It was originally intended, as a ready money system, in the interests of the men; but as it meets with little favour, and will be much more difficult to work out than was first anticipated, I have had little hesitation in authorising its withdrawal.
It is hardly necessary for me to add that there never was nor, is there, the slightest difference of opinion between us; and that I am thoroughly satisfied of your single mindedness of purpose, and of the truth of all your statements, both to me and to the men. Those who think I can accept compliments at your expense are quite mistaken, and little know me.
Believe me, as always, yours very truly. Wentworth B Beaumont

27th April 1872 (Hexham Courant)

THE WEARDALE MINERS STRIKE

Another mass meeting of the miners now on strike in Weardale, in connection with the W B lead mines took place on Saturday, for the purpose of receiving from the delegates a report of what had taken place since the last meeting, and of determining upon the steps to be taken in the altered circumstances of the case.
... the fifty shillings lent money was granted- (cheers) - that £1 a week to be the basis of the bargains was granted - (cheers) - and that the percentage system was to be entirely swept away - (cheers) -...
This could well have been the end of the strike, but, in a letter from Mr Beaumont to Mr Cain published in the Durham Chronicle, and Hexham

Courant Mr Beaumont had stated to Mr Cain that he was thoroughly satisfied of his single-mindedness of purpose, and of the truth of all his statements both to him and the men. This to the miners implied that Mr Beaumont was saying that the miner's delegates had in fact misled the men. The letter referred to being that printed in the Hexham Courant on the 13th April.

On the 17th April, Mr Beaumont sent another letter to Mr Cain in which he concedes to the wishes of the men.

"144, Piccadilly, London, 17th April, 1872

Dear Sir, I am very glad to observe from the resolutions passed at the meeting of miners last Saturday that the good feeling which has so long subsisted in Weardale is still unimpaired, and I have therefore felt the greatest pleasure in approaching the present unhappy differences, with a full desire to meet fairly the difficulties as change of time and circumstances may require some modification of arrangements which have existed for about a quarter of a century.

"Having come to a conclusion clear and definite in my own mind, I will not delay informing you that there is no longer any objection on my part to give the men fifty shillings a month lent money; the standard basis of all bargains being one pound per week, instead of fifteen shillings as at present. There is so much complication and difficulty about the percentage system that it will be better to abolish it altogether after next June; it is questionable in principle, and does not exist (so far as I know) in any other mines.

"As I am detained here on a Parliamentary committee, I cannot explain my views personally to the men; but I think it right to state that the decision at which I have arrived has been mainly influenced by advice and assistance derived from yourself. You have always acted with loyalty and kindly feeling towards the men; and I am perfectly confident that what has been recently said against you at the miners meeting is the result of unfortunate misunderstanding, and that good will and peace will be speedily restored in our mining districts among all parties.

Believe me, very truly yours.

"W B Beaumont"

MR NATHAN RACE, chairman. ... He must say that in the Durham letter Mr Beaumont wanted to clear Mr Cain, and expressed to him his entire concurrence in that new system which was laid before the men. (Hisses) Now, he must say that staggered him (the chairman) more than everything else he had heard, because he happened to be one of the deputation who waited upon Mr Beaumont at Newhouse, and distinctly heard him say that there was no new system; he never intended that any new system should be brought before the men, and they had been battling with the wind, and so on. (Laughter) And he (the chairman) was struck when he read in the Durham letter that that the new system had his entire approval. (Hisses) If they would read the fore end of Mr Beaumont's letter to the committee, and the back end of his Durham letter, they would observe that there was such a contradiction, as he never saw in his life. (Applause) At the fore end of the miners committee letter he praised their loyalty, and said he was pleased that the good feeling which had existed for such a long time in Weardale was still unimpaired - (loud ironical laughter and cheers) - but at the back of the Durham letter he said he could not think of receiving compliments at the

expense of Mr Cain. (Loud laughter and hisses) Now he (the chairman) thought there was a flat contradiction there. ... The deputation had told the men the truth and nothing but the truth, and on that they took their stand. (Applause) The struggle had assumed a form, which they never expected (hear, hear). He would far rather have been battling that day for the wage question than on that personal question. It was a question of character - (loud cheer) - although they were workingmen. ... The meeting would be aware that the committee were gathered together at once, after they got the document first read, and drew up three resolutions which they forwarded to Mr Cain, and a copy of which was also telegraphed to London to Mr Beaumont, as follows: -

1st. That the acceptance of Mr W B Beaumont's proposal, received to-day, be held in abeyance until a proper understanding be arrived at between Mr Cain and the miners delegates.
2nd. That our character and that of our delegates has been falsified to such an extent that we cannot as honourable men submit to take any more bargains of Mr Cain until Mr Cain has fully cleared Mr Philipson and his co-delegates from all falsehood.
3rd. That if Mr Cain does not at once come forward and clear our delegates we must take legal proceedings, and let the law do that for us. (Loud cheers)

He had received from Mr Cain the following reply: -
"Dear Sir, (laughter) I have received your letter of the 18th inst., with the resolutions passed at the miners committee meeting last evening, and which I will forward to Mr Beaumont by to-day's post. On receiving a reply from that gentleman, I will again communicate with you.
Meantime I remain dear sir, yours truly J C Cain." (Laughter)

By to-day's post, the committee had received the following letter from Mr Beaumont: -

"144, Piccadilly, 19 April 1872

"Sir, - In reply to your telegram, I can only express a hope that calm consideration will lead you to receive the letter I sent on Wednesday in the kindly spirit in which it was written. "I remain yours faithfully "W B Beaumont
"Mr Featherstone Philipson"

There then followed a discussion as to what should be done next and the following resolutions were passed.

1. That this meeting is perfectly satisfied with the past conduct of the committee and the select deputation, and hereby express its unbounded confidence in their honour and truthfulness, and consider them perfectly blameless in the complications which have taken place between the owner and the manager of the W B lead mines.
2. That we request the owner of these mines to withdraw from the union which exists amongst the employers of labour in the neighbourhood for the purpose of preventing any miner obtaining employment who is necessitated or chooses to change his employment, as we consider the object of such union unfair and despotic to the workmen, and dishonourable to the employer.
3. That we should appoint a miners standing committee, to consist of forty members, including chairman, treasurer, and secretary, whose duties shall

be to watch over the interests of the workmen; and represent any grievances that may exist, between masters and men, to the owner of the mines; and that we the lead miners of the W B Mines do hereby promise, and sign our names to support to our utmost ability the aforesaid committee.

4. That fifty shillings a month be granted to men who work one month whether fortunate or unfortunate, without exception.
5. That as a bargain is an engagement entered into between two parties, that it in future be conducted on the principle of contracting, pure and simple; and not by dictation as has been in the past.
6. That advertisements be inserted in all the local papers, asking that subscriptions in aid of our movement be sent to their respective offices.

27th April 1872 (Hexham Courant)

THE TEESDALE MINERS

The case of the Teesdale miners is not yet satisfactorily settled. They have had an interview with Mr Bainbridge, the resident agent, and have been advised not to press for an advance of "lent money," and have been told that the average wages last year had been 17s 6d per week, and that the whole of their earnings can be drawn every month if they choose, and that they (the masters) placed no bar upon any man who wished to leave the Company from procuring employment elsewhere. The impression existing in Teesdale, that miners leaving the Company's works lost all interest in the Miner's Fund, which is said to have a capital of several thousand pounds, appears to be unfounded. Workmen, who leave, in a proper manner, can retain their membership if they choose, and still be entitled to the benefits accruing from the fund.

MASS MEETING IN ALLENDALE

A mass meeting of the workmen in the Allendale section of the W B Lead Mining Districts was held in the Miner's Room, Allenheads, on Wednesday evening last, the object of which was to take into consideration the generous offer of their employer W B Beaumont, Esq., MP. to augment the standard wages of his miners and workmen generally. The meeting was of a very enthusiastic character, and many points in the past history of the mining enterprises of this district were very ably adverted to men with locks white with age were moved with animation as they contrasted the present with the past, and scarcely could find the language to express their grateful feelings for the almost unprecedented advance of wages now so kindly granted them. Many whose long lives have been spent amongst the surrounding heath clad hills alluded to the strong attachment they felt to their native place, and referred in glowing terms to the Beaumont family, in whose service they, and their grand-sires had been exclusively engaged. Though for some time past the earnings of lead miners have not been subject to those fluctuations and migrations which are so common in other fields of industry, and their constant employment seemed to them as an equivalent to wage in the long run. A fixity of residence amongst the scenes and associations of their earliest days materially enhances and greatly contributes to their general contentment in their secluded sphere of labour, and strangers from the din and bustle of town life cannot but admire their neat and comfortable-looking homesteads, and be led to eulogise their immunities. The advance of wages now offered on the

standard basis for bargains is over 33 per cent, and taking the abolition of the percentage system into consideration may be deemed in the aggregate an augmentation seldom surpassed in the history of trade. The meeting not only gave their expressions of good feeling towards Mr Beaumont, but also to the resident agent Mr Curry, whose uniform kindness and attention to their wishes has been unremitting, and who without any ostentation has taken every opportunity to secure to them any real benefit. This good feeling and understanding that exists between him and the workmen will ever tend to inspire confidence and united effort to promote the interest of their employer, Mr Beaumont. The following resolutions were unanimously passed and ordered to be sent to Mr Beaumont: -

W B Beaumont Esq., MP.

Sir, It is with the greatest of pleasure and satisfaction that we, the undersigned on behalf of the whole of your employees in the Allenheads mining district take this mode of conveying to you the following resolutions unanimously passed at a public meeting of miners, &c., held at Allenheads, 24th April 1872.

1st. That the intimation (communicated through our respected resident agent, John Curry, Esq.) of the definite and substantial manner in which you have so generously proposed to improve our position merits the deepest gratitude and heartfelt thanks of all your employees in this section of your mining district.

2nd. That the increase of monthly subsistence money to 50s to contract men, together with the £1 per week as the standard basis of all bargains, and the liberal remuneration of every other class of labourers, accompanied with the great benefit of payment in full each month are boons which cannot be too highly appreciated, and for which we wish to tender to you our most sincere thanks.

3rd. That the kindly sentiments - or what may be more properly termed loyalty - which have ever been cherished towards yourself and family by the inhabitants of this district will, if possible, be more strong and binding after the generous expression of your liberality and considerate efforts to promote the welfare of your workmen.

Signed, on behalf of the meeting
John Stobbs, chairman
Thomas Prest, secretary

3rd May 1872 (Durham County Advertiser)

THE HYSEHOPE SILVER LEAD AND BARYTES MINING COMPANY, LIMITED

INCORPORATED UNDER THE “COMPANIES” ACTS 1862 AND 1867

Whereby the liability of the Shareholders is limited to the amount of their Shares

CAPITAL, £6,000 IN 1,200 SHARES OF £5 EACH,

Payable—£1 per Share on Allotment—£1 per Share at the end of 6 Months—and the remainder by payments of 10s per Share at intervals of not less than 3 Months.

DIRECTORS

ROBERT REED, Esq., Knitsley, near Consett, Durham

WILLIAM REED, Esq., Knitsley, near Consett, Durham
THOMAS RICHARD DOLPHIN, Esq., The Delves, near Consett, Durham
(With power to add to their number).

BANKERS

THE NATIONAL PROVINCIAL BANK, DURHAM.

SOLICITORS AND SECRETARY

JOHN PORTER DOLPHIN, Esq., Wolsingham, via Darlington.

THIS Company is formed to acquire and work a Vein of Lead Ore and Barytes, which has been discovered in a tract of ground belonging to the Dean and Chapter of Durham, lying near Castleside, in the County of Durham, and held upon extremely favourable terms.

The Mining ground in question is bounded by the Hysehope Burn and the River Derwent on the North, by the productive Royalty held by the Healeyfield Lead Mining Company on the East, and the Hysehope Born divides it from the well-known Silvertongue Mining District on the West.

A Vein, rich in Lead Ore and Barytes, has already been proved; but the present proprietors require additional Capital fully to develop it. And as they believe that at a comparatively small outlay the Mine will become highly remunerative, they have determined to offer only one half of the Shares to the public for the purpose of providing working Capital, retaining to themselves the other half of the Shares as fully paid-up Shares.

The same Vein, which has been proved, is now being worked in a Royalty adjoining, and within a distance of a few yards from the Northern Boundary of the ground to be worked by this Company, and large quantities of ore are being raised.

It is believed there are other good Veins of Lead Ore within the tract of ground secured, but supposing no other veins should be discovered, it is confidently expected that the vein already proved will return a large profit to the Shareholders in a very short time.

The Lead Ora produced, in the District is extremely rich in Silver.

Copies of the Memorandum and Articles of Association may be seen at the Office of the Solicitor; and Forms of Application for Shares may be obtained from any of the Directors, or from the Solicitor.

Application for Shares must be made on or before the1st day of June, 1872.

WEAR FISHERIES ASSOCIATION
POLLUTION OF THE RIVER

Mr DOLPHIN (of Wolsingham): I would like to ask the Secretary if he can tell me If there has been a great falling off of ticket holders residing westward of Auckland.

The SECRETARY (Mr John Caldcleugh): I should say there has been no falling off.

Mr Dolphin: Because I know that the river in the upper reaches is in such a filthy state that it is useless to fishermen, and it is getting worse every day, from Bolihope Burn downwards to Auckland. There is not a day out of one hundred that a person can fish. The river is worse now than it has ever been. Mr Sopwlth promised, at one of our meetings, to put in subsiding ponds, but I believe be has not done so. When there is a flood all the rubbish, which has been put on the banks of the river, and allowed to accumulate, is carried downwards.

The SECRETARY: There is no doubt whatever that the river is worse than ever it was.
Mr DOLPHIN: I know for a certainty that the London Lead Company have opened a great many more mines in Weardale, and in consequence of the refuse thrown into the river by them, the water is utterly useless for ticket holders. This state of things made me ask if they had not got tired of taking out tickets.
Mr RICHARDSON: Formerly Bolihope Burn was a very clear stream of water.
Mr DOLPHIN: The water streaming down from Daddryshields is also much polluted.
The CHAIRMAN: Since the increase in the number of lead mines the pollution of the river has proportionally increased, and the “hush," or pulverised stone, is denser at Durham now than ever it was. Ten years ago it was a rare circumstance to see hush in the Wear at Durham, but now few days pass away without it being too plainly visible.
Mr DOLPHIN: Miners accumulate their hush on the edges of streams, so that when a flood comes it clears it all away; and for two or three days after the subsidence of a flood the river is comparatively clear.
The CHAIRMAN: It seems to me that it is almost impossible to get rid of the pollution except by filtration; and the clogging of the sand or gravel beds would be so continuous that the expense in their perpetual removal would be too serious an item for the owners of the mines to tax themselves with.
Mr DOLPHIN: I think lead miners ought not to be allowed to deposit their rubbish within watermark.
The CHAIRMAN: I should be very severe upon such cases; I do think that the lead miners might prevent their wash coming down the river in such a thick state. If numerous troughs, or subsiding ponds, were erected, in which heavy particles would fall, the water in some degree would approach purity. If such a system of purification could be adopted, it certainly should be.
Mr DOLPHIN: Both Mr Beaumont and Mr Bainbridge promised most faithfully to see that they were erected at their respective works, but I don’t know whether they have done so or not. There is no doubt whatever that if sufficient quantity of deposit ponds were erected, it would obviate all the pollution that was going on; and, besides that, a large quantity of lead, now lost, would be obtained.
The CHAIRMAN: It now becomes a question whether we should not have another inspection of the whole mines bordering on the upper reaches of the river. There is no doubt on the last occasion the parties put their houses in order to receive us.
Mr DOLPHIN: I know that the London Lead Company did so.
Mr RICHARDSON instanced a case in point, which came under his own immediate notice.
Mr DOLPHIN said “hush’’ was not lead ore, but the stuff that came from it.
The CHAIRMAN: It is fine pulverised debris.
Mr RICHARDSON: But I know there is lead in it.
The CHAIRMAN: One of the evils, which the Sunderland people complain of, is that the staff, which the miners quarry out is not put through the mill, but great boulders are laid in the watercourse and carried away down the river to sea. The bed of the river at Durham is considerably higher now then it was some years ago. The owners of lead mines trust to nature doing the work of

their own cartmen. During the winter season, when the water is high, thousands of tons of stones and rubbish, which have been heaped up on the banks of the river, are carried away by high floods.
Mr Richardson: Can Mr Dolphin name any particular place where the practice of making large heaps of rubbish is carried on?
Mr DOLPHIN: Yes; there is Park House Pasture, for instance. A level was bored there, and Mr Beaumont's miners took thousands of tons of rubbish out of the earth and laid it on the riverside, and the very next high flood carried it away.
The CHAIRMAN: No man has a right to put earthy rubbish on the side of the river for the express purpose of it bring carried out to sea. The best thing would be to ask the Pollution of Rivers Commission— to inspect what is going on. It would be rather invidious for a private individual to go to the mines for the purpose of detecting the malpractice going on.
Mr DOLPHIN: The last time the Commissioners were down, Mr Beaumont and the London Lead Company promised to do everything that could be done to prevent the pollution of the river; but since that time I have seen no improvement in the aspect of the water.
The CHAIRMAN: Mr Sopwith showed me an extensive plan, which he intended carrying out, for the purpose of increasing on a large scale, the number of deposit ponds, which would be made quite perfect. It was true in soma isolated places, works had been carried out to prevent, and did prevent, the pollution of the river; but in the bulk of places nothing whatever had yet been done, and a visit, in my opinion, would only be an act of justice to those who had used every exertion to keep the Wear clean, while an exposure would fall on those who had culpably neglected it. Is there not a bill before Parliament, which will deal with all these matters?
Mr DOLPHIN: I believe its enactments have no reference to the upper reaches of rivers, but have only reference to the pollution of rivers by town sewage. I believe the Commissioners when in Durham, promised that on a future occasion they would come down to take evidence on the general pollution of the river.
The CHAIRMAN: As far as I know the present bill does not touch the question of mines.
Mr RICHARDSON: The Commissioners said a future bill would be introduced into Parliament, affecting lead and other mines.
The CHAIRMAN: All that I have read of the bill is, that it relates to sewage of towns. I am afraid it does not go beyond that. It does not even apply to pumping foul water out of coal mines into rivers, or to "hush" water. The bill has certainly references to persons putting stones or rubbish into rivers. It will prevent boulder stones coming down, and that will be something gained. A bill may hereafter be brought forward with reference to other matters.
Mr DOLPHIN: The largest proportion of the rubbish from the mines is sent down the river.
The meeting then came to a resolution, which would, they hoped, tend to lessen the present filthy state of the river.

4th May 1872 (Hexham Courant)

FINAL SETTLEMENT OF THE WEARDALE MINERS STRIKE

On Monday last, the deputation of Weardale miners had an interview with Mr Beaumont's lead agent Mr Cain, in order to arrange the details, as Mr Beaumont wished in connection with the resolution passed at the mass meeting on the 20th ult., and so bring the three week's strike to a satisfactory settlement. In the evening, the whole of the 34 delegates who represent the workmen of the mines known as Pasture Grove, Killhope, Grove Rake, Boltsburn, Stanhope Burn, Green Laws, Slitt &c. met at the committee room, St John's Chapel, to consider the arrangements made by the head agent and the deputation of eight of their number. On these arrangements being laid before them, they were heartily approved of, and all was consequently settled up in a satisfactory manner. The strike of Weardale miners is thus now finally closed. Before the committee rose, a hearty vote of thanks was given to the press for the full and impartial manner, which the proprietors have reported the proceedings in which the miners have been engaged. The miners took their bargains at the W B office, at Newhouses, on Thursday and yesterday, and work will be resumed on Monday. Hitherto, the wage men, or those who work for wages at the W B Lead mines have been receiving subsistence money monthly like the pickmen, and lifting the balance at the half yearly pays. In future, these workmen will be paid off once a month.

The attempt by the management to get rid of the "lent" money system at this time did not succeed, but, the Weardale bargain books show a change to the method of paying subsistence to the miners beginning with the bargains let on the 1st April 1875. In these it was said that the "money to be advanced according to quantity of ore raised". This new wording did not apply to all bargains, but only those that were to work "old ground," or poor ground.

"1st April 1875 Slitt"
"Thomas Furnail 2prs agree to raise ore in old ground east of Slitt shaft @ 50/- per Bing - Money to be advanced according to quantity of ore raised - till 30th June 1875."

"1st April 1875 Greenlaws"
"Mark Nattrass 4prs agree to raise ore in their old ground at 50/- per Bing - Money to be advanced according to quantity of ore raised."
"1st April Boltsburn"
"Tho. Middleton 4prs agree to rise 1 fathom in Pattinson sill at £6 contract and raise ore at 50/- per Bing - money to be advanced according to the quantity of ore raised."

This system continued through 1876 becoming more common by 1877, and in 1878 out of 107 bargains, 69 were of this type.

In 1879, the bargains let on the 27th August show yet a further change, and all bargains were let according to ore raised, but also on a percent basis; the miners were "to be paid 80 percent monthly on this contract and the balances at the half yearly pay in July 1880."

"27 August 1879 Burtree pasture"
"Jos. Thompson 4 partners agree to raise ore in 6 fathoms of ground in Nich James length at 75s per ton of ore till the 31 December 1879 to be paid 80 per

cent monthly on this contract and the balance at the half yearly pay in July 1880."
This method continued up to the closure of the mines by the Beaumont Company.

"6 January 1883 Grove Rake"
"Thompson Robinson 4 prs agree to raise ore in their old ground @ 90/- per ton of ore as directed or till 31st March 1883 to be paid 80 per cent monthly on this contract and the balance at the half yearly pay in December 1883."
This would mean that a miner who did not raise any ore would have received no subsistence; it is little wonder that the miners were so opposed to it.

Marriages
At Alston 25th ult., William Milburn Esq. of Mishawake, Indiana, US, to Jane Eldest daughter of the late William Dickinson Esq., of Spency Croft.
See 10th May 1879, 20th August 1887, 6th July 1889, & 23rd April 1892
At Nenthead Mr John Armstrong to Miss Agnes Thompson, both of Nenthead.
In 1861, at Brownley Hill Bank, Nenthead, John Armstrong, widower, lead miner, aged 41, children, Joseph, lead miner, aged 25, Mary, dressmaker, aged 23, William, lead miner, aged 21, Sarah, housemaid, aged 18, John, lead miner, aged 16, Margaret 13, Thomas 10, Jane 1, and granddaughter, Sarah Armstrong 1 year.
In 1871, at Holme Foots, John Armstrong, lead miner, aged 25, and his sister Mary, domestic servant, aged 32.
In 1881, at Dyke Heads, Nenthead, John Armstrong, lead miner, aged 36, his wife Agnes, 35, children, William 8, Margaret 7, Matilda 4, Thomas 2, and Matthew 4 months.
In 1891, at 11 Duke Street, Haworth, Yorkshire, John Armstrong, wool comber, aged 46, his wife Agnes, 45, children, William, worsted weaver, aged 18, Margaret, wool drawer, aged 17, Matilda, worsted spinner, aged 14, Thomas, worsted spinner, aged 12, and Matthew 10.
In 1901, at 16 Lora Street, Haworth, Yorkshire, John Armstrong, wool comber, aged 56, his wife Agnes, 55, children, Margaret, mender of worsted goods, aged 27, Matilda, mender of worsted goods, aged 24, and Thomas, labourer in machine shop, aged 22.
Agnes Armstrong died 1st quarter 1906, aged 60, registered at Keighley.
In 1911, at 56 Prince Street Brow, Haworth, Yorkshire, John Armstrong, widower, wool comber, aged 66, daughters, Margaret, mender of worsted goods, aged 37, and Matilda, mender of worsted goods, aged 34.
John Armstrong, died 2nd quarter 1921, aged 76, registered at Keighley.
Deaths
At Alston, 1st inst. aged 80, Mrs Rebecca Charlton, widow. *Annuitant*
See 21st March 1856, 3rd December 1859, 14th October 1871, 15th February 1873, 30th June 1877, 1st April 1882, 21st July 1888.
At Pasture House, 30th ult. aged 59, Mr Robert Nicholson.
In 1871, at Pasture House, Nenthead, Robert Nicholson, widow, lead miner, aged 58, children John, lead miner, 27, Mary 22, and Tom, draper & grocer, aged 17.
See 11th January 1868, 29th May 1869, 15th November 1873, and 21st April 1883

At Newcastle at 37 Eldon Street, 28th ult. Mary relict of Mr W. Reed, glass merchant.

4th May 1872 (Hexham Herald)
Deaths
At Nenthead, 23rd ult. aged 65, Mr John Armstrong, Miner.
In 1851 living at Bank Head, Nenthead, John lead miner, 44; his wife Elizabeth (Rowe, married 8th May 1830) aged 40, children Robert born Kenton, Northumberland 18, Elizabeth 14, Mary Ann 12, Margaret 9, John 7, Edward 4 and Jane 2. In 1861, at Pipers Row, Nenthead, John Armstrong, lead ore miner, aged 54, wife Elizabeth aged 51, children Margaret 19, John, lead ore washer, aged 17, Edward, lead ore washer, aged 14, Jane 11, Isabella 9, and Isaac 6. See 25th January 1867
His eldest son Robert a lead miner was living at Nenthall with his wife Sarah. John's wife Elizabeth died 20th January 1867, see . In 1871, at Pipers Row, Nenthead, John Armstrong, widow, lead miner, aged 64, daughter Isabella, housekeeper, aged 19, son Isaac, lead ore washer, aged 16, and grandson William Armstrong 8.
Nenthead, 2nd inst. aged 9 months James Simon, youngest son of Mr John Hyslop, Teacher of the Lead Company's School, Nenthead.

11th May 1872 (Hexham Courant)
THE TEESDALE LEAD MINES
Another interview has taken place between the delegates of the lead miners and Mr R W Bainbridge, the superintendent of the Lead Company's Works, which occupied four hours. A fortnight ago, a petition was presented asking for an advance in the subsistence money from 44s to 54s per month, which the men considered very reasonable. The request not being granted, a discussion followed, in which the superintendent reminded the men of other privileges they enjoy - namely, a doctor free, and schooling at a nominal charge. The men contended that these were no greater than those of coal miners who pay a doctor 6d per fortnight, house rent and coals free, 6d per fortnight cartage of coals, 2d per week average for two children at school, amounting to £2 7s 8d per annum. Compare these charges with the lead Company, namely, doctor free; school (2) 8s; house rent £3 10s; coals £3 5s; total £7 3s; a comparison putting, the men think, their privileges into the shade. Another cause of complaint was the way in which bargains are let. Suppose a partnership, by extra hours and hard labour, earn a few shillings more per week, the men complain that at the end of the quarter their prices may be lowered, and this encouragement is given to what the Company mean to destroy idleness. What the men want seems to be to have a fair remunerative price per bing, and then for the masters to allow the men to earn as much as will support their families. They think that if the ordinary work of the miners bring profit to the Company, the extraordinary work must do much more so. Notwithstanding the powerful reasoning of the delegates on these and other points Mr Bainbridge still stood strongly opposed to the petition. Urging another weeks' consideration, the delegates kindly requested the Lead Company, through Mr Bainbridge, to give the petition their most earnest consideration, and to sympathise with the men in their difficulty, stating that if the men did not get their request granted they intended to get up another

petition which would contain a rate of wages, the basis of which would range higher than at present; that other classes would be in all probability embraced; and that if the men were obliged to leave the Company's works, the latter would be unlikely to get another lot of men to do the work at similar rates.

11th May 1872 (Hexham Herald)

FALLOWFIELD

SERIOUS ACCIDENT

On Monday, about twelve o'clock at noon, a serious accident occurred to a boy 2 years of age, son of John Robson; joiner of Hexham at Fallowfield Mines. It appears that he was going along the level with the wagons full of ore and he jumped on to one of the wagons and through some circumstances in turning round, he slipped his foot and falling broke his left leg. He was immediately conveyed home to Hexham, and medical assistance procured under which he is progressing favourably.

Deaths

At Boltsburn, Rookhope, 3rd inst., aged 11 years, William son of John Westgarth.

In 1871, at Boltsburn John Westgarth, mason, aged 31, children Mary J. 30, William 9, John 8, Henry 3, Elizabeth H. 11 months, lodgers John Dixon, master tailor, aged 36, and Henry Smith, tailor journeyman, aged 23.

St Peters, Allendale, 7th inst., aged 61, Mary Wife of John Heslop.

In 1871 John Heslop, School master aged 61, his wife Mary (Spark, married 3rd November 1836, St Peter's Allendale) aged 60, children Thomas Green, schoolmaster 33, John iron stone miner 29, and Mary Ann 22.

See 9th March 1878.

25th May 1872 (Hexham Courant)

THREATENED RENEWAL OF THE STRIKE IN WEARDALE

Not withstanding the settlement that was recently come to between Mr Beaumont and his workmen, when all grievances were supposed to have been removed we are informed that there are still about 100 men off work in Weardale. During the first two days when the bargains were taken, all went on smoothly the prices being considered by the men generally fair, and those who had taken these bargains resumed work at once. Unfortunately, during the two last bargain days, the prices offered to the miners were not nearly so good, and they were consequently refused. There is a great deal of dissatisfaction amongst the men on this account, as they fancy that it has been a scheme on the part of the agent to get part to commence work, and so dissolve the unity which has hitherto existed. There is another point which has also been freely commented upon, viz, that those set to work at first are composed entirely of men who have votes, whilst those who are likely to be debarred from another month's subsistence money, are nearly all non-electors, and belong as a rule, to the poorer class of miners, who can worst afford to do without subsistence money. Their more fortunate brethren however are likely to resist this sort of treatment very bitterly. Already, meetings have been held in different mines, and a mass meeting is intended to be held shortly, and unless some satisfactory arrangement come to, another strike is likely to occur. The men who have not yet resumed work say

that according to the scale of prices offered, they could not earn 10s per week; numbers are still continuing to leave the district.

Marriages

At St Peter's Church Allendale, 23rd inst., Mr John Curry, mining inspector son of Mr John Curry, agent of the W. B. Lead mines Allendale, to Margaret only daughter of the late Mr Joseph Coats, Hammershield, Allendale.

See 21st December 1864, 17th March 1868, 6th July 1869, 18th July 1870, 9th September 1876 and 24th June 1899.

At Rookhope in the parish Church, Mr John James Allison, of Allendale to Susannah, youngest daughter of the late Mr G. Oliver, Redburn, Rookhope.

1st June 1872 (Hexham Courant)

NENTHEAD MINERS MEETING

A meeting of the lead miners of the district was held in the Band room, at Nenthead on Thursday week, for the purpose of deliberating upon the action to be taken in order to secure better remuneration for their labour. The meeting resulted in the formation of a committee of twenty and out of that number; a select committee of eight were delegated to confer with the resident agent J. J. Millican Esq. of Nenthead house. The first conference took place on Friday night at the offices, the delegates being very courteously received by Mr Millican, who expressed himself warmly attached to the workmen, and nothing would be lacking on his part to advance their welfare. The result of this interview were communicated to the miners at another meeting held on Tuesday night last. Six delegates from Garrigill attended this meeting and informed them that the Garrigill miners had resolved to stand by the conclusions arrived at by their Nenthead brethren. The meeting however could arrive at no resolution, and it was left to the committee assisted by the Garrigill committee to arrange matters, as they deemed best. Our correspondent suggests that the committee should seek an interview with R W Bainbridge Esq. the superintendent of the works as that gentleman controls the rate at which the bargains are let. The attitude of the Nenthead and Garrigill men does not foreshadow a strike to which they are greatly opposed. The markets have gone up and other companies are advancing 50s and 72s under the same royalty, which has lowered the duty on the ore but the men do not participate in the boon. The men adds our correspondent must be united in their efforts to secure a greater amount of lent money and £1 per week on which to base their bargains. At present the standing wage is 15s 9d; surely they should have advanced the odd 3d. The miners should have the same privileges as those obtained by their brethren in Teesdale.

LOCK OUT OF THE TEESDALE LEAD MINERS
GREAT MASS MEETING OF THE MEN AT MIDDLETON

Middleton in Teesdale was the scene of much excitement on Saturday, on the occasion of a great mass meeting of the men in the employ of the London Lead Company. The men as most of our readers will be aware, have recently been agitating for an increase of "lent" money, and like their brethren in Weardale they succeeded after some difficulty, in obtaining it, but they had only been at work a short time on the new arrangement when the washer-boys sent in a petition for an advance in wages, and as the masters refused to make any concession, the lads turned out on strike on Wednesday last. At the quarterly bargains on Friday, it was intimated that those miners having either

sons or brothers employed as lead washers, and out on strike, would not be allowed to take their usual places until the boys resumed work. This, as a matter of course, created immense excitement, and it was decided by the men to hold a mass meeting with reference to this and a few other matters on the following day. The town during the night was placarded with numerous squibs, and on Saturday morning, long before the time arranged for holding the meeting at Middleton, the village was thronged with miners from the outlying districts. The meeting was held in the open air, and on the temporary platform, the two delegates took their places shortly after twelve o'clock. Mr Wm Parkin occupied the chair and in opening the proceedings narrated the result of the interview the miners had had with the superintendent, Mr Bainbridge, which ended in a letter being read at an interview on the 15th May, to the effect that their request of 54s was granted by the Company, and for which a vote of thanks forwarded. They likewise returned a vote of thanks to the superintendent for consenting to advance them money earned over and above the 54s when earned. There was now a new feature in the movement. After the struggle had partly subsided and the men were going to try on awhile with the advance of subsistence money, although not satisfied with the basis for bargains, the washer boys came out on strike for an advance of wages, and Mr Bainbridge had locked the men out, as there was no one to wash the produce of the mines. The following is a copy of the notice which had been posted in the office: - "Agreeing with a remark made by one of the company's miners, that the washer boys have at present as much ready money as is practical hereafter, a very well conducted and industrious party will have his monthly subsistence money advanced 1s per week beyond his present year's wage, leaving his present year's wage ready to be fixed in the autumn as usual; the 'back' 1s per week from the beginning of this year's ore dressing will be paid on the 29th of June.-signed, R W Bainbridge, Middleton House." They would all understand the purport of that notice, and as there were several speakers to follow, and several resolutions to submit to the meeting, he would not detain them farther.

The meeting was then addressed by Messrs R Hutchinson, Isaac Parkin, Jacob Nixon, Ezra Lowes, William Dawson, Joseph Richardson, John Watson, George Armstrong, and John Scott, the tone of their remarks being to the effect that not withstanding they were locked out in consequence of the strike of the washer boys, they should support the boys, their demand being reasonable.

The following resolutions were then passed: -

1. That the London lead Company's miners in Middleton in Teesdale, being locked out in consequence of the washers strike for advance of wages, and not being permitted to work unless the boys resume their employment, we consider ourselves disconnected with the Company's works, and that if we go to work again it must be on new conditions.
2. That if we go to work again we have 54s lent money per month, and £1 per week as the basis.
3. That a protection committee be formed to look after the interests of the workmen.
4. That the starting of the boy's wages be 10d instead of 8d at 12 years of age, and to be raised at not less than 3d per day per year, and to be paid off as Mr Bainbridge had suggested.

In the course of some conversation which followed, it was decided that Mr Birch, the head governor, should be requested to come down from London, and that the delegates have an interview with him in reference to the present state of affairs.
The meeting then separated.

7th June 1872 (Carlisle Patriot)

VALUABLE LEASEHOLD ESTATE IN THE PARISH OF ALSTON, CUMBERLAND, FOR SALE.

TO be SOLD, by AUCTION, at the House of Mr JONATHAN WALTON, the BLUE BELL INN, ALSTON, on Friday, the 5th day of JULY next, at Three o'clock in the Afternoon punctually, Mr ROBERT PEARSON, Auctioneer,—

All that Valuable LEASEHOLD ESTATE, situate at HIGH GALLIGILL, in the parish of Alston, in the County of Cumberland, containing, according to the Ordnance Survey, 197a. 3r. 37p, or thereabouts of Land, with the Excellent Modern Built Dwelling House, Stable, Two Barns, Two Coalhouses, and other necessary Outbuildings thereon, and Yard, Garden, and Small Plantations adjoining thereto, as the same is now in the occupation of Mr Edward Walton, or of his under tenant.

The Dwelling House is now let as two Houses, and contains Eight Rooms. About 26a. 1r. 1p. of the Land is Meadow, 27a. 2r. 30p. Pasture, and 141a. 3r. 0p. of it is Allotment Land. The Owner of the adjoining Estate of Pryhead possesses Six Stints in the Allotment, and the property is sold subject thereto.

The Estate is situate about Three Miles from the Market Town of Alston, and at a short distance from the Nenthead Road, from which there is a good way to it. It lies in a ring fence, and is well watered, and the fences are in good repair. A large portion of the Meadow and a part of the Pasture Land has been drained and improved, and a considerable part of the Allotment has been limed.

There is a Seam of Crow Coal in the Pasture, and a deposit of Limestone and a Limekiln in the Allotment.

The property is of Leasehold Tenure, held for the remainder of a term of 1,000 years, which commenced in or about the year 1621.

Mr EDWARD WALTON will show the property, and further particulars may be obtained from Messrs BAINBRIDGE & MILLICAN, Solicitors, Alston, at whose Offices a plan of the Estate can be seen. Alston, 6th June, 1872.

8th June 1872 (Hexham Courant)

THE LOCK OUT OF THE LEAD MINERS IN TEESDALE
CONFERENCE BETWEEN THE GOVERNOR AND THE MEN.

On Saturday morning, a conference took place between Mr Birch, the governor of the London Lead Company's court of directors, and the general body of the locked out miners at Middleton in Teesdale. Before the holding of the conference, which was fixed to take place at eleven o'clock, the men assembled in large numbers on "The Hill," and decided after some conversation to leave their case in the hands of the delegates. The men then proceeded to the Lead Company's Schoolroom, when they were met by Mr Birch, who was accompanied by Mr Wigram (barrister), Mr R W Bainbridge (local superintendent), Mr C Bainbridge, and a few other gentlemen.

The Governor, after referring to the last time he had the pleasure of meeting a large body of Teesdale miners, which was under much happier auspices, said it had always been the principle of the court to act fairly towards the men. It was never intended by the court that any one of them should get himself irrecoverably into debt. It should not be forgotten, however, on the part of the men, that the company had of late not been successful. During the past two years they had been obliged to take a paltry 10s a share out of a little reserve fund they had to distribute, and he was not aware that they had discharged a single workman during their period of depression. He related to them the history of what he knew of the present movement, and read extracts from a lengthened correspondence between himself and Mr Bainbridge, to show that it had been the desire of the court to do their utmost for the welfare of the men, and that no time had been lost in considering the position for an advance of "lent" money. A few days afterwards, on the 23rd of May, he received a letter from the men thanking the court for the increase of subsistence money, which had been granted. He confessed he was considerably surprised on reading a newspaper with an account of a mass meeting of the men on the previous Saturday, the 27th of May. He never thought there could have been so much injustice shown towards the company, and he pointed out fallacies, which he could not believe the majority of the men could agree with. The governor referred to other suggestions made at the mass meeting and denied nearly the whole of them, adding that the company's wish was to deal fairly with their men in every way. With respect to the education of the miner's children, he said the school in which they were assembled cost the company £2,000. As to the washer boy's strike, it appeared to him exceedingly hard that their fathers and others connected with them should be locked out in consequence of the step they had taken. But it was one of those things that could not be avoided, and until the ore in the team was washed up, they could not get any more out of the mines. There was one point on which he differed from Mr Bainbridge, when he said that there was work for the single men, but none for the parents of the boys on strike. That was very unjust. The company had contributed about £10,000 towards the Miner's Fund, and as treasurers to the fund, they had always allowed interest at the rate of 4 per cent per annum, whilst from their money in the Consols they were only receiving 3 per cent.

A petition from the men was handed to Mr Birch, in which they asked - "1. That £1 per week be the basis of our bargains. - 2. That we have, as you have already kindly granted, 54s per month subsistence money. - 3. That the money be advanced monthly over and above the 54s when earned, which Mr Bainbridge, our superintendent, has always consented to advance if required. - 4. That the working hours be reduced from eight to seven per day. - 5. That the starting point of the washer boys wages be 10d instead of 8d per day at twelve years of age, and to be raised at the rate of no less than an average of 3d per day per year. The boys at present employed being advanced accordingly. - 6. That the hours of labour be reduced six per week."

The Governor said he was quite surprised at such a petition after the one they had so recently presented requesting an advance of "lent" money, and one or two other matters which the court at a considerable sacrifice had granted. They had written a letter thanking the company for the concessions made and yet within a week they were presenting again another petition. If they thought,

the court was going to be influenced in that way they were mistaken. It was unfair to think that because they had granted one thing they were going to grant another. He considered that when they gave 10s advance, they made a considerable concession. To the request that £1 per week would be the basis of their bargains, he emphatically said it would not be given. Of course, if they did not like a bargain they were not obliged to take it. The company were not taskmasters. They were not slave drivers. The men could take a bargain or leave it alone. With regard to the worth of the washer boys, it had been suggested that the company should revert to the old method of letting the washing by public competition, which would not be done; and as to the request for reducing the number of working hours he did not think it was fair, as it was an equivalent to an increase of wages.

After a few words from Mr Parkin, the chairman, in which he said the boys going on strike had thrown them into confusion again, but however much some might at first attribute blame to the parents in not controlling their children and sending them back to work, he thought that idea would have subsided, seeing that it was the duty of every father and son to try and earn as much as would keep them out of debt, for the good old book said "owe no man any thing."

Mr Birch said he had already stated the course the company intended to pursue; and with a few speeches from some of the delegates, the conference terminated.

A meeting of the men was afterwards held and it was arranged to hold another mass meeting.

On Thursday a mass meeting of the miners, now locked out in Teesdale was held in the long room of the Rose and Crown Inn, Middleton in Teesdale. There was a large attendance, the room being crowded to excess. Mr Wm Parkin, presided, and spoke at some length on the necessity of looking emigration in the face unless their demands were conceded. He was followed by several other miners, and at the close of the proceedings a series of resolutions were adopted, pledging the men and washer boys to remain out until the Lead Company agreed to make £1 a week instead of 17s 6d the amount paid at present the basis of the "bargains." It was also resolved that a deputation of three miners should proceed to London, to lay their grievances before the Governor, in consequence of the men having been refused a private interview by Mr Birch, when he was down at Middleton last week. On the meeting breaking up a collection was made to defray the expenses of the deputation.

8th June 1872 (Hexham Courant)

WEARDALE LEAD MINERS MEETING AT ST JOHN'S CHAPEL

The representatives of the lead miners in Weardale have just held their first meeting at St John's Chapel, for the purpose of establishing a standing committee "whose duty shall be to watch over the interests of the workmen, and represent any grievances that may exist between the master and the men to the owner of the mines," and to appoint chairman, select committee, district secretaries, and general secretary and treasurer. The standing committee is formed by the men chosen by the miners of the different mines to represent them, and the miners of the W B lead mines, on the 20th April, in this year, signed their names to support to the utmost of their ability the said committee.

After the selection of officers, it was resolved that the W B lead miners in Weardale subscribe at once 6d each towards the funds and it was resolved to open correspondence with the manager of the W B mines, and to point out to him "with feelings of deep regret, that such a number of men have been necessitated to leave their country, when a number of places are standing, and that the £3 per bing has not been generally given. We (the committee) think all men who are at work ought to have their "lent money". Their lateness of commencement of work was the managers blame and not theirs." Several other resolutions were passed, amongst which was that the next meeting be held on Saturday after next "bargain."

15th June 1872 (Hexham Courant)

LEAD COMPANY'S ALSTON MOOR MINERS

Upon Mr Bainbridge the Company's superintendent arriving at Nenthead on Thursday for the purpose of arranging the bargains, opinions for the rates given by the viewers were awaiting him. Delegates from the body of miners called upon him, and presented a petition praying for the same privileges which had been or might in the future be granted to the Teesdale miners be extended to them. They stated that on the Company's workmen finding the "strike" among the Teesdale washer boys was in danger of imitation by their boys, a general meeting was held whereat they agreed that their boys should not "strike", but continuer under a confidence that the masters would give them as high an increase of wages at their Autumn fixing as circumstances allowed. Mr Bainbridge at once frankly told them that the Company's Court intended that the increased monthly subsistence advances granted on the Teesdale application should apply to their other districts, and that the right minded action of the men of Alston Moor in respect of their boys tended to confirm him in the disposition to give the boys the contemplated double rise in the years wages intimated at the Middleton meeting on the 1st inst.; and that the protective new condition against "strikes" which had been inserted into the bargains for Teesdale and Weardale (and accepted by the latter) would also cover the Alston Moor district.

The result of this conference appeared on the ensuing day when every person came forward and took the bargains offered.

15th June 1872 (Hexham Courant)

ALSTON

LENT MONEY AND CLIPPINGS

It would appear that the disaffection is to pervade nearly the whole of the extensive mining field comprised in the hilly regions of South Northumberland, North Durham and East Cumberland, for as one dispute or grievance is disposed of, another appears on the surface, so that few mines of any importance seem destined to escape the general discontent with things past and present. Things, which up to the present have been submitted to as a matter of course, and with scarcely a murmur, are now found to be insupportable, and redress is eagerly sought. This change is doubtless partly attributable to the additional pressure put upon the labouring classes by the great advances made in the prices of every-day necessaries, such as house rent, firing, wearing apparel, and food, all having participated in the almost general advance. Thus our mining population aver that, under present

circumstances, their condition requires some amelioration, as what would do a few years since will not do now. A short time ago we mentioned the fact that Rodderup Fell Company had, unsolicited increased their workmen's lent or subsistence money from £2 to £2 10s per month, but it appears that this concession had been made on the understanding that the inside workmen were to stand five eight hour shifts per week, which some of the men say it is impossible to do in some of the lower workings. Since the advance in the amount of lent money, things have apparently gone on smoothly, and the Rodderup Fell workmen have been looked upon as a docile and contented race of beings, but we are sorry to say a change has come over the face of things. On the last "lenning day" it was found that the "lennings" had undergone a process known as "clipping," or in other words, the amount advanced to each man had been reduced, not according to one uniform scale, but sums varying from 7€d to 2s 6d per week, and it is said that only two men's "lennings" had escaped the "clipping" process. A feeling of dissatisfaction having consequently sprung up amongst the men, a meeting was lately convened in a spacious chamber in the mine, when it was resolved to memorialise the masters with a view to having the system of "clipping lennings" altogether abolished, it being a thing of which they as a body of workmen have the most unqualified abhorrence. A memorial has been drawn up and signed by most, if not all, of the inside workmen. They also request that the present system of long payments may have the careful consideration of their employers, and they likewise suggest the advantages, as well as the practicability, of half yearly instead of yearly pays. We are glad to know that the men, feeling aggrieved, have adopted the sensible course they have, as by a little negotiation there will be more likelihood of having the matter properly adjusted than if other means had been resorted to.

15th June 1872 (Hexham Herald)
Marriages
At Garrigill Church, 9th inst., Mr Hugh Dodd to Mary Cousin, Silly Hole, Garrigill.
In 1861, at High Hundy Bridge, William Dodd, lead miner, aged 46, his wife Elizabeth (Spark, married 15th June 1837, St John, Garrigill) aged 46, children Edward, lead miner, & Wesleyan local preacher, aged 23, Sarah 20, Hugh, lead miner, aged 16, Elizabeth 13, Mary 11, and John 8.
In 1871, at High Hundy Bridge, Garrigill, William Dodd, lead miner, aged 56, his wife Elizabeth aged 55, sons Hugh, quarry labourer, aged 26, John, lead miner, aged 18, daughter Sarah Antchinson, lead miners wife, aged 30, and grandson John Antchinson 3 months.
William Dodd died 5th March 1875 aged 63. See 14th January 1870, & 13th March 1875.
In 1881, at 30 Front St. Browney Colliery, Durham, Hugh Dodd, master coke burner, aged 36, and his wife Mary 37. In 1891, at 30 Front St. Browney Colliery, Durham, Hugh Dodd, coke burner, aged 46, and his wife Mary 47
At Westgate, Weardale, at the Primitive Methodist Chapel, 6th inst., Mr Ralph Featherstone of Ireshope Burn to Miss Ann Rutherford of Wearhead.
In 1881, at Crawcrook Village, Durham, Ralph Featherstone, coal miner, aged 33, his wife Ann 32, children, Mary H 8, William 6, Joseph R 5, Michael 2, and Elizabeth 1.

17th June 1872 (Northern Echo)

THE LOCK-OUT OF THE TEESDALE LEAD MINERS.
ANOTHER MASS MEETING OF THE MEN.

On Saturday morning, the men employed under the London Lead Company, who have been locked out during the past few weeks, held another mass meeting near the entrance to the Station-road, at Middleton.

Mr. WILLIAM PARKIN again occupied the chair, and, in opening the business, said he hoped they were still united in their object, which, he need not tell them, was merely to procure an honest living. (Hear, hear.) It was impossible for them to live on the low wages they had been receiving, and he hoped that the firmness and determination which had all along been manifested would continue to the end. (Applause.) He was glad to say that they had the sympathy of the public with them, and that during the short time their appeal for aid had been before the public, they had received between £20. and £30., which would enable many of them to leave for another field of labour, in the event of its being necessary to do so. A few members of their committee had been down the country, in the neighbourhood of Bishop Auckland, and the promises of work which had been held out showed that there was plenty of employment for both men and boys, and money in abundance. The wages offered for coal hewing were from 6s, to 8s. per day; whilst -boys, who had been earning 1s. 6d. per day as washers in Teesdale, could procure as much as four shillings per day. [A Voice: That is true.] They would be aware that at their last mass meeting it was resolved that a deputation should wait upon the Company's Court in London, in order to have an interview with their employers, This being refused was the cause of their meeting that day. They had not only been refused an interview, but there seemed to be no desire to meet the men in their reasonable request. He would like to make an observation with regard to the action by the Nenthead and Alston Moor miners. He thought they did not appear to any great advantage in taking their bargains in the manner they bad done. They appeared to have been skulking behind the baggage waggons whilst the Teesdale men had been in the front of the battle, and after twelve weeks' hard fighting had taken what little spoil they had obtained. Not content with that, the Nenthead and Alston Moor men now said—there could not be too much praise due to Mr. Bainbridge, his worthy son Charles, and Mr. Millikin. Now, what was the fact? Did Mr. Bainbridge grant the 54s. lent money? He (the Chairman) said no. They were just as far from obtaining it at the end of ten weeks' hard fighting as they were at the beginning of it. And what about the boys' wages? Mr. Bainbridge would not advance a penny, which, as they were all aware, was the cause of the present agitation; but as soon as Mr. Birch came down from London 2d. per day was granted to the boys. Mr. Bainbridge certainly said that he contemplated, early in the spring, giving the boys a rise of wages, but the boys could not live on that contemplation any more than they could live on the London correspondence which was read to them from time to time during the interviews. (Loud laughter.) Mr. Bainbridge, however, gave the Nenthead boys a positive promise that they would be advanced, and they had consequently continued to work, and, as a matter of course, there had been no lock-out. During a short and pointed interview the delegates had on the previous Saturday with Mr. Bainbridge, there was some conversation as to the cause of so much poverty in the neighbourhood. The delegates' opinion was the company's low wages. Mr. Bainbridge thought it arose from the

shopkeepers' great profits; whilst Mr. Charles Bainbridge considered the men wore too many fine clothes! (Laughter.) Coming to the main point, what is there between us and Mr. Bainbridge in regard to the settlement of our dispute? There are but two requests on our petition since it was revised, and these are £1. per week to be the earnings of an ordinary man, and seven hour shifts instead of eight. He had ventured to say once or twice (but without authority) that he believed his fellow-workmen would concede their request for the seven hours if the company would grant the £1. per week. That, he thought, was a fair way of settling the dispute with honour on both sides. If their employers still refused, they might then obtain employment elsewhere. After several short speeches, it was resolved that neither men nor boys go back to work until their request was granted. It was suggested by one of the speakers that Mr. Scarth, agent for the Duke of Cleveland, and Mr. Monkhouse, agent for Mr. T. Hutchinson, should wait upon Mr. Bainbridge as mediators in the dispute; and in the course of the afternoon Mr. Monkhouse procured an interview with Mr. Bainbridge, but the latter gentleman declined to make any further concession to the men. A meeting of men was subsequently held at the house of Mr. Raine, Cross Keys Inn, Middleton, when arrangements were made for a number of the men to start work on Monday, as coal miners, labourers, game keepers. platelayers, and railway porters, at various places in South Durham.

22nd June 1872 (Hexham Courant)

THE LOCK OUT OF THE TEESDALE LEAD MINERS

Another mass meeting was held. Mr Scarth agent for the Duke of Cleveland and Mr Monkhouse agent for T Hutchinson Esq. should visit upon Mr Bainbridge as mediators. An interview with Mr Bainbridge took place but no concession given.

Arrangements were made for some men to start work in the coalmines.

STONECROFT MINE

SERIOUS ACCIDENT

An accident of an alarming character occurred in the Greyside shaft at the above named mine on Wednesday. It would appear that three workmen were ascending the shaft and it was necessary that one of them, named Atcheson, should go into a higher level. In attempting to signal the engineman, he was caught and forced from the cage, and there being suspended by one foot for some time. His fellow workmen by great exertion managed to release him from his dangerous position. When examined by Dr Stainthorpe, of Hexham, several of his ribs were found broken. His escape from falling to the bottom of the shaft is miraculous.

WEARDALE MINERS PAY

The Weardale miners half yearly pay took place on Saturday last. The miners as usual lifted their balance due to them at the W B offices Newhouse, after which they repaired to St John's Chapel, where trades people were looking out for the settlement of their bills, and toy dealers, and vendors of nuts and spice for loose coppers. The pays passed off quietly.

29th June 1872 (Hexham Courant)

Deaths

At Loaning House, Hexhamshire, 21st inst., aged 3 months, James son of Mr John Dinning, lead ore smelter.

At Physic hall, Alston, 18th inst., aged 5 days, Alfred son of Mr John Gill, lead miner.
See 5th April 1870, 20th November 1886, and 8th November 1890

29th June 1872 (Hexham Herald)
Marriages

TEESDALE

THE LONDON LEAD COMPANY MINERS

On Saturday 26 Teesdale miners who lately declined the renewal of their bargains - all let with the like intention in the Company's Weardale Bollihope Mines - were paid the balance of their earnings since October last. Which amounted on the average to 20s 6d per week per man. Upon analysing the account, it was found that the individual weekly earnings were as follows: -

Two above 29s per week
Two above 28s per week
One above 24s per week
Five above 22s per week
Four above 21s per week
Two above 19s per week

One above 18s per week
Two above 17s per week
One above 16s per week
Four above 14s per week
Two above 13s per week

Marriages

At the Wesleyan Chapel, Allendale Town, 4th inst. Mr William Graham of Allenheads to Miss Mary Charlton of Bolts Burn, Rookhope.
At the Wesleyan Chapel, Allendale Town, 4th inst. Mr Alexander Walton, of Juniper Farm, Allendale, to Mrs Rowell of High Wooley, Allendale.

12th July 1872 (Carlisle Patriot)

LEAD MINE IN CUMBERLAND.

TO BE SOLD, a LEAD MINE, situate near Keswick, in Cumberland, and known as the GLENDERATERRA MINE. The Mine has been carried upon limited scale by the present proprietor. In the development, openings have been made upon two of the veins which traverse the sett, and machinery for pumping and winding is also erected, and is in good working order. For particulars, as to leases and royalties, and for orders to inspect, apply Messrs John Taylor and Sons, 6, Queen Street Place, London, E.C., who are empowered to treat for the Sale of the same.

13th July 1872 (Hexham Courant)

Marriages

At Alston, at the Wesleyan Methodist Chapel, 6th inst., Mr George Angus of Nenthead to Miss Ann Graham of Pry House Nenthead.

In 1861, at Pry House, Nenthead, Thomas Graham, lead ore smelter, aged 45, born Allendale (buried at Nenthead 5th September 1892, aged 77), his wife Sarah (Erwin, married 13th June 1839, Alston) aged 44, born Alston (buried at Nenthead 4th May 1899, aged 82), children Thomas, lead ore smelter, aged 21, Agnes 18, George, lead miner, aged 15, Ridley 13, Ann 10, Sarah 8, Joseph 6, William 4, and John 4. See 31st October 1840, 2nd November 1844, 28th March 1846, 23rd September 1871, 11th December 1875, 27th April 1878, & 22nd April 1882.

Deaths

At Ruffside, 4th inst. aged 79, Mrs Elizabeth Brown, relict of the late Henry Brown.

Deceased has 11 children, 51 grandchildren, and 5 great grandchildren.

In 1841, at Ruffside, Edmondbyers, Elizabeth Brown, Ag. Labourer, aged 45, children Eleanor 20, Henry, lead miner, aged 20, Joseph, lead miner, aged 15, John, lead miner, aged 15, Matthew 14, Elizabeth 13, Thomas 11, and William aged 8.

In 1861, at Roughside, Edmondbyers, Durham, John Hutchinson, lead miner, aged 36, his wife Elizabeth 34, children Elizabeth 9, Henry 7, Mary Ann 4, and Jane 2. Also at Roughside, Elizabeth Brown, widow, aged 68, and son John lead miner, aged 38.

In 1871, at Roughside, Edmondbyers, John Hutchinson, labourer, aged 45, his wife Elizabeth 42, children Elizabeth 19, Hannah 9, John 7, Charles William 3, and mother in law Elizabeth Brown, widow, aged 77.

At Moscow, near Alston, 4th inst. aged 70, Mrs Frances Hetherington, widow.

At Nenthead, 4th inst, aged 9 years Johnny son of Mr Ridley Walton.

In 1841, at High Rotherhope, Robert Walton, lead miner, aged 50, wife Hannah (Ridley, married 10th July 1813) aged 50, children Robert, lead miner, aged 20, Mary 15, Ridley, lead miner, aged 13, John, lead miner, aged 10, and George 6.

In 1851, at Donks Hall, Nenthead, Hannah Walton, lead miners widow, aged 59, children, Robert, retired miner, aged 34, Hannah 29, Ridley, lead miner, aged 22, John, lead miner, aged 19, George, lead miner, aged 16, and nephew John Walton, lead miner aged 14.

In 1861, at Nenthead, Ridley Walton, leas ore miner, aged 33, his wife Elizabeth (Stout, married 7th May 1854, at Nenthead) aged 27, children Jane 8, Hannah 6, Margaret 3, and Robert W. 8 months.

In 1871, at Nenthead, Ridley Walton, lead miner, aged 43, wife Elizabeth 38, children Hannah 16, Robert W. 10, Johnny 8, Henry 4, Margaret 2, and boarder Robert Walton, lead miner, aged 19. In 1881, at Nenthead, Ridley Walton, lead miner, aged 52, his wife Elizabeth 46, children Robert Wm., lead miner, aged 20, Henry, lead miner, aged 14, and Margaret 12.

In Weardale, at Weardale House, 5th inst., aged 54, Hannah wife of Mr J. C. Cain, mining agent.

See 21st March 1845, 4th July 1846, 8th April 1853, 4th April 1856, 7th March 1868, 23rd January 1875, 28th August 1875, 7th September 1895, and 6th April 1901.

20th July 1872 (Hexham Courant)

ALSTON

THE MINERS DISPUTE

A few weeks since we intimated that the Rodderup Fell miners were aggrieved on account of their subsistence money being reduced when they had not the prescribed number of shifts per month, and that a memorial had been drawn up for the purpose of being signed by the men and presented to the masters. At the same time, we expressed hope that an amicable settlement might be come to, but such has not been the case. The memorial was duly signed and

presented; meetings of the men have been held with the local representatives of the company, without any settlement being come to. A deputation from the men had an interview with Mr Crawhall on the evening of Friday week, at the close of which the points of difference, so far as we have been able to ascertain were that the masters required the men to work 20 shifts per month, while the men would only guarantee to work 18. The men also wanted two weeks during hay time, without any reduction from the subsistence money, while they were offered one week, and if they stopped off longer, a portion of the subsistence money to be withheld. The men also objected to being required to acquaint the resident manager when they wanted a day from work. On Monday there was a meeting of the men, from which meeting we have no report, but it must have been unfavourable as there has since been a lockout, a door having been placed on the mouth of the level, and the men are for the most part engaged at hay making.

TEESDALE

SETTLEMENT OF THE MINERS STRIKE

Through the mediation of Mr W T Scarth chief agent to His Grace, the Duke of Cleveland an amicable settlement was come to on Saturday between Mr Bainbridge the Lead Company superintendent, and the miner's delegates. The men are to resume work on 20s per week average, instead of 20s per week basis, as asked for and the miner's bargains are in future to be by the fathom instead of per bing of lead (8cwt) as hitherto. On Sunday evening, a band of music paraded the streets of Middleton in Teesdale, and very general satisfaction was expressed amongst all classes at the termination of the prolonged struggle.

WEARDALE

On Tuesday afternoon last a melancholy fatal accident occurred at one of the Weardale Iron Company's ironstone quarries at Levelgate, near St John's Chapel. A young man named Lancelot Robinson of Dry Gill, Weardale, was employed in "baring" and whilst excavating the clay at the bottom a large quantity of clay dropped from the face and buried him up to the shoulders crushing him so severely that he died immediately. *Aged 19 years.*

Deaths

At Nenthead, 9th inst. aged 68, Mrs Martha Raisbeck.

In 1841, at West Nenthead, Thomas Raisbeck, lead miner, aged 40, wife Martha (Henderson, born Stanhope, married 1st September 1825, Alston) aged 35, children George 15, Ann 13, Rachel 11, Mathew 8, Christiana 6, and Mary 2. In 1851, at West Nenthead, Martha Raisbeck, widow (Husband Thomas died 3rd quarter of 1850), parish relief, aged 47, children George, lead miner, aged 25, Matthew, lead miner, aged 18, Christiana 15, Mary 11, Thomas 9, Robert 6, and nephew William Raisbeck 2.
In 1861, at Pasture House, Nenthead, Martha Raisbeck, widow, farmer, aged 57, children George, lead miner, aged 35, Matthew, lead miner, aged 28, Mary, household work, aged 21, Thomas, lead miner, aged 19, Robert, lead miner, aged 16, and house servant, Christiana Henderson unmarried, aged 21. In 1871, at Fair Hill, Nenthead, Martha Raisbeck, widow, formerly house maid, aged 67, children George, lead miner, aged 45, Mary, domestic house maid, aged 31, and Robert, lead miner, aged 26. See 26th September 1891.

At Alston, 16th inst. aged 63, Mr Thomas Walton.

In 1841, at Upton, Caldbeck, Thomas Walton, lead miner, aged 30, wife Hannah (Humble, married 20th June 1831, Alston) aged 30, children John 8, Sarah 6, Jane 3, and Thomas 11 months.
In 1851, at Hartley Village, Westmorland, Hannah Walton, agricultural labourers wife, aged 41, John, agricultural labourers son, aged 18, Sarah 16, Jane 13, Thomas 10, and Maria 3.
In 1861, at Edmunds Lane, Alston, Thomas Walton, lead miner, aged 52, wife Hannah 51, children Thomas, lead miner, aged 20, Margaret A. servant 16, Maria 13, and Besse 7.
In 1871, at Temple Croft, Alston, Thomas Walton, lead miner, aged 62, wife Hannah 61, son Thomas, lead miner aged 30, and daughter Bessie, domestic servant, aged 17.
See 23rd November 1872.
At Red Brow, Garrigill, 16th inst. aged 20, Mr John Archer.
In 1861, at Red Brow, Garrigill, William Parker, stone mason, aged 54, wife Sarah J. 54, nephew John Archer 9. In 1871, at Beldy, Garrigill, William Parker, stonemason, aged 64, wife Sarah J. 64, adopted son John Archer, stonemason, aged 19.

3rd August 1872 (Hexham Courant)

THE TEESDALE MINERS

A settlement of the long pending dispute between the Teesdale miners and their employers has been arrived at. The meeting at which this result was accomplished was held at the Cross Key's Hotel, Middleton in Teesdale on Saturday evening last (*27th July*). Mr W. Parkin presiding. Four of the delegates were chosen to wait upon Mr Bainbridge to fix for letting bargains. On their return, it was announced that bargains would be let on Monday morning, at nine o'clock, to all the workmen who wished them.
The following resolutions were passed: -

1st That the men resume work under the conditions laid down by Mr Bainbridge.
2nd That every man give to the protection committee a just and truthful account of his earnings, not later than one month after the expiration of each quarters bargains, at the same time stating the mine he works at, and who his overman is.
3rd That the working hours of the boys be six hours per week less than they have been working.
4th That there be no rate of wages decided by the committee, but that the parents and the boys themselves hire to the best advantage.
5th That every boy give to the protection committee a just and truthful account of his earnings at the end of each year, not later than the last day of January in the year following, stating which mine he works at and who his masters are.

Deaths

At Coldcoats, Allendale, 27th ult. aged 82, Caroline widow of the late Mr John Glenwright. *In 1871, at Stone Style, Allendale, Caroline Glenwright, widow, farmer, aged 81, son Wilson, farmers son, aged 55, and daughter Jane 46.*
At Nenthead 28th ult., aged 45, Mr Stephenson Price miner.
In 1841 at Holmesfoot Nenthead, Thomas Price lead miner age 46, his wife Elizabeth (Blacklock, married 21st November 1816, Alston) aged 44, children

John 23 lead miner, Thomas 18, lead miner, William 16, lead miner, Stephenson 14, lead miner and Joseph 6.
Stephenson Price married Ann Cousin 1st quarter of 1850, registered at Alston. In 1851, at Holme Foots, Nenthead, Stephenson Price, lead miner aged 24, his wife Ann aged 23, and daughter Elizabeth 11 months. In 1861, at Foulard, Nenthead, Stephenson Price, lead miner, aged 34, wife Ann 33, children Elizabeth 11, Mary Ann 8, Hannah 6, Thomas 10 months, and lodger Matthew Cousin, lead miner, aged 25. The 1871 census shows, Stephenson Price lead miner 44, living at Foulard, Nenthead, with his wife Ann 42, children Elizabeth 21, Mary Ann 16, Thomas 10, William 8, Phoebe 5, Lucy 4. In 1881, at Holme Foots, Nenthead, Ann Price, lead miners widow, aged 53, children William, lead miner, aged 17, Phoebe, domestic servant, aged 15, and Lucy, domestic servant, aged 14.
See 27th April 1866, 3rd December 1870, 3rd May 1873, 22nd April 1882, and 8th December 1894,

3rd August 1872 (Hexham Herald)
Marriages
At Nenthead 27th ult., Mr George Hutchinson to Miss Sarah Whitfield both of Nenthead.

24th August 1872 (Hexham Courant)
TERMINATION OF THE MINERS STRIKE
On Friday last, the letting of the bargains usually held at the Rodderup Fell mines took place, when the men who had been out on strike for some time past accepted their bargains on the old, or as they term it, masters terms. The affair at the commencement created a great deal of excitement, and many were the conjectures that they would not be able to hold out, the masters barring the entrance to the mine, but we are informed that on the above named day the men took their bargains as usual without saying a word as to "clipped lennings" or other grievances, so that the strike may be now considered ended.
Marriages

7th September 1872 (Hexham Herald)
THE METALLIFEROUS MINES BILL
The Metalliferous Mines Bill will come into operation on the 1st of January next, and will apply to all mines that do not come under the Coal Mines Regulation Act. Its main provisions are: -
Women and girls and boys under 12, are not to work underground. No males between 12 and 16 are to work underground more than 54 hours per week, or more than 10 hours at any one time, with intervals in some cases of not less than 8 hours, and in others not less than 12. A register of all such must be kept. Males below 18 are not to be put in charge of winding machinery in shafts, though in the case of Horse Whims &c., the actual driver may be 12.

Parents who misrepresent the ages of their children to evade these regulations will be subject to penalties. Wages are not to be paid in or about a public house or beer shop. Annual returns of the minerals raised, and the number of persons employed in any mine, in a given form, are to be made by the owner or his agent. Notices of accidents are to be sent within 24 hours to the inspector of the district. Inspectors are not to be in any sense land agents, mining engineers, or engaged about any mine, and are to have full power of examination of any mine under the act, at all reasonable times, but not so as to impeded the working. They may give notice to remedy causes of danger not provided for by the rules, whereupon the owner may appeal to the Home Secretary, and the matter settled by arbitration. Inspectors are to make annual reports, and plans are to be kept on all mines brought up to within six months. Arbitrators are to be practical men. The proceedings at all inquests arising out of mines are to be attended by an inspector or some other representative of the Home Secretary. ...

Deaths

At Swinhope, aged 66, Mary Charlton, same place aged 29, Margaret Milburn.

Deaths
At Alston, 5th inst. aged 62, Hannah widow of Mr Thomas Walton Lead miner.
See 20th July 1872

30th November 1872 (Hexham Courant)

LETTER FROM A WEARDALE EMIGRANT IN AMERICA

Stanhope Farm, Wakefield, Clay County, Kansas

Dear Father and Mother,

Having written several letters to you from our new home in the far west, intended for none but yourselves, I think it is now quite time to venture a letter through you to all who desire land to make for themselves farms of such beauty and excellence as none of you who have lived only in Weardale can possibly imagine. To all who wish to =be independent of servitude, to reap the fruit of their own labours, to all who wish to have charming homes of their own in such a beautiful climate on soil so deep and rich, homes from which nothing but the hand of providence can uproot or eject them, and which may descend to their latest posterity, the enduring monuments of the self-denied courage, industry and perseverance of their forefathers, to all such I would now address myself feeling that I am only to them as I would, if our relations reversed, that they should do unto me. Perhaps I should have done this sooner, but if I have erred, it has been on the side of caution and safety, and in a matter of such great importance, I hope I shall be forgiven. Thousands are coming here into the various portions of this State in response to letters of information from those already here, and all I wish to do now is to try to stimulate my fellow dalesmen to inquire whether their condition at home is better than it might be here. I believe there are hundreds in Weardale who would be glad to own such land as we have here, and from what I know of their temperance, frugality, industry, and indomitable perseverance, I have often said since we came here that none are more likely to succeed here and to settle down as permanent dwellers, than emigrants from Weardale. As I cannot say, anything like all that ought to be said in this letter. I must confine myself for the present to the statement of a few prominent particulars.

First land here is free. The Government of the United States gives to the head of every household, and to every person of both sexes who are twenty one years of age 160 acres of land, on condition that they live on the said land for a term of five years and are not absent therefrom at any one time for more than six months, and who will have in cultivation at the end of five years not less than ten acres of land, and for which they have only to pay the paltry sum of 14 dollars. You will thus see that any father or widowed mother who has sons and daughters can have 160 acres each for all of them. I know you will have some difficulty in comprehending the magnitude of this gift. The fact of several hundreds acres coming into your possession with a clear indisputable title to each 160 acres seems almost too big to get in all at once; and this is all freehold land. There are no restrictions, no reservations in our deed at all… We may fly as high above it or dig as deep into it as ever we please. Secondly how much is the land worth? If I had it, just as much as you wish to make it. The soil is from one to three feet deep. You may plough a fifty-acre piece without finding a stone. It requires no fencing until you can grow your own fences, for we have a law which compels every owner of stock to herd or take care of them all the year round, so that farmers have only to look after their own stock. This is done by putting several small herds together and employing one or men or boys to herd them. So far as I know, we can grow everything grown in England, and things almost innumerable, which you cannot grow. Our climate is almost tropical, but taking all the year, is healthful

and most enjoyable. The clear skies, the pure exhilarating air, the glorious sun sets, the lovely Indian summer, and even the bright bracing early parts of winter, which is not wintry, can be described only in language which strangers would deem exaggerated. We often say it could not be better if we had the making of it ourselves. Harvesting is nothing like the harvesting in England. Cut your wheat here and stack it in a few days; cut grass in the morning, start the horse rake about eleven o'clock, and begin stacking immediately after dinner. We have no need for draining, or ditching, or griping, as you call it. We farm on the principal of catching and retaining all the moisture we can. We have no ridge and furrow -. I level cultivation. As I never farmed in England, perhaps it would be improper for me to speak of the comparative merits of the two places, but you must not forget we pay no rent, and very little tax for the first five years. Thirdly if land is so free and valuable, the question arises, which is the best way of making possession of it? I have at great expense travelled thousands of miles in America on foot, by stagecoach, by steamboat, on these magnificent rivers and by railway. I have watched closely, and I have listened attentively, in order to prepare myself to give the proper answer to this question, and I have now no hesitation whatever in advising the formation of a colony of emigrants who would agree to put themselves under the care of a properly qualified person, who should go out by his self first and select land, making a conditional agreement with the Land Office and have a temporary home erected to receive the pilgrims when they arrive, to make the wilderness and solitary places glad. Such a person, if properly chosen, would save far more to the colony than he would cost, beside the pleasure and satisfaction of knowing that, all was being done right and in the most economical way. If a colony of fifty in number were to agree to pay such a person five pounds each, this would not be more than one tenth of what it would cost to settle them as single individuals, and with no experienced judgement but their own. The precautionary measures which I adopted previous to settling here as an isolated person cost me more than one hundred pounds. I can only say that I have never had any cause to regret that expenditure. I shall be ready to give any help I can to all from my native dale by letter or otherwise. To write all I could wish you to know would require several letters and much more time than I could spare just now. You can make any use of this letter you please. I wish you were here just now to see our splendid crops of corn. We are having the most delightful season.
Our Father in heaven seems determined to fill our hearts with gladness.
(Signed) Nicholas Emmerson.

The 1841, census pages are unreadable but the IGI gives Nicholas Emerson christened 3rd October 1823, at Stanhope, parents John Emerson & Mary Wilkinson.

Nicholas married Matilda Mary Philippa Barbera Couper in the fourth quarter of 1845 at Auckland.

In 1851, at Bishop Auckland, Durham, Nicholas Emmerson, brakeman, aged 27, his wife M P B Emmerson, aged 28, children John 4, and William 3, his sister in law D J A Cooper, aged 24

Nicholas married Diana Jane Hannah Couper in the 3rd quarter of 1858, at Guisborough.

In 1861, at Omesby, Yorkshire, Nicholas Emmerson, engine driver, born Stanhope, aged 37, his wife Diana J H, aged 33, born Willington, Durham,

children, William, pupil teacher, aged 13, Mary Jane 7, George 2., and mother Hannah Couper, farmers widow, aged 61.
The family do not appear on the 1870 Federal census, the 1900 Federal census gives 1870 as the year of arrival.
The 1875, Kansas State census has the family at Exeter, Clay County, Nicholas listed as a farmer & engineer, aged 51 years, his wife's name is given as Jane, aged 48.
The 1880 Federal Census shows, at Exeter, Clay County, Kansas, Nicholas Emmerson, farmer aged 56, his wife Diana J.H. aged 53, children George 21, Alfred 15, Jonathan N. 13, Albert E. 11, all born in England.
The 1885 Kansas State Census has the following, at Five Creeks, Clay County, Nicholas Emmerson, aged 61, his wife Jane, aged 58, children, Alfred 19, Jonathan 18, and Albert E. 16.

Marriages

At Alston at the Independent Chapel, 24th inst. Mr Michael Richardson to Miss Mary Ann Haldon, both of Alston.

Deaths

At Nenthead, 20th inst. aged 7 weeks, Jacob Garrett Spark.
At Nenthead 20th inst., aged 53 Mr William Bright, lead miner.
John Bright, lead miner married Isabella Barron 6th January 1824.
In 1841 at Spring House, Nenthead, John Bright lead miner 45, his wife Isabella 58, children William 21, christened 22nd January 1820, John 17, Hannah 15, Sarah 12, Smith 10. In 1851, at White Hall, Nenthead, John Bright, lead miner, aged 55, his wife Isabella 68, children William, lead miner, aged 31, John, lead miner, aged 27, Sarah 22, Smith, lead miner, aged 20, and Catherine 14.
Isabella Bright died 3rd quarter of 1852, John Bright died 4th quarter of 1856.
In 1861, at Overwater, William Bright lead ore miner, aged 41, and his sister Sarah Bright aged 32 are living with their sister Isabella Bond, lead miners widow aged 50 and her children Mary Bond 17, Thomas Bond, 15, and George Bond 12. In 1871, at Nenthead, William Bright, lead miner, aged 51.
Thomas Bond married Jane Blacklock at Nenthead on 30 November 1822, they had 3 children Ann born 11 Jan 1830, Jane born 17 June 1832, John born 5 June 1834. Jane died 4th October 1839. Thomas married Isabella Barron 17th May 1840, who had a child Catherine born 7th May 1837.
In 1841, at Welgill, Dykeheads, Thomas Bond, lead miner, aged 39, his wife Isabella 30, children Jane 8, John 6, and Catherine Barron 4
The 1851 at Overwater, Nenthead, Thomas Bond, blind, pauper lead ore miner 49, born Newton, Yorkshire, his wife Isabella Bond 40, children John lead ore washer 16, Mary 7, Thomas 5, George 2, William 2.
Thomas Bond died 1st quarter of 1859, Isabella Bond died 2nd quarter of 1864.

30th November 1872 (Morpeth Herald)

Marriages

At St Cuthbert's Church, Gateshead, 28th inst., Mr. John G. Cranston, engineer, Alston, to Agnes, youngest daughter of Mr. John Pattinson, Alston.
In 1841, at Front Street, Alston, John Pattinson, stationer, aged 47, his wife Frances (Edger, married 1st May 1817, at St Augustine's, Alston) aged 44, children, William, shoe mk App, aged 17, John 13, Frances 11, Jane 6, and Agnes 3.

In 1851, at Front Street, Alston, John Pattinson, printer & book binder, aged 57, his wife Frances 54, children, William, printer & book binder, aged 27, Frances 21, and Agnes 13.
Frances Pattinson, died 31st July 1856, aged 62, at Alston.
In 1861, at Main Street, Alston, John Pattinson, widower, Printer & book seller, aged 67, daughters, Frances, house keeper, aged 31, and Agnes, house maid, aged 22.
In 1871, at Raise House, Raise, Alston, John Pattinson, widower, book seller & stationer, aged 77, son, William, widower, printer, aged 47, daughters, Frances 41, Agnes 33, grandson John Pattinson, 12, visitor, John Pattinson, analytical chemist, aged 43, his wife Mary Jane 38, and their daughter Alice 2.
John Pattinson died 23rd April 1876, aged 82, at Alston.

In 1851, at Priest Popple, Hexham, James Cranston, Innkeeper, aged 49, his wife Jane aged 47, children, George, plumbers apprentice, aged 20, Thomas, stone mason apprentice, aged 17, Euphemia 15, Christiana 12, and John Grey 6.
In 1861, at Low Byre, James Cranston, innkeeper, aged 59, his wife Jane 57, daughter, Euphemia 24, and niece, Jane Davidson, house maid, aged 24.
In 1861, at Blenheim St, Westgate, Newcastle, boarder, John G Cranston, engine fitter, aged 16.

In 1871, at Low Byre, James Cranston, farmer, aged 69, his wife Jane 66, married daughter, Christiana Stewart, farmers wife, aged 31, grandchildren, Alexander Stewart 12, and Margaret Stewart 10, grand children born at West Derby, Lancs.
In 1871, at Bilton Banks, Lesbury, Northumberland, boarder, John G Cranston, civil engineer, aged 26.

In 1881, at Low Byer, James Cranston, farmer of 60 acres, aged 79, and his wife Jane 77. James Cranston died 4th quarter 1883, at Alston, Jane Cranston died 3rd quarter 1886 at Alston.

In Memory of
John Pattinson
Printer of Alston who died April 23rd 1876
Aged 82 years
Also of Francis his wife
Who died July 31st 1858
Aged 62 years
Also of William their son
Who died Feby 10th 1906
Aged 82 years
Also of Frances their daughter
Who died Nov 25th 1905
Aged 75 years

Agnes Cranston died 2nd qtr 1878, aged 39, registered at Newcastle.
In 1881, at Grove Street, Elswick, John G Cranston, widower, mining engineer, aged 36, and servant, Elizabeth Bramwell, housekeeper, aged 25.

John Grey Cranston married Margaret Gallon 6th July 1893, at At Paul, Elswick.

In 1891, at Grove Street, Elswick, John G Cranston, widower, mining & mechanical engineer, aged 46, and servant Margaret Gallon, domestic servant, aged 28.
In 1901, at Grove Street, Elswick, John G Cranston, mining & mechanical engineer, aged 56, his wife Margaret 39, sons, John 7 and George 4.
In 1911, at 52 Grove Street, Elswick, John Grey Cranston, agent fancy goods, aged 66, his wife Margaret 48, sons, John James, engine fitter, aged 17 and George Grey 15.
Margaret Cranston died 27th February 1913, at Elswick.
John Grey Cranston of 52 Grove Street, Newcastle upon Tyne died 23 May 1931, Probate Newcastle upon Tyne 27th August to John James Cranston and George Grey Cranston. Effects £17453 4s 2d.

26th January 1872 The London Gazette
On his petition, recorded in the Office of the Commissioners on the 16th day of January, 1872.
143. To John Grey Cranston of Low Byer, Alston, in the county of Cumberland, for the invention “of improvements in apparatus for the holding rock drills in mines and tunnels.”

2nd May 1873 The London Gazette
On their several petitions, recorded in the Office of the Commissioners on the 21st day of April, 1873.
1455. To John Grey Cranston, of No. 75, The Side, in the borough and county of Newcastle-upon-Tyne, for the invention of "improvements in machinery for drilling or boring rock, stone, and other minerals, and for boring or cutting
coal."

24th March 1874 The London Gazette
NOTICE is hereby given, that the Partnership heretofore subsisting between us the undersigned, John Grey Cranston and John Pattinson, of Newcastle-upon-Tyne, Engineers, under the firm of J. G. Cranston, was this day dissolved by mutual consent; and that from this date the said business will be carried on by the said John Grey Cranston alone.—Dated this 19th day of March, 1874.
J .G. Cranston.
John Pattinson

4th January 1879 The Mining Journal
“The 'Cranston' Rock Drill”
The "Cranston" Rock Drill is driving levels 200 linear feet per month in hard quartz rock.
"Eberhardt" Tunnel now driven in over 3,842 linear feet with these Drills and Compressors.

It can be seen in Daily Practical Operation drilling 60 feet of Blast Holes per day in Limestone Rock at one-fifth the cost of Hand Labour.
For other particulars and prices, apply to --

J.G. Cranston,
22 Grey Street,
Newcastle-on-Tyne.

North Of England Institute of Mining and Mechanical Engineers, Transactions Vol. XLIX. 1899-1900, extract from "The Driving of a Stone-Drift at the West Wylam Collieries" by Sidney Bates:

" …The installation consisted of an air-compressor, an air-receiver, and 3 Cranston rock-drills. The Cranston air-compressor had a steam-cylinder 16 inches in diameter and 20 inches stroke, with an air-cylinder 18 inches in diameter and 20 inches stroke: the cylinders were placed parallel to each other with a heavy fly-wheel between them. The air-cylinder was surrounded by a water-jacket, and there were four inlet- and two outlet-valves at each end of the cylinder (Figs. 2 and 3. Plate V.). Steam was used at a pressure of 80 pounds per square inch, and compressed the air to a pressure of 60 pounds per square inch. The air-receiver was 4 feet in diameter and 13 feet long. The air-compressor was fixed at the surface, about 1¾ miles from where the drift, B D, was commenced, the air being conveyed in 4 7/8 inches metal pipes, fitted with the Forster joint and an indiarubber ring, a, (Fig. 4, Plate V.), with the exception of about 240 feet near to the face, where steel pipes, about 30 feet in length, were used (Fig. 5, Plate V.). The metal pipes were quickly laid, and there had not been more than one or two instances of a blown joint during the five years of working. The steel pipes, in 18 feet lengths, were opened at the ends so as to form small flanges, after 2 loose rings had been slipped on the tube. The loose rings were made with a spigot and faucet, which was drawn together by 4 bolts, and thus made to enclose an india-rubber ring, *a*, between the two pipes (Fig. Plate V.)
The drift commenced in September 1894, …"

"…The Cranston percussive drilling-machine is shown in Figs, 6, 7 and 8 (Plate V.), The air-cylinder was 4 inches in diameter by 5¾ inches stroke. With an average air-pressure of 55 pounds per square inch, the rock-drill made 400 strokes per minute. Fig. 6 exhibits a longitudinal section, and Fig. 7 a cross-section through the collar-head of the piston-rod. The rock-drill is speedily raised and lowered on a pedestal (Fig. 8, Plate V.) by means of a ratchet-lever to any desired position. The drill is fitted with a universal movement, *a*, and the machine can be fixed to drill at any angle. The drilling-machines are strong, and as they had no complicated parts, the workmen soon become accustomed to their use: the cost of repairs was very low.
The drills commenced with a diameter of 3 5/8 inches, and diminished by three or four successive sizes to 2 1/8 inches in diameter. The full depth of holes bored in blue metal (shale) was in some cases 8 feet. The depth of holes bored in harder stone was less, and varied considerably

according to the position of joints, etc. Only two forms of drill-bits were used, namely, the cross-bit and X-bit, but after a time the workmen found that the former pattern gave the best results.
The Cranston machine was hand-fed, and where the strata changed frequently the writer found that hand-fed machines were most efficient, as the workmen could regulate the feed to suit the nature of the stone. Drills, which advance automatically, had been used in some cases, but as a rule nowadays the automatic feed had been almost discarded. …"

30th December 1873 (Penrith Observer)

SALE OF PROPERTY AT ALSTON.—On Friday last, Mr Robert Pearson offered for public sale, at the Blue Bell, Alston, a large and valuable estate, situate at Nentsbury, in the parish of Alston. The estate was first offered in parcels, and the bidding became at once pretty brisk. The first lot offered consisted of an allotment of common land, containing about 257 acres. The first offer of £1,000 for this was made by Mr. Dickinson, solicitor; this was quickly succeeded by an offer of £1,100, and another of £1,200. The biddings for this lot then quickly advanced to £1,800, at which sum the lot was laid down, and lot 2 then offered. This consisted of a dwelling house and four out-buildings, and about 38 acres of land, 21 of which was allotment land. The first offer of £600 was made by Mr. John Armstrong, of Nenthead, followed by £620, £700, £720, and the biddings quickly ran by offers of £10 and £20 to £980, at which sum the lot was laid down. Lot 3, consisted of a dwelling house, farm out-buildings, and about 55 acres, were next offered, and was put up at £1,200, and laid down again, after being bid to £1,460, at which Mr. Jos. Jackson, of Nenthall, was the highest bidder. The property was then offered together at £4,180, and £4,200 was at once bid by Mr. Thomas Harrison; this sum was quickly increased to £4,400 by Mr. Harrison, at which the property was laid down and again offered in lots. Lot 1 rose by rapid strides to £1,950, the highest bidder being Mr. Dickinson. Lot 2 was bid to £1,000, and lot 3 to £1,460. The property was again offered together for the last time, but did not reach a higher sum than £4,420. It was ultimately sold in lots, lot 1 realising £2,100, at which sum Mr. Dickinson purchased it; lot 2 at £1,000, which was knocked down to Mr. John Armstrong; lot 3 at £1,460, to Mr. Joseph Jackson. The total sum realised, it will be seen, was £4,560.

J. G. Millican, solicitor, acted for the vendors.

4th January 1873 (Hexham Courant)

Deaths

At Alston at Loaning House on the 27th ult., aged 54, Utrick Bainbridge.

Utrick son of Robert & Elizabeth (Walton married 17th June 1804) Bainbridge baptised 13th August 1818. In 1861, Utrick Bainbridge aged 42 solicitor; his wife Hannah (Emerson married 1856, Weardale) aged 30, children Elizabeth 2, Jane E. 2 months.

7th February 1873 (Carlisle Patriot)
MELANCHOLY DEATH IN A PIT.—A young man, 28 years of age, named Anthony Wilkinson, of Ashgill, Garrigill, near Alston, met a more than usually melancholy death in a coal mine on Saturday. During the day he was working what is called “crow” coal, and while engaged in this—though it is not known at what time —a portion of the roof came in upon him, and crushed him to death. He was found about eight o’clock in the evening quite dead. It was not considered necessary hold an inquest.

8th February 1873 (Hexham Herald)
Marriages
At the Primitive Methodist Chapel, Alston, 3rd inst., Mr Thomas Bell of Alston to Miss Mary Jane Wilkinson Whitewell House.
In 1851, at Front Street, Hannah Bell, widow, confectioner, aged 25, daughter Mary 5 and son Thomas 3. A Thomas Bell married Hannah Featherstone 31st December 1843, at Alston.

14th February 1873 (Carlisle Patriot)

CUMBRIAN METALLURGY.—The Mining Journal is issuing a series of articles on this subject. The first, which appeared last Saturday, treats of the Greenside Lead Mines, situate on the southern slope of the outspurs of Helvellyn. These mines, it says, are the most successful in the district in point of quality of produce, it having for nearly quarter of a century yielded enormous profits to the fortunate adventurers. The produce of 1871 was 1,912 tons of galena, which yield 1,434 tons of lead and 28,000 oz. of silver, or an average of 20 oz. to the ton, which is nearly double the average of the Cumbrian mines. In owing to the peculiar cutting off of the vein stuff rock, the produce of the ore has not kept up, and the profits will, undoubtedly, suffer proportionally. Approximately, we learn, the produce of the year just closed amounts to 1,500 tons of lead and about £6,000 worth of silver. A remarkable feature of the mine and we observed the same the neighbouring mines—is the great richness of the argentiferous galena in the upper portion as compared with the lower part of the vein. The yield is present in the highest level 17oz. of

silver to the ton, in the second level 14 oz., and in the lowest adit scarcely exceeds 6 oz. The present reduced output, however, need not seriously or permanently effect the value of the mine. There is every probability that both onward and downward the vein will again be productive, and the company will show its wisdom by pushing vigorously forward explorations at various points, and especially in depth. The arrangements of the mine are highly spoken of.

15th February 1873 (Hexham Courant)

WEARDALE

Miners Average Wages. On Saturday evening last the Weardale mines committee held a meeting at the Kings Head Inn St John's Chapel, Mr Nathan Race in the chair. According to the sheets prepared by the said committee, the following are the average wages at the different WB lead mines for the half-year ending June 30 last

21st February 1873 (Newcastle Courant)

IN LIQUIDATION.
SALE OF A VERY VALUABLE MINING PROPERTY,
PLANT, MACHINERY, &c,
HENRY GILPIN,

By order of the Official Liquidator, G. E. Swithinbank. Esq., will SELL BY AUCTION, at his Sale Offices, George Chambers, Pilgrim Street, Newcastle, on WEDNESDAY, the 26th February 1873.

ALL that Valuable Property called THE TYNE HEAD MINES, situate on the northeast slope of Tyne-head fell, Alston, Cumberland, in the heart of the richest lead-producing district in England. It is bounded on the north and west by the River Tyne; on the south by the Clargill-Head Mine; and on the east by the valuable mines belonging to the Greenwich Hospital. The site extends 1,000 yards over Sir John's vein, and from the river Tyne to the Clargill Head boundary, or Clargill Burn, on the great sulphur vein, with the usual Chords on each side of the said veins. It is considered by some of the best authorities in England to be an extraordinary trial. Many thousand pounds have been spent in laying down rails, erecting machinery, providing plant, and driving to the point at present attained, which is believed to be within twenty fathoms of the place intended to be driven to when first these expensive operations were commenced. The Sale will take place at One o'clock on WEDNESDAY, February 26th, 1873.

Full particulars can be obtained from the liquidator G. E. SWITHINBANK, Esq. Royal Arcade Newcastle-on-Tyne, and 11, Clements' Inn, Strand, London, and W.C.; or at the AUCTIONEER, George Chambers, Pilgrim Street, Newcastle.

22nd February 1873 (Hexham Herald)

SERIOUS GUN ACCIDENT

On Saturday last, Robert Hodgson a lead miner of East Black Dean, Weardale, was standing with his gun in a lane in the outskirts of the village. He held his gun by the muzzle having his hand over it, The stock rested on the ground and one of his feet resting on the wall, when a little boy who was playing about, came up to him and it is alleged fired his gun, which blew off one of Hodgson's fingers and shattered his hand in a fearful manner.

THE MINES

On Saturday evening last the Weardale miners committee held a meeting at the Kings Head Inn, St John's Chapel, when it was resolved to hold a general meeting of the miners in the Town Hall in a fortnights time from the above day.

Deaths

At Alston, 4th inst., aged 67 Robert Bell, Lead Miner.

Son of Albany & Mary Bell, born 8th May 1806; in 1841, at Nattrass, Mary Bell farmer, aged 55, sons Robert, lead miner, aged 35, Thomas, lead miner, aged 25, and Joseph, lead miner, aged 20.

In 1851, at Nattrass, Mary Bell, widow, farmer, aged 71, son Robert, lead miner, aged 45, grandchildren Albany Bell, lead miner, aged 14, and Hannah Bell 12.

In 1861, at Nattrass, Mary Bell, retired farmer, aged 83, Robert, Ag. Labourer, aged 54, Thomas Bell 13, and Mary Bell 15.

In 1871, at Physichall Bankfoot, Robert Bell, unmarried, lead miner, aged 65, nephew Thomas Bell, lead miner, aged 22, and domestic servant, Mary Jane Wilkinson aged 18.

See 8th February 1873

WEARDALE

STRIKE OF IRONSTONE MINERS

On Wednesday a mass meeting of the ironstone miners and cartmen employed under the Weardale Iron and Coal Company, took place in the Town Hall, St John's Chapel. The mines and quarries of ironstone worked by this company are situated in various parts of the dale, and are known as Burtree Slitts, Grove Heads, Rowantree Syke, Heights, Levelgate, West Slitt, Slitt Pasture, Fraser, Grove Rake, Rookhope, and Red Vein, Stanhope, and a large number of cartmen are employed in leading the material from several of these places to the depot at Westgate, whence it is taken by rail to Tow Law. The workmen and cartmen have recently made application to the principal of the company for an advance in their wages of 20 percent. In answer, an advance per ton for working the ironstone, representing eight or ten per cent has been offered by the company but has not been accepted. Meetings have been held at the various mines, but as the result varied, it was deemed necessary to have a mass meeting in order that the workmen might come to a proper understanding. The delegates met at the Kings Head Inn, St John's at eleven o'clock on Wednesday, and at once proceeded to the Town Hall. The meeting was well attended, nearly the whole of the workmen being present. The cartmen left off work on Monday, and Tuesday was the last day for the miners until the result of the mass meeting was known. A resolution was unanimously agreed upon to stand out for 20 per cent, and to suspend work

from Thursday. In the meantime, a deputation was appointed to wait upon Mr Crone, the head agent. Accordingly, at the close of the meeting, the delegates had an interview at Westgate with Mr Crone, who met them courteously, but was not in a position to concede more than had been already offered, namely 10 percent. The delegates, however adhered to their original request of 20 per cent on the present prices per ton and per fathom. The interview consequently came to nothing, except that another interview was fixed to take place this morning at Westgate, when Mr Crone would be able to state to the delegates what the company's intentions were. On Thursday, all work in relation to the winning and carting of Ironstone was suspended at the ironstone mines and quarries in the Park and Forest of Weardale and Rookhope.

In 1851, at Kirkley, Suffolk, Edward Crone, engineer, aged 52, born, Longbenton, Northumberland, aged 52, his wife Susanna aged 48, born Denton Burn, Northumberland, children Susanna 17, Louisa 13, and Joseph Robert aged 7.

In 1861, at Killingworth House, Killingworth, Northumberland, Stephen Crone, mining engineer, aged 35, his wife Jane 30, children Edward W. 8, Jane H. 6, Stephen C. 4, Frederick E. 3, Eveline A. 1, and brother Joseph R. mining engineer pupil, aged 17.

In 1871, at Paradise Row, Killingworth, Joseph R Crone, unmarried, mining engineer, aged 27, and domestic servant Margaret Fothergill aged 31 years.

In 1881, at Castle Hill House, Iron Works road, Wolsingham, Joseph R Crone, aged 37, married Mining Engineer, aged 37, and domestic servant Margaret Fothergill aged 41 years, his wife and daughter were visiting his brother Stephen and his family who were living at Longbenton.

In 1891, at Tudhoe, Durham, Joseph R. Crone, mining engineer, aged 48, born Kirkley, Suffolk, his wife Margaret aged 38, born Birtley, Durham, and daughter Ethel H. aged 16, born Stanhope.

Marriages

At the Independent Chapel, Alston, 13th inst. Mr Joseph Thompson, Blagill to Miss Mary Kearton *(Registered name Kirton)* of Physic Hall.

In 1841, at Physic Hall, John Kerton, lead miner, aged 50, his wife Mary 45, children Elizabeth, straw bonnet maker, aged 20, John, lead miner, aged 15, Mary 14, Joseph 12, and James 9.

In 1851, at Physic Hall, John Kearton, widow, lead ore miner, aged 60, children Elizabeth 30, John Kearton, lead miner, aged 28, Joseph, lead miner, aged 21, James, lead miner, aged 19, and visitor Fanny Walton 16. Mary Kearton died 1st quarter of 1851.

In 1851, at Bruntly Syke, Robert Burn, farmer & owner of 30 acres, aged 68, his wife Mary 61, and domestic servant Mary Kearton, aged 24.

In 1861, at Physic Hall, John Kirton, widow, retired lead miner, aged 72, daughter Mary 34, sons Joseph, lead miner, aged 32, and James, porter at railway station, aged 29. In 1871, at Physic Hall Bank Top, Mary Kearton, unmarried, landowner, aged 44.

In 1861, at Blagill, Joseph Thompson, stone mason, aged 35, his wife Hannah (Cousin, married 1st quarter of 1847) aged 34, children Joseph, mason, aged 12, John 10, Hannah 7, William 5, Jane 3, and Mary A 10 months.

Hannah Thompson died 3rd May 1869, aged 42. See 14th May 1869

Hannah Thompson aged 17, died 12th October 1870. See 15th October 1870.

In 1871, at Blagill, Joseph Thompson, widow, stone mason, aged 45, children John, lead miner, aged 21, William, lead miner, aged 15, Mary A 10, Robert 9, Elizabeth 5, and house keeper Hannah Lee 23.
In 1881, at Nenthead, Joseph Thompson, farmer of 50 acres, aged 55, his wife Mary 54, daughter Mary A. 20, son Robert, coal miner, aged 17. In 1891, at Bleagate, Joseph Thompson, farmer, aged 65, his wife Mary 64, and domestic servant Sarah Walton 14.
Joseph Thompson died 2nd quarter of 1900 aged about 74.

Deaths

At Pasture House, Nenthead, 13th inst. aged 19, Mr Thomas Hornsby, Draper.

22nd March 1873 (Hexham Herald)

WEARDALE

On Tuesday last, a serious accident occurred at the London Lead Company's Mine, at Bollihope, Lancelot Colling, of Fair Hills, near St John's Chapel, Weardale, whilst following his employment at the above mine, was seriously crushed by the falling of a mass of the roof, one arm being severely bruised and the shoulder dislocated. Medical aid was immediately on the spot, and after the wounds were dressed, the unfortunate miner was taken home in a cart.

Lancelot Colling in 1871, living at Fairhills, Stanhope, aged 45, married, working as an Ironstone miner.
The 1881 census shows Lancelot age 55 living in Wolsingham working as a coal miner, living with him his wife Jane aged 47, with sons Whitfield aged 25, Emerson 10, and William 8.

Deaths

At Leadgate, near Alston, 9th inst., aged 4 years, Margaret Alice Goodfellow, daughter of Wm. Goodfellow.
In 1861, at Leadgate, Alston, William Goodfellow, lead miner, aged 56, his wife Sarah (Price, married 27th June 1829, Alston) aged 64, children John, lead miner, aged 26, Mary Ann 24, William, lead miner, aged 23, granddaughter Mary Armstrong 9, and grandson Thos Goodfellow 4.
In 1871, at Mill House, Alston, William Goodfellow, lead ore miner, aged 31, his wife Margaret (Branwood, married 4th May 1867, at Alston) aged 25, children Margaret Alice 2, and Joseph Wm. 11 months. In 1881, Margaret Goodfellow, lead miners wife, & farming 7½ acres, aged 35, son Joseph William aged 10. In 1891, at 41 Stone Street, Westgate, Newcastle, William Goodfellow, labourer general, aged 51, his wife, Margaret 45, and son Joseph W. fitter, aged 20.

At Flowedge near Alston, 10th inst. aged 13, Ralph Pickering, son of Ralph Pickering Yeoman.
In 1851, at Flow Edge, Ralph Pickering, lead miner, aged 33, his wife Elizabeth (Bainbridge, married 31st October 1840, Alston) aged 30, children Thomas 10, Peter 8, Ann 6, Matthew 4 Walton P 3, and John 1.
In 1861, at Flow Edge, Ralph Pickering, Ag. Labourer, aged 43, his wife Elizabeth 40, children Thomas, lead miner, aged 20, Peter, lead miner, aged 18, Ann 16, Matthew, lead ore washer, aged 14, Walton 13, John 11, Elizabeth 9, Joseph 7, Ruth 5, Margaret 3, Ralph 1, and house servant Ann Thompson 22. In 1871, at Flow Edge, Ralph Pickering, farmer of 60 acres, aged 53, his wife Elizabeth 50, children Matthew, dry waller, aged 26, Joseph,

dry waller, aged 17, Ruth 15, Margaret 13, Ralph 11, Adam 9, and grandson Frederick Pickering 2. In 1881, at Flow Edge, Ralph, farmer of 60 acres, aged 63, his wife Elizabeth 60, son Joseph, stone mason, aged 27, daughter Margaret 23 and grandson Frederick Pickering 12.
Ralph Pickering died 3rd quarter of 1881, aged 63.
At Alston, 15th inst., aged 9 years, John Snowdon, son of Thomas Snowden, Stonemason.
See 5th April 1873
At Alston, 17th inst., aged 5 years, Florence Mary Pattinson daughter of Thomas Pattinson, Tailor.
In 1871, at Butts, Alston, Thomas Pattinson, tailor, aged 67, his wife Ellen 44, children Tom W, tailors apprentice, aged 16, Sarah, dressmaker, aged 19, Emily 7, Florence M 2, and Lillian 8 months.
At Alston 18th inst., aged 53, Matthew Hetherington.
See 3rd March 1888

25th March 1873 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)
Marriages
At Garrigill Church, on the 13th inst., by the Rev. George Monkhouse, Mr Thomas Walton, of Kirkoswald, to Sarah, youngest daughter of the late Jacob Smith, of Bleagate, Garrigill.
In 1871, at Low Cow Gap, Garrigill, Jacob Smith, farmer of 96 acres & Wesleyan local preacher, aged 68, his wife Fanny 63, children, Joseph 37, Frances 35, Jacob W, draper & grocer, aged 32, Sarah 24, and Margaret A 22.
Jacob Smith of Bleagate, died 19th January 1868, aged 63
In 1871, at Front Street, Alston, Catherine Walton, widow, aged 50, born Skelton, son Thomas, blacksmith, aged 26, born Caldbeck, and daughter, Phoebe 10.
Sarah Walton died?
In 1881, at Haltwhistle, Thomas Walton, widower, blacksmith, aged 35, children, John 7, Jacob S 5, Ian 3, and Alfred 1.
Deaths
At Alston, on the 11th inst., Jane, daughter of Thomas Martindale, aged 18 months. *Possible family see 13th December 1884*

29th March 1873 (Carlisle Express and Examiner)
Marriages
At Garrigill Church, on the 23rd inst., Mr William Vipond to Miss Mary Ann Walton, both of Garrigill Gate.
In 1861, at Garrigill Village, William Vipond, lead miner, aged 26, his wife Ann (daughter of Thomas and Isabella Bond, married 3rd qtr 1857, at Alston) aged 31, son John 3, and lodger, John Bond, lead miner, aged 26.
Ann Vipond was buried 30th June 1865, aged 35, at Garrigill.
In 1871, at Garrigill Gate, William Vipond, widower, lead miner, aged 36, children, John, tailor (apprentice) aged 13, Mary J 9, and niece, Elizabeth Vipond, domestic servant, aged 19. See 24th June 1871

29th March 1873 (Hexham Courant)

THE WEARDALE LEAD MINES
ANNUAL MEETING AT ST JOHN'S CHAPEL

The first annual meeting of the Weardale lead miners was held on Saturday, in the Town Hall St John's Chapel, and was attended by an exceedingly large and enthusiastic assemblage. With regard to the present position of the lead miners in relation to their employers, it might not be considered out of place to recapitulate shortly the events which have transpired within the last twelve or eighteen months in the lead measures in Weardale. It was during the preceding summer of 1871 that the miners first made a move towards obtaining an advance of their subsistence money, or as it is more popularly called, "lent Money." Some negotiations at that time were commenced, and a committee of the men to manage their proceedings was formed; but the agitation was destined to last only a short time, as the demands which they sought when they waited upon the master's agents with their case were refused. The cost of living continued still to increase without any proportionate advance of pay, it was determined, as soon after winter as possible, to set on foot another and firmer agitation for the 50s subsistence money instead of 40s which they were then receiving, and the first great mass meeting was held under most encouraging auspices, in the month of March last year, at the Town Hall, St John's Chapel. It was the first meeting of the kind, which had been held in the locality for nearly a quarter of a century. In conjunction with their application last year they were informed of some new scheme that was being propounded and shortly to be introduced in connection with the working of the mines upon a different system to what had been pursued in the past. The scheme, however, was never actually initiated, although the men were led to understand that Mr Beaumont was determined to stand to it even if it involved the grave consequence of laying in the mines. This the men considered would be very harsh, seeing that they stood in a somewhat different position in relation to their employer from that existing between capital and labour in most other branches of industry. The 50s would meet their requirements and as it was only a matter of 2s 6d a week increase of subsistence money; they deemed they were not making an unreasonable request. Altogether, three large mass meetings were held upon the subject, and among the numerous resolutions adopted at these gatherings was one to the effect that the miners should accept no more bargains at New House until their just demands had been conceded. In the course of the strike, which lasted a month, various correspondences based between the miners, their employer, and his agent, resulting finally in the men obtaining all they wanted - 50s lent money and bargains based upon £1. There still existed, however considerable dissatisfaction with Mr Cain, the head agent, the miners asserting that whilst he managed everything exclusively in the interests of Mr Beaumont he pressed too severely upon them. The nature of the bargains offered would not suffice, it was said, to maintain them and their families, and the only alternative in case of refusing to accept these bargains was leaving Weardale altogether, in order to obtain a livelihood elsewhere. In a great number of instances this already has taken place several of the lead miners having betaken themselves to the pit and iron districts, where they have found employment. To the great majority of the dalesmen however, it is exceedingly difficult for them to have to leave their beautiful and native place, where for

generations before them their forefathers were wont to spend their happiest days. A great many of them posses a little land, and keep a cow or two, and rather than forego these and the accompanying enjoyments which they afford, they prefer taking these “bargains” in the hope that the little farming and mining combined may be sufficient to maintain them in something like a position of respectability. A short time ago it was determined to hold annual meetings for the purpose of discussing questions relating to capital and labour, and matters generally affecting their own condition and the first of these was held on Saturday. Mr Nathan Race presided and he was accompanied upon the platform by several members of the standing committee, including the secretary Mr F Philipson, Mr Walton, Mr John Emerson, Mr Whitfield, Mr Joseph Kellett, Mr Thos Peadon, and Messrs Crawford and Wilkinson from Durham, who together with some of the members of the Weardale Miners Committee, were announced to deliver addresses bearing upon “ The present position of the Weardale miners, the advantage of working men’s unions, capital and labour,” &c.

The CHAIRMAN, in commencing the proceedings thanked them for the great compliment they had paid him in electing him to preside over their meeting that day. After the present committee was elected, it was resolved to hold the annual meeting of the whole of the miners when a statement would be made with respect to the monies, which had been collected, and how they had been expended. It was further resolved that the standing committee, should be elected for one year, at the end of each year, after the annual meeting had been held at the different mines, to elect members to serve on the committee. Masters had rights and so did workingmen, and it was their duty as workingmen to protect their rights. But he had to tell them they could not do this single-handed. What chance had any of them against Mr Beaumont’s capital? None whatever; but if they combine themselves and formed a union the grievances of any of them would be quickly redressed, because the matter would be taken up by the whole body of the miners at once. His own opinion was, if there had been a standing committee twenty years ago many a change for the better would have been effected, and many of their men who had left the dale would never have required to have done so. He counselled them all to be united. The old motto was “united we stand, divided we fall.” (Applause)

He advised them to elect a standing committee, and to form a union of all the lead miners in Weardale, Teesdale, and surrounding dales, to take in also the ironstone miners. Their interests were pretty identical with the lead miner’s interests. Whatever they did, let them be united and he, for one would give his last sixpence to support it. When they resumed work after the late strike, one condition was that £1 a week ought to be the basis to let bargains upon so far as that was concerned, it had been fulfilled. He had no fault to find with that except as to the modes of distribution. In instancing the averages he showed that one man averaged 29s 1d, another only 12s 1d and another 16s 1d, working in different mines. They were Mr Beaumont’s workmen, and they were all inspected by one set of inspectors, and taking their bargains all at one office. How did it happen, therefore, that there was this difference? He was not speaking of single partnerships, but of one mine against another. How was it that there should be so great a disparity in the wages? He did not say that the 29s a week man got too much. He thought they could all take that at least, when the present price of coal was taken into consideration. (Applause)

It had been a cold winter, and coal had been very scarce, with them. He did not even find fault with the 20s men, but the 16s and 12s 1d men were decidedly receiving to little. All he asked for was fairplay, but he did not think the 12s 1d man had had fairplay during the past year. There had been a system going on of closing the old mines altogether. They seem to have been trying to wreck all the old mines, and so effectually as to the baffle future speculators, and they had succeeded in stamping out all the old mines. If the ancestors of Mr Beaumont had adopted the same sort of system lead mining in Weardale would long have been a thing of the past. He believed that the advisors of Mr Beaumont thought it would be the means of bringing Mr Beaumont most profit. He would say that it was a mistaken policy, ruinous both to the proprietor and to the inhabitants of the valley. What was the use of having £3 per Bing for old mines if they wrecked and closed them? He believed if they would keep a few old men on the superannuation list the lead miner in Weardale would still speculate as his forefathers of old did. (Applause) He believed there was many a mine closed that would and could have been a regular-going mine. (Applause) Looking at the present position in Weardale the prospect was very dark, and he had heard the remark made that there was a bitterer feeling existing in Weardale that day than ever existed during the strike. (Applause) The way that many of the men had been dismissed and required to leave the place was most unfortunate. They had literally been hungered off. (Applause) If a master had any charge against him, and wanted him dismissed, he would much prefer that it were brought before him when he would have the opportunity of defending himself. What the Future of Weardale would be he could not tell. Perhaps things would brighten. They had heard it said that when things were at their darkest signs of brightness began to set in. He hoped such were in store for Weardale. All they wanted was fair play. They might probably be called agitators, and be charged with keeping the people in a state of agitation. He was not an agitator, he liked peace and harmony between masters and men, and he wished harmony were again restored between the proprietor and his workpeople. (Applause) Let their requests be in harmony with reason, and do the thing that was right, and God would defend the right. (Applause)

Mr T PEADON (one of the secretaries) read the report of the committee, which stated that the committee was formed in March of last year, at which time it was decided that their financial and other affairs should for the future be conducted with official order. It was thought requisite at first to levy the sum of sixpence per quarter on each man, the surplus of which was to go towards the formation of a union. The subject of the formation of a union not, however, meeting the views of the men in general, it had been allowed to remain stationary. At the commencement, there were 23 members of the committee; four have since left, and one successor has been appointed. The receipts have been £39 2s; the expenditure, £20 5s 4d; and there was with the balance of £21 8s 4d at the beginning, a balance of £21 5s. If the men were desirous that the committee should be continued, it would be necessary for the general election to take place- the members to be taken from the different mines. It seemed (the report concluded) a great pity that so many were necessitated to leave their dale-a dale with such resources, where nature with her bountiful hand had provided enough for all, could it have been reasonably divided, and when men were willing to put forth their labour for a moderate competency.

The report was adopted.
Mr FEATHERSTONE PHILIPSON, one of the secretaries in the course of his remarks, and after having referred to the necessity of an improvement in their condition, asked: What are the best measures we can adopt to secure a fair remuneration for our labour? I would propose no scheme that would be unfair to an employer. Our interests are identical; but we should form a union. (Applause) Now, in order to have a union we must have a test, and that test must be a monthly subscription, which will both prove our sincerity and also put us in a true position for action. (Hear, hear) What are you going to do? I trust you will give permanently to the union, sand be prepared to stand to each other. I have heard it said but I can scarcely give it credence that the young men stand in the way of a union, affirming that they may have to leave the dale. What a poor reason is this for any one to urge. I would be ashamed of myself to put forward such a plea. I cannot think it of you; you will not discredit your blood, your training, the traditions of our dear native dale. I do trust you will take up time question heartily and fearlessly, and I have no fear of success. Difficulties no doubt stand in the way, but let them be bravely faced and they will disappear, and better days will dawn. Remember the words so many of you have learned concerning another matter-"stand like the brave with your face to the foe." (Loud Applause) I must express to you the deep sorrow and grief with which I have observed cart after cart, day after day, bearing away furniture and families of my old fellow workmen and companions. I have watched them with a sad heart and, as I thought of the future, a dark shadow has come over my mind. Do not think that it was a light matter that has led these men to leave the valley. Here are the houses and hearths of their childhood, where they learned at their mother's knees their prayers. Here are the graves of their kindred and friends for generations. Here are all the associations of childhood and youth. Here are all the ties that bind the heart to home and friends. These are ties that only men who live in secluded dales like this ever know. I have asked why such an exodus? Is the valley exhausted? Is there no more bright ore hid in its heart? Can it no longer provide labour for its sons? I believe hid in the hard rocks there is treasure enough to repay the capitalists who will speculate and yield a comfortable living to all its inhabitants; and I tell you this, the day comes when its riches must be developed and there is no class of men that can be found who are more capable of this than the miners of the W B lead mines. And if we be but united and firm, no more need go forth to wander, but living at home, all may be comfortable and happy. (Loud Applause)
Mr WILKINSON (the secretary of the Durham Miners Association) said he had, like Mr Crawford, to express his astonishment at the condition of things in Weardale. As to the lending system, no man ought to be compelled to borrow money. In their case, however, it was not borrowed money. They ought not to be compelled to subsist on 12s a week. They ought not to be speculators. The capitalist ought to be the speculator. He believed it would be rather premature to ask for stated wages; but he held that the speculative system was the worst system that ever existed, and ought to be abolished. If it was much against the interest of the master as it was against the interests of the men, it would be abolished without twenty-four hours notice. They must be combined. They might attempt everything; but until they spoke as one man, they spoke in vain. (Applause)

Mr JOHN EMMERSON, Lowburn, said that the lead mines in Weardale had given to the capitalist great interest or gain. Thousands upon thousands had been realised both by Mr Beaumont and his ancestors. They stood second to none as lead miners. Go to the coal mines and other places where the Weardale miners had gone, and you would find they were getting as much money as any other man employed at the same work. Look at their position as regards income and outlay. They knew that their agreement with Mr Beaumont last summer was a pound per week as a basis for letting or grounding their bargains. When the average was taken, it was found that they had averaged one pound and two pence per man per week for the half year ending June 30th, 1872. Now, compare this income with the outlay on food, clothing, house rent and coals. They were aware that food, clothing, and coals, and every other thing they had to buy had risen greatly in prices, and they would find one pound per week very poor living for a man, his wife, and family. Whilst they were running the risk of not taking one pound per week, their near neighbours were making 25s per week and upwards, and had their coals driven to Westgate at half price.

Mr JOSEPH KELLETT said that they were now, in a certain sense, an organised body of workmen. The masters had fulfilled the condition under which they had returned to work last year, but they could not but remember, with their gain, what they had lost, and they asked where were many friends and neighbours who were with them last year. Some scores had by necessity been driven to seek employment in other places, and were now scattered all over the country. Yet, they were glad to hear they had not sought in vain, but had found better remuneration. Some had doubled the average they had here, besides having coals and house found.

Mr WHITFIELD said they must put forth united effort. Not to have a union would be to stand-alone. Nearly every class of men around them were in unions, and he held to be their duty to make as much of their occupation as they could. He did not say it was wrong to go to other fields of labour, but, on many grounds, the justness of it might be questioned. He admitted that they had been treated with coldness; they heard again and again that Mr Beaumont had too many men. Was not the dale still rich in mineral? They hesitated not to say that it was. Now rather than the dale should become a wilderness, it would be more honourable on Mr Beaumont's part to let the mines fall into other hands, as no doubt many would be ready to speculate in them. They must have a large income, or must be provided with coals at a lower rate, which would be of great advantage to them. (Applause)

It was then resolved to continue the standing committee, the election to take place in the manner proposed in the report.

The CHAIRMAN: The next thing is a Union. What do you say about this? Are you all for a Union? Let those for a Union hold up their hands. [All hands were instantly raised]

Mr JOSEPH WATSON (Haswick) said he thought unionism was absolutely necessary for all classes of workmen at the present time, and especially workingmen in Weardale. If all the lead miners in these neighbouring dales would unite and stand true to each other, they would protect their labour and keep pace with the onward march of civilisation and commerce. (Applause)

The usual votes of thanks were passed, and the meeting separated.

WEARDALE

On Friday delegates of the Weardale Iron Stone Miners, had an interview with Mr Crone head agent at Half Moon Inn, Westgate, and ultimately an amicable settlement was come to. The miners at the West Slit mine get an advance of sixpence per ton, and at Rowantree, five-pence, the other mines to be regulated by these prices, which represent about eighteen and a half percent. The day labourers get an advancement of six pence per day. The cart-men also came to a settlement, having got something like five-pence per ton advance. The strike is consequently at an end, and work will at once be resumed.

NENTHEAD

MASS MEETING OF THE LEAD COMPANY 'S WORKMEN.

The lead miners of Nenthead working under the London Lead Company held a mass meeting on Tuesday evening last, in order to ascertain the best way of trying to better their circumstances, the present monthly pay of £2 14s being considered too little to live upon, at the present high rate of provisions, &c. It was resolved to draw up a petition to be signed by the lead miners, asking that the monthly pay be raised so as to place them at least, on an equal footing with the other lead miners of the district. The Lead Company's miners at Nenthead are not paid so much as the miners employed by other companies. There are three different mines worked in the same village, belonging to different Company's and they are all paying the men £4 per month, some of them having got this sum without asking for it. It was considered also that the London Lead Company ought to see that their workmen were paid for doing their work, as their mines are far richer than the others are.

Deaths

At Nenthead, 13th inst. aged 44, Mr John Pattinson, Stonemason.

STANHOPE

STRIKE OF QUARRYMEN

Not withstanding the recent advance made to the quarrymen employed at the Stanhope and Frosterley, Limestone quarries, considerable dissatisfaction exists in as much as on Monday the workmen at Broadwood Quarry, belonging to J. Pease and Co., and at Parsonbyers, belonging to Bell Brothers, struck work and are now out on strike, and it is expected a strike throughout all of the quarries in the district will take place if their request of 1s per ton for winning the stone is not acceded. The number of workmen now out on strike is about 200. The whole of the men employed at the quarries in this district numbers 500.

FATAL ACCIDENT AT NENTHEAD

Last Thursday week, a boy named Thomas Price, 11 years age *(burial records give the age, 12 years)*, residing at Nenthead, died from injuries sustained in an accident which occurred to him on the previous Monday. On that day he was working amongst the waggons at the washing mills belonging to the London Lead Company, when he fell between the waggons, and had his head severely crushed. He was attended by Dr. Horder, but medical skill was of no avail, and he died on Thursday. The coroner did not consider it necessary to hold an inquest.

In 1871, at Foulard, Nenthead, Stephenson Price, lead miner, aged 44, his wife Ann 42, children, Elizabeth 21, Mary Ann 16, Thomas 10, William 8, Phebe 5, and Lucy 4.

See 27th April 1866, 3rd December 1870, 3rd August 1872, 22nd April 1882, and 8th December 1894,

Marriages

At the Primitive Methodist Chapel, Alston, on the 27th ult., Mr Joseph Richardson, of Milkwell Burn, to Miss Jane Bowness, of Alston.

In 1861, at Low Bailes, Alston, Isaac Dowson, Ag. Lab., aged 61, his wife Grace aged 45, born Shap, stepson, John Yeats, tailor, aged 19, born Patterdale, stepdaughter Jane Bowness 9, born Knaresdale, and son Thomas Dowson 5.

In 1881, at East Chevington, Northumberland, Joseph Richardson, coal miner, aged 36, his wife Jane 29, children, John E 7, Annie N 5, Grace H 3, Joseph 11 months, mother Margaret Richardson, widow aged 64, and brother, John, coal miner, aged 25.

Jane Richardson died 1st qtr., 1899, aged 47, registered at Morpeth.

Joseph Richardson of South Broomhill, Morpeth, died 5th October 1908, aged 64

At the Primitive Methodist Chapel, Alston on the 30th ult., Mr Jonathan Davidson, to Mrs Jane Walton, both of Alston.

Marriages

At Stanhope Wesleyan Methodist Chapel, 2nd inst, Mr Joseph Peart of Bent Houses to Mrs Jane Fleming of Wearhead.

10th May 1873 (Hexham Herald)

Correspondence to the Editor of the Hexham Herald

Sir The miners of Nenthead and Alston Moor district after holding two mass meetings, formed a committee to draw up a petition and get it signed for presentation by J. J. Millican Esq., resident agent, to R W Bainbridge Esq.,

Middleton, head Superintendent, for an increase of advance cash monthly from £2 14s to £4, also stating the wistfulness of the miners should be let on the basis of £1 per week. A few have been making more than that sum. The petition was duly presented by Mr Millican to Mr Bainbridge, who courteously said that, if they persisted in their demands, he would forward them to London, but he was afraid it would make a bad job of it, and lead the Company to close the mines altogether; a fear which I think is groundless. They might do so, and, if they did, they could not keep them closed long, as the Lord of the Manor would compel them either to work them or give them up. There is plenty however, in the event of such being the case, ready to take them up. ... A mass meeting, however will be held tonight (Wednesday the 7th inst) when no doubt, resolutions will be passed for Mr Bainbridge to send the petition to London. ... I am &c. ZETA

Deaths

At Haydon Bridge, 28th ult. aged 60, Mr John Douglas, Lead Ore Miner, late of Patterdale.

In 1841, at the Butts, Alston, John Douglas, lead miner, aged 65, his wife Ann (Walton, married 23rd August 1802, at St Augustine's, Alston) aged 55, son John, lead miner, aged 30, and daughter, Mary 15.

John Douglas snr., died 3rd qtr., 1847, registered at Alston.

See 15th September 1868

At some time between 1841 and 1851, he moved to Patterdale.

In 1851, at Hartsop, Patterdale, Edmund Irving, farm labourer, aged 29, his wife Elizabeth 35, lodgers William Bell , lead miner, aged 37, and John Douglas, lead miner, aged 36. John Douglas was lodging with the same people in 1861.

The 1871 shows John Douglas, unmarried, lead miner aged 60, born Alston, lodging with the Johnson family in Patterdale, Glenridding.

16th May 1873 (Carlisle Patriot)

PARISH OF ALSTON, WITH GARRIGILL

MASTER AND MATRON WANTED

THE BOARD of GUARDIANS propose at their MEETING to be held at the BOARD ROOM, in the TOWN HALL, ALSTON, on SATURDAY, the Seventh day of JUNE next, at the hour of Ten o'clock in the Forenoon, to appoint a Man and his Wife as MASTER and MATRON of the WORKHOUSE for the said Parish. The Salary of the Master is £25, and that of the Matron is £20 per annum, with Rations and Apartments in the house.

The person appointed will be required to perform the duties prescribed by the Local Government Board, and subject to whose approval the appointment will be made. Applications, in the handwriting of the Candidates, stating age, and number and ages of children (if any) dependent upon them, with copies of recent Testimonials as to character and qualification, must be sent in to me on or before the Thirtieth day of May instant. No Candidate need attend personally unless specially requested to do so, and no travelling expenses will be paid. The persons elected will be required to enter on their duties forthwith, and the Master will be called on to give approved security in the sum of £100 for the due performance of his duties. By Order of the Board of Guardians, JOSEPH DICKINSON, Clerk. Dated 15th May, 1873.

17th May 1873 (Hexham Courant)

FALLOWFIELD MINE
SAD ACCIDENT.
ONE MAN KILLED AND ANOTHER SERIOUSLY INJURED

On Thursday about 12 o'clock noon, an unfortunate double accident occurred in the mine at the above place, known as the "Old Engine shaft," by which an elderly man, named Thomas Ritson, lost his life, and his mate Thomas Cook was seriously injured. From inquiry on the spot it appears that the miners above named were engaged in sinking a "sump" from one drift to another directly below it and at about 27 feet perpendicular distance, and had nearly accomplished their object when they put in a shot, and is supposed had put in an extra large quantity of powder with the hope of completing the perforation designed, and then retired "back" until the explosion should take effect. After waiting some time and not hearing the usual report, Cook desired his mate to let him by the "jack roll" in order that he might examine and ascertain the state of matters below. When near the bottom of the sump 27 feet as above stated, he seems to have been overpowered with the "stythe" and to have fallen out of the loop. Two other miners, who were on their way to relieve the two above named, arrived at this juncture, and Ritson having explained the state of affairs to them desired them to let him down that he might ascertain the state of Cook. They immediately complied with his request, but when he got near the bottom, he called out for them to draw him up, as the gas was still too strong for him to proceed. When he had nearly reached the top of the sump, however, he also fell out of the loop - cross stick suspended in a triangular or forked rope - and falling to the bottom appears to have been killed on the spot; but Cook could be heard moaning, so that attempts to save him were still persevered in. In the meantime Mr Henderson, the manager had arrived on the spot, and instantly dispatched men to another shaft for an air machine and tubes, which were put down with all the expedition possible. The blast of fresh air seemed to revive Cook, as he could be heard speaking incoherently and saying, "that's right Tommy." After about two hours exertions, the air in the sump was sufficiently pure to allow the men to descend, and the body of Ritson, and Cook, in a semi-conscious state, were brought to bank as speedily as possible. Mr Henderson, on being appraised of the state of matters, had with his usual promptitude, dispatched a messenger to Hexham for medical aid, which he judged, even at the best would be necessary, and Dr Kendall arrived at the scene of the accident soon after the unfortunate subjects of so much anxiety and solicitude were got out were being carried towards their homes. When our reporter left Acomb Cook continued in much the same state suffering partly from the fumes of the powder and partly from the fall, and still talking incoherently so that his true position in reference to life or death could scarcely be ascertained. Both men had their heads cut near the Coronal region, and much in the same manner something like a roughly formed cross, the distance fallen apparently making the only difference in favour of Cook. The last named is a young man between 20 and 30 years of age, is married, and has a young family of two children, a third being shortly expected. Ritson is the father of a large family, but his surviving children are all arrived at mature years and have left the parental home. Both were men of exemplary habits and lives, Mr Cook having been for some year's secretary of the Sunday school of the Wesleyan chapel in his native village, and our

readers may remember his name being mentioned in our report of their late anniversary. Mr Ritson, too was present on that occasion, and appeared to take a deep personal interest in everything, which concerned the spiritual and temporal welfare of the children belonging to the school of which he was joint superintendent with Mr Wilkinson. Under the careful and judicious treatment of Dr Kendall, Cook recovered consciousness on Thursday evening when the exact extent of his injuries were more accurately ascertained. Up to that time, he had suffered considerably from concussion of the brain, an extensive scalp wound near the crown of the head, his shoulder and side being also severely bruised. He consequently required a good deal of rallying, but on inquiry last evening, Dr Kendall stated that he was progressing as favourably as possible.
The 1861 census shows Thomas Ritson aged 45, a lead miner born Allendale living at Acomb with his wife Sarah aged 46, born Hexham, and children Ann aged 17, St. John Lee, Acomb and Joseph 4 years, St. John Lee, Acomb. John his son aged 23 is living with his wife Jane Ann aged 21, and son Henry 2 months; Jane Ann died in 1866.
The 1871 census lists Thomas Ritson living at Acomb a lead miner aged 55, married, born in Allendale, living with his son John aged 33 a coal miner and John's son Henry 10.

The 1871 census gives Thomas Cook (born St John Lee) aged 29 a lead miner, living at Acomb with his wife Isabella (born Garrigill) aged 25 and children Joseph Hedley aged 2, and Amelia 2 months.

17th May 1873 (Darlington & Richmond Herald)

THE STRIKE IN WEARDALE

THE STRIKE IN WEARDALE. The strike continues. 450 men are out. £2,400 in wages has been lost. Last Saturday at Beverley Old Quarry the men met to consider whether or no they should go in on the old terms. The meeting was largely attended, and after some discussion, it was proposed that (with the masters' consent) the men go to work at the old price, meanwhile submitting their case to arbitration, the men to stand by the decision of the arbitrators; but this was overruled, and ultimately a resolution was passed to the effect that they stand out for their original demands. A great many of the quarrymen have left the district, and on Saturday the secretary filled up many more removal certificates, consequently a large number of the remaining workmen are about to seek other fields of labour. On Saturday three men arrived from Norfolk, in answer to advertisements wanting men; but on hearing that the men had an association, and were on strike, they took a speedy departure.
See 30th January 1875

17th May 1873 (Hexham Herald)

Deaths

At Nenthead, 11th inst., Margaret, daughter of Mr Havelock Latimer, aged 6 years.
In 1871 Havelock Lattimer, draper & grocer, Nenthead, aged 34, married to Isabella (Watson married 1862), children Jane 10, Matthew 8, Margaret 4, and Thomas Havelock 6 months.
The 1881 census shows another son born in 1874 Ridley Cranmer Lattimer.
See 28th May 1877, 22nd December 1877, & 29th April 1882.

WHO DIED OCT. 29TH 1807, AGED 70 YEARS.

24th May 1873 (Hexham Courant)

A SERIOUS MINING ACCIDENT AT GARRIGILL

A serious accident on Monday last at Garrigill near Alston to two brothers named Thomas and Ralph Winskell. They are employed in the mines of the London Lead Mining Company, and when the accident occurred were charging a hole with powder in order to blast. Thomas was doing this part of the work, while Ralph was sitting by preparing the material. Before the hole was charged, the powder ignited and exploded. Thomas was much burned about the lower part of his face, one hand was bruised and his eyes were also so seriously burnt that the sight of one of them is in some danger. Ralph sustained a deep cut right along the top of the head and one of his hands was also much bruised. They are both attended by the medical gentleman employed by the Company, and are doing favourably according to latest accounts.

In 1851, at Middle Craig, Garrigill, Elizabeth Winskell, widow, parish relief, aged 30, children Thomas 10, Ralph 8, and Frances 6.

7th June 1873 (Hexham Herald)
WALLISH LEAD MINING CO.
A very favourable report of the prospects of this mine has just been issued. The mine is situated on the bank of the river Derwent, and a lease has been taken by Sir Arthur Monck, Bart of Belsay Castle, Northumberland. The company have already expended on the mine since 1871, £1,286, having erected first class machinery. The ore is of excellent quality, 13 ounces of Silver to the ton and 801/2 per cent lead, and the company are warranted from the smallness of the outlay, and the good yield of the mine, in anticipating a large percentage on the capital expended.

7th June 1873 (Hexham Courant)
Deaths
At Allendale, Dunedin, New Zealand, February 19th 1873, George son of the late Jonathan Harle, of Wooley Burn Foot, Allendale, (*aged 57*).

14th June 1873 (Hexham Herald)

STANHOPE
FATAL MINE ACCIDENT

On Saturday an inquest was held before Mr T. Dean, deputy coroner, at the Queens Head Inn, Stanhope, on the body of Thomas Wilkinson, who came to his death in a most shocking manner on Friday. Whilst following his employment at the Red Vein Ironstone Mine, the property of the Weardale Iron and Coal Company, part of the roof fell and crushed the unfortunate miner in so dreadful a manner that his body was nearly cut in two and he died immediately. Deceased was 46 years of age and leaves a wife and child to mourn his loss.

In 1861 living at Crawleyside, Stanhope, Thomas a lead miner aged 34, Hannah (Jaques married 1846) his wife 40, children, Lancelot Jacques son in law age 15, lead ore washer, Ann Wilkinson aged 13, and Joseph aged 9.
In 1871 at Martin Street, Stanhope, Thomas is not listed at home, those listed are his wife Hannah Wilkinson aged 50, son Joseph aged 19 a labourer, living with Hannah is Jane Gibson her sister aged 56, a widow, and niece Martha Readshaw aged 18, a dress maker. In 1881 Hannah a widow, is living with her son Joseph working as a limestone quarryman his wife Ellen aged 26, their son Thomas aged 1 and daughter Margaret 2 months, Hannah's sister Jane Gibson is also living with them.

21st June 1873 (Hexham Courant)

WEARDALE
ANOTHER FATAL MINE ACCIDENT.

On Friday, a fatal accident occurred at Grove Heads, one of the WB lead mines in Weardale. John Emerson of Wham, near Weardale, whilst working at his employment at the above mine as woodman, was crushed to death in a shocking manner. A "rise" is a perpendicular passage in a mine, one half being for the men to travel by means of ladders, and is called a way gate, and the other is used to put down the material excavated. Emerson was in the "way gate" when the material in the rise burst through the partition and crushed him to death. Deceased was upwards of 50 years of age, and unmarried.

The 1871 census gives John Emerson of High Wham aged 55, lead miner & farmer of 4 acres, born Stanhope, Durham.

21st June 1873 (Hexham Herald)

WEARDALE MAN KILLED IN AUSTRALIA

The Australian mail has just brought news into Weardale of a fatal accident which occurred on the 18th April of the present year, to a Weardale man well known and much respected, Thomas Peart, who left Weardale some nineteen years ago for Australia met with his death whilst working at Hill End

Tambaroora, New South Wales. He was many years a member of the Weardale Harmonic Band, was a cheerful companion and was a Good Templar, deceased was 48 years of age and leaves a widow and three daughters.

The Independent order of Good Templars was a temperance organisation, below is an extract from the Australian Press.

The Sydney Morning Herald (NSW)
Friday 4 April 1873

A Fatal Mining Accident: - Another fatal mishap occurred at Beard and Tallentyre's claim, on Hawkins Hill. The Observer states that the deceased, a very respectable man, named Peart, was the contractor for certain work required to he done in the claim. He was at the time of the accident below in the shaft that had been sunk in the tunnel, and whilst in this position a heavy wooden bucket fell upon him from the top of the shaft, fracturing his skull and causing almost instant death. From the evidence taken at the Coroner's inquest, it seems that the unfortunate man's attention was only a few hours previously called to the state of the hook that attached the bucket to the chain, and he replied it would do for a while.

His temerity has cost him his life, and this instance of a want of caution should impress itself on our mining friends in the discharge of their labours, particularly those-who, have wives and families dependent on their existence.

21st June 1873 (Hexham Herald)
Deaths

At Newcastle, at 55 Hawes Street, aged 71, Jane, Widow of James Spottiswood of Alston.

In 1841 living at Physic Hall, James Spottiswood, lead miner 35, his wife Jane (Martindale married 17th May 1827 at Alston) 35 and children James 10, Joseph 8, Elizabeth 4, Hannah 4, Sarah 1.

In 1851 living at Physic Hall, Jane Spottswood a lead miners widow (Husband James died 1845) aged 49, children, James lead miner 20, Joseph lead miner 17, Hannah 14, Sarah 11.

In 1861, Jane a Widow is living in Elswick with her son James listed as a lead miner and daughter Sarah a dressmaker.

In 1861 living at Teynham Place, Elswick, Joseph Spottiswood a foreman at Elswick lead works, 27, his wife, Elizabeth 24, and children Margret 6, James 4 From census information I believe Joseph married Elizabeth in 1858, and that their first two children Margaret and James (1868?) died before the 1871 census as did Elizabeth (1868?).

In 1871 at 55 Hawes Street, Elswick, Jane Spottiswood widow, aged 69, sons James (a stoker) 40, Joseph widower, (a stoker) 39, daughters Hannah 34, and Sarah 31,also living with them are Josephs children Jane A. 9, and James T. aged 3.

Jane Spottiswood died in 1873 aged 71. Sarah married in 1875; I believe she married a Thomas Martindale, Sarah Martindale born 1840 died at Gateshead in 1878.

In 1881, James is a boarder in Elswick working as a Boiler Fireman; Joseph is living at Hawes St. with his two children working as an Engineman driver at works. Hannah is living in Whickham, Gateshead, with her sister Elizabeth,

married to George Masterman (married in 1868) a mason; they have a daughter Mary Jane aged 9.

Hannah Tindle died 4th qtr., 1929, aged 82, at Alston.

28th June 1873 (Hexham Herald)

WEARDALE
GRANT OF MORE "LENT MONEY" TO THE MINERS.

The great struggle of last year marked the concession of ten shillings per month more "lent money" to the Weardale miners, making it 50s instead of 40s. The miners committee, at a meeting held at St John's Chapel in April last taking into consideration the high price of coals and other household necessities passed a resolution to the effect that they would petition their employers for an advance of 10s per month lent money making it £3 and the request has been granted through Mr Cain by Mr Beaumont, who in a letter expressed his wish to consider at all times the requirements of his men.

19th July 1873 (Hexham Courant)

WEARDALE
SHOCKING DEATH

A young man, named John Charlton met with a shocking death on Tuesday morning at Boltslaw in Weardale. The deceased was engaged to attend to the wire rope at the Boltslaw standing engine and was keeping it in its proper place on the drum, when from some cause or other which is not at present satisfactorily explained he was taken up by the rope, and carried, before any assistance could be rendered him, twice round the drum between it and the rope. On being extracted, he was found to be quite dead. The deceased was 18 years of age.
In 1871, at Bolts Burn, Stanhope, William Charlton, railway engine stoker, aged 55, his wife Sarah 54, children William, railway platelayer, aged 17, John, railway gatekeeper, aged 15, and Elizabeth A. 12.

Daily Southern Cross 18th April 1873: On April 14, at her residence, Beach Road, Devonport, after a painful illness extending over 15 years, borne with true Christian resignation and fortitude, Elizabeth, the beloved wife of Mr. John Holmes, in the 47th year of her age. Her end was peace.

26th July 1873 (Hexham Courant)

THE WEARDALE MINERS

On Saturday last, the quarterly meeting of the Weardale Miners Association Committee was held at St John's Chapel, at the Black Bull Inn. At their last meeting in April, it was agreed, "That they petition W B Beaumont Esq., MP. to advance them 10s per month 'lent money', and that the bargain be based upon 25s per week." The secretary acted accordingly to the wishes of the committee, their request for 10s advance per month, subsistence money was readily granted, through Mr Beaumont's chief agent, Mr J C Cain, but Mr Beaumont would not admit of any basis for bargains. The committee accepted the advance from 50s to 60s lent money with thanks, and conveyed their sentiments in a letter to Mr Cain, expressing their feelings of gratefulness to that gentleman and their employer, Mr Beaumont, for considering so generously the interests and welfare of their workman. The first £3 lent money will be advanced on July 25. Once upon a time, the Weardale miners got a guinea per eight weeks to subsist upon. In the early part of this century they had 30s per month, on February 12, 1846, 40s per month was advanced, and on May 31, 1872, 50s.

26th July 1873 (Hexham Herald)

See 15th February 1873

4th October 1873 (Hexham Herald)

STRIKE AT MR BEAUMONT'S LEAD WORKS

The whole of the men who were employed as separators at Mr Beaumont's Lead Works both at Allen Smelt works and Rookhope Mill, have come out on strike in consequence of the non compliance with their request for an increase in wages. The workmen had 4s 3d for seven hour shifts. They now demand 5s for the same hours and the same work.

11th October 1873 (Hexham Courant)

11th October 1873 (Hexham Herald)

MR BEAUMONT AND THE SEPARATORS

It appears that the dispute with Mr Beaumont and the separators still exists though the statement that the men were on strike has been contradicted. The separators, we understand made an application to work 5 tons in 6 hour shifts at 5s each shift having previously received 4s 3d for doing 6 tons in 7 hours, and they argue that it is almost beyond human endurance to work that length of time and that they frequently arrive home in a most exhausted condition.

This was represented to the agent of Mr Beaumont, who in reply to their request has offered to give the men 4s 6d for shifts of 6 hours, but the quantity of lead 6 tons as previously must be worked in that time. Considering that the men have found themselves unable to work 6 tons in 7 hours, the concession of an hour – or rather the concentration of work, for of this there is no abatement – and an advance of 3d per shift is not regarded with any favour by the men who have determined not to accept it, at the same time offering to take the same wage that separators in other firms may now receiving. Meetings e been held, only with the same result not to accept the offer. Had this offer been accepted by the men the little that is offered to them by way of increased wage would have been more than counter balanced by the saving in fuel.

Deaths

At Nenthead, 4th inst, aged 6 weeks, Robert Whitfield.

18th October 1873 (Hexham Courant)

Marriages

At Hexham Registry Office, 16th inst. Mr William Milburn to Miss Margaret Reed, both of Coating Hill, Allendale.

Deaths

At Bridge End Mill, Allendale Town, 13th inst. aged 65, Mr John Little.
Miller & farmer, born Scotland. See 30th May 1874.

18th October 1873 (Hexham Herald)

NENTHEAD

MINING BARGAINS. The Lead Company's mining bargains for the Alston Moor district were held at Nenthead on Friday last. For a considerable time the mines have been in a moderate condition and as a natural consequence, the earnings of the men have been below the market price of labour. During the last ten years, numbers have left for other districts, and on Friday, last it seems to have reached its climax. The Garrigill men must have given a heavy blow to their side by reducing their number, when upwards of 30 are remaining this time. The Nenthead side will be about a dozen less, making a total of upwards of 40 men and their families. The men with small families no doubt feel the pinch of the times, and the young men cannot afford to lose the golden opportunity of improving their social conditions. The inducements offered in other districts afford the men in these poor districts the opportunity of bettering their condition, and develop their powers of industry. If the tide of migration flows on, Alston Moor district will present a lonely aspect. However, the batch who have departed will not materially affect their old employers, but rather relieve them at the time when the mines reopen.

Deaths

At Wentworth Place, Allendale Town, 21st ult., Frances third daughter of Mr Thomas Roddam, Cattle Dealer.

25th October 1873 (Hexham Courant)

ALSTON IMMIGRATION

The poverty of the lead mines in the Alston district has frequently being referred to in these columns. The mines have at length become so poor, the masters cannot allow wages in accordance with the high price of most of the

necessaries of life. Hence, large numbers have left for other places where better remuneration for their labour is to be obtained. On the morning of Tuesday last between fifty and sixty including miners and their families left the Alston station for the coal mines in East Lancashire. They were mostly from Garrigill where the average earnings has for some time been poor. It is expected that if good reports come from the immigrant's numbers more will follow their example.

Many returned complaining of the working & living conditions in Lancashire

WEARDALE

A farewell service and presentation was held in the Wesleyan Chapel, High House, on the 14th inst. A gold watch was presented to Rev Joseph Race on his leaving Weardale as a missionary to China.

See 25th March 1876, 8th February 1890, 22nd May 1892, 2nd July 1892, 5th November 1892, and 21st October 1893.

25th October 1873 (Hexham Herald)

ALLENDALE SEPARATORS AND THEIR WAGES

A meeting was held on Thursday night at Allen Bridge, which was attended by a large number of the workmen in the neighbourhood, when a deputation, consisting of Messrs Johnson and Dickinson, was appointed to wait upon the agent Mr Johnson, to explain to him what the separators required, so that a just and fair settlement of the case could be arrived at. This deputation were to meet the men on Saturday night at an adjourned meeting held at Thorney Gate, and report how their requests were met. They stated that the result of their labours had been that the agent would make no further concessions further than allowing them to work the same six tons in seven hours and give them 4s 6d per shift, which offer was not accepted, they wishing to work 6 tons in seven hours at 5s per shift. Failing this they are agreed to abide by the same regulations under which the Rookhope men work, appoint a deputation to settle these matter or leave them to arbitration. … Meanwhile they remain on strike.

1st November 1873 (Hexham Herald)

GARRIGILL

Mr William Nall was accepted for admission into the University of Durham, "… who must have passed a very good examination, as the examiners have recommended him for an exhibition of £30."

7th November 1873 (Newcastle Courant)

DEATH OF MR FAIRBRIDGE SURGEON.

The inhabitants of Blanchland and surrounding district have sustained a heavy loss by the death of Mr John Madgin Fairbridge, surgeon, which took place at his residence in the above village, on the 1st inst. Mr. Faribridge has resided in the locality for about thirty years, during which period he has had a very extensive practice, and by his great ability as a surgeon, and his uniform kindness to all with whom he came in contact, he had secured many friends. He was engaged by the Derwent Mines Company, Limited, as surgeon for the mines, at a monthly stipend, in 1848, and from that period up to the time of his death he faithfully and efficiently discharged the duties of the office. The

deceased gentleman, who was fifty-six years of age, leaves a widow and several children to mourn after a kind husband and affectionate father.

8th November 1873 (Hexham Courant)
Marriages
At the Wesleyan Methodist Chapel, Alston, Mr Thomas Hymers of Hudgill, to Mary Graham of Fairhill, Alston.
John Hymers married Elizabeth Coulson, 15th April 1839, at Alston Church.

In 1851 at Low Galligill, Nenthead, Thomas Glendenning lead miner, aged 42, born Knaresdale, his wife Susan (Liddle, married 29th December 1842, at Alston) aged 42, children John lead miner 16, Jane 13, William 5, Robert 3, and Margaret 2.
Susan/Susannah his wife was buried 20th April 1856, aged 47, at Nenthead
In 1861, at Haggs Foot, Nenthead, Thomas Glendining, widower, lead miner, aged 52, children, John, lead miner, aged 26, William, lead miner, aged 16, Robert, lead miner, aged 13, Margaret, house keeper, aged 12, Mary 9, and Susannah7.

In 1871, at Haggs Foot, Nenthead, Thomas Glendining, widower, lead miner, aged 62, children, William, lead miner, aged 25, Robert, lead miner, aged 23, Margaret 22, and Susannah 17.

15th November 1873 (Hexham Herald)

ALLENDALE

THE SEPARATORS

Another meeting of the separators at Allen Smelt Mill was held on Wednesday night, when it was resolved to continue the struggle, which has now lasted eight weeks. The agent remains inflexible and will neither compromise nor allow a settlement by arbitration.

Deaths

At Nenthead, 11th inst., after a lingering illness (consumption) aged 25, Miss Mary Nicholson.

See 11th January 1868, 29th May 1869, 4th May 1872, and 21st April 1883

At Allendale at Holly Bush, 3rd inst. aged 80, Margaret, widow of Henry French, Wood Agent. *See 2nd August 1864, & 19th June 1869*

22nd November 1873 (Hexham Herald)

WEARDALE

THE TRACTION ENGINE. The long looked for and long talked of engine arrived in Weardale last week, and was taken to the W. B. lead mines at Breckon Syke, where it had to undergo the test of its usefulness. On the day of the trial several influential gentlemen connected with these mines, as well as a large number of the inhabitants of the dale, whom curiosity led to see the iron monster which was to replace the old fashioned, slow cumbrous carrier's cart, by which lead ore has hitherto been taken to Allendale. The fire was soon ignited, and steam began gradually to rise, until the desired pressure had been attained, when the carriage was loaded with about 51/2 tons of lead ore. ... though the leviathan is restive, reels and staggers a little it does not move a great deal - only a little, and after a mile had been passed over, it failed to climb a steep bank. ... a mistake, and most assuredly so in Weardale, where the roads are not so level or so good as they are in southern counties. The carriers we understand have got instructions to resume their usual work, and the engine is left "under consideration."

ALLENDALE

The Separators held a meeting on the 15th inst., when a deputation of three of their number was appointed to wait upon the agent (Mr W. J. Johnson) and ascertain if there was any likelihood of their terms being accepted. ... On Monday, the deputation waited on him, and explained the nature of their business to which he listened in good part, until the moot point at issue was touched, and when he said they knew his terms, and if they liked they could go in on them. After a good deal of discussion, W. Ridley, one of the deputation and one of the oldest workmen on the works, said if he would not listen to them they would go to the fountain head, and let Mr Beaumont know how the case really stands. The deputation then left, with the understanding that a petition explaining their case, is to be drawn up and forwarded to Mr Beaumont for the gentleman's consideration. Application, we understand has been made in several quarters for men to come and supply the places of those who have left, but without success, under present circumstances. We

also hear of influences having been used in sundry places to stop employers from obtaining the services of those leaving Allendale.

ROOKHOPE

We have to record the death at Lintz Garth, Rookhope on Monday 10th after a few days illness Miss Hannah Foster daughter of Mr John Foster agent Rookhope Lead Mill, had just attained the 17th year of her age. ... She was attacked with Scarlatina of a malignant type and diphtheria supervening, baffled the skill of Mr Davis her medical attendant.

Scarlatina also called, Scarlet fever is due to a throat infection caused by the bacterium called streptococcus. Sore throat and fever (high temperature) are the typical first symptoms.

A bright red rash soon develops; toxin that is made by the streptococcal bacteria causes this. The toxin gets into the blood from the infected throat. The rash starts as small red spots, usually on the neck and upper chest. It soon spreads to many other parts of the body. The face may become quite flushed. Other common symptoms include: headaches, vomiting, being off food, and feeling generally unwell.

Diphtheria is a contagious bacterial infection that mainly affects the nose and throat. Less commonly, it can also affect the skin. The symptoms of diphtheria include: high temperature (fever) of 38°C (100.4°F) or above, sore throat, and breathing difficulties.

The most serious cases of diphtheria can be fatal.

Today an estimated 5-10% of people who get diphtheria will die from complications that arise from the condition, such as breathing difficulties or inflammation of the heart (myocarditis).

Deaths

At Aimshaugh near Alston, 18th inst. aged 90, Hannah Watson, widow of the late Mr Emerson Watson of Hudgill.

In 1841 at Lovelady, Emerson Watson, lead miner aged 45, Hannah Watson (Hymers, married 10th June 1822, at Alston), aged 60, and Hannah Watson, 15. In 1851, at Hudgill, Hannah Watson, widow, landed proprietor, aged 72, daughter Hannah, dairymaid, aged 25, and house servant Elizabeth Hymers aged 15. In 1871, at Kings Arms Lane, Hannah Watson, widow, landowner, aged 86, and granddaughter, Hannah Hall, housemaid, aged 22.

29th November 1873 (Hexham Courant)

Marriages

At Stanhope Primitive Chapel, 22nd inst. Mr Stephen Teasdale to Miss Mary Lowes, both of Stanhope.

In 1881, Stephen Teasdale, widower, limestone quarryman, aged 47, and son John Lowes aged 12.

At Stanhope Primitive Chapel, 22nd inst. Mr Charles Emerson of Stanhope to Miss Sarah Douglas of Daddry Shield.

On Sunday, November 2nd 1873, Mr James Davison to Miss Sarah E Raine, both of Nilsonville, Ohio.

Deaths

At Alston, 20th inst. aged 84, Mr James Fisher.

In 1861, at Main Street, Alston, Thomas Cawthorn, draper and china shop keeper, aged 40, born South Wales, Abergavenny, his wife Jane (Smith, married 16th March 1852, at Newcastle upon Tyne) aged 42, born Shotley

Bridge, children, Elizabeth 10, born Knaresdale, Thomas 8, born Knaresdale, William 5, born Knaresdale, John 3, born Alston, and Jane 1, born Alston. In 1871, at Front Street, Alston, Jane Cawthorn, widow (her husband Thomas, died 4th qtr 1870, aged 50), general dealer in hardware, aged 51, children Elizabeth, general dealer daughter, aged 20, James, general dealer son, aged 19, William, pupil teacher, aged 15, John 14, Jane 11, Mary A. 10, and visitor James Fisher, formerly paper maker, aged 79, born Hexham.

At Alston 27th inst aged 76, Hannah Philipson.

In 1871, at Front Street, Alston, Hannah Phillipson, widow, grocer, aged 73, her son William, iron ore agent, aged 43, wife Mary 46, children Ellen, pupil teacher, aged 18, William F. pupil teacher, aged 14, Anne 11, and Mary P. 8 years.

At Catton, Allendale, 18th inst., aged 30, Mary wife of Mr Wm Parker, 24th inst., aged 19, Mr Edward Beck, farmer and lead ore carrier.

In 1871, William Parker aged 28, railway platelayer, living with his wife Mary aged 27, and children Isabella 1, and John William 5 months. William remarried and in 1881, he was working as a butcher and living at Medomsley with his wife Ann aged 33, children Isabella 11, John William 10, and Jane 2.

29th November 1873 (Hexham Herald)

Allendale

The separators remained on strike, and at a meeting: -

… Mr Wm. Ridley, one of the separators informed the meeting of the nature of their employment and their present wages being 4s 3d per shift for seven or eight hours labour, during which time they had to put through the process of disuniting or separating six tons of lead with a heavy iron ladle; and they now asked for s for the same labour and time to work it in." … *They agreed to petition Mr Beaumont and remain on strike.*

Births

At Stonecroft, Lead Mine, 26th inst., the wife of Thomas Ware, Agent, of a son.

See 27th November 1886

Deaths

At Mill Cottage, Allenheads, 22nd inst., aged 69, Mr Robert Todd.

In 1851, at Mill Cottage, Allendale, Robert Todd, lead ore weigher, aged 46, his wife Elizabeth (Bowman, married at Hexham 14th November 1825), aged 45, sons George, lead and silver separator, aged 19, and Joseph 11 years. In 1861, at Mill Cottages, George Todd, lead ore smelter & joiner, aged 29, his wife Mary Anne (Robson, married 22nd May 1858, St Peter, Allenheads) aged 26, and daughter Elizabeth 1 year. Joseph Todd, lead ore smelter, aged 21, his wife Hannah (Stephenson, married 2nd quarter of 1859) aged 25, daughter Jane 1, and son Robert 3 months. Robert Todd, foreman in lead ore smelting works, aged 56, wife Elizabeth, aged 55, and house servant, Elizabeth Hetherington aged 30. In 1871, at Mill Cottages, Robert Todd, annuitant, aged 66, and his wife Elizabeth 65.

At Middlehope Green, Allenheads, 24th inst., aged 27, Mr Joseph Stokoe.

In 1861, at Mill Cottages, Allenheads, John Stokoe, Blacksmith, aged 55, his wife Ann 52, son Joseph, lead ore dresser, aged 16, and granddaughter Ann Stokoe 8. In 1871, at Middlehope Green, Joseph Stokoe, lead ore smelter, aged 26, and his wife Jane (Robson, married 14th November 1868, St Peter, Allenheads) aged 28.

6th December 1873 (Hexham Courant)

ALLENDALE TOWN

Yesterday the strike which has been existing between the separators of Allen Mill Lead works and their employer for the past nine or ten weeks, terminated. At a meeting of the men held yesterday afternoon it was resolved that they should commence work upon the old terms.

Marriages

In 1871 living at Low Dyke Head, Smith Barron lead miner aged 59, his wife Hannah (Erwine married 28th November 1835 at Alston) 61.
See 26th October 1872, 13th March 1875, & 9th January 1875

27th December 1873 (Hexham Courant)
LETTER FROM A WEARDALE MAN IN NEW ZEALAND
The following letter from a Weardale man at present in New Zealand will be perused with considerable interest by our readers: -
Auckland, August 25th 1873.
Dear Sir, You will have thought me a long time in writing, but your turn has come at last. We arrived at Melbourne on the 26th of May, after a splendid passage of fifty-eight days.
We had two deaths on board, and with this exception nothing particular occurred except a ship that hove in sight of us about eight o'clock on the morning of the 15th of May, the wind at the time blowing very hard and the strange vessel kept running alongside of us all day causing great excitement aboard our ship. The Captain and Mate said the "Brisbane" had never been passed, so they put out "Stancils," but some of the passengers found fault as it was blowing a gale at the time. A fair wind, however, at five o'clock that night brought her within five or seven miles of us and coming right on our course bid fair to pass the "Great Brisbane." Next morning at daylight found her two miles off, but she still kept up to us until two o'clock in the afternoon when she made off to the seaward of us. She ran up her flag, but as the wind was blowing from us, we could not make her out. We parted at dark the second night about broadside on, after running between 315 and 316 miles the two days after they were in sight of each other. We stayed nearly a week in Melbourne, and then left by rail for Bendigo, which I arrived at safely the same night. I had not got Bob's address, so I stayed all night at a hotel and started out next morning to enquire after him. I saw a school of 500 scholars let loose at noon but none of them new my friend. I even went to the headmaster, but learned nothing. I next retraced my steps to another school and there found his son John Bunting. He escorted me to his father's house, telling me his father was at home. I passed by the door, and his mistress spied me and came out to meet

me. Bob was struck speechless, as he had never heard of my leaving the “Old Country.” We set out together to the hotel for my luggage, and on our return enjoyed a good chat. Bendigo is a grand place, the streets and shops being fully equal to those of Melbourne, being built on a flat by the Old Poles Camp, in fact the whole of the flat is laid out in towns and is nearly all built upon. There is a town between Long Gully and Eagletroke; it is nearly all town from Bendigo to Sailor’s Gully. An omnibus leaves Bendigo for Eagletroke every fifteen minutes, besides lots of cabs. I walked over to Mines Flat and saw the old place. The place where you and Scotty worked is all removed and a lot of gold in it. Where your tent formerly stood in Sailor’s Gully is now a neat row of brick houses, at the foot of which is a steam engine at work. Making down for Mires Flat way you come to Pegleg, which is cut out from the surface many feet down before the miners sunk a shaft, which proved very rich. Bendigo is also very rich in ore, for I stood on a ridge and counted fourteen reefs at work, running across the gulley’s, some of the shares not fifty yards apart, with steam engines at work. From fifty yards apart, the reefs extend to half a mile, and even some to six or eight miles in length, while some of the claims are eight hundred feet deep, paying well. Bob is working at a claim that nearly all belongs to one Lazareth, a Dutchman. It all belonged him at one time, and he made so many and sold about fifty thousand pounds worth, and then had one hundred thousand bid for the remainder, but answered that he had no use for the money, and would rather keep them.

He has a large brick house near the mine, and lives there a very happy old man. There is a person named Bell from about Haltwhistle, or near Carlisle, who has done very well in Bendigo. He has a share in two very rich claims, and has bought a station and other land, in old Lazareth’s claim where Bob is working; the head superintendent belongs to Middleton in Teesdale, and the head manager is a Weardale man. House rent is very high in Bendigo, five to seven shillings per week being paid for a two-roomed cottage. The land is all bought up, except what is held by the company, and if you want to build on their ground, you have to pay so much a year. I stayed a week at Bendigo and then left for Ballarat by way of Castlemaine and thence to Keswick Creek, Castlemaine is a very nice town. I stayed a week at Ballarat, and saw Jonathan Featherstone. He is a storekeeper, and seems to be doing very well although lame on the hip joint. I went and saw John Clennel, in his house on the swamp. He has a fine looking woman for his wife, and has a good house and garden. He also grows a great deal of fruit and cabbages. Last year he sold over twenty pounds worth. He sends his respects to you and Joseph Taylor. I left Ballarat and went to Smith Creek and Pigrest, and onward to Linteneo. I also visited Thomas and Joseph Milburn. Thomas is a thriving butcher while Joseph and William have six hundred acres of land near Hamilton. They went on to the farm about ten years ago and paid for it at the rate of two shillings per acre per year. He has now got it clear and obtained the title deeds. He has upwards of five hundred sheep. He has been offered £3 per acre but declined it and is about to buy more. The landowners or farmers are best off here, at least they appear to have most money, are well dressed and all ride a good horse accompanied by a greyhound or dog. When we crossed Keeler Plains we had a full view of the greyhound coursing which was at its height, about fifty horsemen passing us at the gallop, some of whom cleared the fences well and a few had to seek the gates. The hares are very

numerous, and have bred well, one I had hold of weighing ten pounds. After we got back to Melbourne, we stayed a week and visited all the principle places in the town.
Leaving by way of Model Island in a steamer called the Alabama on the 29th June, we arrived at a place called the Bluff on the South Island on the 5th July, and stayed eight hours. Our next stoppage was at Port Chalmers where we lay two days. I took the railway and went up to Duneadery. It is a very pleasant town with 1700 inhabitants. We next put into Port Lyttleton where we stayed two days, then Port Wellington where we changed vessels at the end of a couple of days, and proceeded to Port Picton, and thence to Nelson where after lying three days we made New Plymouth and Manukan Harbour about six miles from Auckland. I took a coach and arrived thither, and after a brief sojourn engaged a passage on board a steamer northwards to a place named Matakana in order to visit my brother. I next journeyed to Tamhou on Mount Hamilton, the highest mountain north of Auckland. This was the mountain where the Maoris had their camp and stronghold. It has a very sharp peak on top, and around its summit are rifle pits four feet deep studded with trees. I next shipped to an island called Kawau, where the Governor Mr George Gray owns 500 acres of land, and employs thirty men. He has a very pleasant residence in the bay close to the sea. At the time of my visit, his men were engaged in making a road around the island by the shore. I was in the back apartment of his house and enjoyed a short chat with the doctor and the girls. I would have seen Mr Gray only the boatman would not wait as our ship was laid out in the stream. They told me the old gentleman was very fond of conversation with strangers. The land in this country is very poor, being badly drained, the topsoil being red clay and under a white clay with sandstone under that. The clay is as fine as soap, and not a stone in it. Where my brother is it is very heavily wooded, one tree measuring 37 feet in girth. The timberland is said to be the best as after it is cleared and sown-down in grass the grass dies out and esparto and dandelion overruns the land. The dandelion has roots on it as large as any carrot ever I saw grown in Weardale, and some of the tops measure a foot in breadth. Sheep fatten well on the dandelion; in fact, some of the best sheep I ever saw came to this market. I could buy 400 acres of land adjoining my brother for £2 0, but the labour seems too great.
There is lots of land for sale from 100 acres at 1s 6d to 1000 acres sold by auction the other day at 3s per acre. I could not tell what sort of land it was as a man like me arriving in a strange country has to begin life anew. There are some good chances to buy land cheap but a person will have to reside in this country a while before he can discern where the best land lies. I intend to go up to Wicaioa in a few days time, as I hear the best land lie there, but the Maoris dwell in that direction and hold the best land. Speaking of sheep, those in the market I mentioned before weigh from 100 to 130 pounds, and the fat has to be cut off the ribs before they can sell the meat. The natives are a fine, strong race of people and very friendly with each other. When they meet they often kiss each other, but they do not kiss in the same form as we do, they put their nose ends together and press for a minute, and sometimes cry “Opiley.” Well I have taken a house in Auckland, till I see what I am going to do. Auckland is a very nice place standing on rolling hills and gulley’s nearly surrounded with little bays or arms of the sea jutting in, the breadth of the land

from shore to shore being only six miles from east to west. Mrs A. joins me in kind love to Mrs Lee and all at Stocksfield hoping she may early recover from her illness. Since we left the country, we have had no news from home, so you must write and address your letter to Mr Joseph Vipond, Matakana, Marsden County, Auckland, New Zealand. (*Daily Southern Cross 30th September 1875, Deaths: At his residence, Matakana, Mr Joseph Vipond, late of Tynehead, Alston, Cumberland, England; aged 55 years. Home papers please copy.)* It may happen that I will have removed ere your letter arrives. Bob has not seen William Walton for about a year. He has seen Parker about three weeks before I landed. He had been at Bendigo and had seen the claim where Bob works. We have had nice weather. Good-bye at present.
I am yours truly, THOMAS ANDERSON
In 1841, at Rigg Side, Middleton in Teesdale, Nancy Heward John Heward married Nancy Airey, Nancy died 4th quarter of 1846) aged 50, Jonathan, lead miner, aged 25, Thomas, lead miner, aged 20, Jacob, lead miner, aged 20, George, lead miner, aged 20, Henry, lead miner, aged 15, Robert, lead miner, aged 15, Nanny 14, James 12, Elizabeth 10, Dinah 8, and Nanny 3.

10th January 1874 (Hexham Herald)

ALSTON

Mr Thomas Stubbs has been appointed master of Nenthall schools in place of Mr Tomlinson and enters on his duties on Monday next.

17th January 1874 (Hexham Courant)

NENTHEAD PAYS

The annual pays of the Governor and Co's workmen in this district was held at Nenthead on Wednesday, 7th inst. We understand the amount paid was about £5,000. The place was as usual visited by a number of tradesmen from adjoining places, the public houses were well patronised, although the Good Templars have been for some time been exercising a very beneficial influence. Things passed over very quietly.

17th January 1874 (Alston Herald)

TINDALE FELL

We regret to learn that typhoid fever is at present raging in the neighbourhood of Tindale Fell Spelter Works, four deaths having occurred during the past week.

Typhoid fever is a serious and potentially fatal bacterial infection. It can cause symptoms of fever, abdominal pain and constipation. If they are not treated, symptoms can rapidly get worse and lead to serious complications, such as internal bleeding.

Typhoid fever is caused by bacteria called Salmonella typhi (S. typhi). It can be contracted by eating food or drinking water that has been contaminated by the S. typhi bacteria. Risk factors include, overcrowding, poor sanitation/untreated water, and poor personal hygiene.

The incubation period of Typhoid fever is usually one to two weeks, and the duration of the illness is up to six weeks. (www.nhs.uk)

Symptoms

- *poor appetite,*
- *headaches,*
- *generalized aches and pains,*
- *fever 39 - 40 °C*
- *sweating*
- *sometimes a rash of rose-coloured spots.*
- *lethargy, and*
- *diarrhoea.*

In 1881, at St John's Chapel, Joseph Jackson, farmer and inn keeper, aged 46, wife Mary 30, children George, cartman, aged 18, Matthew, cartman, aged 15, Isabella 12, Joseph 10, Mary Ann 7, John James 5, and Sarah Jane 3.
In 1891, at Blagill, Hill Top, Joseph Jackson, farmer, aged 56, wife Elizabeth (Teasdale, married 1st quarter of 1885, at Newcastle) aged 27, children John James, assistant on farm, aged 15, Sarah Jane 13, Caroline Rose 3, and Thomas 6 months.
At Alston 18th inst. aged 79, Hannah Longstaff, widow.
In 1851, at Skelgill Plains, William Longstaff, mason, aged 57, his wife Hannah 56, children, John, mason, 23, Matthew, labourer, aged 21, Eliz 18, Magtt 15 and Ann 9.
In 1871, at Kings Arms Row, Alston, Hannah Longstaff, widow (husband William Longstaff, stone mason, died 1st quarter of 1859), formerly domestic servant, aged 77, daughter Ann, servant, aged 28, grandson William M. Longstaff 3, lodger Thomas Jackson, plasterer, aged 22, and lodger George Hodgson, plasterer, aged 21.

28th March 1874 (Hexham Herald)

ALLENDALE

DEATH OF ALLENDONIAN AT THE ANTIPODES.

Reported that Mr Matthew Carr one of the oldest and most respected residents of Stawell, died on Friday night 16th January, a little after 9 o'clock; from typhoid. His origins were as a lead miner from Allendale, Northumberland. "Being a hard working, frugal and intelligent man he became possessed of valuable mining property on the Cross Reef, best known as Carr, Dixon and Company; claim which for a number of years yielded very well and is still likely to give good returns at a greater depth. We understand that his wife and family are fully provided for. …"
The following press report mentions Matthew Carrs claim:
The Argus (Melbourne) Saturday 21 July 1866
Mining in Ararat
*Out of claim No. 7 North Cross Reef (held by Messrs. **Dixon** and **Carr**) sixteen tons of trial stone were crushed, taken in-discriminately from the reef, and it would from the result appear that this stone bids fair to yield for the present ten pennyweights per ton; this is the first stone they have raised in this claim out of the deep reef (remake), and it is taken from a depth of 460 feet from grass.*

The Argus (Melbourne) Thursday 22 January 1874
IN the SUPREME COURT of the COLONY of VICTORIA In its Probate Jurisdiction-In the Will of MATTHEW CARR, late of Stawell, in the Colony of Victoria, Miner, Deceased -Notice ' is hereby given, that after the expiration of fourteen days from the publication hereof application will be made to the Supreme Court in its Probate Jurisdiction, that PROBATE of the WILL of the above named Matthew Carr, late of Stawell aforesaid, miner, deceased, be

granted to Matthew Dixon, of Stawell aforesaid, miner, Edwin James Bennett, of Stawell aforesaid, surgeon, and Isabella Carr, of Stawell aforesaid, the widow of the said deceased, the executors and executrix named in and appointed by the will of the said deceased
Dated this 22nd day of January, 1874

Deaths

At Blagill, Hilltop, 21st inst, aged 73 years, Mrs Ann Hilton widow.
In 1841, at Blagill Hill Top, Thomas Hilton, lead miner, aged 40, wife Ann (Jackson, married 9th November 1826) aged 40, children Jonathon 13, William 12, George 7, Thomas 5, John 2, and Ann 3 months.
In 1851, at Blagill Hill Top, Thomas Hilton, landed proprietor, aged 51, wife Ann 49, children Jonathan, lead miner, aged 23, William, lead miner, aged 21, George, lead miner, aged 17, Thomas 14, John 12, Sarah 7, James 4, and visitor Hannah Hilton, dress maker, aged 25.
Thomas Hilton died 3rd quarter of 1854.
In 1861, at Blagill Hill Top, Ann Hilton, widow, occupier of land, aged 61, children George, lead miner, aged 27, Thomas, lead miner, aged 24, Sarah, dress maker, aged 17, and James 14.
In 1871, at Blagill Hill Top, Ann Hilton, widow, farmer, aged 70, sons George, lead miner, aged 37, Thomas, lead miner, aged 35, and James, lead miner, aged 23.
At Elba, Nenthead, 21st inst., aged 5 weeks, John son of Mr Joseph Teasdale, lead miner. *In 1881, at Elba, Joseph Teasdale, lead miner, aged 31, his wife Mary J. (Tatters, married 3rd quarter of 1872) aged 30, children Ralph 6, and Isabella 1.*
See 27th February 1869, 31st August 1872, 12th May 1877, 14th June 1884, 5th March 1887, & 20th August 1887.
At Alston, 22nd inst., aged 1 year, Annie, daughter of Thomas Spark

31st March 1874 (Cumberland and Westmorland Advertiser, and Penrith Literary Chronicle)

SUDDEN DEATH at NENTHEAD.—A case of sudden death occurred at Elba, Nenthead, on the morning of Saturday week. Mrs. Teasdale, wife of John Teasdale, lead miner, left her child, John Teasdale, six weeks, in bed. She noticed that it looked pale, but though it was sleeping soundly, and she would not disturb it. At about eleven o'clock in the forenoon her sister-in-law went in and the mother asked her to go and look at the child. On doing so she found that life was extinct.

4th April 1874 (Hexham Courant)

WEARDALE

At the quarterly meeting of the committee of the Weardale Miners Association held on Saturday evening at the Black Bull Inn, St John's Chapel, the following average wages (made out from sheets prepared by the committee) for the half year ending June 30, 1873, were laid before the meeting: -

8th April 1874 (Teesdale Mercury)
TEES SALMON FISHERY BOARD
… Mr Waistell called attention to the injury done to the fishery in the upper part of the river by the practice of hushing, which had very much increased of late. The only time they could depend on finding the Tees in a fit state to fish was on a Monday. The hushing came down as far as Darlington, It principally took place on the property or the Duke of Cleveland and Mr Bowes, and he thought that representations on the subject should be made to the agents of these landowners. By a new process of washing which had lately been commenced near Middleton-in-Teesdale, a lot of rubbish was allowed to come down and fill up the holes below Middleton Bridge. If catch-dams were made so as to get the water to settle down, and then let it be run off when there was a flood, they would be able to get the rubbish away. —The Chairman said all kinds of suggestions had been made to the Duke of Cleveland and Mr Bowes on the subject of hushing the river. The only really good suggestion would be an indictment. (Hear, hear). —In reply to Lieut, Col. Scurfield, the Chairman said that further had been done in the matter of Dinsdale Dam. It was in a state of "grim repose."—Lieut. Col. Scurfield then gave notice that be would bring the question of the compulsory purchase of Dinsdale Dam before the next meeting of the Board. —The Deputy-Secretary announced that the amount received for licenses for Hartlepool, Stockton, and Darlington, since last meeting was £154.—The other business was unimportant.

11th April 1874 (Hexham Herald)
Deaths
At Donks Hall 4th inst., aged 2 years, Matthew Stout, son of John Stout.
In 1871 at Donks Hall, John Stout lead miner and farmer aged 44, wife Hannah 40, children Jane 16, John 14, Mary Ann 12, Stephen 9, Henry 6, William 4, Margaret 1. See 1st May 1869, 29th May 1869, & 31st March 1883

25th April 1874 (Hexham Herald)
ANNUAL MEETING OF THE WEARDALE LEAD MINERS ASSOCIATION.
The annual meeting of this association was held on Saturday evening in the Town Hall, St John's Chapel, Mr Nathan Race presiding. ...
At their annual meeting held in that place last year certain resolutions were passed, which were left in the hands of the committee to carry out. The first with which they had to deal had regard to the "lent money" that they make a request to Mr Beaumont for an increase in "lent money." They presented this request to Mr Beaumont's mining agent, and he was happy to say it was no sooner made than it was granted. (Applause) He believed there was not a lead miner in Weardale but who had received this boon with thankfulness, (applause) and this act of generosity on the part of Mr Beaumont had done more to bring about a better state of feeling between that gentleman and his workmen than had obtained for a long time. Mr Beaumont was also requested to raise the standard wage (as the basis upon which to make bargains) to 25s a week. This however, was not granted like the other; but looking at the average wages for the last half year, they saw that they had nearly come up to 25s a week something over 24s a week, a great improvement upon the past, as the average wage two years ago were only 14s 2d. This last half year it had been 24s 4d. It was also resolved that they form a lead miners association in Weardale. On the 3rd May, the association was established, and so far, it had been a success. They had experienced a most peaceful year, and if it were properly conducted, there would yet be a better understanding between Mr Beaumont and his workmen. ...
During the year, 363 members had been booked, and they hoped by another year to have considerably added to their number. ...
Mr Joseph Kellett moved that the best thanks of the meeting be given to Mr Beaumont, and Mr Cain, the manager, for their kind assistance in the past.

The proposition was heartily seconded, and carried by acclamation.
The proceedings then terminated.

2nd May 1874 (Hexham Courant)

SALE OF LEAD ORE

On the 28th ult., the sale of 100 bings of lead ore took place at Alston, when the following parties competed for the purchase of the same, namely, Messrs Shield and Dinning offered the sum of £5 1s 6d per bing, Walker, Parker, and Co., £4 10s, Jacob Watson and Co., £4 18s 6d and the London Lead Co., £4 15s per bing. Messrs Shield and Dinning having made the highest offer became, therefore, the purchasers. The lead ore was the produce of a lead mine called Dowpot Syke, near Alston, but which is better known by the name Lapboard.

2nd May 1874 (Hexham Herald)

Marriages

See 24th May 1873

9th May 1874 (Hexham Herald)
ALSTON
BOARD OF GUARDIANS.
... A letter was read from Mr Bainbridge, Middleton in Teesdale with respect to a communication received from the Committee of Council on Education that an infant school was to be provided with a certificated teacher at Nenthead to accommodate 89 children. Mr J. J. Millican stated that the mines were at present very poor and the population was diminishing. The London Lead Company's school had accommodation for 358 scholars, but they had now, in consequence of the reduction of population, only 195 on their registers, and the schools were a heavy expense to them at present, letting alone providing an infant school and mistress. The rules of the Company admitted children even six years of age, but they were not refused if they were under that age. The boys were allowed to leave at 12 years of age and the girls at fourteen years. At present, there were at least forty houses empty. In 1871 there were 337 children in the Nenthead district (including Nenthall) between the ages of six and fifteen, and they intended to take the census of the children again, so as to present further facts of the decline of the population to the Committee of Council. Mr Millican stated that from a census taken in January 1873 there were only 261 children in Nenthead between the ages of 5 and 13 years, so that in their present school there was ample room for the whole. ...
The Board of Guardians agreed there was no need for an infant school and wrote to the Committee of Council for Education accordingly.

16th May 1874 (Hexham Herald)
Deaths
Alston 13th inst. aged 19, Sarah Elizabeth Dickinson, daughter of John Dickinson.
In 1861, at Raise, Alston, John Dickinson, draper, aged 41, his wife Hannah 41, children Mary 7, Sarah E 6, Frances H 4, and Phillis Errington, widow, annuitant, aged 38. In 1871, Sarah aged 16, was at school in Poulton le Fylde, Lancashire.
At Hillersdon Terrace, Nenthead, 11th inst., aged 47, Hannah Watson, wife of Thomas Watson, Lead Mine Overman.
In 1861, at Hillersdon Terrace, Thomas Watson, lead mine overman, aged 43, his wife Hannah aged 34, and daughter Ann aged 18.

In 1871, Thomas Watson, lead mine Overman, aged 54, living at Hillersdon Terrace with his wife Hannah (Parmley married 2nd quarter 1842) aged 43. On 30th June 1868 Ann, married Matthew Raisbeck a lead mine Overman and in 1871 they were living at Hillersdon Terrace. In 1881 the census shows them living at Beldy House, Matthew a lead mine agent.

At Allenheads 17th inst., aged 1 year and 8 months, Elizabeth Hetherington, *(christened 8th December 1872, at St Peter, Allenheads)* daughter of Mr Joseph Coats, Land Agent. *See 2nd October 1867.*

29th May 1874 (Northern Echo)
DEATH OF JOSEPH MOORE, OF WESTGATE, WEARDALE.
It is our duty to record the sudden and melancholy death, which took place at Westgate, Weardale, on Sunday last, of Mr Joseph Moore, one of Weardale's literary men. In the afternoon he was cheerful and hearty, and had a long chat with a neighbouring friend, who left just before tea time, having, in the meantime, an invitation to come in again in the evening. After his friend had left, Mr Moore went up stairs whilst tea was being prepared, and just as his mother called him to come down he had fallen from his chair, where he sat at the table writing. The unusual noise called the attention of his brother, who, on going up stairs, found him lying on the floor. He held his hand to his heart, said, “Oh dear," and in about ten minutes expired. Every valley has its worthies, and Joseph Moore was one of those of whom we are all proud. Mr Moore, bred and born in the dales, and brought up to follow the occupation of a lead miner, rose to be an inspector of lead mines under W. B. Beaumont, Esq, a position he filled for many years. He was a self-taught man, and had an excellent knowledge of lead mining, both practically and theoretically, and was well versed in geology. He was also a talented musician. Of literature he was very fond, having written extensively, but published sparingly one article, we may remark, “An etymological hunt," in *Weardale Forest* was from Mr Morris’s *(Sic)* pen. He was an extensive reader, and took great interest in politics and social topics of the day, those of an antiquarian bearing being his specialty. He was warmly respected by all who knew him, and he had many deeply attached friends, who, with his relations, and his wife and two children, sincerely mourn and feel his great loss. Deceased was 50 years of age, and was interred on Wednesday, at St. Andrew’s Church, West gate.
In 1851, at Stanhope Forest Quarter, Benjamin Moore, lead miner, aged 48, his wife Ann 49, children, Joseph, lead miner, aged 27, Ann 25, Thomas, lead miner, aged 23, George, lead miner, aged 20, John, lead miner, aged 16, Sarah, 14, Elizabeth 12, and Benjamin 8.

Benjamin Moore died 2nd quarter 1860, registered at Weardale.
In 1861, at Stanhope, Ann Moor, widow, aged 59, children, Joseph, inspector of lead mines, aged 37, George, lead miner, aged 30, John, lead miner, aged 36, and Elizabeth 22.
In 1871, at Stanhope, Ann Moor, widow, aged 69, sons, Joseph, mining agent, aged 47, and John, lead miner, aged 36.

12th September 1874 (Hexham Courant)

FATAL ACCIDENT TO A HALTWHISTLE MAN IN NOVA SCOTIA.

We cull from a Nova Scotian newspaper the following account of the death of John Jackson on the 14th August last, at the Albion Mines, Nova Scotia. The deceased was the son of Mr William Jackson, of Redpath, near Haltwhistle, and went out to Nova Scotia four years ago. He was at Stonecroft and Greyside lead mines previous to his going abroad. He was 36 years of age.

"Sad and fatal accident; two men instantly killed at Foord Pit, Albion Mines. A terrible accident occurred at Foord Works, Albion Mines, on Saturday last causing the death of two men, John Jackson and John Potts. They were about to descend the pumping shaft; Jackson being in the tub and Potts stepping in, when the hoist rope parted and both were instantly precipitated down the shaft. Jackson fell a distance of 650 feet and ended a lifeless corpse in a tank of water nine feet deep. Potts struck on a "butting" timber about 30 feet down the shaft, to which he clung for a few seconds, then fell 60 feet further striking his head on another "butting" timber, and then fell across another timber 50 feet further down, where it remained; falling in all a distance of about 140 feet. The unfortunate men, by the fall had their clothing and shoes stripped of them, and yet strange to say their bodies were not nearly so much mangled as would be expected.

The accident was of course caused by the breaking of the hoisting rope, which was comparatively a new one, and had been most thoroughly tested before being put into use. The strands of wire, where they parted, appeared to have rusted away. The rusting is supposed to have been caused by a piece of Marline which had been wrapped around the rope at that point, (serving the purpose of a "token") holding water which caused the wire strands to rust off. This however, is in some doubt. One of the men who assisted to bring the copses up out of the shaft informed us that only a week previously he had descended the shaft by the same rope when it appeared quite firm, giving no indication whatever of weakness.

Both of the unfortunate men leave sorrowing wives and helpless children, Jackson leaving five and Potts four. … Works were suspended during the day of the funerals in the works of the Halifax Co.

12th September 1874 (Hexham Herald)

STANHOPE

FATAL ACCIDENT AT AN IRON STONE MINE.

On Tuesday, a fatal accident occurred at the Weardale Iron and Coal Company Iron Stone mine at Red Vein, Stanhope. It appears that the workmen fired a hole or shot and one of them Thomas Golightly of Stanhope along with his son had gone to work out the rock after the shot and a quantity of debris had fallen and crushed him to death. Deceased was about 60 years of age and leaves a family.

In 1851, at Sunderland, Stanhope, Mary Golightly, widow, aged 70, son Thomas, farmer, aged 25, his wife Frances aged 25, and daughter Mary 1.
In 1851, at Sunderland, Stanhope, Mary Golightly, widow, aged 84, son Thomas, farmer of 70 acres, aged 39, his wife Frances aged 39, their children, Mary 11, Frances 9, George 7, Elizabeth 4, and Ann 1.

In 1861, at High Farm, Stanhope, Thomas Golightly, iron miner, aged 48, his wife Frances 48, children Frances 19, George, iron miner, aged 17, Elizabeth 4, and Anne 11.
In 1871, at Eastgate, Stanhope, Thomas Golightly, ironstone miner, aged 58, wife Frances 58, children George, lead miner, aged 25, Annie 21, and William, Ag. Labourer, aged 16.
In 1881, at Front Street, Stanhope, Frances Golightly, widow, formerly dress maker, aged 69, daughter Annie 30, and son William, blacksmith, aged 26.
Frances Golightly died 3rd quarter 1884, aged 72, registered at Durham.

George Golightly married Sarah Ann Hewitson 1st quarter of 1873; Sarah Ann Golightly died aged 29, 2nd quarter of 1877.

George Golightly widower married Frances Ward, 29th June 1879, at Stanhope.

In 1881, at Graham Street, Stanhope, George Golightly, manager of ironstone mine, aged 37, his wife Frances aged 36, born Allendale, children John Thos. 7, Frances Mary 5, and George E. M. 1 year.
In 1891, at Gas House, Stanhope, George Golightly, gas stoker, aged 47, his wife Frances 46, children, John Thomas, limestone quarry labourer, aged 17, George Ernest Mowbray 11m William 8, and Jane 7.
In 1901, at Front Street, Stanhope, George Golightly, Spar miner, aged 57, his wife Frances 56, and son George Ernest Mowbray, clerk in Co-op store, aged 21.

George Golightly died 27th July 1902, at Stanhope, aged 58.
Frances Golightly, died 30th April 1909, aged 64, at Stanhope.

19th September 1874 (Alston Herald)

TEESDALE

Mr R. W. Bainbridge said “the London Lead Company contemplated working the mines by machinery, and his son was then in Germany watching operations with a view to the introduction of the appliances at home”.

19th September 1874 (Hexham Courant)

DEMISE OF A NATIVE OF ALSTON IN AUSTRALIA

We have had forwarded to us the appended notice from the Ballarat Star of June 20, of the funeral of Mrs. Lakeland, who was a native of Alston. Her husband, Mr. Lakeland, a native of this town was formerly a clerk to Mr. W. A. Temperley, after which he commenced business in Hexham, along with Mr. James Watts, as grocers and provision dealers. About twenty years ago Mr. Lakeland emigrated to, Ballarat in Australia, where by perseverance and enterprise he has been very successful in business. He married the subject of the subjoined remarks in Australia, but we may state that Mr. and Mrs. Lakeland paid a visit to their nature country some two years ago. The following is the extract referred to: -

" The funeral of the late Mrs. Wm. Lakeland on Friday afternoon was largely attended, between forty and fifty: carriages filled with the most influential citizens forming the solemn cortege.

Before the funeral started from the residence of Mr. Lakeland, Victoria Street, service was conducted in St. Paul's Church by the Ven. Archdeacon Stretch, the Revs. R. T. Cummins and Allanby being present. Amongst those who followed the remains of the deceased was the president and members of the committee of the Orphan Asylum, of which institution the husband of the deceased has been for some years, and is still, the honorary treasurer, also the committee of St Paul's Church. The pallbearers were Messrs Robson, Pinnell, Towl, Twentyman, Thompson, and Hall, and the burial service at the Old Cemetery, was read by the Rev. R. T. Cummins. The arrangements connected with the funeral were undertaken by Mr. F. Atkins. The deceased lady for many years took an active part in promoting, the welfare of several charitable institutions, amongst others, the Ladies Clothing Society, the Female Refuge, and the Lying in Hospital. Her services were also given to the superintendence of the boarding-out of children from the Industrial Schools and she was most active in promoting the welfare of St. Paul’s Church especially at the time when heavy liabilities had to be incurred through the damage done by a mining company. The district has lost an active worker in the cause of charity, and one it could but ill spare.”

The Argus (Melbourne)
Friday 19 June 1874
Deaths.

10th October 1874 (Hexham Herald)
Alston
It is with extreme regret that we chronicle the death of Mr William Dalton, manager of the Smelt Mills at Nenthead. He had been ailing in health lately, and had resorted to Ilkley in Yorkshire for the benefit of his health. ... on Wednesday evening, his remains were brought to the station and conveyed thence to Nenthead.
The internment we believe takes place today (Saturday). The deceased was a member of the Society of Friends, and was universally respected. He expired 3am on Tuesday (*6th*) aged 49 years.

9th January 1875 (Alston Herald and East Cumberland Advertiser)

ALSTON BOARD OF GUARDIANS.

The usual fortnightly meeting of the members of the above Board was held in the Board Room, Town Hall, on Saturday last, the Rev. O. James, Clargill Hall, occupying the chair. The other guardians present were—Mr Thos. Dickinson, Spency Croft, Alston; and Mr Jos. Renwick, Garrigill. The minutes of the previous meeting having been read by the Clerk (Mr Jos. Dickinson), and confirmed, the members proceeded to sign the cheques for the day. Respecting the notice of motion which was moved at last meeting, the Chairman moved that the appointment of medical officer for the higher or No. 2 district (Nenthead) be postponed until next meeting. Agreed to.—The Workhouse Master's (Mr Dickinson's) report was then read by the Clerk, from which it appeared that the house was in a satisfactory condition. The Board then proceeded to consider the out relief cases.

SANITARY AUTHORITY.

At the termination of the above meeting, a meeting of the Sanitary Board was held. The usual routine of business was transacted, the Inspector having nothing to complain of, the town being in a healthy condition.

HIGHWAY BOARD.—The usual quarterly meeting of the waywardens of this district was held in the Board Room, Town Hall, Alston, on Saturday last, but owing to the severity of the weather there was not sufficient attendance to transact business.

16th January 1875 (Northern Echo)

SEASONAL BENEVOLENCE. —At Middleton-in-Teesdale, during the past week, Mrs Bainbridge, of the of the Middleton House, has distributed to widows and the deserving poor about thirty cart loads of good coals.

16th January 1875 (Alston Herald and East Cumberland Advertiser)

GARRIGILL

The members belonging to the Garrigill Beading Room Institute held a coffee supper in the old School-room, on Saturday evening last. The weather was highly unfavourable, a more dreary and gloomy night we could scarcely have, the atmosphere being thick and cloudy, accompanied by a heavy rain. Notwithstanding this drawback a large company assembled, presenting a lively and vigorous scene, among whom was a goodly number of the fair sex, with their costly winter garb, and smiling faces giving additional lustre to the occasion. The proceedings commenced by holding a public meeting in the Wesleyan Chapel, (kindly granted by the trustees for the occasion), the chair being taken at six o'clock, and ably occupied by Mr Adam Walton, of Alston, formerly a native of Garrigill, who, after a few very appropriate remarks, characteristic of reading and improvement, called upon the secretary to read the report, which was as follows:—Number of members 95, being an increase since last anniversary of 11. Number of volumes in the library 397, average circulation each month 45, newspapers and periodicals which are taken into the room.:—Newcastle Daily Chronicle, Carlisle Journal, Public Opinion, Hexham Herald, Alston Herald, Newcastle Weekly Chronicle, Cumberland and Westmoreland Advertiser, Illustrated London News, Punch, Bow Bells, Chambers Journal, Leisure Hour, and Bible Educator. Papers and periodicals presented to the room—Carlisle Patriot, Daily Standard, Gardener's Chronicle,

and Blackwood's Magazine. The financial income was £24 15s 2½d and the expenditure being £12 0s 5½d, leaving a balance in the hands of the treasurer of £5 14s 9d. The chairman came forward and gave out the hymn" Come let us join our cheerful songs With angels round the throne, Ten thousand are their tongues, but all, their joys are one," which was sung with delight by the whole congregation.—Mr Thomas Ramsay of Alston, next followed with an eloquent address, giving encouragement to reading to the young and rising generation.—Mr George Peart, of Alston, in an address rivetted the attention of the whole audience with the most fluent oratory, and sublime language, on the improvement of the mind. Rev W. Johnson, superintendent minister of the Primitive Methodists of Alston, gave a most, interesting speech, touching upon the pamphlet written by Mr Gladstone on the Papal Church.—Votes of thanks to the speakers and Chairman were given, the singing of the doxology, the benediction was then pronounced, and this interesting meeting was brought to a close. Then followed the supper in the school room, the tables being filled with the most splendid cake and tea, literally tottering beneath their load, being a sight such as is seldom seen on such occasions, when upwards of 150 partook of the excellent spread. The tables were gracefully presided over by Miss Jane Stephenson, Miss Annie Hall, Miss Sarah Davidson, and Miss Isabella Hutchinson, assisted by Mr Friend Hardman, Mr Guy Walton, Mr John Dodd, and Mr William Shield. The Garrigill Brass Band were in attendance and discoursed some pieces of music, in first class style, adding greatly to the evening's entertainment.

23rd January 1875 (Hexham Herald)
Deaths
At Clitheroe, 1st inst aged 39, John Barron, Coal Miner.
In 1871 John Barron (son of Smith Barron & Hannah Erwine) coal miner aged 35, wife Ann (Anne Angus married 29th May 1859) aged 32, children, Mary J. 11, Hannah 10, Joseph W. 6, Frances E. 5.
See 27th Dec 1873 & 17th May 1878.
At Alston, 19th inst aged 35 Jane Slack wife of Joseph Slack Tailor.
In 1871, at Hundy, Alston, Joseph Slack, tailor employing 2 apprentices, aged 39, his wife Jane (Parmely, married 1st qtr 1864, registered, at Newcastle) aged 31, children, Margaret A 5, Mary H 2, and Harriet 4 months.
In 1881, at Hundy, Alston, Joseph Slack,widower, tailor, aged 48, daughters, Margaret 15, Mary Hannah 12, and Harriet 10.
Joseph Slack died 2nd quarter 1886, aged 54, at Alston.
See 6th December 1873
At Prospect Hill, Allendale, 18th inst., aged 50, Thomas Milburn, Mason.

Also of Henry their son
who died July 7 1886
aged 62 years

23rd January 1875 (Alston Herald and East Cumberland Advertiser)

APPOINTMENT OF PAROCHIAL MEDICAL OFFICER AND MEDICAL OFFICER TO THE SANITARY AUTHORITY FOR THE HIGHER OR NO 2 DISTRICT

The appointment to the above offices was left over from the last meeting, as there were only three guardians present.—Mr J. J. Millican said that Dr Carson had been appointed (by the London Lead Co.) as successor to Dr Horder for a period of six months; he would reside at Alston, but keep an assistant at Nenthead.—Dr Gill applied (by letter) for the vacant appointments, but he did not wish his application to be prejudicial to any other qualified medical practitioner, should one come to reside in the higher district.—It was remarked that when Dr. Carson previously held the appointment under the Lead Co. he also held that under the parochial authorities.—Mr T. Dickinson very forcibly recommended his re-appointment, but he was met with the very plausible objection that Dr. Carson had not applied for it, while they had an application from Dr. Gill.—Mr Millican explained that the former gentleman had not had time to make an application since he heard of his appointment by the Governor and Co.—A discussion followed, which resulted in a farther postponement till next meeting; the difficulty in the way of Dr. Gill's appointment being a clause to the effect that where a parish is of sufficient extent to cause it to be necessary to divide it for municipal purposes no medical officer should be appointed over a district exceeding in area of 1,500 acres. Alston with Garrigill, containing about 36,000 acres, had been divided so as to form two districts,

and the medical officer for the lower district could not also hold the appointment in the higher district should a properly qualified person come to reside in it, the area of the two being too great, although the population was far below the prescribed number. It was stated that there was scarlet fever at Nenthead, which circumstance would necessitate immediate action.—Mr Millican said there was only one case of fever, and the person was entitled to the services of the company's doctor, as was the case with most of the poor in Nenthead, as disabled workmen and their families together with the widows of former workmen, were entitled to such services.—The matter was allowed to stand over till next meeting. Mr Mulcaster said that he visited the Workhouse on Friday last, and found all very orderly and satisfactory. There was a woman in the house who had been removed from the Hexham Union, who intimated a desire to go and live with her brother at Nenthead, if the Board would allow anything towards the maintenance of herself and a girl she had at present residing with her brother.—Mr Dixon said he had heard nothing further of it.—Mr Walton, relieving officer, said that the brother had called upon him to make enquiries as to the maintenance of the girl, but did not say anything about wishing to have his sister to go and live with him; the probability was that he could not do anything for her further than giving her house room. The case was allowed to stand over in order to give the brother an opportunity of appearing before the Board and making his request.—Mr Dixon said that there was a stranger in the workhouse who was very ill, but there was no fever as yet; he was in a very bad state, but would likely be better when the medicine he had got operated, for he had had a good quantity of it.

27th January 1875 (Northern Echo)

CUTTING A NEW LEAD MINE
AT EDMONDBYERS.

The quiet village of Edmondbyers is likely to become much livelier than it has hitherto been, as, a few days ago, a lead mining company carrying on operations at Swandale, about half-a-mile from Edmondbyers, struck a rich lode of ore. The vein is a cross one, or north and south, and appears to be extensive, being in some parts where it is cut a foot wide of solid ore. The mine is worked by the Hexham and Edmondbyers Lead Mining Company, and has been in operation over four years, the outlay being over £8,000. It is a new trial, and was thought by many to be a failure, but the enterprising manager, Mr William Dodd, pushed on through all difficulties, and though he had a large quantity of water to contend against, he persevered, in full confidence of opening a mine, his labours have been crowned with success, and a mine has been cut quite beyond his expectation. Pieces of ore have been got four and six stones weight, two specimens, weighing seven stones, are exhibited at Mr Thompson’s Inn. They are nearly solid ore, of a first-class quality. Lead ore is the topic at Edmondbyers.

30th January 1875 (Hexham Courant)

WEARDALE
LIMESTONE QUARRYMEN AND THEIR WAGES

A meeting of the owners of limestone quarries in Weardale was held on Tuesday at the offices of Messrs. J. W. Pease and Partners, Darlington, for the purpose of considering a contemplated reduction in the wages of their

workmen. There are about 2000-limestone quarrymen employed in Weardale by Messrs. J. W. Pease and Partners, Messrs Bell Brothers, Bolckow, Vaughan and Co.; Messrs Ord and Maddison of Darlington, and other firms represented at the meeting. A resolution was passed after some discussion to the effect that the price paid for quarrying should be reduced one penny per ton; that the price paid for "bearing", that is, the removal of the sand and other rubbish overlying the limestone, should be reduced not less than 5 per cent; and that the wages of quarrymen working by the day, platelayers, horse drivers, engine drivers, firemen, blacksmiths, and general labourers be reduced 1s per week; horse drivers not to be reduced below 21s, nor blacksmiths below 22s per week. The price paid at the present time for quarrying limestone is 8d to 8½d per ton. The wages of the quarrymen have been advanced altogether 66 ¾ per cent upon the standard of 1871; or in other words, they rose from 6d per ton in the latter year to 10d per ton in 1875. In April last, however, a reduction took place of 24 per cent, leaving wages still 41¾ above the rates of 1871. This difference will now be still further diminished by 16¾ per cent, so that the wages will after the reduction just resolved upon comes into force be 25 per cent higher than the prices of 1871. The changes proposed in the wages of the limestone quarrymen of Weardale will be likely to take place in other parts of the North of England where limestone is quarried for the purposes of the Cleveland iron trade.

Marriages

At Alston, Primitive Methodist Chapel, 27th inst, Mr Joseph Haldon to Miss Jane Graham, both of Alston.

In 1881, at Delaval Terrace, Benwell, Joseph Haldon, coal miner, aged 35, his wife Jane 28, children James Wm. 5, Lizzie J. 3, and Margaret 1.
Joseph Haldon died 2nd quarter of 1890, aged 45, at Alston.
In 1891, at Edmunds Lane, Alston, Jane Haldon, widow, laundress, aged 37, James Wm, stocking knitter, aged 15, Foster 9, and Louisa M 4. In 1901, at Lord St., Westgate, Newcastle, Dorathy Archer, widow, aged 71, visitor Jane Halden, widow, aged 47, boarder Forster Halden, leather harness maker, aged 19, and boarder John Thompson, slaters cartman aged 34. In 1911, at 169 Beaconsfield St., Newcastle, Jane Haldon, widow, aged 57, daughter Margaret 31, son Foster, saddler, aged 29, and adopted daughter May Haldon, shorthand typist, aged 18. See 26th October 1872, 30th January 1875, 18th December 1875, & 15th March 1884

Deaths

At Alston, 28th inst. aged 20, Mr William Graham.

In 1871, at Buntly Syke, Alston, Sarah Graham, widow, formerly domestic servant, aged 68, daughters Sarah, dress maker, aged 35, Mary Ann, dress maker, aged 28, and grandson William Graham, drapers apprentice, aged 16.

At Coanwood, 24th inst. aged 39, Mr Thomas White, formerly of Alston. Deceased was secretary to the miners union.

In 1861, at Ramsey's Buildings, Alston, Thomas White, lead miner, aged 25, wife Mary (Bowman, married 15th July 1858) aged 22, children Margaret J. 2, and James 2 months.
In 1871, at Lambley, Thomas White, coal miner, aged 35, wife Mary 32, children Margaret Jane 11, James 10, Mary Elizabeth 8, Ann Isabell 5, Hannah 5, Alice 3, Sarah 3 months, and lodger Thomas Armstrong, coal miner, aged 16.

In 1881, at Labne Head, Haltwhistle, John Tallentire, coal miner, aged 49, wife Mary A. (White married 4th quarter of 1878 at Haltwhistle) aged43, children Robert J. Tallentire, coal miner, aged 17, Mary Eliz. White, general servant 17, Annie Isabella White 14, Hannah White 14, Sarah Tallentire 11, John W. White 7, and John Tallentire 1.

At Leadgate, Durham, 19th inst. aged 65, Jane widow of Mr Matthew Glendinning, Allendale.

In 1861, at Studdon, Matthew Glendinning, farmer of 16 acres & stonemason, aged 73, wife Jane 52, son Matthew 10, grandson James Glendinning, stonemason, aged 24.

Matthew Glendenning died 4th quarter of 1869, aged 81.

In 1871, at Walk Hill, Allendale, Jane Glendinning, widow, seamstress, aged 62.

30th January 1875 (Alston Herald and East Cumberland Advertiser)

SANITARY REPORT.

The following is the report of Dr Gill, referred to in our last week's in the report of the Alston Board of Guardians' meeting

"The Sanitary Board of the Parish of Alston."

Gentlemen,—According to instructions as Sanitary Medical Officer for No. 1 district, I have made out a separate tabulated form of the mortality, and as it is impossible to give any tabular form of sickness occurring, I may take this opportunity of mentioning as far as I am enabled what has come under my own observation. Since my appointment there has not been any remarkable prevalence of contagious or infectious diseases. A few cases of scarlatina and diphtheria came under my notice, but they were isolated and erratic, probably disinfection and fumigation with isolation of the sick, may have been serviceable in stamping out the disease. Those complaints most frequently occurring may be said to arise from the vicissitudes of our climate on of its high elevation above sea level (1000 to 2000 feet) and high range of temperature from 90 deg. Fah„ the highest point during the hottest period last summer, and 30 deg Fah. of frost or 1 deg below zero.

Bronchitis, pneumonia, pleuritis, consumption, and catarrh, rheumatism, and remittent fever of children will goitre may be considered significant in forming my conclusions.

The chief part of my duties as you are aware have been in the inspection of any nuisances which might be considered injurious to the health of the people. Having been appointed in March last, I have since that period visited nearly every inhabited house with its surroundings in the district. In doing so I am glad to inform you that so far I have found nothing disagreeable from the occupants, and generally they have been civil and obliging. In one case of impure water, that of Jane's Well, which was contaminated by various noxious customs, I am enabled to give a good account. Through the kind attention of others, that opening at the head of the town has been closed in, and a good supply of water is now conveyed to the Butts for the use of the neighbourhood. In one instance there was a spring conveyed by an imperfect conduit under the floor of an inhabited house which produced bad smells, (strange to say, a case of diphtheria occurred in that very house) but by the owner I believe, Mr Millican, laying the conduit down with earthenware pipes at our suggestion, he has completely prevented dead rats from becoming a source of disease, a suitable

grating where the conduit terminates in the chief sewer being effectual in stopping the live one's going up to the spring. I have previously reported the various ashpits, privies, and manure steads which have been inspected, and very satisfactory action in every case has been the result. Such, gentlemen, are the cursory observations I have now made, and I trust that in future reports you will perceive that there is great progress going on towards improvements in the health of the people, and that material aid towards preventing disease will result. (Signed) RAILTON GILL, M.D., and L.R.C.S., of Edinburgh.

6th February 1875 (Hexham Herald)
Deaths
At Allendale, At Hindley Hill, 30th ult., aged 4 months, George son of Nicholas R. Forster. *Farmer of 117 acres*
At Allerwash, near Newbrough, 29th ult. aged 62, John Nattrass, formerly Miner.
In 1851 living at Chesterwood, Haydon John Nattrass aged 38, Iron ore miner, born Weardale, his wife Dorothy aged 37, born Lanchester, children Elizabeth 12, Ralph 10, Thomas 7, and John 2.
In 1861 living at Page Croft, Haydon John Nattrass lead miner aged 48, his wife Dorothy 47 (Hall married 1840, died 1863), Thomas 17, John 12, and Dorothy 9.
In 1871, at Allerwash, John Nattrass widow, aged 58, lead miner, Dorothy (his daughter aged 19 born North Warden), and grandson Ralph aged 9 months.
Ralph married Jane Watson 1861, they had 4 children, Ann, William, Mary and Thomas in 1871; Jane died in 1875.
Ralph re-married in 1876 to Elizabeth Race in 1871 living at Crook Billy Row, Ralph Nattrass, coal miner aged 42, his wife Elizabeth 30, children William coal miner 17, Mary 15, Thomas coal miner 13, and John 4.

12th February 1875 (Northern Echo)
THE NEW LEAD MINE AT EDMONDBYERS.
Hidden away, amid the moors and fells of Hexhamshire, and secluded from the ordinary track of every-day life, on a bleak hill-side, with hardly a trace of human life visible, and shut in by beetling fells, overgrown with brown and shaggy gorse, are the very insignificant-looking workings of a small mining Venture—to say workings is perhaps to dignify the wooden shed or two, and the small water-race close by, with a title which would excite the risibility of a more extensive projector of schemes for exploring the bowels of the earth. But taken in conjunction with the value of the mineral below, any cynic would grant, that they deserve the title much more than many of the pretentions structures which abound in mining districts.
The history of mining explorations at this spot, which is known in the neighbourhood as Swandale, dates back for a number of years. From time, immemorial the villagers of Edmondbyers—about three-quarters a mile distant—could tell tales of how an ancient load seeker, familiarly styled among themselves "Th'owd chap," spent lots of money in his search for wealth, and left behind him nothing but the traces of his labours. The spot has not proved so secluded as to be hidden from the eyes of London projectors, and some years ago a company was formed for the purpose of following up the search, but their efforts were fruitless. After their failure, it seemed as though the fell

side would be left at peace. Apparently, every effort had been made to make the earth disgorge its treasure, but hitherto, instead of doing so, it had only swallowed the money spent in each attempt. In the face of all this discouragement however, a native of the neighbouring village, and foreman mason at the Derwent Lead mines, some two miles away over the fells, determined to try his hand in the search. He prospected after his own fashion, and became satisfied that if the work was gone on with, with right good will, lead—and this valuable metal in abundance— would be the reward.

Mr William Dodds, of Edmondbyers, offered his services and the information he possessed to the right people, and shortly a company was formed, having Mr Pearson, of Newcastle, as its principal shareholder, and distributing its shares in the venture—at the modest sum of twenty-five shillings each—over a large area, some finding their way on to the Continent.

The work now proceeded under different auspices, having the advantages of a local man, one whose knowledge of the nearest mines was turned to the best advantage, Tho new manager explored the old workings, and while doing so discovered three shafts on the top of the fell, and one horizontal, driven in the same mound. Having calculated his chances, he commenced, nearly three years ago, to sink a shaft on the south-east, and made an oval opening of nine feet by seven feet. The work went on but slowly; for, in the first place, the sinkers came on an immense bed of millstone grit, and was much troubled and impeded with water.

The venture proceeded so slowly, and the prospects of success seemed so obscure, that Mr John Cain, of Hartley, Kirkby-Stephen, one of the mining managers of the Messrs Pease, was invited to prospect the mine. He went to Swandale about two years ago and "dialled" the shaft from the Derwent mines. His advice simply amounted to a suggestion continue the work, and the sequel will show of how much value this opinion really was. The venturers did proceed. A water-wheel was rigged alongside the shaft, the water-power was obtained from a river adjacent, known as the Burnhope, and in the rear of the wheel a trench 25 feet deep, from the top of the shaft was dug
through shale and clay to carry off the pit water, and to act as a tail-race.

In the meantime, Mr Dodds, the manager, met with nothing but discouragement from his neighbours. Hard names were used, and he was accused of digging a hole and throwing people's money into it. He still persevered, however, and at length passed the millstone stratum. and then met with signs of success, He had now got sixteen fathoms deep, and then put into force the information he had; obtained by exploring "th' owd chap's " workings. Unknown to many he had there met with traces, sufficient to satisfy himself, of three lodes of lead, running east and west, and in searching for these blasted and dug his way from the bottom of the shaft due west for ten fathoms.

About the middle of January last, when the frost abated sufficiently to allow the water apparatus to work, the men went down as usual one day, and, after a short time, the long hidden treasure—a mine of lead—flashed in the light of their candles, It was not till the first day in February, however, what with weather hindrances and the rocky difficulties of the drive, that the ore could be properly got into, and now it is found that the lode runs from north to south, to an unknown extent while the height up and down in the way that lead usually lies, and the thickness of the seam has not yet been ascertained. It is need

less to add that the “croakers” now have nothing more to say, for the lead, apparently, is abundant, and of a most excellent quality. Things have taken a considerable turn the immediate locality, and the shares in this mine—which so far has only cost between £2,000 and £3,000-—cannot be bought for £20 a piece.

The working of the Edmondbyers Lead Mine bids fair to become one of the staple industries of the neighbourhood. The present condition of affairs is as follows: —Four men are employed as miners, and a like number at the top of the shaft, bringing the ore to the surface by means of a windlass. The large waterwheel, which has supplanted the smaller one first worked, is 30 feet in diameter, is connected with the perpendicular spear by four cranks, and conveys the water out of the mine to the trench with two buckets 11. and 9in. respectively. Nine or ten strokes a minute can be obtained, and the displacement is between one and two hundred gallons in the same time. The ore seems to improve, if possible, as the work proceeds, and as an attempt is being made, by cutting northward through the ore, to reach one of the east and west veins, a junction may be made, and then the company will feel still safer in enlarging their operations. As it is, more men are being put on, and a better road made through the soft and hillocky ground which runs along the foot of Swandale Fell to the highway about half-a-mile distant. When this is completed, the way will be open for steam machinery and all the paraphernalia of crushing and smelting mills, and soon, as the mine shows every sign of continued richness, the quiet fell side will be as busy a scene of life as “th’ owd chap" himself would have wished to see in his day. It may be mentioned here that the Derwent Mines, which still continue to yield, are worked at a very much greater depth than 16 fathoms, but it is suggested that if the different altitude of the two workings were taken into consideration, the seams would be found to be about the same depth. The nearest railway station is Burnhill, about five and a half miles from the mine; the line is continued from there on the one side to Waskerley, about a mile nearer, and on the other aide to Benfieldside and Shotley Bridge, about six miles off. Stanhope, on the Weardale side, is farther away still, being seven miles. The roads are well made, however, but perhaps the company, should their venture develop, may make some advantageous arrangement for the carriage of their lead. The company have taken the precaution to reserve a large plot of ground for their mining operations.

The project of the Hexham and Edmondbyers Lead Mining Company has to all appearance turned out most prosperous. We are sure no one will deny that their perseverance, and particularly that of their manager, deserved such a result, and it will be some satisfaction to them to think that their adventurous spirit, with a comparatively small pecuniary outlay, should have been rewarded with a mine which may surpass with its richness even their utmost expectations.

13th February 1875 (Hexham Herald)

Deaths

At Alston, 5th inst. aged 77, Irving Watson, widow.

In 1841, at High Rotherhope, Garrigill, Thomas Watson, lead miner, aged 55 wife Irving (Thomas Watson married Irwin Ramshaw, 25th January 1817, at

Alston) aged 45, children Joseph, lead miner, aged 20, John, lead miner, aged 15, and Isabella 14.
Thomas Watson was buried at Garrigill 20th February 1844, aged 57.
In 1861, at Shield Hill, Garrigill, Joseph Watson, lead miner, aged 34, brother John, lead miner aged 32, and servant Irving Watson, lead miners widow, aged 65. In 1871, at Town Foot, Alston, Irving Watson, widow, formerly domestic servant, aged 75.
At Ivy House Garrigill, 6th inst., aged 5 hours, Phoebe, and aged 5 hours, and Rebecca, aged 15 hours twin daughters of William Bird Brown, Yeoman.
In 1841, at Garrigill Gate, William Bird, cattle dealer, aged 50, and his wife Sarah aged 50. In 1851, at Ivy House, Garrigill, William Bird, landed proprietor, aged 63, his wife Sarah 64, servants Robert Hawthorne 41, Mary Slack 22, and lodger, Eliz Beckton, elementary teacher, aged 27.
Also at Ivy House, in 1851, Elizabeth Brown, widow, proprietor of houses, aged 37, children Phebe 11, Sarah 9, and William B. 8.
In 1861, at Ivy House, Garrigill, William Bird, widow, landed proprietor, aged 73, born Skirwith, Cumberland, boarder Rob Hawthorn, carter, aged 56, niece Phebe Brown, house maid, aged 21, niece Sarah Brown, dairy maid, aged 19, and servant Ann Bell18.
In 1871, at Ivy House, Garrigill Gate, Elizabeth Brown, head, widow, annuitant, aged 58, son William Bird Brown, farmer of 255 ½ acres, aged 28, servant Elizabeth Earl aged 25, servant John Smith aged 15, and Mary Bird, widow (William Bird aged 76, married Mary Slack aged 59, 20th December 1863, at St John, Garrigill), annuitant aged 67.
In 1881, at Ivy House, William B. Brown, farmer of 144 acres, aged 38, his wife Sarah B. (Pickering, married 4th quarter 1871, East Ward, Westmorland) aged 33, children Julia P. Brown 8, Lucy F. 7, Evangeline 2, Sarah E. 6 months, and farm servant Thomas W. Atkinson 15. In 1891, at Rope St., Penrith, William B Brown, retired farmer, aged 48, his wife Sarah B 43, Julia 18, Lucy F 17, Evangeline 12, Sarah E 10, Phoebe 8, Josephine P 7, and Victoria T B 5.
Garrigill Epitaphs give: —

13th February 1875 (Alston Herald and East Cumberland Advertiser)

REFUSING TO QUIT A PUBLIC HOUSE.

Peter Swindle was charged with refusing to quit a licensed public-house when requested to do so by the police on the night of January 7. Charge admitted. P.C. McDermot stated that at a few minutes past 10 o'clock on the night of the 7th ult., he was on duty at Nenthead, when his attention was called to a disturbance at the Board Arms. On proceeding thither he found defendant drunk and wanting to fight one of the attendants. He put him out and order was again restored. He went back about 20 minutes past 10 when he was there again, but went away quietly on being requested to do so. —By the Chairman: He was making a great disturbance, and the landlord requested him to put him out.—Sergt. Grisdale explained that it was during the time the Nenthead pays were held when there was an extension of time granted to the public-houses at Nenthead. There was no previous complaint.—Fined 10s and costs, and advised to refrain from resisting the police, more especially when there was a disturbance.

TO MINERS

TO BE LET

THE SINKING of an AIR SHAFT at GRASSFIELD MINE near Nenthead, Alston Moor. For further particulars apply to Mr JACOB CRAIG, Mining Agent, Garrigill, near Alston, who will receive Tenders for the same up to March 7, 1875.

20th February 1875 (Alston Herald and East Cumberland Advertiser)

DISSOLUTION OF AN OLD MINING COMPANY, AND PRESENTATION TO THE MINING AGENT, AT NENTHEAD.

One of the oldest mining companies in this district, "Carrs West of Nenthead Mining Company," has been dissolved, the interest in the mine having been purchased by the London Lead Company. A meeting of the shareholders was held at the house of Mr Joseph Blacklock, Crown Inn; Nenthead, on Friday, the 12th inst., when the consideration money was divided. A substantial dinner was served up in Mrs Blacklock's usual commendable style. The chair was occupied by Thos. Shaw, Esq., of Shield Hill, Garrigill, who has been connected with the above mentioned directly and indirectly for near 60 years. The cloth being removed, the venerable and respected Chairman said it was his pleasing duty to present to Mr Blacklock a slight token of the estimation in which he was held by the Carrs Mining Company, and of the appreciation of the manner in which he had fulfilled his duties as their agent during the 16 years he had held the appointment. The shareholders of the company also wished to manifest their high appreciation of the worthy hostess, Mrs Blacklock, and of the kind-heartedness she had always shown towards them since he had the pleasure of her acquaintance. The articles presented were two handsome pieces of plate, procured for the occasion by Matthew Smith, Esq., Battle Hill, Hexham. The presentation to Mr Blacklock was a handsome cup, bearing the inscription—"Presented to Jos. Blacklock by the Shareholders of Old Carrs Mine, 1875." The article presented to Mrs Blacklock was a handsome gravy spoon, with her initials inscribed thereon.—Mr Blacklock returned thanks on behalf of Mrs Blacklock and himself for the kindness manifested towards them. Alluding to the articles which had been presented to them, he said they would take care of them, and treasure them up while they

lived, and would hand them down as heirlooms to their family.—The health of the Chairman was proposed by Mr Wm. Hall, coal agent, Alston, who alluded to the many years they had gone hand in hand in mining speculations. The business of the Old Carrs Mining Company was then brought to a close by drinking to the health and prosperity of Matthew Smith, Esq., of Hexham, amid expressions of regret on account of his unavoidable absence. He was also honoured with a vote of thanks for the trouble he had taken in procuring the articles which had been presented to their mining agent and his partner in life.

Deaths

At Allendale Town, 17th inst. aged 27, William, second son of Mr George Stobbart.

In 1871, at Allendale Town, George Stobart, cordwainer, aged 55, wife Margery 48, children William, cordwainer, aged 23, Jane A. 19, Harrison, labourer, aged 15.

27th February 1875 (Hexham Herald)

13th March 1875 (Hexham Courant)
NENTHEAD
DEATH FROM BURNING AT NENTHEAD.
On the afternoon of Friday last, Elizabeth Barron of Nenthead, had occasion to leave the house for a short time. During her absence her daughter, Maria Barron, a girl about 7 years of age, attempted to take the kettle of the fire when her clothes ignited. Her cries attracted the neighbours, who hastened in, and lost no time in extinguishing the fire. ... The girl gradually succumbed to the effects of the injuries she received, and died about 10 pm on Monday last.
Marriages
At Alston, Wesleyan Methodist Chapel, 11th inst. Mr Matthew Tindle to Miss Elizabeth Dawson, both of Alston.
In 1881, at McAdams Buildings, Alston, Matthew Tindle, Engine smith, aged 70, born Longbenton, his wife Elizabeth, aged 47, and niece Ann Davidson aged 11.

20th March 1875 (Alston Herald and East Cumberland Advertiser)

ALSTON BOARD OF GUARDIANS

VACCINATION.

A letter was read from the Local Government Board, in reference to the alterations recommended to be carried out as to the arrangements for official vaccinations in the districts comprised in the parish of Alston. The Local Government Board had duly considered the matter; they had consulted Dr Airey on the points raised in the letters of the vaccinating officers of the districts comprised in the parish; and they were convinced of the necessity for the arrangements as recommended being carried out. Similar arrangements had been carried out in districts or parishes similarly situated, and wherever such recommendations had been adopted they had been found to produce good results. As to the objections of vaccinating officers that a great number of children would be presented for vaccination on the first day of each stated period, and would have to be vaccinated with preserved lymph, the recommendation was that only what was considered a sufficient number should be vaccinated on the first day, and from them lymph would have to be taken for those who came on subsequent days. The recommendations are that instead of vaccinations being performed at frequent intervals they shall be confined to two period, of three weeks each, in April and October, at stated times and places. At Alston at residence of Dr Gill, at Nenthead and Garrigill at convenient places selected by Dr. Carson. At Alston the attendances are recommended to be on the 1st, 2nd, and 3rd Mondays in April and October; at Nenthead on the 1st, 2nd, and 3rd, and at Garrigill on the 2nd, 3rd, and 4th Mondays of the said months, the attendance at Garrigill being on the same day as at Nenthead but at a later hour, so that after the first week lymph may be procured at Nenthead to be used at Garrigill; the charges being fixed by Act of Parliament as follows:—For every successful vaccination performed at the residence of the vaccinating officer or within one mile of such residence, 1s. 6d ; over one mile and within two miles, 2s; beyond that distance for every successful vaccination 3s. It was explained that Dr Carson had previously held the appointment of vaccinating officer for the No. 2 district while there was a resident medical practitioner in the district, the arrangements being that he —(Dr Carson) performed the duties on the same terms as if he was residing in the district, but there now being no medical practitioner residing in the district, and both stations where vaccinations were to be performed being more than two miles from the residence of Dr Carson, he would now be entitled to 3s for each successful vaccination.—An application from Dr. Carson for

reappointment under the new regulations, as vaccinating officer for the No. 2 district, was then, read and the appointment made.

STANHOPE

PRESENTATION.— On Saturday evening last, the workmen employed at the London Lead Company's works at Stanhope and other friends assembled at the Good Templars Lodge Room, Stanhope, for the purpose of presenting Mr Anthony Bolton with a testimonial on his leaving the works, where he had been foreman for ten years, for Nenthead. A tea was prepared, the trays being under the management of Mrs A. Bolton; Mrs T. D. Bolton; Mrs Rote. Walton; Mrs Maddison and Miss Bainbridge. After the company had done justice to the excellent cakes and tea, Mr T. D. Bolton was voted to the chair. Having opened the proceedings with a few well timed remarks he called upon Mr Nixon Coulthard, one of the oldest "mill hands," to make the presentation, which consisted of a black marble time-piece, ornamented with gilt, and beautifully inlaid with Russian malachite. The time-piece, which was artistically built, was from the establishment of Messrs. Reid and Son Newcastle-on-Tyne, cost £9 9s., and was inscribed "Presented to Anthony Bolton by the workmen employed at the London Lead Co's Works, Stanhope, as a token of respect on the occasion of his leaving for Nenthead." Mr Coulthard, on making the presentation spoke in most eulogistic terms of their foreman, and assured the company that he felt proud of his duty in making the presentation, but at the same time deeply regretted Mr Bolton's leaving; however, he hoped that the testimonial would not only tell him the time of day, but keep in remembrance the respect in which he was held by his old workmen. After a few more imitable remarks he made the presentation. Mr Bolton kindly accepted the handsome testimonial, and assured them that it would be prized highly, and would ever be valued as a mark of their respect and esteem. In thanking them be said that during the ten years he had been foreman at the Stanhope Mills, he had always acted honestly and fairly between man and master. The chairman next gave a humorous description of his trip to the continent, after which a choice selection of songs, duets, recitations, readings, &c., were given by Miss Maddison, Miss Normanson, Mr Moores, Mr McGee, and Mr E. D. Bolton. The whole of the proceedings passed off satisfactorily.

Anthony Bolton (born 1844, at Dufton, son of William and Hannah Bolton) had been the foreman at Stanhope Mills, he was leaving to take up the job of Manager at Nenthead Lead Works. The 1871 census, gives him aged 26, born, Dufton, Westmoreland, he was married to Rebeka aged 26, a schoolmistress, born Leeds, Yorkshire. In 1881 Anthony's sister Mary Bolton, aged 49, was living with them at Nenthead, they had no children. See 16th July 1910

LOCAL NOTES

As will be seen by referring to our advertising columns the inhabitants of Garrigill have decided upon having a suitable building as a public School room. This has long been felt to be a serious want, for the present building is declared to be not only unhealthy, but otherwise unsuitable for the purpose to which it has been for so many years devoted. …

TO LET,

THE several works of BUILDING a NEW SCHOOL at GARRIGILL. Plans and Specifications may be seen on application to Mr JOSEPH WATSON, Crossgill, who will receive sealed Tenders for the Contracts, either together or separate,

up to Monday, the 5th day of April, 1875. The Managers do not bind themselves to accept the lowest or any offers. THOMAS SHAW, Chairman. Garrigill, 17th March, 1875.

Deaths

At Clitheroe, 12th inst., aged 10 months, Margaret Ellen, daughter of Mr Watson Robinson.

Thomas Robinson married Mary Thompson 26th February 1807, at St Augustine's, Alston.

Marriages
At Alston, Wesleyan Methodist Chapel, 23rd inst. Mr William Craig, Crosslands, to Miss Sarah Ann Robson, Silly Hole.
In 1881, at Sandhill, Alston, William Craig, stonemason, aged 35, his wife Sarah Ann 31, children Ann Alice 5, and John Joseph 3. See 2 February 1878

27th March 1875 (Northern Echo)
MINING IN THE EDMONDBYERS DISTRICT.
The cutting of the rich vein of lead ore at Swandale by the Hexham and Edmondbyers Mining Company, Limited, has been the cause of much excitement in the immediate neiglibourhood, and also in the towns of Hexham and Newcastle, where, we believe, the shareholders chiefly reside, and from which towns numbers of people have visited the scene of operations. We understand that the company's shares have changed hands at almost fabulous prices, and that now the prices that are being obtained would show that the value of tbe mine is £80,000. It is, we believe, the intention of the directors to push on the operations at the mine with vigour, dressing floors and machinery for preparing the ore for market will be proceeded with at once. It is the opinion of practical men that the mine will bear still better at a lower depth than that already attained. It is intended to put down a powerful steam engine for pumping and winding purposes. This will admit of the mine being sunk to a lower level, when, no donbt, the anticipations of the company will be fully realized. We are informed that the ground on the south side, immediately adjoining the above-named company's operations, has been taken by a party of local gentlemen, and that they have already commenced operations on the course of the same vein. It is generally thought that this vein is the same as that being wrought by tbe London Lead Company, at Bollihope, where it is 15 feet wide, and rich in ore, the output during last year amounting to something like 2,800 tons. Thus, with Swandale on the north, and Bollihope on the south, the new company's undertaking at Harehope Gill can hardly fail to be successful.
The London Gazette of 23rd January 1891, recorded that a meeting was to be held on 23rd February at 7pm, at Newgate Street, Newcastle to show the "Manner in which the winding up of the Hexham and Edmondbyers Mining Company had been conducted" by the liquidator.

3rd April 1875 (Hexham Courant)
GARRIGILL
FATAL ACCIDENT
On Monday, the 29th ult., an accident occurred in the Ladies' Walk portion of the Gov. and Company's Browngill mine, by which a young man named William Slack, of Leehouse, Tynehead, unfortunately lost his life. At about one o'clock he was engaged with his partner, John Armstrong in boring a hole for a shot, when the portion of the roof of the mine immediately above them fell upon the two men, a large mass of nearly a ton weight striking Slack and crushing him down. When it was got off him, he was found to be alive but

fatally injured. He was quite sensible and complained of a pain in his back and chest. He was got out of the mine alive, but died on the way home. His partner was not much hurt. Slack was 35 years of age, unmarried, and was the only support of his mother a widow. He was a remarkably quiet, inoffensive man, and deep sorrow is felt at his untimely death. An inquest was held at the house of Mr Thomas Bell, Leehouse, on Wednesday, the 31st ult., by the deputy coroner for East Cumberland, and a verdict of "Accidental death" returned. The foreman of the jury, Mr Watson of Crossgill suggested that the fees of the jury be given to deceased's mother, which was agreed to.
In 1841 the family living at High Lee House James Slack lead miner 35, wife Betty (Lee, married 17th March 1825, at Alston) aged 35, children Jonathan 14, Hannah 11, James 7, William 2, and John 2 months.
In 1851 at Gate, Betty, lead miners widow, aged 45, children James, labourer, aged 17, Wm, labourer, aged 11, J Joseph 9, Thomas 7, and nurse child, Anny Thompson, aged 1 year.
In 1861, at Garrigill, Elizabeth Slack, lead miners widow, aged 55, sons William, lead miner, aged 21, and John J. lead miner, aged 20.
In 1871, at Lee House, Garrigill, Elizabeth Slack, widow, grocer and farmer of 6 acres, aged 66, and son William, lead miner, aged 31.
In 1881, at Garrigill Gare, Elizabeth Slack, widow, grocer, aged 75, died 30th January 1888. See 4th February 1888

1st May 1875 (Alston Herald and East Cumberland Advertiser)

ALSTON RURAL SANITARY AUTHORITY

… Balance on hand, £31 5s 0d. The clerk reported a letter from Dr Horder (late of Nenthead), which contained his annual report, and an apology for not sending it sooner, for reasons over which he had no control. It seemed that the deaths in his district for, the last year were from all causes 61. There were not many from Zymotic diseases, *(term formerly applied to the class of acute infectious illnesses e.g. typhus and typhoid fevers, smallpox, scarlet fever, measles, cholera, whooping-cough, diphtheria, &c.)* but those from diseases of the respiratory organs were more numerous than usual. This was accounted for by the severe winter we had had. He recommended the dry earth system, but the chairman said it could not be carried out, as it had been tried at Nenthead. Dr Carson's report was read, he said there had been a case of typhoid fever at Nenthead, and he had seen the place disinfected. There were also 5 cases of scarlet fever in Garrigill district, chiefly at Ashgill. The sanitary arrangements were defective, he had ordered a drain to be diverted and the sewers flushed. The inspector reported a case of nuisance at Garrigill, caused by liquid manure coming from Hetherington, and which lay on Mr A. Pickering's property without any means of escape. At Mr B. Brown's the liquid was also standing, and several other places had been visited but there were no complaints respecting them. With regard to Pickering's case it was a repetition of an old grievance, there being previously a drain from Pickering's yard through his neighbour's property, but it had been stopped up. The case had been before the magistrates several times, and we believe a manor court also sat upon it. The clerk reported a case similar to it at Dalton, and it was referred to the Assizes. The board recommended arbitration between the parties to bring about a settlement. Mr Mulcaster thought two members, together with the chairman, might suffice to settle it, but Mr Richardson thought the board might do it, and charge the parties with it, bat the clerk said they had not the power. The meeting was then adjourned for a fortnight.

8th May 1875 (Hexham Courant)

Marriages

At the Wesleyan Methodist Chapel, Alston, 6th inst. Mr Joseph Cousin of Low Silly Hole, to Mary Ann Hetherington of Garrigill Gate.

Deaths

At Nenthall, 29th ult. aged 40, Elizabeth Carr, wife of Mr Thomas Carr.

In 1851, at Nenthall, Sarah Carr, lead miners widow, aged 74, daughter Elizabeth 40, sons Anthony, lead miner, aged 32, Joseph, lead miner, aged 31, and grandson Thomas Carr, lead miner, aged 15.

In 1861, at Nenthall, Elizabeth Carr, unmarried, charwoman, aged 51, and nephew Thomas Carr, lead miner, aged 25.

In 1871, at Nenthall, Nenthead, Thomas Carr, lead miner, aged 36 Elizabeth (Hutchinson, married at Nenthead 19th November 1865) aged 38, and daughter Elizabeth Ann 2 years. In 1881, at Snowdon's Houses, Alston, Thomas Carr, widow, farm labourer, aged 40, daughter, Elizabeth A. aged 11, and aunt, Betty Carr, housekeeper, aged 70.

At Alston, 29th ult. aged 22 Elizabeth Kearton, daughter of Mr James Kearton, deceased.

In 1851, at Shaw House, Alston, James Kearton, innkeeper & farmer of 110 acres, aged 43, wife Ruth (Bainbridge, married 28th May 1835 at Alston) aged 36, children Peter 14, Mary 11, Tom 9, Ruth 7, John 2, and house servant Isabella Metcalf 17.

James Kearton died 1st quarter of 1861 aged about 52.

In 1861, at Hundy Bridge, Garrigill, Ruth Kearton, lead miners widow, aged 46, children John, Ag. Labourer, aged 12, Elizabeth 8, James 4, and grandson Walton 8 months.

In 1871, at Bailes, Alston, Ruth Kearton, lead miners widow, aged 56, daughter Elizabeth, dress maker, aged 18, son James, lead ore washer, aged 14 and grandson Walton 10.

In 1881, at 5 Nenthead Road, Ruth Kearton, housekeeper, aged 66, son James, quarryman, aged 27, grandson Thomas Kearton 11.

See 6th May 1876, 27th April 1878, and 7th February 1885

At Hill Top, Nenthead, 30th ult. aged 52, Catherine Robson, widow.

In 1851, at Hill Top, Ridley Robson, lead miner aged 36, wife Catherine (Irwine, married 16th March 1843, at Alston) aged 28, children Thomas 8, Mary 6, Ridley 3, Isabella 1 (see 9th January 1869), and brother James Robson, lead miner, aged 23. Ridley Robson died 23rd July 1855, aged 40; see 27th July 1855.

In 1861, at Hill Top, Catherine Robson, miners widow, aged 38, children Tamar, housemaid, aged 18, Ridley, lead ore washer, aged 13, Isabella 11, George 8, and Margaret 5.

In 1871, at Hill Top, Nenthead, Catherine Robson, widow, house keeper, aged 49, children Tamer, domestic servant, aged 29, Ridley, lead miner, aged 23, George, lead ore washer, aged 18, and Margaret, house maid, aged 15.

See 5th April 1879, 16th June 1883

At Tower Hill, Alston, 3rd inst. aged 3 months, Catherine Bainbridge, daughter of Mr William Bainbridge. *In 1871, at Low Grassfield, Joseph Bainbridge, lead ore smelter, aged 60, his wife Ann (Jackson, married 8th June 1839, at Alston) aged 60, children William, lead ore smelter, aged 30, Isabella 26, Christopher, blacksmith, aged 24, and John, lead ore smelter, aged 18.*

In 1881, at Low Grassfield, Alston, William Bainbridge, lead ore smelter, aged 40, wife Elizabeth (Dowson, married 4th quarter of 1872) aged 44, children John J. 12, James 7, Mary A. 6, William 4, Elizabeth 2, and Margaret 1.
At Holmefoots, 2nd inst, aged 24, Mr John Stout, Lead miner.
The 1851 census gives Stephen Stout lead miner 29, his wife Elizabeth 27, children Walton 3, and John 1 day. The 1861 census shows Elizabeth a widow, and three more children, Richard 7, Ann 5 and William 3; Stephen died in 1859.
At Priorsdale House, 5th inst, aged 75, Hannah Archer, widow of Mr John Archer.
The 1871 census has Hannah living at Priorsdale House, Garrigill, aged 71 a farmer, with her daughter Mary, unmarried, aged 50, and son William aged 48, unmarried working as a lead miner.
In 1851 at Priorsdale House, John Archer, lead miner, aged 53, his wife Hannah 51, children Mary 30, William, lead miner, aged 28, Joshua, lead miner, aged 20, Isaac, lead miner, aged 18, Edward, lead miner, aged 16, Adam, shepherd, aged 14, Hannah 11, James Odavious 5, and Elliot 3.
In 1861, at Priorsdale House, Hannah Archer, widow, farmer of 1500, acres, aged 61, children Mary 40, William, mason, aged 30, Isaac, mason & farm manager, aged 28, James, mason, aged 15, and Elliott, shepherd, aged 13.
In 1871, at Priorsdale House, Hannah Archer, widow, farmer, aged 71, Mary 50, & William, farmers son, aged 48.
See 16th September 1876

15th May 1875 (Hexham Herald)
Deaths
At Stanhope, 9th inst., Mrs Elizabeth Stobbs late of Allenheads, 10th inst., Mrs Elizabeth Watson.
At Alston, 12th inst aged 77, Thomas Whitfield.
In 1871, at the Temperance Hotel, Front Street, Thomas Whitfield, temperance hotel keeper, aged 72, born Southwark, Middlesex, wife Anna aged 67, born Alston, general servant, Mary Pearson, aged 16, boarder John B G Graham, second class assistant of excise, aged 23, and boarder William North, carpet weaver, aged 25.

17th May 1875 (Northern Echo)
WEARDALE MINERS' ASSOCIATION. ANNUAL MEETING.
On Saturday evening last, the Weardale lead miners held their annual meeting in the Town Hall, St. John's Chapel. There were on the platform Messrs Nathan Race, Westgate; T. Peadon, Secretary, Cowshill; Joe. Walton, Westgate; Joshua Fairless, Wearhead; Isaac Thompson, Bowersheygate; John Emerson, Ireshopeburn; J, Watson, Cowshill; and a good attendance, but not so good as last year. Mr Nathan Race was unanimously voted to the chair, and, in opening the proceedings,
THE CHAIRMAN said that it was their second annual meeting, and, as they were aware, the object of the association was mutual support and protection for their labour in all its branches. Their society was not aggressive in its operations, but for mutual defence. Individually, they were weak and

powerless; but if they were united, they were strong, and would be able to defend the rights of each other. But their association was something more. During the past year they had extended their operations. The benefits had been extended to members who had happened accidents, and those unfortunate members, no doubt, had found it a great boon. During the past year a great deal had been said about the subject of trades unions. The question had often been asked if those combinations of workman were any real benefit to themselves. Men of high authority, and good men, will say no to this question. They tell us unions may do good in prosperous seasons, but as soon as adversity overtakes them, they crumble to the ground. They tell us it will just happen as predicted, that unions, when tried in the balance, wilt be found wanting. But so far these men have been false prophets. Trades onions are standing yet, and look healthy. (Cheers.) Have not trades unions brought about arbitration, and has arbitration not brought about justice? He argued that if onions were properly conducted, there would be a better understanding between masters and men in the present than there had been in the past. In days gone by men groaned under hard taskmasters they sighed for justice, but they did without the right. (Cheers.) Last year they had to announce that their relations with their masters wee peaceful, but this year, during the last mouth, he was sorry to say he had met with men who had got “short lent” money for reasons over which they had no control. Men felt their position a degrading one. There was a time when they had no dread about their “lent money” being stopped if they were able to follow their employment, but if the time was come when, in addition to our daily toll, they lived under the dread of their “lent money“ being stepped, their lot was a hard one. If the article they produced had been falling in the market there might have been a show of reason; but lead was going up. He hoped, however, that things would take a turn, and peace and harmony exist. Let them, as working men, try to do what was right to their masters, what was right to each other, and at all times be united and defend the right; then they would have nothing to fear. (Loud cheers.)

Mr THOS, PEADON read the report, which showed that the total receipts for the year and the balance amounted to £212 16s 1½d; expenditure, £26 6s 1d, of which £16 7s 6d had been paid for accidents; balance, £186 0s 0½d, The speaker thought that owing to the small subscription of 6d per month, and the small number of members, the association was in a satisfactory position. In advocating the onion, he said their present object was to create a benefit fund to assist members in case of accident; and the ultimate object to learn to exercise more fully provident habits, and to look to their independence and not to charity. It was true their funds were small, but accidents were rare. The Mutual Provident Association was on institution that was useful not only to themselves, but to the country at large, and one of its most honourable features was that it would embrace any class of miners. This association would contribute to promote the feeling of brotherhood, which should exist. He believed the time would come when it would have great influence in the dale, and it could not fail to command the respect and assistance of all men, whether workmen or employers, and he had very little doubt but that if the objects of the association were thoroughly placed before the public, a large number would respond and subscribe willingly towards the funds. The labour market has been considerably affected by disputes in various branches, but

has now assumed a somewhat healthier aspect, and several of the larger industries that have been depressed for some time past show signs of revival. They had no such fluctuation of prices for what they produced, nor consequently in wages, lead being about stationary at a high figure. Nobody should object to the capitalist being handsomely paid. If he created work, he was a great benefactor to the community, and he did good in proportion as he exposes and develops the mineral ores. In conclusion, after viewing the question of supply and demand, capital and labour, from different standpoints, he was convinced that employers and employed have interests that should be identical; that one class ought not to flourish without that prosperity being extended to all; and that one class ought not to suffer, and that suffering be confined to themselves alone. (Cheers.)

MR JOS. WALTON moved the adoption or me report,

MR JOHN EMERSON seconded the motion, and, in doing so, spoke at length on the relations between capital and labour, urging that; unity on the part of the men was the only condition under which they could meet the masters on equal terms.

MR JOSHUA FAIRLESS, in supporting the adoption, said that they had met to see if their association was seaworthy for another year. He said there had been many speculations as to whether their society should take in all the clubs and make one society, The association could, no doubt, be extended, and, if so, no better motto could be adopted than “Help to those that need.” He thought the association should continue. It had a committee, and their forefathers, no doubt, regretted that they had net kept a committee; for, sometimes grievances arise, and a committee formed a connecting link between muster and men. (Cheers,)

The report was adopted.

The CHAIRMAN regretted the absence of many workmen. He saw that when they held their first mass meeting, during the strike, the hall was filled, though snow covered the ground. They had got 50s, and they had got 60s lent money, but now the miners were not so ready to come, and he also noticed the absence of tradesmen. They took part with them during the struggle, and if the miners had received a benefit, surely it was for the benefit of the tradesmen, but where were they that night. The Chairman then proceeded to the business before the meeting, and the following were elected as committee-men for the various mines for the ensuing year: —Burtree Pasture—Messrs Joseph Carrick, Thomas Peadon, John Emerson, and John Watson; Kilhope— Messrs T. Fairless, H. Featherstone, and T. Milburn; Greenlaws — Messrs John Lee, Nathan Race, John Wilson, and Joseph Kidd; Grove Heads —Messrs Isaac Thompson and John Lowes; Grove Rake—Messrs John Moor, D. Stanhope, and H. Fairless.

As the society stood, a person who got injured by accident received 5s per week, and a discussion arose as to whether it should not be broader; that any person being injured by accident, at any place or under any circumstances, might receive the benefit. It was ultimately carried that it should be the same as friendly societies in respect to accidents. It was also agreed that £5 be paid when death occurred within two months after an accident.

22nd May 1875 (Hexham Herald)
Marriages
At Stanhope, Primitive Methodist Chapel, 15th inst, George Bright Esq., of Bank Top to Hannah third daughter of Wm. Fairless of East Hassacks, West Gate, Weardale.
Deaths
At Peru, 2nd ult aged 40, William Steel, formerly of Allendale.
In 1851, at Thornley Cottage, Allendale Town, Abraham Steel, lead ore smelter, aged 41, his wife Hannah 41, children William, lead ore washer, aged 16, Dorothy 12, Elenor 11, Sarah 12, Hannah 4, Abraham 3, and John 1. Abraham Steel snr., died 1st quarter of 1853.
In 1861, at Thornley Cottage, Hannah Steel, widow, farmer of 4 acres, aged 51, children Hannah 15, Abraham 13, John 11, and Mary Jane 9.

29th May 1875 (Cumberland and Westmorland Herald)
LOSSES of LEAD MINING IN CUMBERLAND.—Mr. Charles G. Grey, late of Dilston, and now of London, who has for many years held the responsible position of Receiver for the Lords Commissioners of the Admiralty, who possess large estates in the north of England, including the manor of Alston, was entertained to a complimentary dinner on Tuesday night, at the Golden Lion Inn, Alston. A large Company sat down to an excellent dinner, under the presidency of Mr. R. W. Bainbridge, Middleton House (chief agent of the London Lead Company), and the vice-chair was occupied by Mr. T. W. Crawhall, Alston House.—Responding to the toast of his own health, the Chairman said that Alston Moor had been a paying district to the London Lead Company until the last six years. During those six years the produce had fallen off, and the cost of labour increased and the Lead Company's losses had averaged between £7,000 and £8000 a year, and at the present moment the losses were going on at the same pace. He trusted, however, that even on Alston Moor they would yet enjoy better days. In the district of Garrigill the expenditure had exceeded the income for at least half a century, but it looked at the present moment like compensating them for all their perseverance there, and for the mining pluck of the company's agency in that neighbourhood. At Nenthead, although still poor, there were some gleams of hope. He trusted the Lead Company would long remain lessees of the Greenwich Hospital in that neighbourhood.

29th May 1875 (Hexham Herald)
Marriages
At Stanhope, Primitive Methodist Chapel, 22nd inst, Mr Whitfield Colling of Level Gate to Miss Sarah Cragg, of Fair Hills; 24th inst. Mr James Armstrong to Miss Jane Dodds, both of Wolfcleugh.
Deaths
At Burnhope of Scarlatina, 20th April aged 7 years, John youngest son of William Turton; 24th of the same month, aged 4 years Sarah Jane, only daughter of the above, and on the 25th aged 20 years, William, eldest son of the above.
In 1871, at Burnhope, Holmside, William Turton, groom, aged 55, his wife Margaret 39, sons William 16, George 13, and Thomas 3.

Joseph Mitchell Paull son of William and Ann Paull, baptised at St. Mewan, Cornwall on 1st July 1827. In 1841 he was living at St Austell, with his father aged 45, a mine agent, and his brothers & sisters, Maria 17, Emily 13, William 11 and John 11. In 1861, Joseph was living at Loaning Foot, Alston, Moor Master to the Commissioners of Greenwich Hospital, with his sisters Maria Ann and Emily M. In 1871 Joseph is living at Low Byer, Alston with his wife Elizabeth Mary Drake aged 36, with the children from Elizabeth's first marriage (widow of Frederick Paull, Josephs cousin) Henry Baynham aged 12, and Maria Prideaux aged 7, and their own 1 year old daughter Louisa Michell. Joseph and Elizabeth had married in Bedford on 14th July 1868.
In 1881 the census places Joseph at the Bush Hotel, Carlisle, widower, mineral and land surveyor, with his sisters Maria Ann Paull (unmarried), Emily Michell Wilson widow, (she had married George Wilson of Alston), and his step daughter Maria Prieaux, and his youngest daughter Wilhelmina Constance who was born at Alston in the last quarter of 1871. Josephs wife Elizabeth died aged 47, in 1879, in Devon.
In 1891 Joseph, (living on own means), his sister Maria, and his daughter Wilhelmina are living at Park Terrace, Silloth, Cumberland. Joseph died in 1901, his death is registered in the district of Wigton, Cumbria.
See 1st January 1858, 31st May 1861, 22nd April 1864, 18th July 1868, 21st December 1872, and 10th January 1880

5th June 1875 (Alston Herald and East Cumberland Advertiser)

PRESENTATION TO J. M. PAULL, ESQ., AT ALSTON.

J. M. Paull, Esq., of Lowbyer House, Alston, late Moor Master to the Lords Commissioners of the Admiralty for the Manor of Alston Moor, being about to leave the neighbourhood, was on the evening of Friday invited by a number of his friends to meet them in the commercial room of the Crown Hotel, Alston, the object of the meeting being the presentation to Mr Paull of a silver centre piece for dinning room table. The article, which for a very brief period had been exhibited in the window of Mr T. Bramwell, watchmaker and jeweller, Alston, was much admired, and Mr Bramwell was highly complimented on the manner in which he had carried out the views of the committee, after competing with some of the leading firms in the north of England for the supply of the article, which any firm might exhibit with satisfaction and credit. We feel somewhat at a loss in attempting a description, but the following may give some slight idea as to general appearance and design. With centre bowl it was over two feet in height; on the base of the richly ornamented centre pillar were representations of three Griffins, between which were smooth and highly polished surfaces, on one of which was engraved the following inscription;—"Presented as a token of esteem by tenant farmers, mining lessees, and personal friends to Mr Joseph Mitchell Paull, of Lowbyer House, Alston, Cumberland, Moor Master at Alston to the Lords of the Admiralty, on the occasion of his leaving their Lordships' service on the 30th June, 1875." At a few inches from the top were three branches, the ornamentation of which was in keeping with the rest, at the extremity of each branch was a carrier of the Grecian design, richly chased in the highest style of art, and what gave an additional charm to the whole was double rows of silver chains suspended in graceful carves from the various branches. The cost was something over £60. By the time for opening the proceedings the room was filled. Amongst the company we noticed Lieut.

Wilson, Mrs Wilson, and Miss Paull, Nenthall ; Joe. Dickinson, sen., Esq., Lovelady Shield; Dr. Gill; J. P. Walton, Esq., Green Ends; A. Walton, Esq., Manor House, Alston; and Messrs Thos. Bramwell, Alston; John Atkinson, Lowbyer; Richardson, Coatlith Hill; W. Lee, Randle Holme; Jacob Craig, Garrigill; John Walton Park, Robt. Lee, Hugh Pattinson, John Dawson, Joseph Sparke, J. Pattinson, John Lowe, Alston.

The presentation was made by J. G. Millican, Esq., The Grove, Alston, who said they had met to do honour to one who for many years had occupied an important position in their midst. It would have been more agreeable to his feelings had the duty or he might say the honour been conferred on someone who had been longer connected with the affairs of the town and neighbourhood, but of two things he was certain, he had no need to say a single word in order to convince Mr Paull of the estimation in which he was held by those amongst whom he had lived and laboured. He had but to point to the very splendid article upon the table, and there was sufficient proof of appreciation and the highest possible form of respect. On the other hand he need not remind his audience of the many noble and amiable qualities of Mr Paull, and how they were indebted to him for his self-denying labours on behalf of social institutions, parochial and otherwise, for they had given proof of an unmistakeable kind of the respect for the man, and of their appreciation of his conduct while he had been amongst them. He then briefly referred to the cause of Mr Paull having to leave the neighbourhood. The Lords Commissioners of the Admiralty recently sold much of the property they held in the Northern Counties, and as a consequence of which with other changes the office held by Mr Paull had been abolished. After further remarks—explanatory and complimentary—he, in the names of the subscribers, presented the centre piece to Mr Paull, who in a most feeling manner and in a speech of some length gave a resume of his connections with Alston Moor, and thanked the subscribers for the manner in which they had shown their appreciation of his conduct. Before sitting down he proposed health, prosperity, and long life to the Chairman.

The CHAIRMAN briefly responded, after which be proposed the health of Mrs Paull and family.

Mr PAULL responded, and, before sitting down, proposed and drunk to the health and prosperity of the subscribers.

Mr WILSON, of Nenthall, gave "The gentleman who constituted the committee."

Mr A. WALTON, in responding, said he believed the committee had really done their work owing to an honest feeling of warm attachment to Mr Paull on their part; for himself he had been connected with Mr Paull in business during the last eighteen years, and thought it would have been strange indeed, if, during that long period, some little tiffs or jealousies had not sprung up between them, such as occasionally occurs between the beat of friends; but still he could confidently assert that, so far as their business relations were concerned, they had never been disturbed by a single jar. So far as any unkind feeling that ever existed was concerned, he could only say that such feelings were, with him, as evanescent as the aerial atoms by which the company were surrounded, and he had no doubt that such would be the case with Mr Paull. He hoped that the future career of that gentleman would be brighter than it had ever been, and that they should hear of his health and prosperity for many years to come.

Mr PAULL next proposed the health of Mr T. Richardson, of CoAtley Hill, neatly complimenting him on the fact of his having made for himself so distinguished a mark among the farming fraternity of the county in so short a time, and confessing to having been very much benefited by the instructive chats which he had held with Mr Richardson on various occasions.
Mr RICHARDSON, in reply, said that when he came into the country he knew very little about farming or agricultural affairs, but he professed to know more about commercial matters. This knowledge he carefully applied to such as he could glean respecting the business of his adoption, and lie believed that this was, in a great measure, the secret of the little success he had achieved.
Mr WALTON next proposed success to the mining interests of Alston Moor, which was ably responded to by Mr MILLICAN.
Mr PAULL then proposed the health of Mr Jacob Craig, which was briefly responded to by that gentleman.
Mr RICHARDSON proposed the health of the "Mining agents of the country," saying that theirs was a profession which required much deep thought and eminent skill in the performance of the several duties involved therein.
Responded to by Mr PEART.
The health of the different tradesmen employed under the Admiralty were next proposed, and responded to by Messrs PATTINSON and DAWSON.
Mr RICHARDSON then proposed the health of Mr Atkinson, forester to the Admiralty in Alston Moor. He characterised him as a christian that had grown grey (being the oldest man) in the service; that his life had been spent in the faithful discharge of his duties; that in all his actions he had proved himself a faithful servant, and that which Burns calls the noblest work of God, "an honest man."
Mr Atkinson had left the meeting previous to the drinking of this toast, but it was warmly supported by several gentlemen present. Mr PAULL remarked that he would, with all his pride, rather receive a blowing up from Mr Atkinson than from any other man. The secretary was instructed to convey the kindest sympathies and good wishes of the meeting to him forthwith.
Mr PAULL warmly complimented the workmen who had been under him, remarking that he had had men from all nations except Russia working for him, but he was proud to say that none whom he had ever known could excel the workmen of Alston Moor. (Cheers.)
Mr JOSEPH SPARK responded.
Mr WALTON said there was one toast which should certainly not he omitted. He considered that when a public subscription was made for any specific object, the committee who were entrusted therewith were bound to lay out the money thus obtained to the very best advantage. This the committee carefully endeavoured to do; they had sent for specimens and patterns of the article required from the most distinguished firms in the North of England, and after judging as impartially as they could, they found, to their intense satisfaction, that their own fellow-townsman (Mr Thomas Bramwell) was able to compete successfully with the best of them, in as much as from him they had been able to procure more for their money, both as regards intrinsic worth and beauty of design, than from all the others. He thought that if the gentry in the country who have money to spend, would spend more of it in the town and country where they themselves earned their money, the tradesmen in the place would have a much better chance of taking smaller profits, and at the same time

earning a livelihood, but he was sorry to say that many in the country think it beneath their dignity to spend their money among those from whom they had earned it. The present instance, however, was a proof that by their own townsmen they could be as well and as cheaply served as by any others. He now begged to propose the health of Mr Bramwell, who had supplied the subscribers with the beautiful epergne now before them. (Cheers.)
Mr Bramwell not being present, the toast was ably responded to by Mr MILLICAN.
The CHAIRMAN then rose and said it was usual on all such occasions as the present to propose the toast of "Our next merry meeting." but was not sure whether, in the present instance, the words "Merry meeting" was a misnomer or not, "seeing that we were about to lose the services and companionship of the gentlemen in whose honour we were then assembled. However, be trusted that Mr Paull would have opportunities of paying us periodical visits, and that we should from time to time hear of his continued welfare and eminently successful career in the world." (Cheers.) He now proposed "Success to our next merry meeting," upon which the really pleasant proceedings of the evening terminated.

UTILISATION OF PEAT

Mr C. E. Bainbridge of Middleton in Teesdale, is now engaged in developing a process of his own for the utilisation of peat for heating and lighting purposes at the works of the Lead Mining Company in Teesdale. Mr Bainbridge has for some time past been making peat fuel for supplying the workmen. The peat is compressed by patent machinery invented by Mr Clayton of Manchester, and capable of yielding highly satisfactory results. The London Lead Company were the first to adopt the machine, but within the last eighteen months or two years, it has made rapid progress in public favour. ...

Deaths
At Holm Foots, aged 9 months, John Emerson Teasdale.
At Cocklake, Nentwater, 14th. ult., aged 46, Robert Snowden, Farmer.
The 1871 census shows Robert Snowden, Farmer, aged 41, wife Jane (Richardson married 1858) aged 30, children Thomas aged 9 and daughter Annie aged 1.

9th June 1875 (Teesdale Mercury)
THE RIVER TEES AS A SOURCE OF WATER SUPPLY FOR DARLINGTON, STOCKTON, MIDDLESBROUGH, &c.
The Special Correspondent of the Newcastle Daily Chronicle writing on this topic, says;—
"The considerations involved in this matter are of such extreme importance to the people of Tees-side generally, and to the clientele of the Stockton and Middlesbrough Waterworks Company in particular, that I have made them a subject of special and prolonged inquiry. It is an indisputable fact that the Tees is very much polluted from two equally objectionable sources—first, from the sewage of the towns and villages above the point where the Water Company now Impounds its supply; and secondly, from the "hush" that flows into it from the lead mines. The fanciful and far-fetched, although perhaps strictly scientific theory set up by Mr Hawkesley, that the elements of the foulest substance are

the same as the elements of the purest, and that it is only when they become associated that these elements are deleterious, will be little likely lo satisfy the minds of the people, who are told on all hands, in much more sober and intelligible English, that they are drinking diluted them to provide a quality of water which, if not perfectly pure, it is at least quite innocuous. But whatever certificate of character chemical analysis may give to the water supplied to the Tees-side towns, most people will agree that it is at least desirable to have the water impounded, if at all possible, where it is not to encounter any source of pollution; and hence the suggestion made by Mr Dodds, the member for Stockton, and other gentlemen who have given the question patient and careful thought, that the water supplied to the Tees-side should be impounded—if it is to he taken from the Tees at all—at a point so far up the dale as to be out of the reach of contamination.

“Something might probably be gained—there would, at any rate, be some initial cost saved—by impounding the water of the Tees at a point nearer Middleton. Between Cauldron Snout and Middleton, however, a quantity of “hush" from the lead mines is deposited in the river. The “hush” of the lead mines is an evil easily susceptible of remedy. Indeed, it is only fair to the London Lead Mining Company, who own the largest number of mines in Teesdale, to state that they have already applied a remedy which reduces the evil to a minimum. The water which they use in ore dressing, and which is obtained chiefly from the Newbiggin Beck, near its confluence with the Tees, is passed by this company into large ponds, provided with filter beds, in which, after filtration, the greater portion of the sedimentary matter is left; and this is done so effectually that it is difficult to find traces of pollution at Egglestone, only three miles below Middleton. The Pikelaw Mining Company, however, are still accustomed to “hush," under a special arrangement with the Duke of Cleveland, who is the lessor of most of the lead royalties in Teesdale. The Tees Salmon Fisheries Commissioners have succeeded in limiting the days in which “hushing" shall be allowed to three days in the week—namely, Thursday, Friday, and Saturday; but on these days traces of the sedimentary matter carried down by the "hush" may be found considerably below Darlington. It is, however, desirable to avoid contact with this source of pollution, and that can only be done under existing conditions by going up as far as Cauldron Snout. The London Lead Company have two mines—Greenhurth and Hard shins—above the “Snout" but at Greenhurth only a very limited quantity of ore is being washed—so limited as to leave no trace whatever of “die” within a mile of the mine; while at Hardshins the company are only carrying on explorations, and have no dressing floors in operation. I may add that, so far as I can see, there are no engineering or economic difficulties in the way of bringing the water supply of the Tee-side towns from the locality. By constructing reservoirs of sufficient size an unlimited quantity of water could he impounded during times of flood, and the effects of drought would be less felt here at any time than they would be thirty miles further down the river. The cost of constructing the necessary works would, of course, he considerable, but the cost of maintenance would be less than at the present time, seeing that pumping would be superseded by gravitation. In the coarse of my investigations I heard of numerous visits recently made to this locality by prominent men on Tees-side, of corporate “big wigs," accompanied by analytical chemists, who explored the whole valley from Middleton upwards,

and of portable reservoirs being filled with water at different points between Middleton and Cauldron Snout, both inclusive, and then transferred to the care of the railway authorities for transport to towns on Tees-side. All this seems to imply that the question of the future water supply of Middlesbrough and Stockton has yet to be settled; and I have ample means of knowing that the recent defeat of the present company's bill is only a preliminary to further negotiations, if not to further hostilities respecting this important matter.

11th June 1875 (Durham County Advertiser)

THE HYSEHOPE LEAD MINE, CASTLESIDE

A report of the Hysehope silver Lead and Barytes Mining Company (Limited) has just been issued to the shareholders.

The report is by Captain John Peart, mining agent, Alston, who describes the above mine to be situated on the south side of the river Derwent, and close to the river Hysehope, where it joins the former river, and is about four miles from Benfieldside railway station. The mine is bounded by the mines of Healeyfield on the east, Silvertongue on the west, and Wallish on the north. The geological formation appears to be much the same as Silvertongue, viz., hazel or freestone, shale, with a little limestone. Hysehope mine is worked by a shaft from the surface, the water being pumped from the workings by a water wheel, 32 feet in diameter. There is a fair supply of water to the wheel. The shaft is 13 fathoms deep, on an east and west vein, and from the foot of the shaft a cross cut is made 12 fathoms west, cutting through a strong north and south vein nearly 20 feet wide. The east portion of this Vein is composed of coarse Barytes, and the west part is "rider" and "donk," all permeated with ore. The mine is at present being worked in the west part of this vein, southward, and is opened out about 6 fathoms in length, and still has ore mixed in the vein the full width of the drift. The yield, though not wageable, will pay well for dressing. At the forehead, a cross cut is made west. 7 feet in hazel, but nothing discovered. The strata is all standing on it edge, caused by the east and west strength crossing the north and south vein, or it is from some other cause not yet discovered, but by continuing this drift in the vein south, there is a chance of getting out of the trouble, and getting into better and sounder ground, as the hill Is rising very fast, going south in the direction of the vein, and will soon double the depth from the surface to the present water drift, and will get some good strata above, so that by making rises occasionally from the water drift, the company will be able to prove the vein in the upper beds at a trifling cost. Mr Peart's impression is that the vein will be more likely to be productive of lead ore, &c., when the company gets more under the hill and clear of the confusion. The sinking deeper is not at present recommended. The better plan is to continue the present drift southward, as it is a strong and powerful vein, and from appearance would be more likely to carry ore after it gets more weight from the surface The prospect at present is very encouraging, and well worth proceeding further, the vein being all whole, and very little Is known about it, and the few fathoms opened out in it are no criterion of what the vein may prove to be. A cross cut through the vein is recommended; say one in 20 or 30 fathoms. The machinery, &c., is all in good working order, and the only expense to be incurred is simply the opening out of the vein. Captain Peart is of opinion that the company has not yet opened out sufficient ground to show what the mine may be, but having a strong and powerful vein with lead ore

and traces of copper ore, &c, and machinery all in good working order, they are quite justified in expending more capital in proving the vein southward in the strata above. He considers it a good and promising speculation.
Notice of the Winding up of the Hysehope Silver Lead and Bartes Mining Co. Limited appeared in the Newspapers of January 1876.

12th June 1875 (Hexham Herald)

STANHOPE
DIAMOND ROCK BORING.

A few days ago, a party of gentlemen connected with the lead mining interests in Weardale, met at the Hope Level, Stanhope, to witness work which is now being carried on there by the Diamond Rock Boring Co, under the superintendence of their agent, Mr C Atkin. Major Beaumont, MP. the Managing Director of the Company, and the inventor of the system was present, and explained the mode of operation. Hope level belongs to Mr W. B. Beaumont MP. and is a level or adit driven right into the hillside for the purpose of laying open a vein which crosses at some distance ahead. The work, previous to being taken up by the Diamond Rock Boring Company, was carried on by hand labour, at a speed of from a yard to a yard and a half per week, while now the rate of progress is from 10 to 12 yards per week, thus showing that a speed of eight times that of hand labour can be obtained by the use of this machinery.
A 20 horse power engine was employed outside the mine to condense air to a pressure of 40 pounds per square inch which was conducted along the level by cast iron pipes to within a short distance of the working face, and then a flexible India rubber tube connects the pipe with an air engine which raises and lowers the framework that carries the drills, which when working are gradually advanced by a screw motion. The cutting is done by diamonds, which are set round the end of a steel drill, which is itself, a hollow cylinder. The diamonds overlap the cylinder's edge sufficiently (both inside and out) to enable it to clear itself and bring away a core of the material being drilled. A hole 21/8 inches in diameter was driven 6 inches into an exceedingly hard limestone in 1 minute 35 seconds. Information from the Alston Herald 12th June 1875

12th June 1875 (Hexham Herald)

STANHOPE

Mr Anthony Crawhall died on the 4th of dropsy *(An old term for the swelling of soft tissues due to the accumulation of excess water, now known as congestive heart failure)* at the age of 62 years. He was one of the richest boot and shoemakers in the North of England, hundreds of workmen having been in his employment during the last 40 years.
In 1871, at Stanhope, Anthony Crawhall, unmarried, shoemaker, employing 3 men, aged 58, sister Jane Crawhall, unmarried, housekeeper, aged 54, brother Toward Crawhall, unmarried formerly shoemaker, aged 50, and brother John Crawhall, unmarried, shoemaker, aged 48.

Deaths

At Allendale Town, 2nd inst. aged 19, Thomas Todd, son of the late Thomas Todd Mulcaster.

Thomas Todd's father was Thomas Todd Mulcaster, son of James and Betty (Wallis married 22nd March 1807, at Warden, Northumberland) born 1814, he married Hannah Hodgson on 1st March 1838. In 1851, at Allendale Town, James Mulcaster, widow, retired smelting agent, aged 74, his son Thomas Todd Mutcaster, out of business (smelting agent), aged 37, daughter in law Hannah Mulcaster 36, grandchildren, James Mulcaster 12, John Wallis Mulcaster 11, Susannah Mulcaster 5, Elizabeth Mulcaster 1, and servant, Hannah Rowel, house servant, aged 19. In 1861, at Allendale Town, Thomas Todd Mulcaster, assay master out of office, aged 47, his wife Hannah 46, children, Susannah 15 (born Grenada, Spain) Elizabeth 11, Hannah 9, Esther 7, Thomas Todd 5, and Robert William 5 (died 1864). In 1871, at Path, Allendale Town, Hannah Mulcaster, widow, annuitant, aged 56, children Susannah 25, Elizabeth 21, Esther 17, and Thomas 15.
John Wallis Mulcaster married Annie Holmes on 3rd quarter of 1862, at Newcastle upon Tyne. In 1871, at Woolwich St Mary's, Woolwich Common, John W Mulcaster, principal of military school, aged 31, his wife Annie aged 28 (died 22nd July 1878), sons James 9, John W. W. 6, and sister Hannah Mulcaster 19. In 1881, at Path Head, Allendale, Hannah Mulcaster, widow, aged 67 (died 27th October 1888, aged 76), son John W. (died 26th October 1901, aged 61), widow, schoolmaster, aged 41, daughters Elizabeth Mulcaster 30, Hannah Mulcaster 28 (died 2nd February 1882, aged 30), grandsons James Mulcaster 18, and John W. Wallis Mulcaster 15. See, 3rd August 1878, 11th February 1882, 27th October 1888, & 2nd November 1901.
At Alston, High Plains, 5th inst., aged 17, Sarah Jane White, daughter of Joseph White *(farmer).*

19th June 1875 (Hexham Courant)

TEESDALE

A "Medical Union" has been established in Teesdale to provide the services of a competent medical man. This movement has been occasioned by the London Lead Mining Company having recently ceased to provide medical attendance for their workmen, as they have been accustomed to for years.

Marriages

At St Augustine's Church Alston, 14th inst., William Burns Esq., of Nettlehirst, Ayershire, to Marian Clapinson, eldest daughter of Adam Walton Esq., mining engineer, Manor House, Alston. *See 19th March 1887*

Deaths

At Greyside near Newbrough, 12th inst. aged 29, Mr Edward H. Perrow, engineer (Stoneycroft and Greyside mines) and formerly of Down, St Just, Cornwall.
Edward Hicks Perrow, baptised 7th February 1847, Saint Just, Cornwall, son of Isaac & Alice Perrow, Isaac married Alice Hicks 15th August 1840, at St Just. Isaac died 1st quarter of 1851.
In 1851, at Cupples Hill, St Just, William Hicks, Inn Keeper, aged 59, his wife Margaret 57, children Edward, tin miner, aged 25, Alfred, tin dresser, aged 21, Elizabeth I. 6, daughter Alice Perrow, widow, aged 30, her children Mary A. 10, Isaac 9, Edward 4, and Elizabeth I. 2.
In 1861, at St Just, Cornwall, Alice Perrow, widow, aged 43, children Isaac, tin dresser, aged 18, Edward, tin dresser, aged 14, Elizabeth 12, and William 9.

At Crook, 7th inst. aged 51, Anthony Watson formerly of Flatt near Alston, interred at Garrigill.
In 1851, at Turnings, Garrigill, Anthony Watson (baptised Alston, 13th February 1824, son of William Watson & Hannah Parmley, married 31st August 1820), lead ore miner, aged 27, his wife Ann (Grey, married 26th December 1844) aged 28, children William 4, Hannah 2, and Jacob 4 months.
In 1861, at Turnings, Garrigill, Anthony Watson, lead miner, aged 37, his wife Ann 38, children William, lead miner, aged 14, Hannah 12, and Jacob 10.
In 1871, at Flat, Garrigill, Anthony Watson, lead miner & farmer of 26 acres, aged 47, his wife Ann 48, children Hannah, household assistant, aged 22, Jacob, stone mason, aged 20, Mary F. 8, Joseph 6, and Jane A. 2.

19th June 1875 (Hexham Herald)
Deaths
At Weardale at St John's Chapel, 16th inst. aged 50, Wm. Hewitson, surgeon, late of Allendale.

26th June 1875 (Hexham Courant)
Marriages
At Alston, at the Independent Chapel, 23rd inst., Mr Robert Stagg of Hill House, Alston, to Miss Caroline Bennett, of Kentibeare, Cullompton, Devonshire. *See 15th June 1878, & 5th October 1907*
At Stanhope, 19th inst. at the Primitive Methodist Chapel, Mr Job Emerson of West Blackdean to Miss Phoebe Featherstone of Burnhope.

26th June 1875 (Hexham Herald)
ALSTON
THE "CRANSTON" ROCK DRILL.
Recently experiments were made at the London Lead Company's works at Nenthead, with this drill, Messrs C. Bainbridge and J. J. Millican, the Company's agents, being present. The drill was under the superintendence of Mr Cranston himself, and gave every satisfaction. The machine is largely used in boring operations in most of the continental nations. The turbine in this instance was worked from a distance of 42 fathoms, and running at the rate of 800 revolutions per minute. The compressor worked from the turbine at 45 strokes per minute, and great progress was made with the boring. The machine is very portable weighing only 2 cwt., and through Aberdeen granite, it will bore at the rate of 2 - 6 inches per minute. It can be applied to drill at any angle, and can be worked by an ordinary miner with a pressure of 20 lb. of steam or air, and will bore a hole 15 ft deep, if the drilling tool is changed every 2 ft. It is the patent of Mr J G Cranston, 22 Grey Street, Newcastle on Tyne, who is a native of Alston, and therefore a credit to the ingenuity of our town.

3rd July 1875 (Hexham Courant)
Marriages
At the Primitive Methodist Chapel, Garrigill, 1st inst. Mr John Wailes of Haggs Foot to Miss Elizabeth Vipond of Crossgill, Pasture Houses. *See 3rd May 1879, & 21st June 1879.*

Deaths
At Alston, 21st ult., aged 58 years, Mary Coats, widow.
See 15 March 1873
At Low Dykeheads, 26th ult. aged 28, Elizabeth daughter of John Richardson.
In 1841, at Wellgill, Dykeheads, William Richardson, lead miner, aged 23 John, lead miner, aged 20, Mary 15, John 8, Rachael 7, and George 6.
In 1851, at Wellgill, Dykeheads, John Richardson, lead miner, aged 29, wife Mary aged 24, daughters Elizabeth 4, and Agnes 1 year.
In 1861, at Dyke Heads, John Richardson, lead miner, aged 39, wife Mary 34, children Elizabeth 14, Agnes 11, Mary Ann 5, and John 2.
In 1871, at Dykeheads, Nenthead, John Richardson, lead miner, aged 49, wife Mary 45, children Elizabeth 24,. John 12, Frances 8, and granddaughter Frances Mary Richardson 1 year.
In 1881, at Wellgill, John Richardson, lead miner, aged 59, wife Mary 54, John, lead miner, aged 22, and Frances, household work, aged 19. John Richardson died 4th quarter of 1898, aged 76

10th July 1875 (Hexham Courant)
Deaths
At Dykeheads near Alston, 1st inst. aged 58 Mr Joseph Stephenson lead miner.
See 19th December 1874.
At Dykeheads near Alston, 7th inst. aged 58 Mary wife of William Percival lead miner.
In 1861, at Dykeheads, William Percival, lead miner, aged 38, wife Mary aged 43 and son John M. 6.
In 1871, At Dykeheads, William Percival, lead miner, aged 47, his wife Mary aged 54, their son John aged 16, a labourer.
William Percival died 7th July 1876, aged 53.
In 1881, at Dykeheads, John Percival, lead miner, aged 26, his wife Jane (Pattinson, married 2nd quarter of 1878, Alston) aged 27, daughters Mary M. 2, Agnes Ann 1, and Isabella 1 month.
In 1891 at Roughside, Nenthead, John Percival, lead miner, aged 36, his wife Jane 37, children, Mary M 12, Agnes A 11, Isabella 10, Hannah 8, William 5, Elizabeth 4, and boarder Thomas N Thompson, lead ore washer, aged 20.
In 1901, at Dykeheads, Nenthead, John Percival, lead miner, aged 46, his wife Jane 47, children William, lead ore washer, aged 15, Lizzie 14, Jane 9, and lodger Thomas Thompson, lead ore washer, aged 34.
In 1911, at Dykeheads, John Percival, lead & zinc miner, aged 56, his wife Jane 57, son William, lead & zinc miner, aged 25, and daughter Lizzie 24.
John Percival died 2nd quarter 1914, aged 60, his wife Jane died 4th quarter 1918, aged 65.
See 1st July 1876, 15th July 1876, and 11th October 1884

10th July 1875 (Alston Herald and East Cumberland Advertiser)
NENTHEAD.
SABBATH SCHOOL TRIP.—On Monday morning, the quiet village of Nenthead was the scene of activity and excitement, caused by the children, with their teachers, parents, and friends of the Wesleyan Sabbath school leaving the place for a day's pleasure at the beautiful Gilliland Spa. The village

being about 4½ miles from the Alston Station, the managers of the school were obliged to ask their friends and neighbours for the use of their conveyances to take the children to the railway station in the morning and back to home again the evening, which they very readily granted, it not being the first time they have shown their kindness in the way named. All parties belonging to the institution wish through your valuable paper to tender to all such parties their best thanks for their liberality. Between eight and nine o'clock in the morning they left the village accompanied by the choir, those parents that could not make it convenient to go placing all confidence in the managers of the trip that their children would be taken care of. About 100 children and 25 teachers availed themselves of the opportunity of visiting the spa, besides a number of friends. At the railway station they were met by the Nentsberry Wesleyan scholars bound for the same place. All went on nicely, reaching the beautiful spa about one o'clock. The first thing done was to take the children to the well, when all had a draught of the refreshing water. At half-past two o'clock the children were called together on the green, where they sang some of the choice airs out of Sankey' s collection, conducted by Mr G. Angus, in his masterly style. Having done this they then visited the "popping stone," some of the young ladies and gentlemen procured a piece of the stone as the old story says if they can only do that and take it with them into their bed chambers at night they will dream of those that love them. Returning to the green all seated themselves and were served with cake and tea until all were satisfied. After this they were again permitted to strol until at the request of some ladies and gentlemen staying at the place they again sang two or three of Sacker's airs, and bidding the ladies and gentlemen good bye the children were marched once more to the well where all got their last draught of the spa water. Being about half-past five o'clock the children were brought in front of the Shaws Hotel, where they sung two or three hymns, after which they took their departure for the Rose Hill Station, which they left by 7:25 p.m. train and arrived at Alston by half-past eight, amid a great throng of spectators, and reached Nenthead by half-past ten all safe, nothing having happened either scholar or teacher. So ended a day long to be remembered by all that took any interest in it.

17th July 1875 (Hexham Courant)
Marriages
At Stanhope Primitive Methodist Chapel, 8th inst. Mr John Philipson of Windyside to Miss Hannah Moses of the Fold.
In 1841, at Westgate, Weardale, Ann Moses 45, children, Frances 20, John, lead miner, aged 15, Cuthbert, lead miner, aged 15, George, lead miner, aged 15, and Ralph aged 12. In 1851, at Westgate, Weardale, Ann Moses, widow, aged 55, sons, George, lead miner, aged 24, and Ralph, lead miner, aged 21. In 1861, at Brother Lee, St John's, Weardale, Ralph Moses, lead miner, aged 31, his wife Mary (Forster, married 1st qtr 1852, registered at Weardale) aged 30, children, Hannah 8, Ralph 5, and William 10 months.
In 1871, at Westgate, Weardale, Ralph Moses, lead miner, aged 42, his wife Mary 41, children, Hannah 18, William, lead miner, aged 15, and Ralph 10.
In 1881, at Fold, St John's, Weardale, Ralph Moses, lead miner, aged 51, his wife Mary 50, and son William, labourer, aged 20.
Ralph Moses died 1st quarter 1883, aged 53, registered at Weardale.

In 1891, at Fold, St John's, Weardale, Mary Moses, widow,farmer, aged 60, son William, lead miner, aged 30, and servant, Hannah Moses, domestic servant, aged 16. In 1901, at Windy Side, Westgate, Mary Moses, widow, aged 70, and her son, William, limestone quarryman, aged 40.
Mary Moses died 3rd qtr of 1902, aged 72, registered at Weardale.
In 1881, at Tindale Cres, Bishop Auckland, John Philipson, coal miner, aged 29, his wife Hannah 29, children, Thomas 3, and Ralph 7 months.
In 1891, at Windyside, Stanhope, Hannah Phillipson, widow, aged 38. Sons, Thomas 18, Ralph 10, and John W 6. In 1901, at Constance St., Consett, Hannah Philipson, widow, aged 48, sons, Thomas, steel smelter, aged 23, Ralph, apprentice brick layer, aged 20, and John W, steel works clerk, aged 16.
At the Wesleyan Methodist Chapel, High Houses, Weardale, 10th inst. Mr William Johnson of Byrehope, Allendale, to Miss Mary Featherstone of High Houses, Holts, Weardale.
In 1881, at 27 northumberland, Stranton, Hartlepool, William Johnson, book agent, aged 27. his wife Mary 28, children, Frances 5, Sarah H 3, Elizabeth 2, and Antonio 5 months.

22nd July 1875 (The Hour)
LEAD COMPANY'S WORKMEN'S MEDICAL UNION.—Alston District—Wanted, November 1st, for the above Union, a MEDICAL PRACTITIONER of experience and ability. Salary £200 per year, with good house, garden, stable, &c., at a nominal rent. An energetic man might also obtain a good Private practice.—Applications, with testimonials and references will be received up to the 31st inst.—Address A. Bolton. Nenthead, via Carlisle.

ALLENHEADS

Scarlet fever is again raging here.
The worst case is that of the family of Sergeant Fowler, who has lost two children, William, 4 days and another is lying ill.
See 7th August 1875

27th July 1875 (Daily Gazette for Middlebrough)

THE UTILIZATION OF PEAT IN THE NORTH.

On Monday, the Cleveland Institute of Engineers had an excursion to Middleton-in-Teesdale for the purpose of seeing in operation the peat fuel works of the London Lead Company, in pursuance of an invitation from Mr C. E. Bainbridge. More than 80,000 square miles of royalty are held by the company, chiefly from the Duke of Cleveland, in Teesdale. Other royalties, however, have come into their possession in Cumberland, Westmoreland, and Yorkshire. The annual production of pig lead is equal to 10,000 tons, worth at the ordinary market rate from £22 to £24 per ton. More than 2,000 hands are employed at or in connection with the company's various mines. The peat works of the company are situated in the centre of a bleak, lonely, and almost trackless moor called Eggleshope Fell, situated at an altitude of 1,700 feet above sea level. They are closely adjacent to the mine called Little Egglesthorpe, to which the members of the institute were conveyed by special conveyance from Middleton-in-Teesdale. For the last two or three years the company have made use of Clayton's patent peat compressing machinery, primarily for the purpose of affording to the men in their employment a cheap and plentiful fuel supply. One of these machines can produce about 20 tons of peat fuel per day at a cost, which was described as being less than that of

coal, after the cost of carriage had been paid, even if the latter were offered at the pit for nothing. An opportunity was afforded of seeing the whole *modus operandi* of the process of manufacture, from digging the peat out of a bog close at hand to its ultimate disposition as fuel. After the peat has been passed through the machine and compressed it contains from 70 to 80 per cent, of water. It is in this condition placed in a series of shelves arranged in tiers one above another, in a building called the drying shed. It is there allowed to remain for a week, by which time a skin is formed on the surface of the peat, which will make it impervious to damp. After this the peat is carried in blocks not unlike the shape and size of pigs of iron to the open air, where it is permitted to remain for another week, and at the end of that time it is fit to be used as fuel, the moisture having been reduced from 70 or upwards to about 15 per cent.

The present cost of production is about 6s per ton. Some very excellent charcoal has been obtained from the utilization of peat for making gas at the company's smelting works at Stanhope, in Weardale. The exceptional hardness and purity of this charcoal was admitted by the visitors, who seemed generally disposed to think that it might with advantage be adapted for the manufacture of charcoal iron in the Middlesbrough district. No such iron is now made in Cleveland, because of the dearness of charcoal and the extreme difficulty of procuring it. No place, however, enjoys better facilities for the importation from Sweden or Norway of iron ores adapted for this branch of metallurgy, and as there is always a good market for charcoal iron, it is quite on the cards that an experiment may be made in this direction. The charcoal made from peat at the works of the London Lead Company does not cost more than 30 per ton for production, and Mr Bainbridge has an offer of £4 or £5 per ton for as much he can produce. In view of the demand that may be expected to spring up for this product, that gentleman has recently invented and patented two machines, the first to make the peat fuel, with several important improvements on Clayton's machine; and the second to effect the carbonisation of the fuel for smelting purposes. Models of these machines were inspected by the visitors with much interest. The adjacent lead mines of the company were then visited, and the company afterwards made an excursion to High Force, where they partook of an excellent dinner, under the chairmanship of Mr Wrightson, the president of the institute. Before leaving again for home the members of the institute cordially united in thanking Mr Bainbridge for his kind and cordial reception, and for the valuable information he had placed at their disposal.

31st July 1875 (Hexham Courant)
Deaths

At Donks hall, 23rd inst aged 6, Margaret, daughter of John Stout.

In 1861, at Donks Hall, Nenthead, John Stout, late lead miner, aged 70, his wife Margaret (Madgen, married 25th June 1818, Alston) aged 63, unmarried son William, lead miner, aged 38, married son John, lead miner, aged 34, his wife Hannah (Lee, married 7th May 1854, at Nenthead) aged 30, sons children Jane 6, John 4, and Mary 2. John Stout died 2nd quarter of 1869, aged 78.
In 1871, at Donks Hall, John Stout, lead miner & farmer, aged 44, wife Hannah 40, children Jane 16, John, lead miner, aged 14, Mary Ann 12,

Stephen 9, Henry 6, William 4, Margaret 1, and boarder William Stout, lead miner, aged 48.
In 1881, at Donks Hall, John Stout, farmer of 27 acres & quarryman, aged 54, wife Hannah 50, Stephen, quarryman stone, aged 19, Henry, cartman, aged 16, William 14, and brother, William Stout, quarryman stone, aged 58.
John Stout died 1st quarter 1890, aged 63
See 1st May 1869, 29th May 1869, 31st March 1883
At Dykeheads, 22nd inst aged 44, Mr Thomas Rutherford, Lead Miner.

31st July 1875 (Hexham Herald)

WEARDALE

On Wednesday the months notice given to the ironstone miners under the employment of the Weardale Iron and Coal Company expired and their works at the different mines in Weardale and Stanhope have ceased for the present. At the limestone quarries and ironstone mine at Stanhope above 100 men are off, and at the different ironstone mines and open quarries in Weardale about 300 men are out of employment. … How long the works will be closed is not known, but it is said for 6 months at least. Some 2 months ago about 100 ironstone miners were paid off in Rookhope under the same company.

7th August 1875 (Hexham Courant)
Marriages
At Stanhope Wesleyan Methodist Chapel, 31st ult. Mr Ralph Phillipson to Miss Jane Smith of Westgate.

7th August 1875 (Hexham Herald)
Deaths
At Allenheads, 18th ult., aged 4 Thomas son of Sergeant T. Fowler, 25th ult., Maria daughter of the above, 30th ult., Rhoda, all the children of Sergeant Thomas Fowler.
The register of deaths shows Maria to be 1, Thomas 3, and Rhoda 5 years old.
In 1861, at Castlegate, Grantham, Thomas Fowler, sergeant, Grenadier Guards, aged 32, born Lingfield, Surrey, his wife Mary aged 28, and daughter Mary A 5 months.
In 1871, at Chapel Cottages, Allendale, Thomas Fowler, Sergeant Instructor 1st Ad. Br. N.R. Volunteers, aged 42, his wife Jane (White married 3rd quarter 1869, Alnwick) aged 31, and daughter Rhoda 9 months.
In 1881Thomas (Sergeant Instructor of the 7th Northumberland Volunteers and pensioner from the Grenadier Guards) is living at Chapel Cottage, St Peter's, Allendale, with his wife Jane aged 40, and their children Rhoda aged 5, Harry aged 2, and Boarder, John White, widow, retired porter, aged 78.
In 1891, the family had moved to Crockham Hill, Westerham, Kent, Thomas Fowler, aged 62, his wife Jane aged 50, children Rhoda, dressmaker, aged 15, Harry aged 12, and Father in law, John White, widow, aged 88. In 1901, at Crockham Hill, Thomas Fowler, retired army pensioner, aged 72, and his wife Jane aged 60.

14th August 1875 (Hexham Courant)
Deaths
At Fairhill, Nenthead, 4th inst., Mr Ridley Havelock lead miner aged 51.
In 1841, at Low Hill Top, Nenthead, William Havelock, lead miner, aged 52, his wife Jane (Elliot, married 26th December 1811, at Alston) aged 52, children John lead miner, aged 25, Mary 20, Smith 20, Jane 15, Ridley 15, Thos 13, and Betsy 10.

In 1871 Ridley Havelock lead miner, unmarried aged 47, living at Fair Hill with his unmarried brother and sister, Thomas, aged 43, lead miner, and Elizabeth aged 40.
See 9th January 1875, 22nd April 1882, and 11th October 1884

14th August 1875 (Hexham Herald)
Deaths
At High Spency Croft, 7th inst. aged 15, Susanna Currah.
In 1861, at Low Crossgill, Matthew L Currah, unmarried, lead miner, aged 35, his unmarried sister Catherine 29, nephew Walton, lead miner, aged 8, niece Frances 6, and niece Susanna 9 Months.
Matthew Lee Currah, died 3rd quarter of 1864, aged about 38.
In 1871, at Butts, Alston, Catherine Currah, unmarried charwoman, aged 33, daughters Susan 11, and Jane 7. In 1881, at High Spency Croft, Catherine Currah, charwoman, aged 47.
At Dykeheads, 11th inst. aged 66 years, Jane Wilkinson wife of Thomas Wilkinson, Lead Miner.
In 1851, at Wellgill, Dykeheads, Thomas Wilkinson, lead miner, aged 44, wife Jane (Percival, married 28th January 1832, Alston) aged 42, children Margaret 22, Anthony 12, Thomas 9, Mary 6, and Elizabeth 4.
In 1861, at Dykeheads, Thomas Wilkinson, lead miner, aged 52, wife Jane 52, children Anthony, lead miner, aged 22, Thomas, lead miner, aged 18, Mary Ann, house maid, aged 16, Elizabeth, dressmaker, aged 14, and Jane 9.
In 1871, at Dykeheads, Thomas Wilkinson, lead miner, aged 62, wife Jane 62, children Anthony, lead miner, aged 32, Thomas, lead miner, aged 28, Jane, dressmaker, aged 19, and granddaughter Mary Ann 9 months. In 1881, at Dykeheads, Thomas Wilkinson, widow, lead miner, aged 72, son Anthony, lead miner, aged 40, daughter Jane, house keeper, aged 27, granddaughter Mary Ann Wilkinson 10, and grandson Robert William Wilkinson 7.
Thomas Wilkinson died 1st quarter of 1886, aged 77.

14th August 1875 (Alston Herald)
LEAD MINING IN THE NORTH OF ENGLAND
THE LONDON LEAD COMPANY'S WORKS.
THE WORKS OF THE LONDON LEAD COMPANY, IN THE North of England, are the largest of their kind in the United Kingdom. ... The London Lead Company has a most interesting history. It was founded in the reign of Queen Anne (*Incorrect it was formed in 1692, reign of William & Mary, what is probably being referred to is the second period of the company when it was reformed in 1705. Previous to the 1st January 1752 the New Year began on Ladyday, 25th March. The first recorded meeting of the Company was on 10th February 1704, which using when using the modern calendar would be 1705*) from whom it received a special charter of incorporation, and it is worthy to

note that it is the only company in Great Britain, except the Bank of England, that holds a charter direct from the crown.
Tradition and the archives of the Company together afford the following particulars as to the origin of the company. A Quaker lady, of the name of Fox, in travelling from the North to London in the old stagecoach regime, had her attention called to the fact that in the hills and dales of the northern counties there were valuable minerals, which it only required capital to develop. At the same time, she saw for herself that there was a sturdy, but poverty-stricken population available for working the mines, and to whom the chance of employment in such an industry would be a positive boon. She therefore on her arrival in London, laid the matter before several of her Quaker friends, who were induced to aid her in subscribing the necessary capital, and the company was thus projected (*There is no evidence in the Company records to support this nice story*). Some of the mines which the newly formed corporation undertook to work on Alston Moor had been worked in the time of the Romans. In the Silver Band Mine, on the Alston Hills, traces of Roman workmanship have been found together with a number of Roman coins, ...
Within the last few years a great development has taken place in Spain, which now annually throws into the English market nearly as much lead as the total quantity at home, while the extensive lead mining operations carried on in America by such companies as the Richmond Consolidated, has also exercised an appreciable effect in discounting the influence of English firms. …
Generally speaking the miners are very comfortable - the result sobriety and steady industry. They usually work 40 hours per week; and in order that they may have two clear days in each week for the cultivation of the small holdings which most of them have acquired on the moors or in their immediate vicinity, they compress their 40 hours per week into four days - Monday, Tuesday, Wednesday, and Thursday - thus leaving the two last days entirely free. Their average earnings will be about 24s per week *(a little high?)* free of all extras and deductions. They had a mode of managing their affairs, which is as successful as it is exceptional. Every year they hold a meeting, and appoint one of their number to act as the medium of communication between themselves and their employers. It is the duty of the delegate to see that as far as possible, the men do their duty to their employers, and the employers fulfil their obligation to their men. There is a set of rules and regulations for the conduct of the miners. A breach of these rules, or dereliction in any other way, is generally attended by a specific fine, but the employers instead of inflicting the fine on the culprit - whose culpability they might possibly fail after infinite trouble to establish - impose it upon the delegate who acts as the vicar of the men, and whose business it is to ascertain as best he can the offender, for whose offence he is thus made responsible, and then deduct the penalty from his wages. If it is found impossible to trace the offence to its real source the amount of the fine is generally distributed over all the men in the mine or colony, where the offence occurred. This plan has hitherto been found to answer remarkably well. It relieves the employers from a deal of harassing trouble and is calculated to put the men on their good behaviour. ...
Under the able and energetic management of Mr Bainbridge,...
The modus operandi of winning the lead is much similar to that adopted at other mines in the North.

The drifts are made 6ft 6in high, and 4ft 6in wide, and for the purpose of securing greater safety they are always arched except when driven through solid rock. For the purpose of making the arching more easy, the drifts are generally driven through shale formation. The lead ore is broken up by Marsden's patent Blake's stone and ore crusher. The Company have seven or eight of these machines in operation at their different mines, and they answer the purpose of their application better than anything yet devised.

After the ore has been crushed, it is carried from the bottom of the trough of Blake's ore crusher by a series of vessels, which are placed at much the same angle, and are moved in much the same way, as the buckets of a dredging machine. These vessels deposit the ore in a trough, which is worked by an automatic motion, and where with the application of water the precious mineral is separated from the base matter in combination with which it is found. ... Within the past few weeks, the company have adopted a new process for the desilverisation of lead, which is entitled to notice from the valuable economy, which it promises to introduce. ...

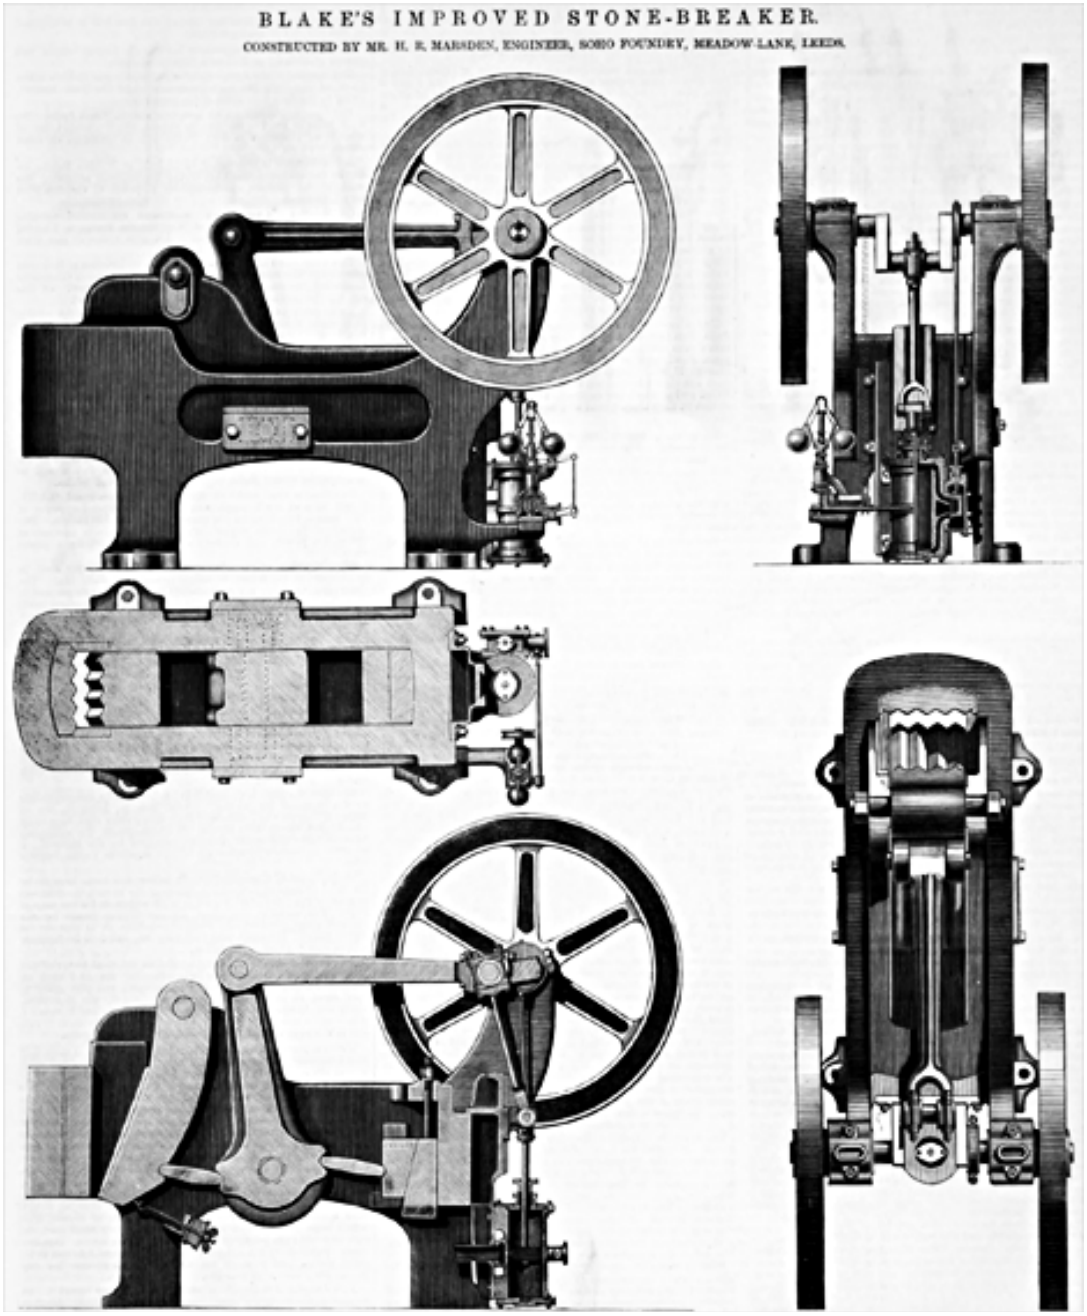
It is now rather more than two years since M. Rozan, a Frenchman, introduced to the world the new process for the desilverisation of lead, which bears his name, but it was not adopted in this country until it was taken up last year by Mr Cookson, of Newcastle, and Mr Cookson reported so favourably on its results that the London Lead Company were induced to give it a trial. The principle of the Rozan process is much similar to that of the well known process of Mr H. L. Pattinson, ... The Rozan process, however, is carried out by the mechanical agency of steam. Two separate pots are made use of - the one containing 20 tons and the other 6 tons. At the bottom of the 20-ton pot, which may be described, as the working vessel there is a steam pipe, with a valve through which the steam is let into the molten lead at pressure. The pressure at which the steam is applied is about 55 lbs., which is found sufficient to support the lead, and prevent it from going down into the steam pipe while it is being desilverised. By this process a considerable saving in labour is effected, which must necessarily vary according to the percentage of silver contained in the lead, but which Mr Bainbridge has estimated all round at fully a third, while it is also proved that desilverisation of the lead is more completely effected than by the Pattinson or any other process in use. ...

Blake's ore crusher from:
THE ENGINEER issue 7th JUNE 1872, pg. 406 - 407

> WE illustrate in the accompanying engraving an improved arrangement of the now universally-known Blake's stone and ore breaker, which is so clearly shown in the drawings as hardly to require a word of description.

It will be seen that a rocking or vibrating upright lever is combined with two toggles and a movable and fixed jaw, the rocking lever being supported on a cross-pin extending between the two side standards, and passing through a horizontal slot in the boss of the lever. On the opposite sides of this vibrating boss there are formed two curved notches, corresponding notches being formed in the back of the movable jaw, and in the toggle block, in which notches are fitted the correspondingly rounded ends of the two toggle levers. The toggles are so placed that on rocking or vibrating the actuating lever they will alternately assume a straight line and an angled position on opposite sides of a

right line drawn between the notch on the movable jaw and the notch in the toggle block.



For example, when the lever is vertical the two toggles will be straight, and consequently the greatest force will be exerted just at the termination of each forward stroke of the movable jaw by reason of the toggles passing over or across their points of greatest resistance. Instead of driving by a belt, an engine is combined direct with the machine, to one end of which is bolted a vertical bed-plate containing the slide block guides of the engines, the vertical cylinder of which is bolted to the face of the plate. The side standards of the machine are prolonged sufficiently to form brackets for carrying the bearings of a crank shaft, upon which is mounted one or a pair of fly-wheels. The piston-rod is coupled to the crank by a connecting rod, and the crank

is further coupled by another connecting rod to the upper or free end of the actuating rocking lever. The entire arrangement is very neat and compact.

21st August 1875 (Alston Herald)

WEARDALE

DREADFUL SUICIDE

On Tuesday, an inquest was held by Mr T. Dean Deputy Coroner, at the House of Mr Robert Maugens, Miner Arms Inn, St John's Chapel, on the body of Joseph Coulthard who was found dead with his throat cut at noon on Sunday last in a wooden shed near his residence at Hill Top, St John's Chapel. Deceased was a very respectable lead miner, renting a small farm at Hill Top. He had a family of five sons grown up and a daughter. He was an intelligent and well respected man. He had been a member of the Primitive Methodist Society for many years and on Sunday morning had had family worship. He had been out of health for some weeks and during some days before the melancholy event and expressed himself as having felt in a rather low way. … Verdict Temporary Insanity.

In 1861, at Ireshope plains, Joseph Coulthard, lead miner, aged 46, wife Sarah 43, children Mary 18, Thomas, lead miner, aged 16, Sarah Ann 13, John, lead miner, aged 12, Joseph, lead miner, aged 10, William 9, Jane 7, Jonathan 4, Ralph 2, and Edward 5 months.

In 1871, at East Hotts, St John's, Joseph Coulthard, lead miner, aged 57, his wife Sarah (died 2nd quarter of 1872) aged 53, children Mary 28, Thomas, lead miner, aged 26, Sarah A. 23, John, lead miner, aged 22, Joseph, lead miner, aged 20, William, lead miner, aged 19, Jonathan, lead miner, aged 14, Ralph12, and Edward 10.

In 1881, at Low Hill Top, Thomas Coulthard, lead miner, aged 36, sister Mary, housekeeper, aged 38, and brother Edward, labourer, aged 20.

Marriages

At Stanhope Primitive Methodist Chapel, 18th inst. Mr John Wearmouth of Westgate to Mrs Sarah Muschamp of Brotherlee.

Thomas Wearmouth married Ann Lowes 19th August 1820, at Stanhope.

In 1841, at Burn Foot, St John's, Weardale, Thomas Wearmouth, lead miner, aged 40, his wife Ann aged 40, children, Jonathan, lead miner, aged 15, John, 14, Thomas 12, Richard 10, Ann 7, Jane 5, William 3, and Joseph 1.

In 1851, at Cherry Tree House, St John's, Weardale, Thomas Wearmouth, lead miner, aged 53, his wife Ann aged 49, children, Richard, lead miner, aged 20, Jane 15, Joseph 11, William 6, and visitor, Jane Wearmouth, widow, aged 61. In 1861, at Burnfoot, St John's, Weardale, Ann Wearmouth, lead miners wife, aged 61, children, Jane 25, Joseph, lead miner, aged 20, William, lead miner, aged 16, Margaret 8, and Mary Wearmouth 3.

Ann Wearmouth died 4th quarter 1864, registered at Weardale.

Thomas Wearmouth died 3rd quarter 1870, aged 72, registered at Weardale.

John Wearmouth married Frances Walton, 1st quarter 1849, registered at Weardale.

Jefferson Walton married Esther Brown, 2nd June 1827, at Stanhope.

In 1851, at High Hill House, St John's, Stanhope, Jefferson Walton, lead miner, aged 50, his wife Esther, aged 44, children, Jefferson, lead miner, aged 17, Sarah 14, Mary 12, Martha 12, Thomas 9, Jane 7, Anthony 5, Ann 5, sin in

law, John Wearmouth, aged 24, his wife Frances 20, and their son John Walton Wearmouth aged 11 months (died 2nd quarter 1901, aged 51, registered at Auckland, Durham).

Jefferson Walton died 2nd quarter 1859, registered at Weardale.
In 1861, at Jigh Hill House, St John's, Weardale, Esther Walton, widow, aged 54, children, Jefferson, lead miner, aged 27, Sarah, lady's dress maker, aged 24, Jane 17, Anthony, lead ore washer, aged 15, and Ann, lady's dress maker, aged 15.

Esther Walton died 2nd quarter 1884, aged 77, registered at Weardale.

In 1861, at Westgate, St John's, John Wearmouth, lead miner, aged 34, his wife Frances 30, children, John Walton 10, Anne 8, and Margaret 5.
Frances Wearmouth died 3rd quarter 1866, aged 36, registered at Weardale.
John Wearmouth married Elizabeth Thompson, 3rd quarter 1868, registered at Weardale.
In 1871, at Westgate, St John's, John Wearmouth, lead miner, aged 44, his wife Elizabeth aged 40, children, John W, lead miner, aged 20, Margaret 15, and Thomas 1.
Elizabeth Wearmnouth died 4th quarter 1872, aged 41, registered at Weardale.
1881, at Wearhead, St John's, John Wearmouth, Iron miner, aged 54, and his wife Sarah, aged 41.
Sarah Wearmouth died 2nd quarter 1885, aged 45, registered at Weardale.
John Wearmouth married Phoebe Emerson 4th quarter 1890, registered at Weardale.
In 1891, at St John's Chapel, Weardale, John Wearmouth, store keeper at lead mines, aged 63, his wife Phoebe 42, and children William H 9, and Mary J aged 4.
John Wearmouth died 2nd quarter 1896, aged 69, registered, at Weardale
In 1901, at Newhouse, Weardale, Phoebe Wearmouth, widow, aged 52, and son in law, William, farm cartman, aged 20.
Phoebe Wearmouth died 2nd quarter 1910, aged 61, registered at Weardale.

28th August 1875 (Alston Herald)
Marriages
At Alston Primitive Methodist Chapel, Thomas Hodgson, High Earn Well, Stanhope, Weardale, to Mary Martin, Ashgill, near Alston.
In 1841, at Ashgill, Polly Martin, aged 60, John Martin, lead miner, aged 25, Nancy Martin 20, and John Martin, lead miner, aged 13, born West Allen. In 1851, at Grow Gill, (probably Grue Gill, east of Low Ashgill), Garrigill, Henry Craig, labourer, aged 68, and nephew John Martin, lead miner, aged 23; also at Grow gill, Polly Martin, widow, aged 78, daughter Nancy aged 29, and house servant, Mary Martin aged 17, born West Allen.
In 1861, at Ashgill, John Martin, woodman, aged 33, his wife Martha 30, children Mary 7, Susanah 6, Elizabeth 3, and visitor James Purves, married, watch & clock maker, aged 39, born Scotland. In 1871, at Ashgill, John Martin, farmer & lead miner, aged 43, his wife Martha 40, children Mary 17, Elizabeth 13, Henry 11, William 7, John J 3, and Martha 1 week.

DESILVERISATION OF LEAD

The London Lead Company, have just adopted a new process for the desilverisation of lead which promises to be attended with a very extraordinary degree of economy. The process is the invention of a Frenchman, named Rozan, and was first adopted in this country by Cookson, of Newcastle. The principle of the Rozan process is much the same as the Pattinson process. Unlike this process however, that of Mr Rozan is carried out by means of the mechanical agency of steam, which conveying the oxygen to the lead, exercises a purifying influence upon it, while at the same time it desiverises the ore, and extracts the silver more thoroughly than has yet been done by any other means. The steam is applied at a pressure of 55 lbs., which is sufficient to support the lead and prevent it going down into the steam pipe. It is calculated that by this process, there will be a saving of nearly one half the cost of labour, and other expenses will be materially reduced. But desilverisation of lead may be carried to far, the extraction of the silver spoiling the lead for many purposes where it would be most useful. It is a questionable economy after all. *English Mechanic.*

REVIVAL OF PLUMBAGO MINING IN CUMBERLAND.

About two years ago, the mines were leased from the owners by Mr James Barrett, of Coniston, and Messrs Salmon and Mr John S. Lawry of Ulverston, and since that, time vigorous operations have been going on towards their development. Within the last few days, a quantity of Plumbago has been discovered, equal in extent and value to the finds, which realised such immense sums of money many years ago. ...
The lessees, we understand, contemplate the erection of large pencil works, ...

ALSTON.

6TH CUMBERLAND RIFLE VOLUNTEERS.—Acting Chaplain the Rev J. Milner, resigns his appointment; the Rev. E. L. Bowman to be Acting Chaplain.

NENTHEAD

SCIENCE CLASS.—A science class in connection with the Science and Art Department, South Kensington, has been commenced at Nenthead, in the London Lead Company's school. The teacher is Mr Milbank, the newly appointed master of the school. A number of influential gentlemen of the place have become officials, as follows:—Rev Jas. Sharp (chairman); committee, Messrs J. J. Millican, Nenthead; Jacob Walton, Greenends House; and A. Bolton, Nenthead; secretary, Mr Thomas Elliott. A good number have become students.
READING ROOM.—The half-yearly meeting of the Nenthead Reading Room was held in the room on Saturday last. Mr James Atkinson presided. All the old papers and periodicals were taken into the room again, with the addition of the "Northern Daily Express." An animated discussion followed the moving of the "Leeds Mercury" to come into the room, and as it was the general opinion that it could not be got on the day of publication on account of its distance from a railway, it was subsequently determined to have another paper from Newcastle, viz., the "Northern Daily Express." There is a good number of names on the books; the room is also in a good financial condition. The old officials were re-elected.

Marriages

At Alston, Wesleyan Chapel, 23rd inst. Mr Robert Armstrong to Miss Ann Hetherington, both of Nenthead.
In 1851, at Bank Head, John Armstrong, lead miner, aged 44, his wife Elizabeth (Rowe, married 8th May 1830, Alston) aged 40, children Robert, lead ore washer, aged 18, Elizabeth 4, Mary Ann 12, Margaret 9, John 7, Edward 4, and Jane 2. (All born Alston except for Robert, born at Kenton, Newcastle).

13th November 1875 (Alston Herald and East Cumberland Advertiser)

PRESENTATION AND COMPLIMENTARY DINNER
TO THE REV. H. ROBINSON.

On Tuesday evening last, a testimonial to the Rev. H. and Mrs Robinson, of Willington-on-Tyne, and late of Nenthead, was presented to them at the school-room, Nenthead, when a good number were present. The presentation was made by Mr James Atkinson, one of the oldest parishioners, who in a humorous speech spoke of the many good qualities of Mr and Mrs Robinson, and apologised for filling the position he was in, the gentleman expected not being, on account of family matters, able to attend, thus the duty devolved upon him. He said that he considered it one of the happiest moments of his life, and felt proud, being a working man, in accepting the duty of making the presentation. Mr Robinson had laboured among them for fourteen years. The church was opened in 1845, and since that time they had had three parsons. Mr Robinson had proved himself a Christian, and he hoped he might go on rising and rising till he got located at Auckland Castle. In reference to Mrs Robinson he thought she was a most excellent woman. Mr Atkinson then made the presentation. … The testimonial consisted of a centre-piece and salver, and a gold pencil case, altogether amounting in value to £41, the articles being from the establishment of Messrs Reid and Sons, Grey Street, Newcastle. The centre-piece bore the following inscription :—"Presented to the Rev H. Robinson by his parishioners and others, on his leaving Nenthead, as a token of respect for his valuable services as clergyman, and of their esteem and regard for him as a gentleman daring the fourteen years he was amongst them, November, 1875." The salver bore the following:—"Presented to Mrs H. Robinson by the parishioners of Nenthead, as a token esteem and regard, Nov., 1875." The centrepiece and salver were of solid silver. Immediately after the presentation, a dinner was held at the Crown Inn, Nenthead, when upwards of 30 gentlemen sat down to a most splendid repast, served up in excellent style, and which reflected great credit on the worthy host and hostess. …

20th November 1875 (Hexham Courant)

4th December 1875 (Morpeth Herald)

DEATH OF A CAPTAIN IN MINING INDUSTRY.— On Monday was interred in Hexham Cemetery the remains of John Cowper, of Hudshaw House, Hexham, whose death was recorded in the papers of last week, a gentleman well known and much respected in the mining districts of Northumberland and Cumberland. Mr. Cowper was one of the “men who have risen,” and the handsome

competence he realised was almost entirely due to the energy, ability, and business capacity he displayed during a long and active life. His father was a working miner at Garrigill, near Alston. He never forgot that his father had laboured in the “dark and dirty mine,” but always treated his men on a footing of equality. He was interested in many lead mines, as well as collieries and iron-stone mines. His knowledge of the geology of Alston Moor was full and minute. *See 1st June 1833*

11th December 1875 (Hexham Courant)
Marriages

25th December 1875 (Hexham Herald)
ALSTON
SANITARY AUTHORITY
The clerk read Dr Carson’s report for No. 2 district:
Since my last report I have visited Rotherup Side and found all in good sanitary condition with the exception of the premises occupied by Isaac Varty and Hugh Kearton, belonging to T. Horrocks Esq. The dung heaps are too near the dwellings and turnpike road, recommend the above to be removed to a greater distance, and in the meantime a few cart loads of moss to be regularly deposited on account of the quantity of liquid manure collected in the dung pits. Garrigill

Gate is in a good sanitary condition and all recommendations carried out with the exception of the joint premises of Thomas Watson and Adam Pickering. Visited Nenthead on the 29th October and found one privy at Holmesfoot used by the tenants of John Lattimer and Pearson in a bad condition, also two at West Nenthead used by the tenants of Joseph Blacklock, recommended the occupiers to join in keeping them clear. On visiting them on the 13th December found my advice carried out. At the same time inspected Joseph Teasdale's premises at Holmesfoot, found privy in a bad state, promises to have it cleared out when the snow disappears. I am happy to say that the district is free from all epidemics a present.

Deaths

At Carrshield School House, West Allendale, 10th inst. aged 26, Mary Ann wife of Mr F. R. Edens.

Frederick R. Edens, School Master, he and his wife were born about 1850, in Oxfordshire.

PRESENTATION TO J P WALTON ESQ., OF ACOMB HOUSE NEAR HEXHAM.

The workmen employed by the above gentleman, at Brownley Hill Lead ore mine, have subscribed and presented him with a handsome Silver tray and wine mug, on the occasion of his recent marriage, as a token of their esteem and regard for him as a kind and benevolent master.

29th January 1876 (Northern Echo)

EXPLOSION OF GUNPOWDER IN WEARDALE

A few days ago a serious explosion of gunpowder took place at Wearhead, Weardale, whereby Hannah Milburn and her daughter were severely burnt. The lead miners are supplied with powder in small kegs, which when empty are used as coal scoops, and the unfortunate woman had mistaken the keg, having put coals into one containing a quantity of gunpowder, which exploded on the coals

being thrown upon the fire. The house was shattered by the explosion and Mrs Milburn and her daughter severely burnt.

5th February 1876 (Hexham Courant)
Marriages
At Alston Independent Chapel, 13th ult. Mr Daniel Thompson to Miss Ellen Davidson, both of Leadgate.
In 1861, at Middle Skelgill, John Davidson, lead miner, aged 38, his wife Ann (Walton, married 4th quarter 1848, reg. Alston) aged 40, daughter Ellen 7, and son John 5. 5th February 1876 (Hexham Herald)

ALSTON SANITARY AUTHORITY

Dr Carson submitted the report for the No. 2 district for the year ending 31st December 1875, and stated that the district was never in a more healthy condition that at present. At the beginning of the year Scarlet fever was very prevalent at Ashgill and Nenthead, but owing to the great care exercised it did not spread. Two or three isolated cases occurred during the summer. With the exception of the above and a few cases of Typhoid fever the district has been free of epidemics. .. Since last report I visited Wellgill and found no privy accommodation although there are 6 or 7 families in the locality but in other respects satisfactory. At the same time I inspected Newhall and found the premises occupied by Mr J. Jackson and belonging to G. Wilson Esq. in a bad state owing to the large collection of stagnant liquid manure surrounding the dung heap. Recommended its removal to a greater distance from the house. The number of deaths in the district for the year amounted to 54 being at the rate of 17.4 per thousand, consisting of 25 males and 28 females.

12th February 1876 (Hexham Herald)

Marriages

At Stanhope, Wesleyan Methodist Chapel, 7th inst. Mr Jabes Greenwell *(Currier)* to Miss Elizabeth Jacques, both of Stanhope.

T**he Nelson Examiner & New Zealand Chronicle 11th April 1867** *had the following advertisement.*

NOTICE: - The undersigned being about to leave the colony for England requests that all ACCOUNTS owing to him be PAID within fourteen days from this date, and that all accounts against him may be sent in for settlement forthwith. Jacob Batey, Appleby, April 6.

The Nelson Examiner & New Zealand Chronicle 4th May 1867

Dinner to an Old Settler. — A dinner was given a few evenings since, at the Star and Garter, Richmond, to Mr. Jacob Batey, of Appleby, who is about to return to England by way of Panama, by the next steamer. J. W. Barnicoat, Esq., Speaker of the Provincial Council, filled the chair, and Mr. Harkness the vice-chair. In proposing the health of Mr. Batey, the Chairman spoke of him as an old and most esteemed friend, who had taken an active interest in the working of our Education scheme, both as a member of the Central and Local Boards. As a neighbour and a settler, no one stood higher in the district, and while he must congratulate Mr. Batey on being able to make the visit he was contemplating, his absence would be felt by all who knew him. The health of Mr, Batey was drunk most enthusiastically, and hearty good wishes expressed for his future health and happiness.

4th March 1876 (Hexham Courant)

NEW ALSTON (STONECROFT)

FATAL MINING ACCIDENT. THE INQUEST.

On Saturday last, an inquest was held at the above place, by Mr R. Y. Green deputy coroner for South Northumberland, on view of the body of a young man named Thomas Rumney, lead miner, living at New Alston, who died on Friday, the 25th ult., from injuries received while engaged in blasting in Stonecroft mine. Deceased was twenty-two years of age, and on the 17th of last month, he and his brother were at work in the mine boring holes in the rock, into which blasting powder was inserted to blast it. Deceased was busy making “squibs” with which to ignite the powder, having a bottle containing 4lbs of powder close to him, when through some mishap or other - the real cause is unknown - the powder exploded, and severely injured the deceased. He was instantly conveyed home, where he lingered until the 25th ult., when he died. Deceased’s tobacco pipe was found near the place but it is not known whether the young man was smoking at the time of the explosion. The body was fearfully mutilated, the face, chest, left shoulder, and both legs being terribly burnt. At the inquest the only witness examined was Joseph Rumney, lead miner, brother to the deceased. He was working not far from his brother when the sad accident happened. He identified the body as that of his brother. The jury returned a verdict of “Accidental death.”

In 1871 at Haydon Fell Cottages Thomas Rumney aged 58, lead miner, his wife Elizabeth (Bell married 26th January 1837) 52, children Joseph lead miner 22, Thomas lead washer 17, Sarah 15, Margaret 11, Hannah 7 and grandson Robert Walton aged 7; all born Alston. They had three older children Mary born 1842 John born about 1844 (born Alston), and Elizabeth born 1846 (born Kirkhaugh, Northumberland).

Deaths

At Overwater 29th ult., aged 40, Mr John Whitfield Lead Miner.

In 1841, at West Nenthead, Thomas Whitfield, lead miner, aged 50, his wife Mary, aged 45, children Robert 20, Sarah 15, Thomas 15, Leah 12, Rachel 8, John 6, and Elizabeth 2.
The 1851 at Bank Head, Nenthead, Thomas Whitfield aged 62, lead miner, and his wife Mary aged 55, born Knaresdale, daughters Rachael 18, and Elizabeth 16, and son John aged 16, lead ore washer.
Thomas Whitfield died 2nd quarter 1852, his wife Mary died either 1858 or 1860.

18th March 1876 (Hexham Herald)

ALLENDALE

TRACTION ENGINE. Another of these engines has arrived at Catton station, for Mr W. B. Beaumont's works at Allendale, ... as soon as weather permits it will commence its labours. In a little time, we doubt, the "Jolly Cartmen" of this district like Toll bars will become a thing of the past. *The engine was used to transport ore between Allenheads and Allen Mill*

18th March 1876 (Alston Herald)

ALSTON

... the school at Nenthead, which is maintained solely by the London Lead Company, but which in the event of a School Board being formed would fall upon the rates with the others. The clerk continued that these schools (the other schools in the parish of Alston) at present did not cost the rate payers a penny, but if we had a Board he thought they would cost at a low estimate not less than £800 a year to rate payers. ...

At Stanhope, 26th ult. aged 89, Mr Thos. Crawhall. *See 27th May 1882.*

6th May 1876 (Hexham Herald)
WEARDALE MINES ASSOCIATION ANNUAL MEETING.
On Saturday last, the Weardale Lead miners held their annual meeting in connection with the association in the Town Hall, St John's Chapel, Mr Nathan Race in the chair. Mr T Peadon, secretary to the association, submitted the third annual report, which proved the total receipts for the year to be £80 0s 10d, which, with the balance of £186, amount to £266 0s 10d. For accidents there

has been paid £16 8s 4d, expenses £16 6s, leaving a balance of £233 6s 6d of which £200 was banked. Mr Peadon thought the usefulness of the association was not likely to diminish for there were still risks for miners. However the number of accidents for the year was very small, only five, and those not of a serious nature, and he thought the accidents were not likely to increase, and however much their friends might misjudge the objects of their association, and members prove faithless, honesty and progress should be their aim. ...

ALSTON

PETTY SESSIONS

Mr J G Millican, solicitor, applied on behalf of the London Lead Company for leave to store gunpowder at Nenthead and Garrigill. He explained that the present places had been in use for at least 80 years, and the Company had got the written consent to continue the keeping of it from every householder within 200 yards of the premises. In the case of Garrigill, there was only one building, the Independent Chapel, within the distance, and they had got the written permission of the trustees. The quantity required at Nenthead was 4,000 lbs. Two tons it appears, was the limit of the Act, but by an order in Council, this was reduced to 4,000 lbs. Mr J J. Millican corroborated the statements of Mr J G Millican, as to the consent of the inhabitants having been obtained, and the application was granted.

Deaths

At Whitehall, 8th inst., aged 1 year, John Doyle son of Mr Hugh Doyle, lead miner.

Robert Doyle, married Agnes Barron (second daughter of Cowper Barron, Nenthead miner, and Hannah daughter of Archibald Armstrong, born 12th June 1810), at Alston, 14th February 1828.

24th June 1876 (Hexham Herald)
NENTHEAD
A CHILD SCALDED TO DEATH.
On Friday the 16th inst. a child *(Margaret Jane)* about 18 months old belonging Mr Walbank, Schoolmaster, Nenthead, met with a shocking death on the day in question. The mother of the child was in the act of preparing dinner, and had placed a pan of boiling water on the bars, the contents which by some means or other fell down upon the child who was before the fire. The poor creature lingered till about six o'clock in the evening when death put an end to its sufferings. The painful circumstances has awakened a feeling of deep sympathy at Nenthead for the parents of the child who have only been in the neighbourhood a short time.

1st July 1876 (Hexham Herald)

ALSTON
SUDDEN DEATH

On Sunday morning the 25th ult. a man of the name Thomas Percival who lived alone and having neither wife nor housekeeper, was found dead in his own house. The deceased it appears had been out of health some time previous to his death and frequently vomited blood. Being in this precarious state it was not considered safe to leave him alone, and his friends and neighbours were in the habit of sitting up with him. But the night before his death (being considered a little better) this practice of sitting up was dispensed with and he was left alone. The female, however, who attended upon him and who entering his house on the morning in question found him lying dead upon the floor, there being every indication that he had been literally choked with blood. Deceased was 51 years of age.
In 1841 at Bloomsbury, Nenthead Joshua Percival lead miner aged 46 (died 1842), his wife Mary 41 (Mally Cousin, married 28th Sept 1822, died 1865), children William 18, Thomas 16, Joseph 12, Isabella 9, John 7, Mary 4, and Anthony 2 months (died 1841?)
In 1851, at Low Dykeheads, Mary Percival, widow, aged 50, children William, lead miner, aged 27, Thomas, lead miner, aged 25, Joseph, lead miner, aged 22, Isabella 19, John, lead ore washer, aged 17, and Mary Ann 13. In 1861, at Low Dykeheads, Mary Percival, widow, aged 60, sons Thomas, lead miner, aged 35, Joseph, lead miner, aged 32, and house servant Mary A Elliott aged 16. In 1871, at Low Dyke Heads, Nenthead, Thomas Percival, unmarried aged 46, lead miner.
See 10th July 1875, 15th July 1876, and 11th October 1884.

1st July 1876 (Hexham Courant)

8th July 1876 (Hexham Herald)

ALSTON

SALE OF LEAD ORE. On the 28th ult., 112 bings of lead ore were sold in one lot or parcel at Newcastle upon Tyne. The ore was the product of a lead mine called Cashwell, which is situated between 7 and 8 miles from Alston. There were three parties who offered to purchase the ore, namely Mr Joseph Dinning of Langley Mills, Messrs Lock, Blackett and Co., and Messrs Jacob Walton and Co. Messrs Lock Blackett and Co's offer for the ore, subject to the same being delivered at the Alston Station, was £5 2s 6d per bing; Messrs Jacob Walton and Co's offer £4 14s 6d per bing; and Mr Dinning having offered the price or sum of £5 0s 6d per bing for the ore at the mine was declared the purchaser.

Marriages

At the Congregational Chapel, Alston, 2nd inst. Friend Herdman, Miner, Garrigill to Mary Walton

In 1881, at Howgill Rigg, Friend Herdman, lead miner and butcher, aged 29, his wife Mary 32, children, John Henry 3, and Arthur Edwin 1 month.
In 1891, at Low Nest, Garrigill, Friend Herdman, farmer, aged 39, his wife Mary 42, children, John Henry 13, and Arthur Edwin 10.
In 1901, at Low Nest, Garrigill, Friend Herdman, farmer and general labourer, aged 48, his wife Mary 51, and son Arthur Edwin, farmers son, aged 20.
In 1911, at Low Nest, Friend Herdman, farmer, aged 59, his wife Mary 61, and Arthur Edwin, farmers son, aged 30.
Friend Herdman died 4th quarter 1912, aged 61, registered at Alston.
Mary Herdman died 3rd quarter 1919, aged 71, registered, at Haltwhistle.
See 4th March 1843, 23rd July 1867, and 19th April 1884.

Deaths

At Ivy House, Garrigill, 29th ult. aged 5 months, Josephine Pickering, youngest daughter of Mr William Bird Brown, *(farmer of 144 acres)*.
See 21st November 1835, 13th February 1875
At Alston, 29th ult. aged 24, Mary 2nd daughter of Mr William Hall, Coal Agent.

In 1871, at Town Head, Alston, William Hall, coal agent, aged 54, wife Sarah Christian (Jobling, married 3rd quarter of 1843, registered at Hexham) aged 48, children Diana, domestic servant, aged 24, William, cartman, aged 21, Mary 18, Harrison, carter, aged 16, Elizabeth 15, Christian 12, and Thomas 9. See 10th March 1894

At Fourdargue, 2nd inst aged 70, Elizabeth relict of John Ridley, formerly of Alston.

In 1841, at Bruntly Syke, John Ridley, lead miner aged 40, his wife Elizabeth 35, Sarah 14, and Thomas 10. In 1851, at Kates Lane, John Ridley, lead miner, aged 54, born Whitfield, his wife Elizabeth aged 45, born Allendale and son Thomas, lead miner, aged 20, born Alston.
John Ridley died 1st quarter 1861.
In 1861, at Town Head, Elizabeth Ridley, lead miners widow, aged 55, and son Thomas, lead miner, aged 30. In 1871 Elizabeth was living at Flimby with her unmarried son Thomas aged 40, who was working as a coal miner.
See 20th October 1888.

15th July 1876 (Hexham Herald)
Deaths

At Dykeheads, Nenthead, 7th inst. aged 53, William Percival, Nenthead.
See 10th July 1875, 1st July 1876., and 11th October 1884

22nd July 1876 (Hexham Herald)
Deaths

Hexham, Hudshaw House, 15th inst. aged 11, Edith Mary, 2nd daughter of the late John Cowper Esq.

In 1841, John Cowper aged 30, is in Keswick, a mineral dealer, in 1851 he is living in Alston, with his mother Sarah aged 71, a mineral dealer; and in 1861 he is listed as a lead mine proprietor lodging at Siloth, with his wife Sarah aged 26 (Atkinson, married at Wigton, Cumberland, 3rd quarter 1860).
The Mannix & Whellan, History, Gazetteer and Directory of Cumberland, 1847, referring to Keswick.

> *The various mineral productions of the neighbourhood, as well as of other countries, may also be had at the establishment of Mr. John Cowper, mineralogist, jeweller, &c.; and likewise at other places in the town.*

The 1851 census shows Sarah Atkinson, aged 14, daughter of John and Judith, living at Lowbyre Receiving House, John Atkinson, wood keeper aged 55, his wife Judith aged 49, children William woodman 27, Mary Ann 19, Sarah 14, Eleanor 12, Hannah 9, and John 7.
In 1871 at Acomb John Cowper, mine proprietor, 61, born Garrigill, his wife Sarah, born Alston, aged 34, children John 9, Judith Sarah 8, Edith Mary 6, Florence 4, Minnie 1, and Emily 1 month. John Cowper died in the last quarter of 1875, he had interest in Stonecroft & Greyside mines, the Cowper family were in business with the Walton family.
In 1881, Judith, Florence & Emily are boarders at the Vicarage at Humshaugh, with the Vicar Henry Parmintor's family.
The family was struck by tragedy with a series of deaths, Minnie died in 1874, Edith Mary in 1876, Sarah in 1879, and Judith Sarah in 1882.

In 1891, living in Shanklin the Isle of Wight, at Hevelock House, John Cowper, medical practitioner 29, with his sisters Florence 24 and Emily 20.
In 1901, at Havelock, Shanklin, John Cowper, medical practitioner, aged 39, his wife Gertrude (Anderson, married at Eastbourne 1st quarter of 1893) aged 33, born Russia, British Subject, children John E. 7, Judith O. 4, Cecil F. 2, servants Gertrude E Osborne, parlour maid, aged 23, Ethel F Attrill, housemaid, aged 18, Phoebe Davis, cook, aged 24, and Emily Buckland, nurse, aged 36
See 1st June 1833, 23rd November 1864, and 14th January 1868,
Nenthall, 14th inst. aged 16, John only son of John Bell, Butcher.
See 9th August 1873
At Alston workhouse, 17th inst. aged 82, Elizabeth Teasdale. *(unmarried)*

29th July 1876 (Hexham Herald)
Deaths
At Carrshield, 10th inst. in his 32nd year John Fairless, Innkeeper.
In 1871 at Carrshield, John Fairless, publican and farmer of 13 acres born Hunstanworth, 76, his wife Ann 69, born Allendale, Matthew road labourer, 43 Thomas agricultural labourer, 33, Sarah 31, Margaret 28, John Fairless, shepherd aged 26.
At Nenthead, 23rd inst. aged 19, Margaret Ann, daughter of Mr Anthony Robinson.
Nenthead Primitive Methodist records show, Anthony Robinson born 23rd March 1823, christened 28th August 1829, Tinniswood Robinson, born 11th March 1827, christened 28th August 1829, Joseph Robinson, born 31st May 1832, christened 14th July 1833, mother Margaret Robinson.
In 1841, at Hill Top, Nenthead, Margaret Blacklock, supported by sons, aged 30, sons Anthony Blacklock, lead miner, aged 15, Tinniswood Blacklock, lead miner, aged 14, and Joseph Blacklock 9.
In 1851 at Hill Top Nenthead, Margaret Robinson, unmarried formerly a house servant aged 53, sons Anthony 28, and Tinniswood 24, both lead ore smelter's.
In 1861, at Hill Top, Nenthead, Anthony Blacklock, smelter, aged 38, his wife Esther (Redshaw, married 2nd April 1853, at Nenthead) aged 32, children Joseph 7, Thomas Hall 5, Margaret A 4, Elizabeth 2, and Mary 7 months.
In 1871, at Nenthead, Anthony Robinson lead smelter and farmer aged 48, his wife Esther 42, born Knaresdale, Northumberland, children, Joseph lead ore smelter 17, Thomas lead ore washer 15, Margaret A 14, Elizabeth 12, Mary 11, Isabella 9, Tinniswood 7, Anthony 5, Esther 5, Emily Jane 4, Frances 3, John 2, Jacob 4 months, and mother Margaret Robinson 75.
Anthony and Esther emigrated to Canada, the 1881 Canadian census gives the following, at Greenock, Bruce South, Ontario, Anthony Robinson, farmer, Wesleyan Methodist, aged 58, his wife Esther Robinson 52, children Joseph, farmer, aged 27, Thomas H., farmer, aged 24, Elisabeth 22, Tinswood 17, Anthony 15, Isabella 18, Esther 15, Emely J. 14, Frances 13, John 12, Jacob 10, and William 8, all children born in England.
In 1891, at Greenock, East Bruce, Ontario, Anthony Robinson, farmer, Methodist, aged 68, his wife Esther, aged 62, Children Joseph, farmer, aged 37, Anthony, farm labourer, aged 25, Esther 25, John, farm labourer, aged 22, Jacob, blacksmith, aged 20, William, farmer, aged 18, Lettie C aged 7, born

Ontario. Also Thomas Robinson, farmer, aged 36, and his wife Hannah aged 34, born England.
Mary Robinson aged 20, married Robert Tacket, 12th January 1880, at East Zorra, Oxford, Ontario. Emily Jane aged 22, married John McDowell Burgess, 25th December 1888, at Brant, Bruce, Ontario, at the same place on the same date Isabella Robinson aged 26, married Joseph Teasdale. Frances Robinson aged 21, married George Childs, 6th March 1889, at Edengrove, Bruce, Ontario.
Jacob Robinson aged 22, married Amelia Plummer, 20th September 1893, at Mount Forest, Wellington, Ontario.
Anthony Robinson aged 28, married Sophia S. Wilson, 21st March 1894, at Bentinck, Grey, Ontario.
Anthony Robinson died 25th January 1901, aged 78, at Greenock, Bruce, Ontario. Ontario Cemetery records show Anthony and Esther buried at Douglas Hill, Cemetery, Brant, Bruce, Ontario (Ref. BG-B-024)
See 19th February 1876, and 5th March 1887

5th August 1876 (Hexham Herald)
Marriages
At Garrigill at the Wesleyan Chapel, Mr Edwin Bevington, Provisions Dealer, Leigh, Lancaster, to Elizabeth Teasdale, Garrigill.
Deaths
At Alston workhouse, 1st inst. aged 80, Wm. Edgar, recently of Clargill Head Farm near Alston.
At Nenthead, 3rd inst. aged 55, Joseph Blacklock, Innkeeper and Grocer.

AGED 33 YEARS
INTERRED AT ELSWICK CEMETERY, NEWCASTLE.

In 1841, Joseph Blacklock innkeeper, aged 45, his wife Ann 40, children Joseph lead ore washer 17, Hannah 10, and Jacob 3 (died 17th February 1870, aged 32). Ann Blacklock died 4th March 1849 aged 52.
Joseph Junior, married Ann Latimer 24th February 1848 at Nenthead, Ann died 10th March 1848, aged 24.
In 1851, Joseph Blacklock, widow, Innkeeper & grocer, aged 52, sons Joseph lead miner aged 27, also a widow, and Jacob aged 13, a scholar.
Joseph Blacklock senior died 19th July 1855, aged 64.
In 1861, Joseph Blacklock, widow, Innkeeper & grocer, aged 38.
Joseph married Ruth Irwin at Nenthead on 24th May 1863.
In 1871 Joseph Blacklock, draper, grocer & innkeeper aged 48, his wife Ruth 37, children Jacob 11, Nanny 6, and Frances Ruth aged 3.
See 12th January 1878, 1st July 1882, 16th February 1884 & 6th December 1884.

12th August 1876 (Hexham Herald)
Marriages
At Stanhope Primitive Methodist Chapel, 5th inst. Mr Thomas Lowes of Middle Blackdean, to Miss Elizabeth Moses of Daddry Shield.

19th August 1876 (Hexham Courant)
LEAD MINING INTERESTS IN TEESDALE AND WEARDALE
Some important alterations to the monetary transactions of the London Lead Company are to be made with the employees. For a great number of years it has been the custom for the Governor and Company to settle annually with the wagemen, and washer boys employed in the Teesdale, Weardale and Westmoreland mines, and number about 2,000 hands, the men periodically through the year drawing what is locally known as “subsistence money.” The “great pay” is to be abolished and quarterly settlements instituted. This ulation has met with the hearty approval of the men. The wagemen, for forty hours per week generally averaged over £1 2s per week. The mines are on the whole in a prosperous condition the price of lead having an upward tendency in the market. The machinery recently introduced for washing ore has proved to be labour saving and economical.

WEARDALE
LEAD MINING. Some important alterations in the monetary transactions of the London Lead Company are about to be made with the employees. For a great number of years it has been the custom of the Governor and Company to settle annually with the wagemen, bargain men, and washer boys employed in the Teesdale, Weardale, and Westmorland mines, and numbering about 2,000 hands, the men periodically throughout the year drawing what is locally known as “subsistence money.” The “great pay” is to be abolished, and quarterly settlements instituted. This regulation has met with the hearty approval of the workmen. The wagemen for forty hours per week, lately averaged over £1 2s per week. The mines are, on the whole in a prosperous condition, the price of lead having an upward tendency in the market. The machinery recently introduced for washing the ore has proved to be labour saving and economical.

Births
Hill House Alston, 16th inst. the wife of Mr Stagg jun. of a daughter, still born.

26th August 1876 (Hexham Herald)
Marriages
At Alston, St Augustine's church, 21st inst. Ralph Carr of Low Flatt, near Alston, to Margaret Holmes of High Bayles near Alston.
In 1861, at Gate Foot, Garrigill, Daniel Holmes, lead miner, aged 31, his wife Mary aged 28, children Tamer 8, Mary Ann 6, Margaret 4, and William 2.
In 1871, at Snappergill, Daniel Holmes, lead miner, aged 41, his wife Mary 38, son William 12, boarders William Craig, lead miner, aged 21, and his wife Tamer Craig aged 18. In 1871, Margaret Holmes, aged 14, was working as a domestic servant, at Kent St., Alston, for William Craig, drawer in lead mines, aged 35, and his family.
Daniel Holmes died 18th August 1871, aged 41
In 1881, at Garrigill Gate, John Dawson, farmer of 20 acres, aged 58, his wife Mary 48, son in law William Holmes, coke drawer, aged 22, and grandson Thomas W. Holmes 5
In 1871, at Road Side House, Alston, Joseph Carr, lead miner, and farmer of 14 acres, aged 49, his wife Mary aged 49, children Ralph, lead ore miner, aged 18, William, lead ore miner, aged 17, Thomas, lead ore washer, aged 15, Joseph, lead ore washer, aged 13, Elizabeth 7, John 5, Anthony 2, and Matthew 11 months.
In 1881, at Sycamore St., Elswick, Ralph Carr, cartman, aged 28, his wife, Margaret 24, sons Joseph 4, and Daniel 1. In 1891, at Marian St., Gateshead, Ralph Carr, Rolleyman, aged 39, his wife Margaret 35, children Joseph, errand boy, aged 14, Mary E 6, Ernest R 4, and Matthew W 2. In 1901, at Haydn St., Gateshead, Ralph Carr, brewers drayman, aged 48, his wife Margaret 40, children Mary Lizzie 16, William 12, Wilfred 10, Stanley 7, Margaret 5, and Fred 3 years.
Ralph Carr died 4th quarter 1904, aged 51
In 1911, at Castle Terrace, Hirst, Ashington, Margaret Carr, widow, aged 54, sons Matthew William, plumber, lead, aged 22, John Stanley, miner stoneman below ground, aged 18, and Fredrick 12.
See 13th December 1870, 2nd September 1871.

2nd September 1876 (Hexham Courant)
LETTER FROM A NENTHEAD MAN IN CANADA
We have received for publication the following letter from Mr John T Little, a native of Nenthead, at present at Batchawana in Canada.

Sir, - I send you these few lines thinking they may interest some of your readers to hear from me in this far off land. Twenty-two years ago on the 16th of September 1854, I left my native land. After touching at Halifax, N.S., we landed at Boston, U.S; thence we went by railway to Buffalo, and from thence by steamboat to Toronto in Ontario. After staying there some three weeks, I went to Paris, Ont., where after some negotiation I bought a capital farm on the Grand River, which was rather an imprudent step in one so little experienced in the ways of the country, value, &c., to take. I note these few particulars as a beacon to warn others. My advice to any one going into a new country is to wait patiently at least a year till you get

accustomed to ways of working, habits, and current values, else you will be apt to acquire wisdom at a rather too expensive a rate to be useful or profitable. A new comer is rather to apt to despise the ways and plans of those he finds around him, and thinks that what he has been accustomed to see at home is suited to all places and climates, but soon finds out that such is not the case.

I was in the farming business some few years in that neighbourhood. It is a fine country, the valley of the Grand River, very fertile and healthy with beautiful scenery I have found Canada on the whole to be a very fine country, in many parts of it, a very fertile soil capable of growing good crops of grain, grass, turnips, and vegetables of every kind. Indian corn does well in almost every part of Ontario. Apples, pears, plums, English cherries, and all the small fruits do well, and yield good crops of fruit. Grapes grow well and ripen well in many parts of Ontario. Clover, Timothy, and other grasses, with peas, tares, flax, &c., are largely grown in almost every part of Canada. Winter wheat, spring wheat, barley, rye, and oats yield large crops when well cultivated. Many parts of Ontario are under a high state of cultivation. Clean fields, good orchards, barns, well kept fences, and substantial brick or stone houses are plentiful in many parts. Some of the herds of stock, cattle, and sheep, would be no disgrace to any country, and are justly the pride of their owners. As a rule, the land is mostly in the hands of and cultivated by its owners. Prices of land in the newer parts of Canada advance very rapidly. For instance, land that 18 years ago sold for 20 dols. an acre (£4) now brings 70 dols. (£14) an acre. This I vouch from personal observation. The older settled parts of Ontario are fast filling up with an industrious thrifty people of mixed origin and nationalities. But yet, there is abundance of room for an unlimited number of hardy enterprising people not afraid of a few years hardship and cutting off from home comforts to carve out for themselves a home in the wilderness, and a comfortable competency for old age. I could name several of my own acquaintances from Alston Moor who have succeeded well and now are in very good circumstances, and are able to place themselves and families in comfort. I will however, only name one, Mr & Mrs W. Dixon. Mrs Dixon's maiden name was Liddle *(Hannah Liddle, married 28th March 1833)*. She was born at Nenthead, married to Mr John Teasdale, of that place, a Wesleyan preacher, and after his death *(died 6th July 1842)* married a second time to Mr Wm. Dixon *(married 18th August 1850, at Nenthead)*, and emigrated to Canada, and they now have a farm of 160 acres of land in good cultivation and their family and themselves are in very comfortable circumstances.

In 1841 at West Nenthead, John Teasdale, stone mason aged 30, his wife Hannah aged 30, children Thomas 7, Ann 3, and Joseph 1.

In 1851, at Foulard, Nenthead, William Dixon, lead miner, aged 25, his wife Hannah aged 39, step children, Thomas L. Teasdale, lead miner, aged 17, Ann 13, Joseph 11, and John aged 8 years.

In 1861, the Canadian census shows, at Grey, Canada West, William Dixon, farmer, aged 35, Thomas L. Teasdale, aged 26, George (Joseph!) Teasdale, aged 21, John Teasdale, aged 18, William L. Dixon aged 5, Hannah Dixon aged 49, and Ann Dixon aged 65.

In 1871, the Canadian census shows, at Egremont, Grey South, Ontario, William Dixon, farmer, aged 47, his wife Hannah aged 59, John Teasdale

aged 27, William Dixon aged 15, and Ann Dixon, widow, aged 75. See 6th April 1833.

This is only one of many instances where industry and thrift combined with sobriety have brought there own reward. One of their neighbours, a Devonshire or Somersetshire man, went into the bush with money to buy 50 acres of land from Government at one dollar per acre, and the Government gave him other 50, all wild land, remember no clearing. And a little money, not much either of that, which he had saved in Canada. He moved on to the land 23 years ago, now he owns 400 acres of good land, in different lots and quite a big clearing on all of them with buildings. As a rule people that come to Canada with plenty of money often lose it with speculation in various ways, and those that come with little or no capital but good pluck and a resolute determination to surmount the trials and difficulties of a new country, coupled with sober and industrious frugal habits, almost invariably succeed by a few years patient industry in placing themselves on the high road to fortune, and a competency. Our school privileges in Canada are good, and the means of education are placed within the reach of all. The electoral franchise is placed within the reach of all who are worthy of it. Churches of various denominations are found in every part. Railways, towns, villages, and good roads abound. Life and property are quite safe in any part of the country to any one who attends to the golden rule of "keeping out of bad company and minding your own business". Water powers offer great facilities for manufacturers of various kinds, which are springing rapidly up. Intemperance is, sad to say, the bane of thousands, but temperance principles are rapidly spreading. I saw last year a statement copied from an English paper, stating that our climate was severe, and that it was quite a common thing to see people that had their legs and feet frozen and were crippled in consequence for life. Allow me to say that the writer of that statement must have been in a very curious part of Canada or otherwise he was making a false statement. As I have lived in Canada (Ontario) 22 years, and never yet knew a case of any one being seriously frozen in cold weather unless the party was under the influence of intoxicating liquor, and I have travelled about in the open when the thermometer has indicated 30 degrees below zero without taking any hurt at various times. Allow me to add my humble testimony in favour of total abstinence from all intoxicating liquors. I am, as I always was, a cold water man, and often feel amused at a dialogue which took place after I came to Canada. One of my old friends in England just after I came out said to me, "Little, it will not do for you to be teetotaller in Canada, you will be sick with the bilious fever next summer in the hot weather if you do drink water without a little whisky in it." I laughed at the man and told him he might try his plan and I would stick to the cold water. Summer and hot weather came, an lo and behold the doctor was sent for and our whisky and water advocates had the pleasure of taking several doses of calomel and such like nice compounds, but the cold water with the aid of a little oatmeal mixed in it carried me triumphantly through the season without the first symptoms of biliousness. As your paper circulates in a mining country, let me say that Ontario will by and by take a high rank as a mineral country in many parts of it. Iron of various qualities abound, copper, lead, silver, plumbago, &c., but the mining business is quite in its infancy. Our population is mostly

agricultural, and mining explorations have been neglected. The district of Algoma on the north shore of Lake Superior is famous for mineral wealth. Silver Island mine produced one year, £200000, 1000000 dols. worth of silver with the labour of 20 men. This year it is very rich. At Garden River there is a new lead mine, opening the rib is four feet wide of solid lead ore in the vein and a little from the side of its two ribs of one foot each. The vein is a well defined one, is traced quite a distance. At various other places new mines are opening out that look well. The diamond drill is coming into use now. Imagine drilling a hole 300 or 400 feet deep in as many weeks, and bringing to the surface well defined samples of the different rocks passed through. I enclose you a report on the diamond drill which will make the matter plain to all and I have no doubt it will interest your readers, many of them. Although I still continue to love my native land, I like this country very much. I have enjoyed very fair health, got rid of the asthma, and hardly ever have a bad cold, more especially since we left the settled parts of Ontario, and came to this part of Algoma. Perhaps it might interest you to hear from us what we are doing here. Well about two years ago we left Brant Co., Ontario, and after travelling by water and rail some 450 miles north-west, landed at Batchawana Bay on the North Shore of Lake Superior, 40 miles N.W. from Sault St. Marie, the capital of Algoma. I am stationed here as a catechist and schoolteacher, in connection with the Missionary Diocese of Algoma Church of England. My labours are principally among the Indians. Our nearest white neighbours are five miles away from us across the bay. The Indians are a small remnant of what was once a mighty nation that anciently gave name to this lake (Obebway Lake) now Lake Superior. They are a very inoffensive, peaceable, honest people, and are very kind to us. The people learn well but their roving habits are a great hindrance to their well doing. We find it a very healthy climate in summer, and very pleasant and steady in winter, without those fluctuations in temperature so trying to the human constitution. The scenery round here is highly romantic, and very beautiful. The bay and its islands and the mountains round are very rugged, though not of any great height. Indications of mineral wealth abound on every side, but the country being all covered with forest the veins are bad to trace. Fish, delicious fish, speckled and salmon trout, pickerel, pike, whitefish, bass &c. are plentiful. Grouse, the woods grouse, and the black grouse are plentiful in the fall, and thousands of ducks and geese fly over in the spring and autumn. I had a copy of your paper sent to me by some of my friends in Alston Moor; I presume so. I take the liberty of sending you a little information about Canada. Give my best respects to my cousin, Mr John Millican, merchant, Alston. Please send me a paper and then by and bye I will write to you again. I am, &c. John T. Little, late of Nenthead.

Batchawana, July 18th 1876.

See 11th July 1829.

John Tinniswood Little, son of Joseph Little (born Garrigill, son of Joseph Little & Sarah Dickinson) & Mary Millican (born Alston, daughter of John Vipond Millican and Francis Tinniswood), married 1st July 1829, at Alston, they had two children Joseph Tinniswood born 2nd December 1829 and Frances Lucy born 5th July 1834 (died 16th July 1834). In 1841, Mary Little aged 40 is living

with her father John Vipond Millican, at Nenthead, and John is at school, the Milbourne Academy, Kirby Thore, Mary died 9th February 1851.
In 1851, at West Nenthead, John Vipond Millican, widow, aged 74, retired mining agent, and his grandson, John T. Little, landowner & mortgagee, born Stanhope, aged 21 years, also servants Ann Shield, 22, Mary Green 14, and washer woman Tamar Hind aged 36.

On 15th March 1858, John Tinniswood Little, aged 27, married Sarah Curson (born England, parents James Curson and Sarah Curson), aged 27, at Paris, Brantford Township.
The Canadian 1861 census shows James Curson farmer aged 60 and his wife Sarah aged 60, at Brant, Canada West.
The only English record I can find for this family is the 1841 census for Little Ryburgh, Norfolk: James Curson, bricklayer, aged 45, his wife Sarah 38, children James 19, Sarah 15, Samuel 13, Thomas 10, and Elizabeth 8 years.
In 1861, at Brantford, Brant, Ontario, John Little, farmer, and his wife Sarah, children Mary Henderson. and Frances Ann.
In 1871, at Brantford West, Brant South, Ontario, John Little, peddler, aged 41, his wife Sarah 42, children Mary H. 12, Frances Ann 10, James Henry 8, Flora Ellen 6, and Sarah Agnes 2 years.
In 1881, at Korah, Algoma, Ontario, John Little, farmer, aged 51, his wife Sarah 52, children Mary 22, Francis 20, Henry 19, Flora 17, and Sarah 12.
In 1891, John, farmer, aged 61 and his wife Sarah aged 62, were living at Algoma Mills, Algoma. The records of deaths for Algoma show Sarah Little died 13th June 1898, from dropsy, which she had suffered for 1½ years and John, died 16th June 1898, from inflammation of the bladder, both were buried at Carlyle Cemetery, Iron Bridge, Ontario.

John Tinniswood Little's grandfather John Vipond Millican was a significant figure in Alston, as were his sons Tinniswood and John, his will gives further information:

Will of John Millican 14th February 1851

I John Millican of Nenthead in the parish of Alston and County of Cumberland being in a poor state of health but of sound mind. I do hereby declare this to be my last will and testament in manner following that is to say, I appoint my two sons ***Tinniswood Millican*** *and* ***John Millican*** *my joint executors of this my last will and testament to whom I bequeath the whole of my property personal and otherwise to be equally divided between them nevertheless to be subject to the following payments, in the first place to pay there out all my just debts and funeral expenses, in the second place to pay there out to my grandson* ***John Tinniswood Little*** *twelve months after my decease the sum of five hundred pounds and also to give there out to my grandson John Tinniswood Little the whole of my household furniture Beds, Bedding, and Linen, and I do hereby declare this to be my last will and testament made this fourteenth day of February one thousand eight hundred and fifty one. John Millican signed published and delivered by the said Testator John Millican as and for his last will and testament in the presence of us who in his presence at his request and in the presence of each other have hereunto set and subscribed our names as witnesses. John Tatters, Thomas Moffat.*

Proved at Durham on the 5th day of July 1851 by Tinniswood Millican, Manager of Lead mines, and John Millican, Manager of Smelting Works, the executors therein mentioned, to whom admin was granted, they having first duly sworn as usual. Sub. £3,000.

John Vipond Millican married Frances Tinniswood 5th October 1799, from which they had four children, Mary Millican who as already mentioned married Joseph Little, Tinniswood Millican, Francis Millican and John Millican.

Tinniswood was born at Alston 23rd May 1803, and married Lucy Little 21st September 1831, Lucy died 10th August 1844, at Nenthead. Tinniswood and Lucy had three children Frances, Sarah and John Joseph.

In 1841, at West Nenthead, Tinniswood Millican, lead mine agent, aged 35, his wife Lucy 35, children Frances 8, Sarah 7, and John 3. Tamar Hind aged 25 was recorded as their servant; the 1851 census shows Tamar working for Tinniswood father. In 1851, at New House, Tinniswood Millican, mine agent for lead company, aged 47, children Frances 18, and Sarah 17, servants, Hannah Teasdale 26, and Ann Cousin 18. In 1861, at Nenthead House, Tinniswood Millican, widow, district mining agent, aged 57, his son, John J Millican, clerk to the district mining agent, aged 23, Hannah Teasdale, housekeeper, aged 36, and Frances Teasdale, housemaid aged 18. In 1871, at West Nenthead, Tinniswood Millican, widow, retired mine agent, aged 67, and servants Hannah Teasdale, 46, and Elizabeth Teasdale 12. Tinniswood Millican died 2nd April 1879, his brother John predeceased him on 18th August 1878. See 5th April 1879.

Frances Millican married William Dalton, 15th September 1853, William was assistant lead smelting agent, at Nenthead. Sarah Millican married Henry James Millican, at Nenthead 4th September 1855, he was aged 27, she was 21. See 10th December 1881.

John Millican the second son of John Vipond Millican, born 3rd February 1811, (died 18th August 1878) became the chief agent (manager) of the Nenthead smelting works.

See 17th August 1844, 24th August 1878, 5th April 1879, 8th February 1896, 26th June 1897, & 12th March 1898.

2nd September 1876 (Hexham Courant)

William Vipond and family emigrated to Auckland New Zealand.

Spencer Carr Vipond married Miriam Agnes Landall, the occasion being recorded in the **Marlborough Express 23rd April 1904: —**

"A quiet little marriage ceremony was performed on Thursday last at the residence of the bride's parents, Mr and Mrs Landall, of East Kahikatea (writes our Picton correspondent), when Miss Miriam Agnes Landall was united to Mr Spencer Carr Vipond, of Resolution Bay, Queen Charlotte Sound. The bride wore a pretty soft white muslin frock trimmed with lace, also a tulle veil, and a wreath of white cosmeas, She also had a shower bouquet of white chrysanthemums and cosmeas. The bridesmaid was her sister, Miss Caroline C, Landall, in cream striped muslin. The ceremony was performed by the Rev. J. U. Spence, Presbyterian minister. Only relatives were present, with the exception of one or two special friends from Picton, and the house and verandah were prettily decorated by the bride's sisters. The happy couple left for Resolution Bay the same evening, the bride's going away costume being of navy blue serge."

Spencer Carr Vipond died 29th April 1949, and his wife Miriam Agnes died 5th October 1935.
Edward Carr Vipond died 30th July 1921,

Edward Carr Vipond

Rodney and Otamatea Times, Waitemata and Kaipara Gazette , 10 August 1921

The death occurred at Matakana on July 30th of an old settler in the person of Mr Edward Carr Vipond, formerly of Kaipara Fiats. The late Mr Vipond, who was 74 years of age, arrived in New Zealand by the Caduceus in March, 1871. He was at the Thames goldfields until 1875, and during this period saved three lives by carrying three men up a ladder from the Caledonia mine, where they had been overcome by gas. For this he was presented with a locket, a ring, and a scarf pin made from gold from the mine. Mr Vipond removed to Kaipara Flats in 1875, and remained these until 1919, when he removed to Matakana, where he remained until his death

In 1881, at Oak St., Middlesbrough, John C. Holmes, ticket collector, NE Railway, aged 32, and his wife Catherine 31. In 1891, at Jedburgh St., Middlesbrough, John C. Holmes, ticket collector, aged 42, and his wife Catherine 41. Catherine Holmes died 2nd quarter 1900, aged about 50.
In 1901, at Saltburn, John C. Holmes, widow, railway carriage guard, aged 52, and housekeeper Frances E. Duckworth aged 30.
In 1911, at Garnet St., Saltburn, John Carleton Holmes, pensioner, NER railway guard, aged 62, his wife Frances Elizabeth 41, children Elsie 7, and Ernest Carleton 6. John C Holmes died 4th quarter 1917, aged about 67.

At Alston Wesleyan Chapel, 30th ult., Mr Joseph Todd of Gateshead, eldest son of Mr Thomas Todd of Physic Hall, Alston to Hannah, 2nd daughter of Mr Joseph Cousin, Green Ends Alston.

In 1881, at Greenside, Ryton, Joseph Todd, draper, aged 30, his wife Hannah 26, children Ernest 3, and Marian 1.

WEARDALE
FATAL MINE ACCIDENT
On Monday last, a sad fatal accident took place at Killhope lead mine, situated at the head of Weardale. John Hodgson and his son, of Copt Hill, worked together at the above mine at a "forehead," and whilst in the act of charging a hole with powder the hole went off, and severely injured both the father and the son. The father was shot on the left side, and his leg was broken, and though medical aid was immediately obtained, he died within an hour of the accident. The son Thomas Hodgson was seriously injured about the face, but there are hopes for his recovery. Deceased was 54 years of age. The sad event has cast a gloom over the neighbourhood. Deceased was an excellent miner, and well respected.
***John Hodgson**, died 20 Nov 1876, aged 53, Miner, had drilled a hole into a cavity in the stone and while putting in a large charge of powder, he accidentally exploded it with his candle [an article by Margaret Manchester about John Hodgson, his life and family appears in the Winter 2003 issue of the NDFHS Journal], Buried: Heathercleugh*
In 1861 at Killhope, John Hodgson lead miner, aged 37, his wife Hannah 36, children Tamar 14, Joseph 11, Jane 9, Hannah 7, Thomas 5, and Mary 1. John's wife Hannah died in 1862.

In 1871 at Heathery Cleugh, John Hodgson, widow, aged 48, a lead miner, his daughter Hannah aged 18, unmarried, Thomas aged 15, lead miner, and daughter Mary aged 12.

Marriages

11th December 1876 (Morning Post)
The creditors of the **Derwent Mines Company (Limited)** are required to send in the particulars of their claims to the liquidator by the 30th inst.

16th December 1876 (Hexham Courant)

WEARDALE

SAD MINING ACCIDENT (*BOLIHOPE MINE*)

About four o'clock on Tuesday afternoon, near Frosterley, John Gibson, a married man, residing at St John's Chapel, and his partner, Coulthard, living near Westgate were working at their board or "length," and whilst putting some timber to the roof, the mine crashed in from above, throwing Coulthard back, and breaking his leg, and completely burying his unfortunate partner, Gibson. The other workmen in the mine were soon aware of the accident, and were immediately on the spot to render assistance. Though no hope was entertained of recovering their fellow workman alive, they set to work with a will, and after labouring incessantly all through the night, and up to midday on Wednesday, word came back from the mine that they did not see any chance of recovering Gibson before evening. Coulthard was little worse, except a broken leg. At three o'clock on Wednesday afternoon word came from the mine that the workmen had come into contact with a huge piece of rock, some tons in weight, and this will have to be blasted before the body can be recovered. The body of the unfortunate miner, John Phillipson Gibson *(39)* who was buried by the crushing in of the roof at Bolihope Lead Mine on Tuesday last was recovered in a mangled condition, at eleven o'clock on Wednesday night.
In 1851 at High House, St John's Chapel, Walton Gibson lead miner, aged 45, his wife Elizabeth (Phillipson, married 1839) aged 43, children John 13, Mary Ann 10, and Joseph 6. Elizabeth died in 1854 and Walton died in 1856.
In 1861 at High House, St John's Chapel, John Gibson lead miner, aged 23, his wife Hanah 22, their daughter, Elizabeth 7 months, and Johns brother Joseph lead miner aged 16.

16th December 1876 (Alston Herald)
Deaths
At Grassfield, near Nenthead, 12th inst., aged 24, Mr John Bainbridge, lead ore smelter.
In 1851, at Low Grassfield, Joseph Bainbridge, lead smelter, aged 39, his wife Ann (Bowman, married 1839) aged 39, children William 10, Joseph 8, Isabella 6, Christopher 4, and Mary Ann 1 year.
In 1861, at Low Grassfield, Joseph Bainbridge, lead crystaliser, aged 50, his wife Ann aged 50, children William, lead ore washer, aged 20, Joseph, lead miner, aged 18, Isabella 16, Christopher, lead miner, aged 14, and John 9.

In 1871 at Low Grassfield, Joseph Bainbridge, lead ore smelter, aged 60, his wife, Ann aged 60, children William lead ore smelter, 30, Isabella 26, Christopher blacksmith, 24, and John lead ore smelter, 18.
Joseph Bainbridge snr. died 3rd quarter 1871, aged 60, his wife Ann died 1st quarter 1883, aged 73.

23rd December 1876 (Hexham Courant)
Marriages
At St John's Church, Nenthead, 19th inst. Mr David Burns of H.M. Geological Survey, to Phoebe, 3rd daughter of the late Jacob Walton Esq. of Green Ends Alston. *See 23rd November 1864.*

6th January 1877 (Hexham Herald)
NENTHEAD
Pays. Today is the first of the Lead Company's pays. We understand that these are the last yearly pays, as the Company have in future resolved to pay their workers quarterly.

13th January 1877 (Hexham Courant)
POULTRY SHOW. —On Wednesday, the annual show of the Nenthead poultry and bird show was held in the Lead Company's School-room, and was well patronised by the inhabitants of the surrounding district. Among those present we noticed C. Bainbridge, Esq., Middleton-in-Teesdale; J. J. Millican, Esq., Nenthead House; T. Millican, Esq., West Nenthead; — French, Esq., Middleton-in-Teesdale; A. Bolton, Esq., Nenthead; Joseph Goodburn and T. Walbank, Esqs., Hillersdon Terrace; Mr J, Pickering, Garrigill; Mr W. J. Philipson, Mr E. White, Alston, Miss E. Hall, Alston; Miss Burns, Alston, &c. The Nenthead Quadrille Band was in attendance, and discoursed a variety of the most popular selections of music for the delectation of the visitors. The principal prize takers in the poultry classes were: Thomas Brown, Nenthead; J, Rutherford, Nenthead; Geo. Davidson, Washington, Durham; F. J. Snowdon, Haltwhistle;

E. Walton, Nether Park, Alston; John J. Millican, Nenthead House; J. Richardson, Gill House, Alston; William Jopling, Bridge End, Frosterley; John Temple, Newbiggin, Durham; H. Wilkinson, Early, via Leeds; T. Teasdale, Black House, Alston; Joseph Goodburn, Nenthead; Emerson Thomason, Ashgill; James Hind, Queen's Place, Kendal; Alexander Halliday, Nenthead; and William Dodd, Market Hill, Wigton. Several of the prises in the poultry classes were offered for competition by private individuals as special prizes. The first prize for the best duck and drake was won by William Keenleyside, Coanwood; John Kindred, Bayles, Alston, being second, and John Richardson, Gill House, Alston, third. This was a reversion from the way in which the prizes were awarded at Alston, the competitor who received first at the show being placed second, while in the competition for pigeons, William Clark, Coanwood, was only highly commended, being beaten by Thomas Brown and Wm. Graham, both of Nenthead respectively, although at Alston he carried off premier honours, Brown being second. Most of the prizes offered to be competed for by canaries were carried off by Thomas Brown. The principal other prize takers being Geo. Moor, Woodmas Thompson, Nenthead; Robert Clark, Coanwood; and Joseph Rutherford, Nenthead. The show proved to be one of the most successful held under the auspices of the society at Nenthead for many years, and the decisions of the judge, Mr E Hutton, Columbrian House. Pudsey, Leeds, gave every satisfaction. The entries in every class were numerous, and the fowls shown in excellent condition.

ST. JOHN'S CHURCH BAZAAR. —The above Church has lately undergone a thorough repairing, the cost, we understand, being upwards of £400. A bazaar was opened in the Lead Company's School-room on Thursday week, and continued on the Friday. It was opened by the Rev B. Robinson of Monkseaton. The bazaar was crowded both nights. The stalls were presided over by Mrs Millican, Miss Mack, Miss Atkinson, Mrs Blacklock, of Nenthead, the Misses Hall, of Alston, and the Misses Walton, of Donks Villa. The hardware stall was under the management of Mr John Erwin, of Hillersdon Terrace, and the confectionery under that of Mrs Erwin, of West-Nenthead. Refreshments were provided at moderate charges, this department being under the management of Mrs Beck, of Greenends, assisted by the members of the choir. A good sum of money was realised on both days, in all upwards of £130. The church, we understand, will be opened out early in February.

Deaths

At Hill House, Alston, 5th inst aged 29, Mr George Yeats, lead miner.

See 18th September 1841, 22nd March 1845, 22nd January 1864, 10th April 1886, and 1st May 1886.

13th January 1877 (Hexham Herald)
Nenthead

The Lead Co. and Nenthead Pays.

We live in a time of improvement,
Science and art have full swing;
And scarcely a day passes over,
without bringing out a new thing.

Nenthead is a place of renown,
For its riches of silver and lead,
With one thousand five hundred inhabitants,
Which by it are earning their bread.

For many long years we've been getting
our money once a year, which we made,
Excepting a little bit lenning,
Every month the Company paid.

The Company has wisely considered
To knock these big pays on the head,
And pay every man his own quarterly,
The money he has honestly made.

May the Company go on and still prosper,
'Tis the wish of the workmen, I say
May they cut a good mine in the brewery
And may they make money like hay.
S. M.

27th January 1877 (Hexham Courant)

NENTHEAD

NENTHEAD INDUSTRIAL CO-OPERATIVE SOCIETY.— The members of this Society held their first half yearly meeting on Saturday night last. The store has

been in existence for some years; the meetings have been held quarterly, but, being nearly all working men, in order to save time and labour, it was resolved to hold the meetings half-yearly instead of quarterly. On Saturday night, there being important business to transact, more store accommodation being needed, there was a good attendance. Things were found to be in a prosperous and satisfactory state, money being plentiful and trade brisk. A resolution was passed to build more warehouse accommodation, in which to store surplus stock. Nearly all the old officers and committee were re-elected. The report stated that the number of members was 116. A dividend of 2s in the pound on members' purchases was paid, and the reserve fund amounts to £50. The amount received in cash for the half-year for goods sold was £1428 1s 7½d.

WEARDALE

TRACTION ENGINES

A traction engine belonging to the Weardale Iron and Coal Company is now plying the roads between Cowshill and Westgate, for the purpose of conveying Ironstone from upper Weardale to the Westgate depots. It carries ten tons. For some time two traction engines, belonging to W B Beaumont Esq., MP. have been carrying lead ore from the Weardale mines to the Allendale mills.

27th January 1877 (Hexham Herald)

10th February 1877 (Hexham Courant)

THE ALSTON POET DROWNED IN ROOKHOPE

On the afternoon of Sunday last, two young men while walking down the water-side below Boltsburn Rookhope, observed the body of a man in the bed of the stream. On farther examination, it proved to be the body of Thomas Read, tailor and poet, a native of Alston, and who for some months had been at Rookhope. The unfortunate man was for many years a local preacher under the Scotch Presbyterians, and during the last twenty years or so he had travelled through and sojourned in Weardale, Teesdale, and other neighbouring vales, following his trade as a tailor, and painting in poetry the rugged and picturesque scenery in the respective valleys, and recording in poetic measure the odd incidents

which transpired. Amongst the pieces are a descriptive poem of Teesdale and a pathetic account of the two lost children in Weardale. Several fugitive pieces have been printed in slips, but no collection has been issued. On Saturday, he had been working at Westgate, Weardale, which place he left about four o'clock for home, and was seen about five o'clock at Bishop's Seat. He is then supposed to have taken a footroad which, by a wooden bridge, crosses the burn a short distance below Boltsburn. Whilst attempting to cross the bridge it is supposed that, it being dark, he had missed the bridge end, and had walked over tbc buttress into the river, which was much swollen owing to heavy rains. His body was discovered a few hundred yards below this bridge, and in his pocket, were found some fishing tackle, bought; at Westgate, and some money. He was a widower, was about 53 years of age, and had gained many friends daring his stay in Rookhope.

10th February 1877 (Alston Herald and East Cumberland Advertiser)
Marriages
At Garrigill Church, 8th ult., Mr John Spark, of Lanehead, to Hannah, eldest daughter of Mr Thomas Hutchinson, Beldy Mill, Garrigill.
In 1871, at Beldy Mill Garrigill, Thomas Hutchinson, miller, aged 49, his wife Tamar 42, children, James, draper, aged 20, Hannah 18, Isabella 11, Mary A 9, and Thomas W 5. See 1st April 1864, 19th August 1882

17th February 1877 (Alston Herald and East Cumberland Advertiser)
NENTHEAD. GRAND CONCERT.—A grand concert, in aid of the Nenthead Church Restoration Fund, was held in the Lead Company's school room, on Friday evening, 9th inst. Rev. Wm. Muskett, M.A. presided. A large company assembled. The Nenthead Brass Band under the able leadership of Mr T. Graham, was in attendance and performed their pieces in good style. The Nenthead Quadrille Band also was in attendance under the leadership of Mr Thos. Hutchinson, and played their pieces in excellent style. Mr Smith, better known as the "Hat-dresser," went through his recitations very well. Miss Hall and Miss Ridley of Catton, performed their pieces in style, and should they appear at Nenthead again, they will no doubt, be well received. Mr Hargreaves, Mr Thos. Hutchinson, Mr J. J. Atkinson, and Dr Davidson, of Nenthead, were well received. Mr Jas. Hutchinson of Garrigill was also well received. The accompaniments to the songs were well rendered by Dr. Davidson and Mr Wm. Hutchinson. The proceeds were upwards of £8.

24th February 1877 (Alston Herald and East Cumberland Advertiser)

TEESDALE
GREEN HURTH MINE TEESDALE
There is considerable improvement in the works of this mine. The agent closes his annual report, which is a resume of the operations of this mine, inside and at the surface, for the last 12 months, thus: - "Not with standing that the mine is comparatively poor at present yet looking to the prospects there is of opening into rich ground both east and west of our present working, and also in the lower sills, I have no hesitation in saying that I have a better opinion of the mine now than I ever had even when No 1 cross vein was most productive. Now it may be remembered by all who are at present shareholders that the vein in question was at one time 3 feet wide of pure galena, besides several smaller branches, and that the produce was frequently 10 tons per fathom of 144 square feet, being a money value of £12, and this rich ground is standing unwrought in the limestone below; in addition to this and many other valuable parts in the mine, a new and most important working is being opened in the Northern part of the

mine. It may be in No 1 vein north of adit, but this is uncertain until more ground is opened. When cut through a few years ago it was then considered a very important point, but the character of the mineral was such that it could not be profitably treated with our machinery. This valuable aid being now at command and the reserves of crusher work at the surface fast disappearing, it became necessary to look out for the means to keep the machinery at work in a regular manner; and on placing men to explore on the vein just named, it is found to be from 2 to 3 fathoms wide of excellent bouse work the whole of which must be taken away to the crusher, &c., first of course picking from it, in the usual manner the solid lumps of pure lead ore. As Nos 2, 3 and 4 north and south veins are all entirely unworked on the north side of the adit level, it is almost impossible to estimate the value and importance of this discovery, especially when it is known that the ground is entirely whole or unwrought, and must be intersected by several east and west veins known and proved by lead mines on both sides of the property. *Mining Journal*

NENTHEAD.

At the examination held at Edinburgh on the 26th and 27th of February 1877, Mr Matthew Walton, late of Nenthead, gained a Government certificate of competency as a manager of mines, having successfully passed the examination. The examination was held in the Lecture Hall of the Museum of Science and Art. Mr Walton it a native of this place and worked for man years at the Lead Company's works as a lead miner. He has been for some time cashier and book-keeper at Dearham collieries.

I*saac Walton married Ann Thompson, 15th June 1839 at St Augustine's, Alston.*
In 1841, at Donks Hall, Nenthead, Isaac Walton, lead miner, aged 32, his wife Ann 36, and daughter Elizabeth 5 months.
In 1851, at Nenthead Fields, Isaac Walton, lead miner, aged 41, his wife Ann aged 44, born Scotland, children, Mary 11, Elizabeth 9, Matthew 8, Ann 7, Jane 5, Adam 4, and Eleanor 1.
In 1861, at Nenthead Fields, Isaac Walton, lead miner, aged 52, his wife Ann aged 55, children, Matthew, lead miner, aged 18, Ann 17, Adam, lead miner, aged 14, Eleanor 11, and adopted son, Jacob Irwin 1.
Isaac Walton was buried at Nenthead, 24th February 1867, aged 57.
See 22nd February 1867
In 1871, at Holm Foots, Nenthead, Ann Walton, widow, aged 64, children, Matthew, lead miner, aged 28, Adam, lead miner, aged 25, and granddaughter Annie Walton 7.
In 1881, at Nenthead Fields, Ann Walton, lead miners widow, aged 75, born Ayreshire, son Adam, lead miner, aged 34, grandson, Isaac Walton, lead miner, aged 17, and granddaughter, Annie, domestic servant, aged 17.
Ann Walton was buried at Nenthead, 11th October 1885, aged 79.
In 1881, at Dearham, Cockermouth, Matthew Walton, secretary Dearham Colliery, aged 38, his wife Mary A (Coulthard, married 2nd quarter 1879, registered at Cockermouth) aged 25, born Dearham, and son Isaac aged 1.
In 1891, at Ivy Cottage, Dearham, Matthew Walton, accountant, aged 48, his wife Mary Ann 35, children, Isaac 11, and Gertrude 2.

Probate 1901, Matthew Walton of Dovenby Bridekirk Cumberland, colliery-manager died 22nd May 1899, Administration Carlisle 15th April to Mary Ann Walton, widow. Effects £517 5s 7d.

In 1901, at Dovenby, Bride Kirk, Mary A Walton, widow, aged 45, children, Isaac, clerk at Colliery, and Gertrude 12.
In 1911, 33 North Street, Mary Port, John Walton, retired cemetery curator, aged 74, and his wife Mary Ann (Mary Ann Walton married John Walton, 25th July 1904 at Cross Canonby, Cumberland) aged 55
In 1911, at 10 Wilsons Terrace, Broughton and Moor, Isaac Walton, colliery manager, aged 31, his wife Frances 33, and son Matthew 6.
Mary Ann Walton, died 1st quarter 1927, aged 71, registered at Penrith.

24th March 1877 (Hexham Courant)

ALSTON.

ALSTON MARCH FAIR.—This annual fair tor the sale of cattle, horses, and sheep, was held on Saturday last. The sale of the cattle and sheep took place as heretofore, on the Fair Hill, in morning, while the horse fair took place on the highway at the head of the town in the afternoon. The weather was miserably wet which greatly affected the attendance of both buyers and sellers, the fair throughout was very dull, slow-selling one. The show of cattle was small. Milch cows brought from £18 to £24 each, young cattle from £6 to £14 each. Horses end sheep were only sparely represented, the first named being mostly made up of second-class animals. Little trade was done in sheep, so that we can quote no regular prices.

Deaths

At Alston, 15th inst., aged 20, Mr William Maughan, tailor
A t Alston, 21st inst., aged 17, Rose, daughter of Mr Samuel McBride, tweed weaver.
At West Allen, Gate House, 15th inst., aged 67, Mary, wife of Mr Wm. White.

31st March 1877 (Hexham Courant)

Deaths

At Alston, 25th inst., aged 9 months, Margaret, daughter of Mr John Pickering, groom.
At Nentsbury, 24th inst. aged 43, Mr William Millican, coal miner.
William Millican married Mary Vipond 14th February 1793, at St Augustine's, Alston.
In 1841, at Green Ends, Nenthead, Mary Millican, farmer, aged 65, children, Robert, lead miner, aged 40, Elizabeth 25, Mary, dress maker, aged 21, and William 7.
In 1851, at High Green Ends, Nenthead, Mary Millican, lead miners, widow, aged 78, daughter Elizabeth 37, grandson, William, lead miner, aged 17, and granddaughter Margaret aged 8.
Mary Millican of Green Ends, was buried 2nd July 1876, at Nenthead.
In 1861, at Wellgill, Dykeheads, Elizabeth Millican, housekeeper, aged 47, and son William, lead miner, aged 27.
William Millican married Mary Teasdale, 25th May 1861, at Nenthead.
In 1871, at Wardway Foot, Nenthead, William Millican, widow, lead miner, aged 37, children Frances A. 9, Joseph H. 6, born America, United States and Elizabeth Coats, house keeper, aged 22.
At Low Dykeheads, 26th inst., aged 67, Mr Thomas Swindle, smelter of lead ore. *See 31st March 1877, and 2nd May 1885*

Deaths
Allendale Town, 23rd inst. aged 78 George Bright.
In 1851, at Allendale Town, George Bright Lead ore miner, unmarried aged 52, living with him his two sisters, Isabella, unmarried aged 43, born Newcastle, Hannah Hick, a widow aged 32, and her daughter Elizabeth aged 4, born Lanchester. In 1861, living at Dirtpot, Matthew Forest, aged 51, labourer in lead mines, his wife Hannah aged 42, daughter in law Elizabeth Hick, aged 13, and George Bright lodger unmarried aged 62, labourer in lead mines.
In 1871, at Allendale Town, George Bright, unmarried aged 73, labourer, sister Isabella, unmarried aged 65, and brother John aged 60, unmarried a stone breaker.

4th April 1877 (Teesdale Mercury)
MIDDLETON IN TEESDALE
The first of the quarterly pay-days of the extensive lead mining works of the London Lead Company was held in this town on Saturday last. A large amount of money was paid, and it being the usual day for making monthly advances to the workmen the streets presented quite an animated appearance.

7th April 1877 (Hexham Courant)
ALLENDALE
AN HEROIC PITMAN
Particulars have just been received by the widow of Thomas Glenwright, of the recovery of her husbands body, which for three years had been buried in a coal mine in America, Thomas Glenwright was a native of Allendale, Northumberland, but for many years resided at Tow Law, Durham, where he was much respected, and carried on a small business as a confectioner, in addition to his labours at the pit. Some six years ago, he went to America, and

when the terrible explosion occurred at Drummond Colliery, Picton County, *(Nova Scotia)* Glenwright performed an act of heroism almost unparalleled in the history of heroic deeds, and he sacrificed his own life to rescue his fellow workmen. When the terrible sacrifice of human life occurred by the explosion of the Drummond Colliery in 1873, Glenwright was working at the Black Diamond Mines, and on hearing, the first explosion hastened to the scene of the disaster, and volunteered to go into the burning abyss. He was let down a perpendicular shaft by a gin, and when he had just reached bottom a second explosion took place, and the lurid flame issuing from this shaft, and also from the slopes up which the coals were brought prevented all approach to the pits, and thus perished a Durham pitman, along with a Cornish miner named Abraham Guy. Some of the victims have not been recovered, and strange to say three years expired before the bodies of these two heroes were found. Glenwright's body was found perfect and clearly recognisable, and was kept ten days, in the hopes of hearing from his widow, who with eight children had returned to Tow Law, in England.

In 1841, at Catton, Margaret Glenwright, aged 55, Thomas, lead miner, aged 25, Summers, coal miner aged 20, Henry, coal miner aged 15, and Mary aged 15.

In 1851, at Dean House, Catton, Thomas Glenwright, coal miner, aged 36, his wife Jane, aged 34, children Jane 3, and Margaret 2.

In 1861, at St Nicholas, Newcastle, Thomas Glenwright, stoker at blast furnace, aged 42, his wife Jane 32, children Jane 13, Margaret 11, Thomas 9, Ann 5, Mary 2, and John 1 week.

In 1871, at Westoe, Durham, Thomas Glenwright, coal miner aged 55, his wife Jane aged 43, children, Thomas Glenwright, 20, Ann 18, Mary 13, John 10, Elizabeth 8, Jane 3, and Florence 1 year.

In 1881, at Westoe, Durham, Jane Glenwright, widow, aged 49, children, Mary, plate glass polisher, aged 22, John, seaman, aged 20, Jane day maid, and Florence aged 10.

The following is from the New York times dated 16th May 1873

> The names of the men who volunteered to go down the air-shaft to explore the mine after the first explosion were Abraham Grey, Edward Burns, Thos. Glenwright, and Timothy Howatt, all of whom lose their lives. Grey was above the surface when the first explosion occurred, and when his terrible fate was made known to his wife, the unfortunate woman rent the air with her screams. To give some idea of the extent of the explosion from the several air-shafts, it may be stated of an old one, close to the miners' residences, and distant from the mines some 600 or 700 yards, that huge pieces of timber were driven through it up into the air, some falling on the roofs of the houses and crushing through them. It was truly heart-rending to pass through the square of buildings where the families of the lost miners reside.

7th April 1877 (Hexham Herald)

NENTHEAD

At the examination held in the lecture hall of the Museum of Science & Art, Edinburgh, Mr Matthew Walton (of Nenthead) gained a government certificate

in competency as a manager of mines having successfully passed the examination. Mr Walton formerly worked at the Lead Company's Nenthead mines, but has been for some time cashier and bookkeeper at Durham collieries.

Marriages

Trinity church, Darlington, 5th inst. Mr Wm Lee Hornsby of Nenthead, to Fanny, 4th daughter of the late Mr John Cain, Mining Agent, Galligill, Alston.

See 16th November 1864, 21st November 1874, 6th April 1901, & 26th October 1912.

Deaths

At Mohope, West Allen, 1st inst. aged 25, the wife of Mr Martin (*Jane).*

New Shield, Allendale, 29th inst. aged 20, after a short illness, Margaret, eldest daughter of John and Hannah Short.

In 1871 at New Shield, John Short lead miner and farmer of 18 acres, aged 42, his wife Hannah 38, children Thomas 15, Margaret 14, Mary J. 13, John 11, Henry S. 9, Hannah 7, George 5, Matthew 4, and Elizabeth 1.

11th April 1877 (Teesdale Mercury)

TEESDALE SANITARY BOARD.

The usual monthly meeting of this body mu held in the County Court Boom, Bernard Castle, on Wednesday. Mr J. B. Dent (Streatlam House) presided, and there were also present Messrs Porter, Lee, Bowron, Boazman, Helmer, Nicholson, Todd, Hilton, end the Rev. H. C. Lipscomb

THE ALLEGED EPIDEMIC IN UPPER TEESDALE: The Clerk stated that he had seen Mr C. R. Bainbridge, who had expressed himself anxious for a medical examination of the children and miners in connection with the London Lead Company's works, and he was moreover anxious to have a special meeting of the Board convened to consider the report of independent doctors in relation to that submitted at the last meeting of the Board by Dr. Makens, the medical officer of the Board, which stated that he (the doctor) had had under his care several cases of itch, the origin of which be traced to the mine shops, and that he had good reason to believe many of the children attending the Lead Company's school were then suffering from that disorder. He (the Clerk) saw no reason to convene a special meeting, and instead of having any other of their medical officers implicated in the matter, he suggested that the services of a medical practitioner from another town be engaged. Since then he had received the following letter from Mr R. W. Bainbridge, the chief agent of the London Lead Company.

DEAR Sir. —Referring to my letter of the 17th March, and your intimation to my son that you did not deem it advisable that Dr. Mitchell should be asked to report on the imputation made by Dr. Makens, his fellow officer under the Teesdale Union Sanitary Authority, against the character of many of the children in the Lead Company's Middleton School and their workmen lodging at their Wiregill and other mine shops, for being afflicted with the itch, I beg to inform you that I instructed Mr Thwaites, of Bishop Auckland, a medical gentleman of experience and good standing, and unconnected with all parties, along with Mr Hunter, the doctor engaged by the Teesdale Medical Union, to thoroughly examine the children in the School, and afterwards to spend the remainder of the day in the examination of a number of the Company's workmen lodging at the mine shops, who fortunately happened to on their visit to be in casual attendance at the

Company's office here. I had recourse to this measure with the object of ascertaining whether there existed, contrary to my expectation, grounds for the foul imputation made by Dr. Makens, and if so, of applying the proper remedy; and if ill-founded, then of protecting the calnminated parties against the imputation of a most disagreeable and irritating offence. I now beg to enclose to you the reports of Mr Thwaites and Mr Hunter, for submission to the gentlemen composing the Union Sanitary Authority, and beg to express a hope that they will deem it fitting that the same publicity shall be given to these reports as was awarded to the report of their own medical officer, and that they may further deal with the case as in the exercise of their own judgment and right feeling they may deem to be proper. It may not be out of place that I should state, such has been the attention of the respective mothers of the children attending the school to their personal cleanliness, that there has never arisen an occasion of complaint from the school masters. And instead of the propriety of Dr. Makens's assertion that many of the children there art suffering from the loathsome disease imputed being confirmed by the examination of independent medical gentlemen, the very small percentage found on their examination shows the exceptional cases to any disease to be rare indeed. And with respect to the workmen lodging at the mine shops, not a single defaulter was found. I forebear further remarks on the case, and am, dear Sir, yours faithfully,

R. W. BAINBRIDGE.

The report of Dr. Thwaites was as follows:—

Sir, —In conformity with your wish I examined the whole of the children in attendance at the Lead Mining Company's School, at Middleton-in-Teesdale, on the 16th of March, 1877, with a view to ascertain how many were affected with the itch. The numbers present amounted to 236, the average attendance for the year being, I am informed 240. The whole of these children especially the girls, were remarkably clean, and equally remarkably free from any cutaneous affection whatever, with the exceptions, one very slight case of itch, the second more extended, the third of an extremely doubtful character. I also examined a number of men (40 to 50), who attended promiscuously from all the different mines (Wiregill included) belonging to the Lead Mining Company, and found them all quite free from eruptive skin disease of any sort, in fact I have seldom seen such a number of individuals with such (clear and healthy skins. I may make the same remark with perfect truth with regard to the children, —I am, sir, yours truly,

T. B. Thwaites. M.R.C.S., L.A.C., F.R.M.S. Surgeon 2nd Battalion Durham, R.V., Examining Surgeon of recruits for H.M. Service, Deputy Coroner for Darlington Ward.

The substance of that report was confirmed by the report of Dr. Hunter, as follows :—

Dear Sir,—Having perused Dr. Thwaites's report concerning the examination of the children and workmen, held on the 16th ult. I have no hesitation in expressing my entire concurrence in the correctness of his statements, having examined the children attending the Lead Company's School here, as also about fifty of the workmen employed by the London Lead Company, who happened to be in Middleton on the same day from several of the mines, I am, yours very truly,

Thomas Hunter, L.R.C.P. Edin., L.F.P. and S. Lon., and L.M. Edin. and Lon., Med. Off., Middleton Medical Association, &c.

—Mr Nicholson said he thought that Dr Makens had given his report a little colouring. —Mr. Lee: It is a very unkind report from a medical gentleman. He might have reported that there were isolated cases existing in the district, in which case it would have been different.—Mr Helmer thought there was some foundation for the statements. The independent reports bore that out.—Mr Hilton submitted that Mr Makens was either their medical officer or else he was not, and the assumption was that if the report was a fair one, and the doctor had had the pluck to come out in the way he had, it was their duty rather to support him than otherwise. Itch was a common ailment, and it required perseverance and proper care to stamp it out. His object in rising was to defend Dr. Makens if he was right, and be approved, rather than otherwise when their officers manifested a disposition to exceed their duties. It was a rare occurrence. (Laughter). —Mr Nicholson : No.no.—

The Rev. H. C. Lipscomb thought the best possible thing to adopt would be to have the opposite statements now produced published. They would sooner get at the truth. —Mr Boazman concurred.—Mr Hilton did not object to such a course, but thought it was no part of the duty of the Board to require the publication of the discussion or the medical reports.— Mr Nicholson decidedly considered the question in its present stage unsatisfactory.—Mr Hilton begged to move that Dr Makens be communicated with and asked to attend the next meeting of the Board, to explain his views of the matter.—Mr Todd: I beg to second that.—Agreed unanimously.—The Clerk agreed to forward copies of the reports to Dr. Makens

14th April 1877 (Hexham Courant)

RURAL SANITARY AUTHORITY.

A meeting of the Rural Sanitary Authority was held at the conclusion of the guardians' meeting, Mr James presiding. The medical officers' quarterly reports were read.—Dr Gill's, and the medical officer of No. 2 district, was read as follows:—" Gentlemen,—I have to report the epidemic—scarlatina—is now very general, and it is doubtful to form any opinion when it will cease. It is so mild in many cases as to require no attention from the parents, and I have no doubt there are many houses not disinfected on account of the sanitary medical officer having no notice of its locality. On the 20th of March, along with our Inspector, I visited the east side of the town, and found most of the manure steeds, privies, and sewage pipes in a satisfactory condition, one having undergone some alteration by order of the Sanitary Authority. I think it must be pronounced in a satisfactory condition. On the 23rd, also in company of our Inspector, I visited the property situated in Grizedales Lane, and found a culvert there requiring opening out as it appears there is very little descent. The property belongs to the representatives of the late Mr Michael Walton. The privies and other sources of filth appear satisfactory on the whole on the west side of the Market Place. There is a wall belonging to the Wesleyans at the Town Head which is dangerous to the public. In my official capacity I am already aware of two different cases of injury from falls arising from want of railing to prevent such occurrences.—I am, gentlemen, yours respectfully, R. Gill."—

The Inspector said that he had called upon Mr Bramwell and he had promised that he would call the attention of the trustees to the wall mentioned in the medical officers' report. "Gentlemen,—In submitting my quarterly report., ending 31st March, I beg to inform you that I have inspected Tynehead and Garrigill

Gate, and found all in a very satisfactory condition. When inspecting Holmefoot, Nenthead, found a privy belonging to John Cousin, in a very foul state; recommended him to have it cleaned out immediately.—I am happy to inform the Board that the district is free from zymotic diseases.—I am, gentlemen, your obedient servant, Stewart Carson, medical Officer, No. 2 district."
The Inspector of Nuisances reported that he had visited Garrigill and Nenthead, and found all in a satisfactory condition. This constituted the whole of the business before the Board.

Deaths

At Alston, 30th ult., David Hounam, farmer. *Aged 66.*
In 1871, at Front Street, Alston, David Hounam, farmer of 13 acres and grocer, aged 60, his wife Mary (Watson, married 29th May 1842, at Alston) aged 56, and niece, Mary A Walton, domestic servant, aged 23.
At Alston, 1st inst., aged 21, Isabella Walton, daughter, of Mr Joseph Walton, butcher.
At Alston, 1st inst., aged 77, Jane Graham, widow of Mr Gilbert Graham, innkeeper.
At Garrigill Gate, 30th ult. aged 50, William Thomason, lead miner.
In 1851 at Garrigill, William Thomason, lead miner, aged 65, wife Elizabeth aged 54, children William, lead miner, aged 23, Joseph, lead miner, aged 18, Rebecca 15, and lodger Joseph Lancaster, landed proprietor, aged 72.
In 1861, at Low Crossgill, William Thomason, copper ore miner, aged 33, his wife Jane (Renwick, married 2nd July 1853, at St John, Garrigill) aged 34, sons John 3, and William 2.
In 1871, at Garrigill Gate, William Thomason, lead miner, aged 43, wife Jane 45, children John, deaf & dumb from birth, aged 13, William, lead ore washer, unemployed, aged 12, Thomas 9, Joseph 7, Mary E. 6, and Jonathan 2.
In 1881, at 19 Rippon Street, Gateshead, Jane Thomason, widow, aged 56 John, no occupation, deaf & dumb from birth, aged 24, William, provisions warehouseman, aged 22, Tom, railway porter, aged 19, Joseph, labourer in iron works, aged 17, Mary 15, and Jonathon, music seller in a music shop, aged 13
At Side Head House, 7th inst. aged 64, John Hodgson, lead miner.
In 1841, at Side Head, Elizabeth Hodgson, widow, aged 55, children John, lead miner, aged 25, Robert, lead miner, aged 20, William, lead miner, aged 20, Mary 20, Elizabeth 15, Joseph 15, and Isabella 10.
In 1851, at Tynehead, John Hodgson, lead miner, aged 38, his wife Jane 34, children Thomas 8, Ann 7, John 6, Elizabeth 4, Esther 2, and Mary Jane 11 months.
In 1861, at Side Head House, John Hodgson, lead miner & yeoman, aged 48, his wife Jane 44, children Thomas, lead miner, aged 18, John, lead miner, aged 16, Elizabeth 14, Esther 12, Mary J. 10, Maria 9, Isabella 7, Sarah E. 3, and Joseph 6 months.
In 1871, at Side House, Garrigill, John Hodgson, farmer, landowner, aged 58, wife Jane 54, children Thomas, lead miner, aged 28, John, farmers son, aged 26, Isabella 17, Sarah E. 13, and Joseph 10.
In 1881, at Tynehead, Jane Hodgson, widow, farmer of 44 acres, aged 64, children Thomas, lead miner, aged 38, John, lead miner, aged 36, Joseph, lead miner, aged 20, Isabella, domestic & dairy work, aged 27, granddaughter Jane Richardson 4, and visitor John Varty 5.

14th April 1877 (Hexham Herald)

FATAL ACCIDENT.

A fatal accident occurred at the West Slitt Ironstone mine, near Westgate, Weardale, on Tuesday last. A miner named Hewitson Bell *(aged approx. 29 years)* was crushed by a mass of stone which fell from the roof and rolled upon him whilst he and other three miners were at work. His thigh was broken and he was severely crushed about the loins and back.. He lived about 2 ½ hours after the accident. He was a single man and belonged Allendale.

In 1871 living at Middlehope, Allendale Joseph Bell, a widow (his wife Margaret died between 1861 & 1871), retired lead ore miner aged 68, children Dryden iron stone miner aged 36, Joseph lead ore miner, 32, William plate layer, 24, Hewitson lead miner 22, Elizabeth 20, and Margaret 16.

21st April 1877 (Hexham Herald)

Deaths

Shaw House, Allendale, 16th inst. aged 77, Mary, widow of the late William Snaith.

In 1841, at Allendale, William Snaith, lead ore miner 45, his wife Mary (Hoggart, married 27th Sept 1823 at Allendale) aged 40, children Eliza 15, John 12, Mary 10, Hannah 8, William 6, Edward 3, and Jane 6 months. In 1851, at Black Cleugh, Allendale, William Snaith, lead miner, aged 56, his wife Mary 51, children Elizabeth 25, John lead miner, 22, Hannah 17, William lead ore dressed 16, Edward lead ore dresser, 12, Jane 10, Mary 3, and Hannah 1 month.

In 1861 at Derwent Terrace, Hunstanworth, William Snaith, lead ore miner aged 66, his wife Mary aged 61, unmarried son Edward lead ore miner aged 22, and granddaughter Mary aged 13 years. William Snaith died 1866.

28th April 1877 (Hexham Herald)

Deaths

Tynehead, 17th inst. aged 61, Robert Hodgson, Lead Miner.

In 1861 at Hole Farm, Garrigill, Robert Hodgson, lead miner, aged 44, wife Elizabeth 39, children William lead miner 16, Isabella 15, Robert lead miner 12, John 10, Ann 7, Elizabeth 4, and Mary J. 2.

In 1871, at Dorthgill, Garrigill, Robert Hodgson, lead miner, aged 54, his wife Elizabeth 50, children Elizabeth 14, Mary Jane 12, and granddaughter Emma Hodgson 1.

See 1st January 1869, 2nd November 1869

Bunkers Hill, Garrigill, 21st inst. aged 21, Mary, daughter of Mr Jonathan Carr.

In 1841, at Bunkers Hill, Jonathan Carr, lead miner aged 25, son of Mary Archer aged 60, years, a farmer. In 1851, at Bunkers Hill Jonathan Carr, labourer, aged 36, son of Mary Archer aged 70, years, a farmer.

Mary Carr married John Archer at Alston, 4th April 1822, John died 1837 or 1841.

In 1861, at Bunker Hill, John is listed as a farmer, living with his wife Sarah (Graves, married 2nd December 1854, at Addingham) and children Mary & Sarah. His mother Mary Archer died in 1867.

At Bunkers Hill, 1871, Jonathan Carr, farmer of 32 acres, 56, wife Sarah 40, children Mary 15, Sarah 12, Jonathan 8, William 5, John J. 2, and Matthew 11 months. See 13th December 1884.

28th April 1877 (Alston Herald and East Cumberland Advertiser)

ALSTON BOARD OF GUARDIANS

RE-APPOINTMENT OF Dr. CARSON.

A letter was read from the Local Government Board relative to the re-appointment of Dr Carson as medical officer of No 2 district. The Board, with a view to obviate the necessity of so frequently arranging the appointment of medical officers, proposed to sanction their appointment to the medical officer-ships for three years instead of one year as heretofore.—Mr Crawhall proposed and Mr Dickinson, seconded that the advice of the Local Government Board be acted upon, which was carried.

APPLICATION FOR A FEE.

A letter was read from Dr Carson, relative to an operation which he and Dr Gill had performed at the workhouse, and for which he had sent in his bill of £2. He complained of having only received £1 which was paid him by Dr Gill. When Dr Carson sent in his bill the Board found that they were only authorised to pay for such an operation to their district medical officer, and any other medical men were called in they had to be paid by the medical officer. As it was not in Dr Carson's , district, but in Dr Gill's, the Board paid the full amount to the latter, who paid Dr Carson one half, and the letter was sent by Dr Carson asking for the full amount. As Dr Carson had been called in by N. 1. district medical officer, it was stated that he would have to apply to him for his fee.

Deaths

At Alston, 21st inst., aged 3 weeks, John Joseph, son of Elizabeth Davidson.

5th May 1877 (Hexham Herald)

STANHOPE

SINGULAR DEATH OF A MINER FROM THE FUMES OF DYNAMITE. On Friday, the Coroner for Darlington Ward, Mr Dean, opened an inquest at the Queen's Head Inn Stanhope, touching the death of Adam Murray, of Derwent, a lead miner. On Wednesday last (*25th April*) deceased was at work at Bolihope lead mine, when a partnership working in the adjoining "forehead" fired a shot with dynamite, and shortly after the shot was fired the stithe being so suffocating deceased lay down a short time, and when able, got up and walked to the mine shop, about a mile distant, and he died at one o'clock on Friday morning, having lived 57 hours after he came out of the mine. The Coroner only call one witness, Mr Wm. Foster, who identified the body of Adam Murray, who was about 17 years of age, and adjourned the inquiry to Friday 4th May.

In 1861, at Jeffries Rake, Hunstanworth, Jane Murray Head, Widow (Jane Elliot married Joseph Murray 28th November 1818, at Hunstanworth; Joseph died aged 40, July 1834) aged 63, house holder, her son Joseph Murray, lead miner aged 41, his wife Mary 40, their children Joseph lead ore washer,15, John lead ore washer 12, Margaret 10, Thomas 8, Nicholson 3, and Adam 1. John Murray died in 1865.

In 1871, at Jeffries Rake, Hunstanworth, Joseph Murray, lead ore washer aged 51, his wife Mary 50, their children Joseph lead ore miner 25, Margaret 20, Thomas 18, Nicholson 13, Adam 11, Hannah 9, his mother Jane aged 73.

11th May 1877 (Durham County Advertiser)
SINGULAR DEATH OF A MINER AT BOLIHOPE, WEARDALE.—On Friday last, Mr Thos. Dean re-opened the inquest at the Queen's Head Inn, Stanhope, touching the death of Adam Murray, of Derwent, who died on April 27, from the effects of inhaling fames after a shot of dynamite. Mr T. D. Bolton and Mr Walker represented the London Lead Company, proprietors of Bolihope mine, where the accident occurred. Mr Edwards represented the company who supplied the dynamite, and Mr Bell, mine inspector, and Mr Atkinson, assistant mine inspector, was present. Edward Adamson was the first witness called, and stated that he and deceased and two other men were working together on Wednesday, April 25, when at about two o'clock Ralph Walton, who was

working in the low level, fired a shot of dynamite, which caused a great smoke, and it was like to choke them. He had a difficulty in breathing. The mine was well ventilated by a water blast, and the whole of the smoke had to pass over them. He and deceased were working on the top level, and they called from below and said they were to go well back, they expected a loud report. He and the deceased, Adam Murray, laid down for about a quarter of an hour, Adam felt poorly, and they came out of the mine. Mr Edwards here interposed and said that there was no smoke from dynamite, but in answer to Mr Bell said there were gases.—James De Burgh Griffith, M.D., assistant to Dr. Arnison, of Stanhope, said that he was called to see the deceased the day after the accident. He found him at the mine shop at Bolihope, and be was nearly dead, in a state of asphyxia, purple in the face, and breathing rapidly. The condition of his lungs was that of inflammation and congestion. He applied the usual remedies in such a case—hot applications to his chest, and dry cupped him. He also gave deceased brandy and eggs, but he did not revive at all. He died that night or early next morning. The cause of death was inflammation of the lung, arising, he had no doubt, from irritation caused by the inhalation of noxious gases.— Ralph Walton working at Bolihope mine with George Hodgson, said he fired the shot on the 25th of April. After the shot was fired the men above came down, except Adamson and deceased. They bored the hole nine inches into the rock, and then came into a cavity. They had 20 charges of dynamite in the hole, and the hole did not get any work. They had about two feet of fuse, and he thought that the whole of the charge of dynamite was fired. In answer to Mr Atkinson witness said that the charges were all hard except four, the paper was not taken off the charges, and the cap was put into the charge about half and inch.—Mr Edwards gave the chemical properties of the dynamite, and was of opinion that the same thing would have happened under the same circumstances. A discussion arose as to the quality of the gases which dynamite gave off when it exploded and when it was simply burnt. The gases were more injurious when the dynamite was burnt, and it was the opinion of Mr Atkinson that in the case under notice the dynamite had been burnt and had not exploded. The jury returned a verdict of accidental death.

DAVIDSON v. CARR
This was an action in which Chris Davidson, medical practitioner, Nenthead, sued Jonathan Carr, farmer, Bunkers Hill, For the sum of £6 5s, professional charges for attending his daughter during an illness. —The defendant is a member of the London Lead Company's Working Men's Medical Union for the district of Alston Moor, and therefore claimed a right to be attended gratia—or any of his family—by the medical practitioner who is remunerated by the club to do so. The plaintiff, Dr Davidson, is employed by the club to attend their sick patients, and he receives a list every quarter of the sick members, and as defendant's daughter was not among the number, and he had attended her, the action had been brought for the a mount above-named, as defendant declined

to pay. —The defendant handed up his card showing, that he was not in arrears with the Union and a certificate stating that his daughter's name had been inadvertently omitted from the list. Mr Taylor (who was for plaintiff): I hold that my client can recover from the defendant, and he (defendant) can recover it from the club.—His Honour: It is for you first to show that he is not a member-—Mr Taylor: His name was not on the list; where does the fault lie? His Honour: It is not a fault; it is a negligent act of some one.—Verdict for defendant.

WEARDALE

DISSOLUTION OF THE WEARDALE LEAD MINER'S ASSOCIATION

On Saturday, the annual meeting of the Weardale Lead Miner's Association took place at the Town Hall, St John's Chapel. The meeting was of a private character, the only question discussed was whether the association should continue or be dissolved. The representatives of some of the mines having stated that the feeling which had recently manifested itself amongst the workmen was in favour of the abolition of the association, and after some discussion on the subject the motion was put by the chairman that the Weardale Lead Miner's Association be dissolved, and carried by a very large majority. The only other business was the arrangements for the distribution of the funds amongst the members

Deaths

At Elba, 29th ult. aged 1 month, Annie Lizzie, daughter of Mr Joseph Teasdale, lead miner.

In 1851, at Pasture House, Nenthead, Ralph Teasdale (died 4th quarter of 1852), lead miner, aged 39, his wife Isabella (Bramwell, married 1836) aged 38, children Lidia 13, Frances 11, Isabella 8, Mary 6, Elizabeth 3, and Joseph 1 year. In 1861, at Elba, Nenthead, Isabella Teasdale, stone masons widow, aged 47, children Elizabeth 13, Joseph 11, Ralph 9, nurse child Margaret A Bramwell 4, and nurse child May J Bramwell 8 months. In 1871, at Elba, Nenthead, Isabella Teasdale, widow, farmer of 5 acres, aged 58, children Isabella, 27, Elizabeth 23, Joseph, lead miner aged 21, Ralph lead miner aged 19, and grandson William Teasdale 3.

In 1881, at Elba, Joseph Teasdale, lead miner, aged 31, his wife Mary J (Tatters, married 24th August 1872). aged 30, children Ralph 6, and Isabella 1 year.

EXPLOSION OF GAS AT FALLOWFIELD MINE NEAR HEXHAM
SEVERAL MEN SERIOUSLY BURNT
On Monday morning, an explosion of gas occurred at Fallowfield Lead Mines, near Hexham by which five men were seriously injured and several others slightly burnt. The men had resumed work between six and seven o'clock, and there were about twelve men in the Windy Hill Shaft at the time the accident took place. One of the men named William Little, who lives at Lantern House, near Acomb, was very seriously hurt about the head, face, and legs, his face being almost literally covered with blood. John Maddison, a married man living in Gilesgate, Hexham, was seriously burnt, as was also George Davison, of Acomb; Wm Eddy, Fallowfield, was burnt about the face and back of the head, and one of the hands, also slightly on the legs. Geo. Hall of Low Engine House, Fallowfield was also seriously burnt. Other five men in the shaft at the time

were only slightly burnt. one of the injured men stated that the explosion took place soon after they entered the shaft. He says Maddison went forward into the mine with a lamp which "brought the gas on the candles," and the explosion followed. Some of the men not so far forward as Maddison, when they heard the report of the explosion, flung themselves on the ground, and thus partly escaped being burnt. Little is believed to be the most severely hurt. The injured men were quickly removed to their respective homes, and were promptly attended to by Dr Stewart (Hexham), Dr Rowlands (Humshaugh), Dr Kendal, Dr Fox and Dr Farmer of Hexham. The names of the five men most severely hurt are :-

Wm Little, of Lantern House, Acomb, married
John Maddison of Gilesgate, Hexham, married
George Davison Acomb, married
Wm Eddy Fallowfield, married
Geo. Hall Low Engine House, Fallowfield, married

The names of the men slightly burnt are:-

Wm Telford Wall, single
Daniel Weldon Cockshaw, Hexham, single
Thos Brown Acomb, single
Edward Eddy Fallowfield, married

Other two men named Jo. Brown and T Little, were just in the act of entering the shaft when the explosion took place, and so escaped unhurt.

Marriages
At Alston Wesleyan Chapel, 22nd inst., Rev. G. R. Cleminson, Wesleyan Minister, Peterhead, to Mary Alice, eldest daughter of Mr John Millican, Alston.
Deaths
At Beldy, near Alston, 26th ult., aged 66 John Morrow, lead miner.
In 1851, at Beldy John Morrow, aged 40, lead miner, his wife Nancy (Parmley, married John Murrah 18th July 1840, St John, Garrigill) aged 31, children Jane 11, William 5 months and mother in law Jane Parmley, aged 74.
Nancy died in 1852.
In 1861, at Beldy, listed as a widow, lead miner, aged 51
John Morrow married Mary Craig, at Alston on 16th August 1861.
The 1861 census shows Mary Craig, widow aged 36, with a son William Craig aged 11, living with her mother Elizabeth Holmes, widow, aged 62, farmer of 28 acres, at Dodberry, Garrigill.
In 1871, at Beldy, John Murray (sic), aged 60 lead miner, his wife Mary aged 46, children John aged 9, and George aged 5.
In 1881, at Beldy, Mary Morray, widow, aged 56, grocer, and sons, John aged 19, lead miner, and George aged 15, lead miner.

2nd June 1877 (Alston Herald and East Cumberland Advertiser)
ALSTON.
A special meeting of the Alston Board of Guardians was held on Saturday last, to make the periodical revision of the out-door relief lists, the result of which was that a reduction of some 10s a-week was made on the amount lately paid.
DEATH OF AN OLD AND ECCENTRIC CHARACTER.—On Thursday last, about twelve o'clock noon, a very old perhaps one of the oldest inhabitants of

Alston breathed his last. We refer to the death of Mr Wm. Burrow, who was well known in Alston for his rather eccentric habits. Deceased earned his living for years by following the avocation of a mineralogist, until fast failing health obliged him to discontinue. For many years a man named John Jones has the companion and sharer of his worldly troubles. He is also of eccentric habits and the general saying is that he is inclined to the study of astronomy. Deceased and this person have lived together, as before stated, for many years, and for a good while, through his declining health, Burrow has been unable to contribute anything to their maintenance. Jones has administered to deceased for some time past, and thereby has been prevented from following his daily labour, on account of being unable to leave Burrow, so that they have been in straightened circumstances during the past winter. Deceased was about 89 years old, and has died from sheer old age.

Deaths

At Alston, 31st ult., aged 89, William Borrow.

9th June 1877 (Alston Herald and East Cumberland Advertiser)

GARRIGILL.

BRASS BAND PIC-NIC. — The quiet village of Garrigill was on Saturday afternoon last the scene of unusual and activity in consequence of a pic-nic being held by the members of the Garrigill Brass Band. At three o'clock the band commenced to procession the village, and marched to the grounds near Crossgill Hall, kindly granted for the occasion by Jos: Watson, Esq. The place which had been chosen for the amusement was really excellent, being the crown of the hill and presenting a capital table for the various amusements, and affording a first-class view both of the rivers Crossgill and the Tyne. At four o'clock tea was provided in a large tent when upwards of 200 partook to their own satisfaction. The following were most assiduous in attending to the wants of the many at the tables:—Miss H. Pearson, Miss H. Hetherington, and Miss H. Renwick. After the removal of the cloth dancing was commenced and kept up till nine o'clock, the music being supplied by two young ladies from-Sunderland, which added greatly to the entertainment. The band played occasionally choice selections of popular airs. Although the was unfavourable, rain falling heavily during the afternoon and evening, a very pleasant day was spent

Deaths

At Alston Workhouse, 5th inst., aged 31, Jane Johnston

ALSTON PETTY SESSIONS

Friday June 1st

These monthly petty sessions were held to-day, before the Rev. O. James (chairman), and T. W. Crawhall, Esq, when the following cases were heard.

DRUNK, ETC.

John Davidson, butcher, Low Craig, near Garrigill, was summoned by the police for being found drunk upon the highway at Skelgill on the 22nd of May last. Defendant pleaded guilty. —P.C. (43) Taylor stated that at 7.30 p.m. as he was going to Nenthead he found the defendant on the Highway at Skelgill drunk and making use of very bad language. He requested him to go home and he refused for about fifteen minutes, there was a young man also wanting him to go home

with him, but he would not do. The Chairman: is anything known against the defendant—Sub-Inspector Grisdale: Defendant has not been up before. —Fined 5s and costs.

William Edgar, miner. High Spency Croft, near Alston, was summoned for being drunk and disorderly in Alston on the 5th of May last Defendant pleaded guilty. —P.C. (43) Taylor stated that he found the defendant at 11 p.m. in the Market Place, drunk, cursing and swearing and behaving in a very disorderly manner. He requested him to go away and he refused for about fifteen minutes, at last he went staggering down the street in the direction of his home-—By the Bench; Is anything known against him. —Mr Supt. Fowler: The last time he was up at this court was in August, 1871, when he was fined 10s and costs for similar conduct. Since then be has been twice fined at Haltwhistle for being drank and riotous; the last time in September, 1876. —fined 5s and costs.

APPLICATIONS.

Joseph Walton, mining agent, Raise, made application to the Bench for the renewal of licensee for the storage of mixed explosives at Blagill, Calvert, and Rodderup Fell. —Application granted.

Thirlwell Story, druggist, Alston, and Joseph Dowson, grocer, Alston, made application for the removal of their licensee for the storage and sale of gunpowder. —The magistrates granted their applications.

Deaths

At Paris, Canada West, North America, 17th May, aged 48, Adam Watson formerly of Garrigill.

Canadian records show John Adam Watson, Railway worker died 12th May 1877, his death was registered on 16th May, at Brant County, Canada by his brother Joseph Watson. Cause of death pneumonia, religion Methodist.

In 1841, at Shield Hill, Garrigill, Ralph Watson, lead miner, aged 50, his wife Eleanor (Walton married, 24th May 1808, at St Augustine's, Alston) aged 50, children Ralph 15, Joseph 13, and John 11.

Ralph Watson of Shield hill was buried at Garrigill, 28th August 1850, aged 64.

In 1851, at Shield Hill, Garrigill, Elenor Watson, widow, aged 64, sons Ralph 27, Joseph 24, and John Adam 22, all sons working as lead miners.

Eleanor Watson of Shield Hill, was buried at Garrigill, 24th December 1855.

In 1861, at Force Green, Garrigill, Ralph Watson, lead miner, aged 37, his wife Sarah aged 31, children, Ann 7, Eleanor 4, and Ralph 1.

In 1871, at Loaning Head, Ralph Watson, lead miner, aged 47, his wife Sarah 41, children, Ralph, lead ore washer, aged 11, Brown 9, Adam W 6, Joseph 3, William 1, and brother in law, Thomas Elliott, lead miner, aged 36.

In 1881, at Crooks, Alston, Ralph Watson, lead miner, aged 57, his wife Sarah 50, children, Eleanor 24, Adam, lead miner, aged 16, Sarah 13, William 11, and brother in law, Thomas Elliott, lead miner, unemployed, aged 47.

Ralph Watson died 2nd quarter 1888, aged 68, registered at Whitehaven.

In 1891, at Ennerdale Road, Cleator Moor, Sarah Watson, widow, aged 60, children, Eleanor 34, Ralph, mine overman, aged 31, Brown, tailor, aged 29, Sarah J. Milliner, aged 23, brother, Thomas Elliott, 57, and granddaughter, Annie Rowe aged 3.

In 1901, at 11 Wagtail, Craghead, Lanchester, Sarah Watson, widow, aged 70, son Adam, coal miner, aged 36, and daughter Eleanor 44.

Sarah Watson, died, 2nd qtr 1906, aged 76, registered at Lanchester.

In 1911, at 11 Wagtail, Craghead, Lanchester, Adam W Watson, coal miner, aged 46, sister, Eleanor 54, niece, Annie Rowe, bakeres, aged 23, and niece, Doris Rowe under 11 months.

12th June 1877 (Penrith Observer)

MELMERBY ROUNDS

About a quarter of a century ago, the squire of Melmerby Hall interested himself a good deal in establishing spring and "back-end" fairs in the village, for the sale of cattle, sheep, &c; and on account it was thought better to abolish the annual Rounds. Accordingly this ancient gathering came to a sudden and unexpected collapse, about the year 1850, after having existed in an unbroken link for more than a century. The following is as complete list of the winners of the wrestling at Melmerby Bounds, as we have been able to collect. The local' newspapers were carefully ransacked for intelligence, but being found singularly barren in this respect, our information had to be gathered in almost every instance from aged fell-side chroniclers, who had either been frequent or occasional attended at these meetings, the principal of whom was Mr. John Dodd, of Broadmeadows, Melmerby.

About 1788 Adam Dodd, of Langwathby Mill, won several years.

About 1798, James Fawcett, miner, Nenthead.
" 1799, " "
" 1800, " "
" 1801, " "
" 1802, " "
" 1803, " "
" 1804, " "
" 1809, Thomas Golightly, miner, Alston.

This wrestler afterwards removed to the West Cumberland mining district; and in February, 1819, was killed by the fall of part of a roof in one of the Whitehaven coal pits.

About 1810 Hebert Rowantree, shepherd, King-water.
About 1815, Andrew Armstrong, farmer, Sowerby Hall.
About 1816, Thomas Peat, from the Templesowerby neighbourhood.
About 1817, John Dobson, Cliburn.
About 1818, John Robley, Scarrowmannock.
About 1819, John Robley, Scarrowmannock.
Robley emigrated to America several years after this date.
About 1820, Isaac Maughan Alston.
About 1821, Isaac Maughan Alston.
Maughan settled in Newcastle-on-Tyne, where he died during the cholera of 1832. About 1826, John Weightman, husbandman. Hayton.
About 1828.—Thomas Armstrong, Carlisle; Elliot (perhaps of Cumrew) wrestled second. Bowman, of The Gale, won the second day's wrestling.
About 1839, Thomas Morton, farmer, The Gale.
About 1840, Thomas Morton, farmer, The Gale.
On one occasion Morton wrestled through the ring without taking his coat off.
About 1841, John &Wield, land surveyor, Huddle.
About 1845, Joseph Shepherd, Crewgarth, Melmerby.
About 1850, Joseph Morton, farmer, The Gale.

Morton threw Halliwell, of Penrith, and, we believe, Anthony McDonald, of Appleby, wrestled up with him. This was the last Bound held at Melmerby.

WEARDALE
On Friday an inquest was held before Mr Dean on the body of John Wearmouth, who came by his death on the previous day whilst at Messrs Ord & Maddisons limestone quarry, Frosterley. Deceased it appears, had gone to work about six o'clock in the morning, and whilst in the act of commencing work had by some means fallen over the face of the quarry, which is 34 feet high. A workman who followed close after him observed a man lying at the bottom below, and it proved to be Wearmouth, whose skull was fractured and he only lived about two and half hours. No person saw him fall. He had laid down his waistcoat and he appears to have had hold of a mall when he fell over the facing. He was 35 years of age. The jury returned a verdict of accidental death.
Marriages
At Stanhope Primitive Methodist Chapel, 16th inst. Mr Jonathan Emerson of West Black Dean to Miss Hannah Pattinson of Wearhead.
In 1871, at West Black Dean, Ann Emerson, widow, annuitant, aged 56, Sons Jacob, lead miner, aged 23, Jonathan, lead miner, aged 19, Ralph, lead miner, aged 17, and John, lead miner, aged 15. See 9th December 1876
Jonathan Emerson died 1st quarter 1880, aged 28, registered at Weardale.
In 1881, at Windy Side, Stanhope, John Pattinson, lead miner, aged 60, children, John, lead miner, aged 27, Margaret 25, Hannah Emerson, widow, aged 29, her children, John 4, and Mabel 2.

Mary Teasdale married John Raine, 1st quarter 1850, registered at Weardale.
John Raine died 3rd or 4th quarter of 1858, at Weardale.
In 1861, at Low Prize, St Johns, Stanhope, Mary Rain, widow, aged 31, son George 9, and daughter, Esther 4.
In 1871, at Low Prize, St Johns, Stanhope, Mary Raine, lead miners widow, aged 41, and son George, ironstone miner, aged 19.
George Raine married Mary Kidd 2nd quarter 1875, at Weardale.
Mary Raine died 3rd quarter 1880, aged 24, at Weardale.
In 1881, at ____ Head, St John's, Stanhope, Elish Teasdale, widow, farmer, aged 82, daughter Mary Raine, widow, aged 51, son George Raine, widower, lead miner, aged 29, children, Margaret Raine 5, Mary Ann Raine 3, and Isabella F Raine 9 months.
George Raine Widower, married Mary Ann Walton, 4th March 1883, at Stanhope
Mary Ann Raine died 1st quarter 1889, aged 44, at Weardale.

George Raine married Hannah Emerson 2nd quarter 1890, registered at Weardale.
In 1891, at Westgate, Stanhope, George Raine, limestone quarryman, aged 40, his wife Hannah aged 40, son in law, John J Walton, limestone quarryman, aged 20, son in law, Thomas Walton, limestone quarryman, aged 17, daughter in law, Mary J Walton 13, daughters, Margaret Raine 15, Annie Raine 8, sons, Edwin Raine 6, Norman Raine 4, son in law, John Emerson, lead ore washer, aged 14, daughter in law, Mabel Emerson 12, and daughter, Lily H Raine aged 1 month.
In 1901, at Crawleyside, George Raine, limestone quarryman, aged 50, his wife Hannah aged 50, children, Annie 18, Edwin, waggon setter NER, Norman, limestone quarry nipper, aged 14, Lily H 10, George W 8, and Arthur aged 3.
Hannah Raine died 1st quarter 1911, registered at Weardale.
In 1911, at 17 Graham Street, Stanhope, George Raine, widower, lead miner below ground, aged 59, children, Lily Hannah 20, Norman, limestone quarryman, aged 24, George William, lead minelabourer, aged 18, and Arthur aged 13.
George Raine died 2nd quarter 1913, registered at Weardale.
At the register office, Wolsingham, 16th inst. Mr John George Watson of Stanhope to Miss Jane Milner of Intake near Frosterley.
In 1881, at Front Street, Stanhope, John G Watson, railway guard (mineral), aged 24, his wife Jane aged 27, children, John Wm 3, and Margaret Ann 2.
In 1891, at Town Foot, Stanhope, John George Watson, Mineral guard (railway), aged 36, his wife Jane 36, children, Margaret Ann 12, Thomas Crawhall 9, and George Milner 6.
In 1901, at Front Street, Stanhope, John George Watson, Mineral guard NER, aged 45, his wife Jane 46, children, John William, railway engine stoker NER, aged 23, Margaret Ann 22, Thomas Crawhall, railway engine stoker NER, aged 19, George Milner 16, Jacob Walton 8, and Charles Baines 5.
John George W Watson died 4th qtr 1910, aged 54, registered at Auckland.
In 1911, at 34 Redworth Rd, Shldon, Jane Watson, widow, aged 57, children, Margaret Ann 33, Thomas Crawhall, fireman, aged 29, Jacob Walton 18, Charles Baines, labourer, aged 15, and Elizabeth Ann 7.

29th June 1877 (Northern Echo)

DESTRUCTION OF MINING PLANT BY FIRE

On Wednesday evening last a fire broke out on the lead ore dressing floors of the London Lead Company's Coldberry Mine, situated about three miles North-West of Middleton in Teesdale. Smoke was discovered issuing from a large wooden shed, about nine o'clock, in which was fixed a beautiful set of Green's self-acting jigging machinery, worked by both steam and water power. During the last few days, owing to a scarcity of water, steam has also been employed to maintain the necessary power, and it is clearly evident that the fire had its origin in connection with the steam engine in use, and which stood inside the wooden shed covering the jiggers. The woodwork was completely destroyed, and the total damage is estimated at not less than one thousand pounds. A large crushing mill, not more than ten feet from the jigging house, also caught fire, but from the presence of mind of several workmen, a plentiful supply of water was turned on, which saved the heavy mass from destruction.

30th June 1877 (Hexham Courant)
Deaths
At Wardway Foot, Nenthead, 23rd inst., aged 32 Joseph Hayton, lead miner.
William Hayton baptised 5th January 1813, son of Jonathan Hayton & Mary Teasdale (married at Alston 13th April 1805) Jonathan had two other children Ann baptised 5th January 1813, Mary baptised 3rd August 1822.

Jonathan was the son of Robert Hayton and Ann Hill, he had a brother Robert, baptised 25th December 1774.*
Ann Hill was the sister of Mary Hill the wife of Thomas Dodd, the Chief Agent of the London Lead Company in the early 1800's.

Robert Jun., wrote letters of complaint to the Lead Company regarding the behaviour of his uncle Thomas Dodd, which led to changes in company practice.*
In 1851, at Overwater, Nenthead, William Hayton, lead miner, aged 40, wife, Elizabeth (Percival, married at Alston, 10th October 1840) aged 31, children Jonathan 9, Teasdale 7, Joseph 5, and Mary 2.
In 1861, at White Hall, Nenthead, William Hayton, lead ore miner, aged 50 Elizabeth 41, children Jonathan lead ore miner, aged 19, Teasdale lead ore washer, aged 17, Joseph lead ore washer, aged 15, Mary 11, Frances 9, Jane 6, and William 3.
In 1871, Joseph, is a boarder at 43, Dirt Pit Row, Tudhoe, Durham, working as a labourer. His mother Elizabeth is at White Hall, Nenthead listed as a widow (William died 4th quarter of 1865), aged 50, Jonathan aged 29, unemployed lead miner, Teasdale, aged 27, a lead miner, Jane aged 16, a domestic servant, and William aged 14, lead ore washer.
See 21st December 1844, 15th June 1850, 21st March 1856, 3rd December 1859, 20th October 1865, 14th October 1871, 4th May 1872, 15th February 1873, 5th July 1873, 30th June 1877, 14th July 1877, 11th April 1882, 21st July 1888.
At Alston, 23rd inst., aged 4 years, Mary Ann, daughter of Mr Henry Richardson.
In 1871, at Clitheroe, Henry Richardson, coal miner, aged 28, his wife Margaret (Smith, married 1870) aged 22, children Annie 8 months. In 1881 the family had moved to Broomhill, near Morpeth, Henry Richardson, coal miner, aged 39, his wife Margt. 31, Annie 10, Elizth. 9, Margt. 5, Mary J. 3, Hannah 5 months. See 14th July 1877
At Pryhead, 25th inst., aged 6 years, William, son of Mr John Hetherington, lead miner.
In 1871, at Pryhead, Nenthead, John Hetherington, lead miner, aged 40, his wife Hannah (Featherstone, married 26th March 1853) aged 39, children James 15, John 9, Hannah 8, Elizabeth 6, and William 2 months

30th June 1877 (Alston Herald and East Cumberland Advertiser)
FESTIVAL AT ASHGILL FORCE.
Tee annual Sunday-school Festival in connection with the Primitive Methodist Society at Garrigill was held on Saturday last, in the beautiful and picturesque woods round Ashgill Force, kindly granted for the occasion by J. J. Millican, Esq., of Nenthead. The morning did not seem altogether promising of fine weather, and as mid-day approached the weather prophets prognosticated showers. The

Garrigill Brass Band, which had been engaged for the occasion, left Garrigill for the rendezvous a little before three o'clock in the afternoon, at which time dark clouds were gathering fast and gave signs of the speedy approach of a heavy downpour of rain. We soon arrived at the foot of the wood, and crossed the burn by the pretty rustic bridge, by which time the rain had commenced and continued with unabated vigour for about an hour, making the ground, which was then very damp, unpleasant for the feet. The unpropitious circumstances prevented many from attending this annual reunion, which is very popular with the inhabitants of the surrounding district, as the rain made the trysting place very miserable altogether hindering visitors from admiring and enjoying the rich and varied scenery which is to be observed around the waterfall. The rain having ceased, "old Sol" shone forth once more and seemingly promised an enjoyable evening, but never were appearances more deceiving, as in the midst of the open air meeting held after tea some heavy showers of hail fell. In spite of the untoward circumstances a large number or people gathered together and partook of the substantial tea provided, which was gracefully dispensed by the following ladies:—Misses Elizabeth Watson, E. A. Renwick, H. Renwick, Annie Richardson, Annie Roddam, Mary Wilkinson, Elizabeth Martin, and Elisabeth Renwick, while the onerous duties of tea infuser were satisfactorily discharged by Mr James Stephenson. After tea, about six o'clock, a public meeting was held, presided over by Jacob Walton, Esq., of Greenends.

After singing a hymn and prayer, the Rev. J. M. Dawson, of Alston, introduced the Chairman to the meeting. After the band, which played the accompaniments to all the hymns and also favoured the audience with choice selections of music at intervals, had performed a piece.

The Chairman rose, and said that in making his first appearance before them at that festival he was glad to see so many present to enjoy the scenery, refresh themselves with tea, and derive instruction and benefit from the musicians and speakers whom they would hear at the meeting. Every credit due to the promoters of the festival for the excellent arrangements they had made, and for holding the festival in such a pleasant and salubrious locality. He considered it a wise plan to hold open air meetings, and the only thing to be regretted was that the weather was not so fine, but he trusted the funds would be equal, and even in excess of former years.

Mr John Slack, the secretary, read the annual report of the Sunday-school, by which it appears that the number of male teachers is 6; female, 2; total, 8; increase, 1; average attendance, 7. Scholars—boys, 30; girls, 9; total, 39; increase, 4; average attendance, 30. Income—balance in hand from last year, £1 5s 7d; proceeds of last anniversary, £12 6s 6d; magazines, 13s. 5d; total, £14 5s 6d. Expenditure £13 19s 3½d. balance on hand, 6s 2½d . …

7th July 1877 (Alston Herald and East Cumberland Advertiser)
Marriages

At Alston Primitive Methodist Chapel 30th ult., Thomas Wilkinson, Hill Top, Nenthead, to Susannah Martin, Ashgill *(daughter of John & Martha Martin)*.

In 1851, at Hill Top, Thomas Wilkinson, blacksmith, aged 34, his wife Hannah 34, children Mary 10, Jonathan 8, Henry 6, John 4, and Elizabeth 1.

In 1861, at Hill Top, Thomas Wilkinson, blacksmith, aged 44, his wife Hannah 44, children Jonathan, lead miner, aged 18, Henry, lead miner, aged 16, John, lead ore washer, aged 14, Elizabeth 11, and Thomas 8.

In 1871, at Hill Top, Thomas Wilkinson, blacksmith at smelt mill, aged 54, his wife Hannah 54, sons John, lead miner, aged 24, and Thomas, lead miner, aged 18.
Thomas Wilkinson snr. died 2nd May 1890, aged 73.
In 1881, at Victoria Terrace, Haydon Bridge, Thomas Wilkinson, joiner, aged 28, his wife Susannah 26, and daughter Laura 3.
In 1891, at Fourth St. Gateshead, Thomas Wilkinson, joiner, aged 38, and his wife Susannah aged 36. In 1900, at Whitehall Rd. West, Gateshead, Thomas Wilkinson, joiner, aged 48, his wife Susannah 46, and daughter Laura 23.
Thomas Wilkinson died 1st quarter 1907, aged 54.
In 1911, at Whitehall Rd, Susannah Wilkinson, widow, aged 55, and daughter Laura, dressmaker, aged 30. See 14th May 1869, 16th October 1875

Deaths

At Alston, 30th ult., aged 22, William Haldon, draper.
At Nenthead, 28th ult., aged 34, Joseph Armstrong, lead miner.
See 22nd February 1873, and 7th October 1882

7th July 1877 (Hexham Herald)

TEESDALE

THE LATE DESTRUCTIVE FIRE. It has been ascertained that by the alarming fire which a few days ago entirely consumed the lead ore dressing floors at the Coldberry Lead mine in Upper Teesdale, the London Lead Company sustained a loss of about £1,200. The origin of the conflagration is believed to have arisen from a steam engine, which in conjunction with water power, propelled the machinery. A set of Greene's self acting jigging machinery, and also a portable engine were injured to a considerable extent. A large Water Wheel and Crushing mill in close proximity to the "Jigger" house also caught fire but it was promptly extinguished. The wooden shed was totally destroyed.

14th July 1877 (Hexham Courant)

NENTHEAD v. ROOKHOPE

On Saturday last the Allenheads picnic, in connection with the Cricket Club, was held. A bat and ball were given for cricketing. Three clubs entered, viz., Nenthead, Rookhope, and Newhouse. Newhouse and Rookhope were drawn together, and the latter club secured a somewhat easy victory. Rookhope and Nenthead then came together for the final The former team won the toss and sent their opponents to the wickets to the bowling of Brown and Dixon. The batting of C. Barron, of Nenthead, was splendid, he, by a succession of fine hits, running up a score of 27 (not out.) Five wickets were down when the allotted number —40—was reached. The Rookhope men then took the willow in hand, but on account of the splendid play of the other team, were unable to make any stand. The bowling of Doyle, Armstrong and Elliott was excellent, the last mentioned gentleman bowling being especially destructive and the whole were got out for 32, Nenthead thus securing an easy victory and getting the bat. Rookhope got the ball. Score: —

NENTHEAD		ROOKHOPE	
A. Thompson, b Brown	2	E. Brown, c Elliott	2
M. Erwin, b Dixon	1	T. Brown, c Walton	1
C. Barron, not out	27	F. Hewitson, b Doyle	0

SALE OF BOLIHOPE SHIELD AND SHIELD ASH ESTATES

… Bolihope Shield was commenced at £3,000, and rapidly ran up to £5,500, when the bidding was advanced to Mr Valentine Rippon of Rogerley, whose last offer was £5,675 and Mr Bainbridge of Middleton, agent to the London Lead Company was the last bidder at £5,700. Mr Bainbridge ultimately made a purchase of Bolihope Shield at £7,000.

21st July 1877 (Alston Herald and East Cumberland Advertiser)

ALSTON BOARD OF GUARDIANS

RURAL SANITARY AUTHORITY.

At the meeting of the Rural Sanitary Authority, the reports of Dr Gill and Dr Carson, medical officers of No. 1 and No. 2 districts were read. Dr Gill stated in his report that since his report influenza and scarlatina had been epidemic, the former having produced increased mortality of the aged and infirm, inducing serious consequences to the respiratory organs, and the latter having been prevalent among children chiefly, but in a very mild form. The summer months perhaps might diminish its further progress. On the 26th of March he had visited various places on the east and west sides of the town, and found the privies, manure steads, and culverts in a tolerable condition consistent with health. During the month of April he had reported an unhealthy nuisance to their Inspector at Fourdargue, who had informed him that the proprietor was improving its condition. His attention had been called to the premises of Messrs Lancaster and Goodfellow in the Butts, but as the former had cleaned his manure stead he could not interfere. On June 25th the Inspector had requested him to view the culvert which came down past Mrs Lee's. It required earthenware tubes, and to be carried further up the side of the street, to render it free from gases noxious to health. This, he was informed, would be accomplished by the Highway Board. The mortality, notwithstanding the prevalence of the above epidemics, had not varied much from the winter quarter, it being 11 as compared to 12, or about 2.27 per cent.—Dr Carson, in submitting his quarterly report for No. 2 district, ending the 30th June, begged to inform them that he had inspected Nenthead, Nentwater, and also Garrigill, and found all the places in a good sanitary condition. All privies regularly cleaned out; all dunghills well-kept from stagnant water. No epidemics had occurred during the above period.—The Inspector of Nuisances said that Mr Jas. Ridley had asked him if the Authority

were going to do anything to the hole in the Mill Race near to his dwelling, and he (the Inspector) had told him that it had to stand over.—There was no other business to come before the authority.

NENTHEAD PAYS.—The quarterly pays of the workmen of the Nenthead Lead Company were held on Thursday last, and were understood to be on the whole pretty good. Pay-day now that it comes once a quarter, is not such a great event as in times past, when it was annual. The alteration to quarterly pays is said to have had the strange effect of making the men more industrious. They now work much harder than when the pay was yearly.

28th July 1877 (Alston Herald and East Cumberland Advertiser)

Deaths

At Overwater, Nenthead, 23rd inst., aged 7 weeks, George H. Hind, son of Ann Hind.

At Overwater, Nenthead, 14th inst., Isabella Percival, widow of Robert Percival, lead miner, aged 70.

In 1851 at Hillersdon Terrace, Robert Percival, lead miner, aged 48, his wife Isabella (Rowell, married 30th August 1828, at Alston) aged 43, children Elizabeth 22, Joseph, lead ore smelter, aged 21, William, lead miner, aged 19, Matthew, lead miner, aged 15, Robert, lead miner, aged 13, Mary 8, Jane 6, and mother in law Mary Rowell, widow, formerly agents wife, aged 65.
Robert Percival senior died in 1854.
In 1861, at Hillersdon Terrace, Nenthead, Isabella Percival, miners widow, aged 53, children Joseph, smelter, aged 30, Robert, stone hewer, aged 22, Mary, house servant, aged 17, and Jane, house servant, aged 15.

At Blagill Hill Top, near Alston, 19th inst., aged 41, Thomas Hilton, lead miner.

In 1851, at Blagill, Hill Top, Thomas Hilton landed proprietor, aged 51, his wife Ann (Jackson, born Haltwhistle, married at Alston 9th November 1826) aged 49, children Jonathan 23, William 21, George 17, Thomas 14, John 12, Sarah 7, James 4 and a visitor, Hannah Hilton, unmarried dressmaker 25.
Thomas senior died in 1854.
In 1871 at Blagill, Hill Top, Ann Hilton, widow, farmer, aged 70, unmarried children George lead miner 37, Thomas lead miner 35, and James farmers son 23.

At Langley Mills, 6th inst., aged 62, Margaret, wife of Mr Wm. Dargue, smelter.

In 1871, at Langley Hill Top, William Dargue aged 61, lead separator, and his wife Margaret aged 56.

4th August 1877 (Hexham Courant)

Marriages

At Durban, Natal, South Africa, 21st June, Mr William John Bainbridge of Middleton House, Middleton in Teesdale to Anne Elizabeth, daughter of the late Mr J. H. Wood of Stockton on Tees.

Deaths

At Brownside, 29th ult. aged 14 hours, Phillis Anne, daughter of Cain Wilkinson, lead miner.

In 1861, at Hay Rake, Allendale, John Wilkinson, lead miner, aged 58, his wife Jane 54, children, Adam, lead miner, aged 29, Hugh, lead miner, aged 24, Paul, lead miner, aged 19, Cain, excavator, aged 17, Mary 14, and Jane 11.

Cain Wilkinson married Margaret Philipson, 3rd quarter 1866, registered at Hexham.
In 1871, Lambley & Asholme, Cain Wilkinson, coal miner, aged 27, born Allendale, his wife Margaret 20, born Allendale, children, Sarah Jane 3, and John Henry 7 months.

The family emigrated to the United States.
In 1880, at Vinegar Hill, Jo Daviess County, Illinois, Kain Wilkinson, labourer, aged 38, his wife Margaret, children Sarah J 12, John H 9, Maery A 7, Maggie L 5, and Adam T 1 year.
Cain Wilkinson, naturalisation recorded 8th October 1886
Cain Wilkinson, farmer, died at New Diggings, Lafayette, Wisconsin, aged 54, in 1896.

4th August 1877 (Hexham Herald)

DEATH OF ISAAC CRAWHALL

This gentleman who formerly resided at Halliwell Dene, Hexham, and then went to Alston, where he had been living for the past few years … died on Thursday last. His son Thomas W. Crawhall Esq. resides at Raise House, Alston.
Isaac Crawhall Christened 22nd April 1795 St Peter's Allendale, Father Thomas Crawhall, mother Ann Bownas.
Ann Wilson baptised 8th February 1798 daughter of John Wilson (born about 1760) & Mary Walton who married at Alston 23rd January 1785.
In 1841 living at Stanhope Isaac a Mining Agent, his wife Ann (Wilson, married15th October 1823) and children, Maria 12, George 10, William 9, Elizabeth 7, Septimus 2, Octavius 1. Thomas at Kupiers Grammar School, Houghton Le Spring.
In 1851, at 2 Eldon square, Newcastle upon Tyne, Isaac Crawhall, lead & Coal mine & landed proprietor, aged 55, his wife Ann 54, unmarried children Anne 26, Thomas W. colliery viewer & mine agent 25, Maria 22, Septimus J. 12, and Octavina J. 10.
Isaac Crawhall aged 64 and his wife Ann aged 63 are staying at Brighton, 18 Marine Parade at the time of the 1861 census. Ann died in 1870.
In 1871, at Nun Monkton, Yorkshire, Isaac Crawhall, land owner aged 75, his unmarried daughter Elizabeth Crawhall, aged 36.

9th August 1877 (Buxton Herald)

DERWENT
Lead Mining and Smelting Company, (Limited.)
CAPITAL, £48,000.
IN 12,000 FULLY PAID-UP SHARES OF £4 EACH,
ALL OF WHICH WERE SUBSCRIBED FOR LAST AUTUMN.

In the Northern Counties are situate a number of large LEAD MINES that have been in operation for very many years. Among them are those of the London Lead Company, which for nearly two centuries have scarcely been a year without paying a Dividend, besides accumulating a large Reserve Fund; while Mr. Beaumont's celebrated Mines, in the same district, have been at work several hundred years, and have gives immense profits estimated at above £4,000,000. The Greenside Mine has been in operation fifty years, and has divided £300,000, while the Stonycroft, with a capital of only £1,800, has divided

about £300,000 since 1853, besides paying for a valuable plant, and opening extensively underground, out of the Returns. In Yorkshire, Wales, and elsewhere, there are a number of Lead Mines that have been in operation fifty years and upwards, paying well most of the time.

From a minute calculation, it appears that the total amount of capital Invested in Dividend and Non Dividend Public Lead mines is about £2,150,000, and the total Dividends paid by the former being about £150,000 per annum, it gives an average return of 7 per cent, on the whole amount, including the Non Dividend; while some Companies pay as high as 60 to 100 per cent, (against only 3 to 13 respectively in Railways, which have all the advantage of unlimited capital to carry out their works in the cheapest manner.) If there existed the means of including the numerous private lead Mines, the result would be still more favourable, for they also yield an annual profit of at least £150,000.

The price of Lead Ore continues good and steady; the same quality which in 1870 realised £11 13s. 6d to £13 10s, 6d. per ton, now fetches about £14 10s. 6d., notwithstanding the general cry of depressed trade and business generally. Whether during times of peace or war Lead is an article, which maintains its value, either for commercial or social requirements or for destructive purposes; while as a metal it is comparatively cheap, and more cheaply and easily raised than any other.

In the County of Durham, and on the borders of Northumberland (the richest Lead District in the kingdom) are the DERWENT LEAD MINES, which till lately have been carried on by a small Company, with little or no capital, and yet are said to have sold Lead Ore to the amount of £1,000,000, and made a large profit. They are situated about nine miles by carriage road from Stanhope Station, which is two hours drive by rail from Darlington.

Notwithstanding the immense returns, the Mine is as yet only down to the top of the Great Limestone, which is the strata in which the other large Mines in the district are the richest, while there is a great extent of ground on the course of the lodes untouched to surface. It is the opinion of CAPTAIN A. WATERS (the Manager of TANKERVILLE and ROMAN GRAVELS), that DERWENT is “a splendid property—is just deep enough to enter the first of the series of richer sills, and will ultimately be developed into a very great and lasting property. Magnificent runs of Ore (he says) hundreds of fathoms in length, have been the rule in DERWENT above the said limestone, and my opinion is that as the Mine is deepened, and you get down to the Great Whin Sill, the lodes will be found more productive than at any previous period in the working of the Mines.”

Capt. Waters gives his views as to the mode to be adopted in working the Mine, which, if carried out with vigour, be says, “ is sure to bring the celebrated Old Mine again forward Into high rank in the district; and he looks on “this property as a prize, especially If worked vigorously and with judgment,” He further remarks that no Mine he has visited in the North of England is so well supplied with machinery as the Derwent.

A most useful and important feature in the undertaking is that the Company has purchased the Freehold of the royalties on very moderate terms. The purchase of the mineral rights in fee not only secures to the Company the immense advantage of the non-payment of any dead rent or royalties of any kind, but what is even more important in mining, the freedom from any covenants or any kind as to working the Mines, and from any penalties or litigation for breaches

of covenants or dilapidations. The Company, in fact, hold the Mines free in perpetuity.

The present Company is in 12,000 Shares of £4 each, all of which were subscribed for last autumn More vigorous operations were commenced some months ago, which are being gradually extended, and already improvements in the Mine are taking plane. Important objects are being actively carried out, several of which will shortly be reached, and the results are likely to be valuable discoveries. Already the monthly sales of Lend are meeting a large portion of the cost, including much dead work, leading to points of great importance; while the reserves of Ore are being largely increased, as though 90 fathom of Ore ground are opened up monthly, so far the Ore from only 33 fathom is taken away, dressed, and smelted monthly. The returns for June were 28 Tons pig Lead value about £600, but as drawings on the Sun vein, lately cut rich in the Little Limestone, are just commenced, the returns will at once be greatly increased, resulting in profits and dividends.

THERE IS AMPLE UNEXPENDED WORKING CAPITAL.

The following figures will show the results of the five principal public Lead Mining Companies In the last ten years. It may be added that when GREAT LAXEY was purchased, the total profits divided from the commencement (on capital of £2,000) had been £28,000, now they are paying £30,000 a year. VAN profits were about £8,000 a year, now they are £48,000 a year; TANKERVILLE profits were about £1,000 a year, now £12,000 a year, ROMAN GRAVELS then about £8,000 a year, now about £16,000 a year: WEST CHIVERTON was making little or no profit, but Is now paying at the rate of £3,000 a year. These five mines are held under leases for 21 or 30 years, and are subject to a considerable annual payment for royalties, FROM BOTH OF WHICH DERWENT IS EXEMPT.

Name of Company	Year established	Nominal Capital, Purchase and Capital since expended.	Dividends paid.	Highest Market Value.	Present Market Value.
WEST CHIVERTON	1863	£30,000	£161,300	£240,000	£51,000
GREAT LAXEY	1863	£60,000	£295,650	£300,000	£300,000
VAN	1869	£58,000	£275,625	£960,000	£570,000
TANKERVILLE	1870	£72,000	£55,400	£300,000	£125,000
ROMAN GRAVELS	1871	£90,000	£74,700	£264,000	£144,000
TOTALS		£310,000	£862,675	£2,064,000	£1,190,000
ADD DIVIDENDS				£862,675	£862,675
				£2,926,675	£2,052,675
Deduct the Nominal Capital, including the Purchase and Capital since expended				£310,000	£310,000
Profit to the original Purchasers, after returning them their whole outlay for purchase and Working Capital				£2,616,675	£1,742,675

It will be seen that, irrespective of the enormous increase in the market value, the amount paid in Dividends is already overly three times the whole of the nominal Capital, including the purchase and Capital expended. It may confidently be expected that the DERWENT MINE will be at least as good, particularly with the especially favourable terms on which it is held. It may also be observed that, including the purchase of the Freehold of the Minerals as well as the Mine and valuable Plant, about £13,000 of Working Capital, and the promotion and preliminary expenses, the whole Capital (£48,000) of the DERWENT is less than that of four out five of the above Mines, all of which are only leasehold

Fully three-fourths of the Shares in the DERWENT MINES are said to be held for permanent investment, while of the rest the greater part are held for very high prices. Subject to prompt application one Thousand Shares, or any less number, can now be had at £6 5s. each, but not at any less price. Applications with remittance must be addressed to Messrs. Hornby & Co., 40 Hanover Street, Liverpool, on receipt of which Transfers will at once be forwarded. To the event of applications exceeding the limited number of Shares on sale, or only a portion of those applied for being on hand, the remittance will be at once returned, or such portion of it as is in excess of the Shares so purchased.

Deaths

At Nun Monkton, York, at his residence the Priory, 2nd inst, aged 82, Isaac Crawhall.

18th August 1877 (Alston Herald and East Cumberland Advertiser)

GARRIGILL AGRICULTURAL SOCIETY.

GARRIGILL, Friday Morning. The annual show of livestock, &c., in connection with this Agricultural Society is being held in a field adjacent to the village to-day. The catalogue shows a slight decrease in point of numbers compared with last year. …

ALSTON BOARD OF GUARDIANS.

The fortnightly meeting of this Board was held on Saturday last in the Town Hall, Alston, the Rev. O. James, chairman of the Board presiding. Also present—Messrs J. J. Millican, Jonathan Can, William Hutchinson, Thomas Dickinson, and Adam Walton. **THE RATING OF MINES**

The Clerk said that he had received a letter this week, dated the 9th of August, in reference to the letter addressed to the Local Government Board, on the 25th of May, 1875. He (Clerk) wrote to the Board in 1875 relative to the Assessment Act, in regard to mines, pointing out to them that so far as Alston Moor was concerned it was a perfect nullity. About eighteen months after the Lords of the Admiralty had agreed to pay the rates. They said they would consider the matter, and let them know the results. The Board had since (according to the letter) been in communication with the Receiver of the Northern Estates of the Admiralty (Mr Grey) and he had proposed that they fix a sum, so they had approved of paying rates on £1000. —The Chairman: That is made permanent.— The Clerk: Yes.

VACCINATION RETURNS.

The vaccination returns for the half-year, showed that there had been 72 births in the parish; successfully vaccinated, 63; dead unvaccinated, 7; postponed by medical certificate, 2. The other business was of a purely routine nature.

RURAL SANITARY AUTHORITY.

The Board then resolved itself into a Rural Sanitary Authority, Mr James still presiding.

THE APPOINTMENT OF INSPECTOR.

The Clerk read a communication from the Local Government Board sanctioning the appointment of Mr John Dixon, as Inspector of Nuisances till the 30th of June, 1878, at the salary of £20 per annum. At the expiration of the above-mentioned time the Board wished the authority to inform them what arrangements they proposed with regard to the discharging of the duties of the above office. …

24th August 1877 (Newcastle Courant)

SHOCKING ACCIDENT IN A LEAD MINE

Yesterday a sad accident occurred in the Langley Barony Lead Mines, near Haydon Bridge, by which a young man named Septimus Herdman was killed. The mine belongs to Bewick and Partners, and has now been worked about three years. Deceased had been on the ladder way in the shaft, and it is believed his head got jammed between the cage and the woodwork. The cage and deceased immediately after it, fell to the bottom, and when Herdman was picked up he was unconscious, and died before he could be brought to bank. *In 1871, at Gavis Shield, Whitley Chapel, Hexham, William Herdman, shepherd, aged 53, his wife Jane 50, children Edward, shepherd 19, Nicholas, assistant shepherd, aged 15, Septimus 12, Isaac 10, Margaret 8, and Elizabeth 6.*

25th August 1877 (Alston Herald and East Cumberland Advertiser)

ALLENDALE AND DISTRICT.

At Allenheads and Nenthead, there has been rain more or less every day for the past five weeks, and in the district there is a great quantity of hay rotting in the fields. It is many years since hay was seen out in the fields at the latter end of August in Allendale, and the present sad state of affairs is creating great anxiety among the farmers of those districts.

TEASDALE.

On Tuesday morning, a violent thunderstorm raged in neighbourhood, the peals of thunder being loud and protracted, and the lightning extremely vivid. A little after seven o'clock, one of the out-houses of Mr Lowry, farmer, Langleydale, was struck by lightning. The house was full of hay. A beam caught fire, and the destruction of valuable property seemed imminent. A messenger was promptly despatched to Barnard Castle, and the volunteer Fire Brigade, with the engine and hose, were immediately on the road. Fortunately, the fire had been got under before the men arrived at Langleydale. For some days past the entire district has been deluged with rain, the Tees and tributaries Balder, Lune, Greta, and Deepdale all being unusually swollen. Large quantities of timber have been removed, and miscellaneous wreckage is being borne down by the torrents. Some cattle are reported to have been drowned. Considerable damage has been done to crops.

1st September 1877 (Alston Herald and East Cumberland Advertiser)

NENTHEAD WESLEYAN CHAPEL.

RE-OPENING SERVICES.

The members of the above church thinking they could greatly improve the appearance of their place of worship by a little money expended upon the painting of the walls and re-varnishing of the woodwork, determined to do so, and for the accomplishment of the work employed able hands from Newcastle. The work has been neatly done, and has improved the appearance of the chapel immensely, In order to defray the expenses of the above work, the services of the Rev B. A. Teller, of London, were secured, and this gentleman visited Nenthead on Wednesday week. Mr Telfer preached to a very large congregation in the afternoon, after which a public tea meeting was held in the Band Room, a good number partaking of the provisions provided. In the evening a lecture was delivered by Mr Teller on "The Scottish Covenanters," which seemed to give great satisfaction to all. The chair was taken by Jacob Walton, Esq., Green Ends House, who complimented the members of the Wesleyan Society at Nenthead for their perseverance in raising such a beautiful chapel as they had done, which he understood was clear of debt, except what had been spent upon the painting, which they were met to try to wipe off, and he had no doubt but that would also be accomplished. We wish to remind our readers that the re-opening services will be continued, and on Sunday next, Mr Batey, of Newcastle, will preach afternoon and evening, and on the Sabbath following the Rev T. J. Macartney, the newly. appointed superintendent of the circuit, will preach twice.

8th September 1877 (Alston Herald and East Cumberland Advertiser)

ALSTON.

SALE OF LEASEHOLD PROPERTY.—Mr William Carrick, auctioneer, Haltwhistle, offered by public competition, at the house of Mrs Pattinson, Angel Inn, Alston, all that leasehold farm of land, dwelling house, farm building's, and premises, situate at Flatt, near Alston, in conjunction with an allotment of land belonging thereto situate at Toolhouse Green, containing altogether 41 acres of meadow and pasture land. There was a good attendance, and the bidding was spirited. The Property was Put up at £1000 and was eventually sold to Mr Craig for £1340. Messrs. J. and J. Dickinson were the solicitor, for the vendors.

LOCAL FLOWER SHOWS.

NENTHEAD.

The annual flower show in connection with the Nenthead Floral and Horticultural Society was held in the Lead Company's new school-room on Friday, when the fruits and vegetables exhibited were of a good class and far exceeded all expectations. The weather was rather unfavourable, but in spite of this there was a good attendance. Mrs Millican, Nenthead House ' and Mrs Wilson, Nenthall, were the judges for butter, for which special prices were offered by the ladies of the district, and won by H. Armstrong; 2nd, Miss Pearson; 3rd, Mrs B. Martin. The Nenthead Union Band was in attendance and discoursed a varied programme of popular music under the leadership or Mr T. Graham. This was the 28th exhibition of the society, and the judges expressed great surprise at seeing such a good show after the very bad season. Mr Gregg, of Messrs Little and Ballantyne's nursery gardens, Carlisle, and Mr Clark, Carlisle officiated as judges for flowers, fruits, and vegetables, …

ALLENHEADS.

The amount of rainfall at Allenheads for the past three months is as follows:—Rain in June, 2.2 in.; July, 5.5 in ; August, 10.1 in.; total, 17.8 inches. Number of days on which rain fell, July, 27 days, August, 30 days. On three days, viz., the 8th, 18th. and 20th of August, upwards of 1 inch of rain fell each day.

WEARDALE.

ST. JOHN'S CHAPEL.—Last week, a public meeting (convened by the Rev. A. J. McGowan) was held in the Town Hall, St. John's Chapel. to consider and decide on a plan for supplying the town with pure water from the neighbouring hills. The land and mine owners are liberally supplying the funds requisite for carrying out the plan.

15th September 1877 (Hexham Courant)

Deaths

At Overwater, Nenthead, 11th inst., aged 86 Ann Lee widow of John Lee, lead miner. *See 9th December 1876*

At Whitehall, 8th inst. aged 72, Elizabeth Barron, wife of Robert Barron, lead miner.

In 1851, at White Hall, Nenthead, Robert Barron, lead miner, aged 49, his wife Elizabeth (Hutchinson, married 14th July 1828) aged 45, children Betsy 20, Hannah 18, Agnes dressmaker 17, Robert lead miner 14, Mary Ann 12, Sarah 9, George 5, and Cowper 3. In 1871 at White Hall, Nenthead, Robert Barron lead miner, aged 69, his wife Elizabeth 65, unmarried children Betsy 40, George lead miner 25, Cowper lead miner 23, Henry lead ore washer 15, and granddaughters Elizabeth 13, Margaret 2 years.

Robert Barron died 22nd September 1878. See 22nd February 1873, 2nd March 1878, 28th September 1878, and 19th June 1880.

15th September 1877 (Alston Herald and East Cumberland Advertiser)

ALSTON PETTY SESSIONS.

FRIDAY 7th SEPTEMBER

(Before the Rev O. James, Chairman, and T. W. Crawhall, Esq.)

AFFILIATION CASES.

Ann Hind, of Overwater, Nenthead, summoned William Hutchinson, miner, of Burn Bottom, Nenthead, for the maintenance of her illegitimate child. After hearing the evidence, this being complainant's second child, which died eight weeks after birth, the Bench made an order for 1s. 6d. per week and costs, including funeral expenses. Margaret Parmley, of Lane Head, Garrigill, summoned William Vipond, miner, of Pasture House,. Garrigill, for the maintenance of her illegitimate child. The defendant admitted the child being his, and the Bench made an order for 2s. 6d per week and costs, this being complainant's child.

NENTSBURY.

Nentsbury Greens Band of Hope and Temperance Society held their annual pic-nic in a field at Nentsbury on Saturday last. A procession formed at the Primitive Methodist Chapel, Hayring, which marched down to Nenthall, and then returned, singing several temperance and other melodies at the last named place, accompanied by Messrs Hutchinson's (Nenthead) string band. Tea was provided in the Chapel of which a goodly number partook, after which a public meeting was held, which was addressed by Mr T. Pearson, Nenthead; and Mr

Isaac Robson Nenthead. The members gave a selection of readings, recitations, which did much to enliven the proceedings. Almost every social gathering of any description this year has been greatly marred in its success through wet weather, or when fine through all the people being so busily engaged with their farm work, and we are sorry to say this was partly the case at Nentsbury, as the day was fine, a great number of people being thus deterred from attending by "making hay when the sun shone." A good number was, however, present during the evening meeting and a very enjoyable re-union was spent.

GARRIGILL.

PROPERTY SALE.—On Friday week, Mr John Dixon, auctioneer, Alston, offered for sale by public auction, in the Girls' School room in this village all that leasehold dwelling house, garden and premises, with out-buildings thereto belonging, situate in Garrigill, and late in the occupation of Mr Thomas Slack, deceased. Mr Wm Craig, Garrigill, became the purchaser of this lot for £200. Mr Dixon also offered a field or close of land containing about two acres situate at Garrigill adjoining the river Tyne. This was bought by Mr George Pickering, of Garrigill, for £360. There was a good attendance, and the bidding was brisk, as may be seen from the high prices realised. Messrs J. & J. Dickinson were the solicitors to the vendors.

22nd September 1877 (Hexham Courant)

NENTHEAD AGRICULTURAL SOCIETY

The second annual show in connection with this Society was held on Saturday last, in a field kindly lent for the occasion by J. J. Millican, Esq, vice-president of the Society. The show of stock, though not larger—if as large—than that of last year, showed a marked improvement in the quality of the stock exhibited. Last year a large percentage of the stock was not in a condition to show to advantage in a show ring, and no doubt many people sent stock, which they never in the least expected to take prizes, but only to make a show. This year, however, the stock, as before stated, showed a great improvement
in regard to condition, and were evidently more selected. The weather proving favourable, a large number of visitors were present, including a large predominance of the fair sex. The arrangements were capital, and did infinite credit to the worthy secretary, Mr Goodburn, on his first year of office. The Nenthead Union Band was present under the leadership of Mr T. Graham, and greatly enhanced: the proceedings with several lively airs. The short-horns shown were all of a good useful class, and there was again a capital entry of horses. Mr Robert Ward, Nenthead, was placed first, and Mr William Parker, Foreshield, who carried off premier honours last year, was second. There were capital entries of sheep, a new feature this fear being the introduction of black-faced and male sheep. Pigs were not shown in such great numbers as on the first exhibition of the Society, but those exhibited were of a very superior class. Mr Jonathan Cousin, Dykeheads, carried off the winning ticket for pigs of the North of England breed; and Mr John Richardson, Low Dykeheads, was awarded the first prise for Suffolk pigs, and the handsome silver cap given by Mr Sherwood, of Crawfield Farm, Suffolk, for the best Suffolk pig in the show, was also awarded to him.

The following were the stewards of the show:—Cattle: Mr Robt. Ward and Mr John Graham. Leicester and mule sheep Mr Thomas Swindle and Mr Allison Stephenson. Black-faced sheep: Mr Wm Parker and Mr George Millican.

Horses: Mr J. Walton, Miners' Arms, and Mr Thomas Liddle. Pigs: Mr J. Walton, Dykeheads, and Mr J. Erwine, Hillersdon Terrace. General field stewards: Mr Jacob Walton and Mr Walton Holmes. …

Births

Hill House Alston, 6th inst. the wife of Mr R. Stagg, jun. of a daughter. *(Charlotte)*

Deaths

Furnace House, Mohope West Allen, 19th inst. aged 53 Mr Joseph Martin.

In 1861, at Harsley, Ninebanks, Joseph Martin, lead miner, aged 37, his wife Sarah (Liddle, married at Ninebanks, 9th December 1847) aged 35, children William, lead miner, aged 13, Hannah 11, and Matthew 8.

In 1871, at Furnace House, Ninebanks, Joseph Martin, lead miner & farmer of 16 acres, aged 47, his wife Sarah aged 45, children William lead ore miner, 23, Hannah 21, Matthew agricultural labourer,18, Joseph 9, Lucy 7, and Henry aged 4.

In 1881, at Furnace House, Sarah Martin, widow, aged 55, children Matthew, coal miner, aged 28, Joseph, coal miner, aged 19, Lucy 17, Henry 14, Mark 8, Jane Ann 7, and Joseph William 5.

In 1891, at White Lee, Ayle, Kirkhaugh, Sarah Martin, widow, aged 65, children Matthew, coal miner, aged 38, Joseph, coal miner, aged 29, Lucy 27, Henry, Ag. labourer, aged 24, Jane Ann 17, and Joseph, Ag. labourer, aged 15.

Scotch Hall, Allendale Town, 16th inst. aged 73, Elizabeth, relict of the late Joseph Thirlwell.

In 1841, at Scotch Hall, Joseph Thirlwell lead ore miner, aged 35, his wife Elizabeth (Keenleyside, married 28th September 1828, at Allendale) aged 35, children Mary 12, Margret 10, William 7, John 4, and Joseph 2.

In 1851, at Scotch Hall, Joseph Thirlwell lead ore miner, aged 52, his wife Elizabeth 46, children , Margaret 19, William lead ore miner, 17, John shoemakers apprentice 14, Joseph lead ore miner, 11, Matthew 5, and Joshua aged 2.

Tedham, Allendale, 7th inst. aged 65, Mary, relict of Joseph Rowell.

Joseph Thirlwell senior died 1854(?).

In 1861, at Scotch Hall, Elizabeth Thirlwell, widow, farmer of 14 acres, aged 56, children Margaret 29, Wm lead ore miner, 27, John cordwainer, 24, Joseph lead ore miner, 22, Thomas stonemason, 19, Matthew 15, Joshua 11, Elizabeth 9, and grandsons, William 4, and John 3.

In 1871, at Scotch Hall, Elizabeth Thirlwell, widow, farmer of 14 acres, aged 66, children John cordwainer, 34, Joseph lead ore miner, 31, Matthew stonemason, 25, Joshua lead ore miner, 22, Elizabeth 19, and grandsons, William 14, and John 13.

29th September 1877 (Alston Herald and East Cumberland Advertiser)

ALSTON BOARD OF GUARDIANS
RURAL SANITARY AUTHORITY

When Mr Dixon, the sanitary inspector, reported that be had visited Nenthead and district, along with the medical officer. They were two manure heaps which wanted removing, they having been delayed on account of the bad weather.—

He had also visited Garrigill and district along with the medical officer. There were a few manure heaps which wanted removing. Inspected Pickering's property. There was a drain from his stable which went beneath the house, and into a sewer in front of the house. He advised that a channel should be put in to take away the liquid manure into the drain, as it went into the wall in Mr T. Pickering's property.

THE WATER AT THE LOW WELL.

The well at the Townfoot, Alston, was out of repair and wanted mending. Something got into the water sometimes, and made it undrinkable. The tank wanted cleaning out, and the "clack" wanted mending. When the tank was run off, the other water ran in, and stirred up the deposit at the bottom of the tank.—Mr Dickinson: "Day water" gets in at the high end of the town. Mr Walton: But that will affect the whole town, and the other is good. There is no complaint about the other part.—Mr Hutchinson: I think the tank should be cleaned out.— Mr Dickinson said that the tank at the high end of the town was once opened out, and was found to be as clean as it could be, notwithstanding that it had not been opened for 10 or 15 years.—Mr Walton: The cause ought to be ascertained for people cannot drink bad water —Ordered that the tank be opened and the necessary repairs done.

29th September 1877 (Hexham Courant)

Deaths

At Alston, 22nd inst., aged 77, Nancy Thompson, widow of Joseph Thompson, lead miner.

In 1841, at Physic Hall Bank, Joseph Thompson, lead miner, 45, his wife Ann (Bramber, married 10th June 1822, at Alston) 40, children, Joseph lead miner 15, John 10, Ann 7, and Mary 5

Joseph Thompson senior died in 1844 or 1845.

In 1851 at Town Head. Ann Thompson, widow, domestic duties, aged 50, her daughters Ann 17 and Mary 14, both working at the Woollen factory.

In 1861, at Kates Lane, Alston, Nancy Thompson, widow, aged 60, char woman, and her daughter Mary, unmarried, dressmaker, aged 24. In 1871, Nancy still living at Kates Lane, she has a lodger Ann Robson a widow aged 85.

At Shield Hall, 19th inst., aged 64, Jane, widow of John Lee.

John Lee married Jane Kearton, at Alston 24th June 1841.

In 1851, at Low Craig, Garrigill, John Lee, lead ore miner & farmer, aged 42, his wife Jane 36, children Mary 9, Ann 7, William 6, James 4, and Isabla 1.

In 1861, at Hermitage, Garrigill, Jane Lee, lead miners widow, aged 45, children William 16, Thomas 14, Isabella 11, Emmerson 9, and John 6.

In 1871, at Shield Hill, Garrigill, Jane Lee, widow, formerly dairy maid, aged 57, and her sons William, lead ore miner aged 26, Emerson lead ore miner, aged 19, and John lead ore dressed aged 16.

29th September 1877 (Northern echo)

PRESENTATION TO MR R. W. BAINBRIDGE, OF MIDDLETON-IN-TEESDALE.

Yesterday proceedings of a very interesting character took place at Middleton-in-Teesdale, Y when Mr R. W. Bainbridge, the widely respected superintendent of the London Lead Company's work in the North of England, was made the

recipient of a handsome testimonial from the employees of the company in the extensive district under his charge. The picturesque village of Middleton-in-Teesdale was *en fete* on the occasion, the day being observed as a general holiday throughout the whole of the great mining and manufacturing establishments over which Mr Bainbridge presides. About noon the miners and their families began to stream into Middleton, which may be regarded as the capital of the district in the midst of which the London Lead Company carry on their industrial operations. The weather — which has been bed enough of late up Teesdale, much of the hay having been only recently gathered in, and not a ripe brambleberry being if visible anywhere—was fine, and it soon became evident that the gathering was certain to be a great success. Bands of music streamed into the town. The mining and smelting works, of the company are situated at Middleton-in-Teesdale, Alston Moor, and Weardale, and employ, in the aggregate, upwards of 2,000 men. It is thirty- eight years since Mr Bainbridge succeeded to the late Mr R. Stagg in the post which he now holds, and during the present summer it was thought by many of the workmen that this was a fitting time to present him with some token of the universal respect in which they held him. Accordingly a movement was set on foot for the purpose of collecting subscriptions, and so readily was this responded to by the workmen and some other friends that in a very short time the handsome sum of £260 was subscribed. With this sum an array of articles were purchased, each calculated to please the fancy of some or other of the numerous subscribers. They consisted of a gold watch, with seals and chain; a mantel timepiece, two vases, two finger rings, a polyglot Bible and oak stand, a silver inkstand, an illuminated address, and, lastly, a purse containing £65. The presentation, took place in the Primitive Methodist Chapel, which was crowded by the employees of the company and others interested in the proceedings. Dr. Arnison, of Stanhope was voted to the chair, and after Mr Win. Pinkney, of Egglestone, had read the financial statement, Mr Millican, late district agent at Nenthead, and the oldest employee of the company, presented the tea and coffee service and inkstand to Mrs Bainbridge, and read and presented the address to Mr Bainbridge, to whom also Mr W. T. Scarth presented the remainder of the gifts. The address was as follows;—"Presented to R. W. Bainbridge and Mrs Bainbridge, of Middleton House, along with a gold watch, mantel time piece, finger ring, polyglot Bible, and stand, tea and coffee service, silver inkstand, and a purse containing £65 by the workmen employed by - the London Lead Company in the Teesdale, Alston Moor and Weardale districts, and several friends, who wished to be identified with a movement which they themselves considered so highly commendable, as a spontaneous token of their sincere esteem for the faithful manner in which Mr Bainbridge has discharged the duties of his responsible office as the Lead Company's superintendent for the term of 38 years, during which period he has displayed sound judgment, unwearied diligence, and unimpeachable integrity, and a steady perseverance in mining operations, combined with a kindly forbearance and forethought for the workmen in assiduously trying to promote their best interests, and by his gentleness,. manly bearing, and liberal spirit deserving and securing the esteem of the population generally; and in all his efforts to promote the wellbeing of others Mrs Bainbridge and family have been his steady and zealous co-operators.

" Presented in the name of the committee

(Signed) T. Millican W. T. Scarth."

Mr Scarth, in making the presentation, bore tribute to the excellent relations which always had existed between himself and Mr Bainbridge in their numerous transactions as lessee and lessor, a fact attributable in a very great degree to the marked courtesy and business tact of Mr Bainbridge. In his capacity of superintendent Mr Bainbridge had been connected with the many educational and other beneficial works of the London Load Company, and personally he had worked energetically in aid of everything which tended to elevate and improve the people among whom he dwelt. (Applause.) The efforts of the company to improve the position of their workmen, carried out under the direction of Mr Bainbridge, had been both extensive and complete. The improvements in their dwellings had been most marked and salutary, the condition of the workmen's homes presenting a strong and very pleasant contrast with those existing twenty or a thirty years ago. (Hear, hear.) But no work of the company deserved such commendation as the educational-(applause)-and the company's school at Middleton-in-Teesdale was a model of efficiency and excellence, and had been, he believed, taken as a model by the Government for the management of their schools. (Applause.)—Mr Bainbridge, in reply, thanked the subscribers for the splendid testimonial they had presented him with, and expressed his gratification at the eulogistic manner in which his labours among them had been spoken of. At the time, he said, when he became superintendent of the works they were not in a very prosperous condition, and had not been paying for some years previously. The court of directors, with great generosity, allowed him a period of five years in order to get the concern into a paying condition, He was glad to say he was successful. Since that time it had had many fluctuations, like all other large companies; but there were not many companies who would have foregone dividends for a period of five years. (Hear, hear.) The miners were now in a very satisfactory condition, although in these times the price of lead was low and did not leave a large margin for profit. In conclusion Mr Bainbridge expressed his great pleasure at the pleasant relations which had, with little exception, prevailed between the company and their employees during the time he had been among them. He also announced that it was his intention to hand over the purse of money with which he had been presented for the purpose of aiding in erecting drinking fountains at Middleton and Nenthead. Several other gentlemen spoke.—In the afternoon, tea was held in the company's schools, and in the evening a public meeting was held in the Wesleyan Methodist Chapel, at which several addresses were given.

5th October 1877 (Newcastle Courant)
The Barnard Castle magistrates have sanctioned a series of applications made by the London Lead Mining Company, for the storage of gunpowder and dynamite at their several mines in Teesdale.

6th October 1877 (Hexham Courant)
Deaths
At Black Tyne, Shotley Bridge, 29th ult., aged 38, Jonathan, son of the late Jonathan Woodmass, of Alston.
Jonathan Woodmass married Isabella Edgar 15th May 1834, at St Augustine's, Alston.
Children of Jonathan and Isabella Woodmass

William baptised 11th December 1834, buried 17th December 1834 aged 5 weeks.
Ann baptised 26th June 1836, married William Turner, 15th June 1856, at Medomsley, Durham
Jonathan Woodmass, baptised 15th December 1839
Elizabeth baptised 9th May 1841
In 1841, at Front Street, Alston, Jonathan Woodmass, Beer seller, aged 70, Jonathan Woodmass, lead miner, aged 30 (born 18th November 1806, son of Jonathan Woodmass and Elizabeth Fairlamb), Isabella Woodmass, silk hat maker, aged 30, William Woodmass, mining agent, aged 25, Frederick Woodmass, lead miner, aged 20, Ann Woodmass, aged 5, Jonathan Woodmass aged 2, and Elizabeth Woodmass 1 month.

THE ROYAL OSBORNE HAND-BELL RINGERS AT NENTHEAD

The above celebrated company of campanologers and vocalists paid their first visit to Nenthead on Friday, and performed in the Lead Co.'s Schoolroom, kindly lent for the occasion J. J. Millican, Esq, the Company's agent, under the auspices of the "Blooming Heather" Lodge of Independent Order of Good Templars. As soon it was placarded that they intended to pay a visit to Nenthead, the good folks of the locality anticipated that great treat was in store for them, and, as was expected, long before the commencement of the concert a large crowd had gathered round the door, and when the room door was thrown open, the large and spacious building was soon filled in every part. The preparations for the entertainment no doubt have cost the committee great amount of labour and expense, but judging from the immense attendance they will be handsomely compensated, and the funds of the lodge greatly augmented after all expenses are paid. The day being exceedingly fine, visitors made their appearance in the village early on in the day, but the climax seemed to be reached from four o'clock until seven, the time of commencing. People were flocking from all directions, north, south, east, and west; while looking down the beautiful little Nent Valley it reminded us very forcibly of the people returning from Alston May Fair, the road being literally clad with people from Alston and Nentwater. Taking a view in another direction, to the south-west, the Garrigill people could be seen hastening quickly to the scene of operations, while in an opposite direction came people from Weardale and Allendale, there being a good representation from these two dales. The doors were opened at six, when there was general rush into the room. Order being lost, the door had to be closed. On the door being re-opened it seemed as if the crowd would gain the upper hand over the door keepers; however, order was obtained, and all the sittings filled, and the available standing room occupied and crammed to excess, it being calculated that 1,000 people were packed in the building. This was the largest audience that has entered the spacious edifice on any similar

occasion. Mr G. Peart, of Alston, presided, introducing the performers in a neat and appropriate speech. The pianoforte on which accompaniments to the vocal parts of the entertainment were played, had been kindly lent by Mrs Isaac Archer, Priorsdale House, Ashgill. The performers were five in number, viz., Mr W. Kingsley, Mr H Ganney, Mr R. B. Hopkins, Mr B. Barton and Mr B. Kinsley, who performed extensive and varied programme in truly artistic manner. All seemed greatly delighted with the entertainment and when vote of thanks proposed to the performers it was received by a loud and continued clapping of hands. Mr Ganney thanked the audience on behalf of himself and comrades for their kind feel, towards them, remarking that they had enjoyed their first visit very much, and hoped they would soon be privileged to pay another. Votes of thanks were also accorded to the chairman, Mr Millican for the loan of the room, and to Mrs Archer for the loan of the piano. It has come to our notice that owing to the great crush at the door a great many gained admission without paying. We think that it is only right to appeal to such as did not pay their entrance fee in behalf of the committee to forward it to some member of that body, seeing that the concert was a good one and that the committee were at a great expense in procuring the bell ringers.

10th October 1877 (Teesdale Mercury)

PRESENTATION TO MR. AND MRS.BAINBRIDGE, OF MIDDLETON HOUSE. TEESDALE.

We last week gave particulars of the above event.

We have now the pleasure of presenting the excellent speech of Mr Bainbridge, in full, as follows: —

Mr BAINBRIDGE, said Mr Chairman, ladies and gentlemen, I gratefully acknowledge my high gratification at finding towards the end of a long and laborious life, devoted to the Lead Company's interests and the promotion of the wellbeing of their numerous employees and the public generally, that the efforts put forth have been so highly appreciated by those with whom I have been so intimately connected so many years, and their observant neighbours, who have kindly joined with them in the valued and valuable presentations now made, which, in descending as heirlooms to our children, ought to develop in them and stimulate them to like efforts and good works. In your kindly notice of the good judgment and perseverance displayed in the conduct of the operations connected with the working of the Lead Company's mines, I feel it is fitting that I should gratefully acknowledge that a large portion thereof may be attributed to my esteemed predecessor in the superintendence of the Lead Company's affairs (Mr Stagg, the father of my beloved wife), who, on resigning his appointment and subsequently, was most ready to give me the benefit of his long experience, leaving me also an efficient and well trained staff of subordinate agents, who have uniformly done all in their power to aid in the promotion of the welfare both of masters and men. And I need scarcely add that, in the position of the Lead Company's Superintendent, one leading object should be to make the best possible use of the practical skill and matured judgment of those under him, by drawing out their opinions on questions that may arise in which the interests of the Company and their employees are alike involved. It will be in the recollection of the old men now present, that, upon my entry into the Company's service, the Teesdale, Weardale, and Westmoreland mines were in a very unproductive condition, and the losses thereon not only

swallowed up the profits then deriving from Alston Moor, but made heavy inroads upon the Company's happily then enjoyed surplus fund, which, in the palmy days of Lodge Syke, had been accumulated to meet a possible and, as you all know, a not improbable period of adversity to which lead mining is subject. Upon the first visit of the deputation from the court of the Company to the north, it was intimated to me by our most respected then deputy governor, Mr Wigram (whose name need only be mentioned in the present assembly to excite a cordial good feeling in every breast), that I was entering on a concern that had for some years previously and was then unremunerative to the shareholders, to whom however a scanty dividend had been paid out of the accumulations of earlier years, and the court, in reliance on the sound judgment of my predecessor, were willing to prosecute the then progressing mine trials to their issues. After the lapse of about three years, without improved result appearing for the company, their youthful superintendent was very properly called to account for the continued deficiency, when, after some days spent in London in anxious consideration, it was agreed to give me my stated needful five years for obtaining good results for the Company's past and intermediate outlays and risks, and shortly thereafter, upon my being urged to exercise every possible proper economy in the management, I frankly told my superiors that the then wages of the men were too low, and ought to be raised as soon as a better mining yield would allow ; that the agency was not overpaid, and the only extravagance connected with the Company was the high royalties paid to the lords of the mines. I need not say to such of the Lessors' Agents as are now present what were the instructions then given to me, and how zealously, and I hope not unfairly, I have carried them out. Nor that in the absence of the lords agreeing to the reductions they have made, and I may add may yet he pleased to make, it would have been impossible their mining fields could or would have been kept in spirited working. I will not say how much has been saved to the Company from the lessors concessions, but I am sure a corresponding amount has reached the lessors pockets, that would have now have been dormant in the bowels of the earth, useless to every party. There is sound policy in the lords of mines not exacting the lion's share of the profits, but allowing the lessees the opportunity of adequately paying their employees for their labour, and reaping a fair return for their expenditure and risk. There is another important allusion made in the address this day presented. I refer to the credit you have given me for unimpeachable integrity; and on this point I may remark that my actions have not only been performed under a sense of accountability to the all-seeing eye of God, but I have felt that I had the honour of an honest paternal and maternal ancestry to maintain. The grandson of the thirteenth George Bainbridge, who owned and occupied the little farm of Snaps Close, over the hill in Weardale, and Utrick Walton, one of the family from whom sprung the firm of so called " honest attorneys," in Alston Moor. I well recollect the old rector of Wolsingham telling me about half-a-century ago, they were "The honestest men he ever had dealings with, and be hoped I would never tarnish their name."

I had therefore a high duty imposed upon me. Besides which I must do my predecessor, Mr Stagg, the justice of stating that he did not leave, on quitting his post, a single corrupt practice for me to put out of the Lead Company's concern.

I will now allude to the kind feeling subsisting between the Company's workmen and their superintendent, as expressed by the committee, and I may add, my

immediate superiors, the directors of the company. I may state an early pervading thought in my mind was that I ought not to pass through life without being of some benefit to my fellow men, and leave the world better than I found it, and although I believe for the promotion of my own and family interests it would have been more profitable to me to have availed myself of an opportunity presented for settling in a respectable Yorkshire city as a solicitor, yet I gave the preference to accepting my present position, mainly from the reason that it might give me a larger sphere of usefulness and influence. For the use made of the situation then open to me you have most kindly expressed your sentiments, and given tokens of your feelings to myself, my good wife, and children, in such a substantial and handsome manner; and your testimonial confirms and strengthens me in that which has ever been my aim. To encourage those that do well. Yet I have not shrinked from rendering my name a "terror to evil doers." On this head I may name the remark made to me by Admiral Elliott on my first interview with him at Appleby Castle. A little while before some one had applied to him for a farm, and he (the Admiral) stated that they would require to know something of his previous character, to which the applicant replied that be was employed under the Lead Company, and he thought this ought to be a satisfactory recommendation, as they would not employ or retain any but those of good character. The Bible and timepiece tell us of the brevity of our life here, and the need and propriety of seeking for an inheritance beyond the skies; as well as of an unremitting performance of our duties on earth. And with a consciousness of my numerous shortcomings, my sincere desire is that our present reciprocal good feeling may be maintained for the few remaining years or days that we may spend together here; and that we may all, through the merits of our common Saviour, be at last partakers of the joys of the redeemed.

13th October 1877 (Hexham Courant)
FATAL FALL FROM A STAIR HEAD
On Friday morning week, at four o'clock, a labourer, named Joseph Wallace, aged 55 *(sic)* years, residing in King's Arms Lane, AIston, died from injuries received through a fall from a pair of stairs. The unfortunate man, who is subject to fainting fits, was sitting on the battrice *(sic)* of the stair head outside his door when he took a fit and fell backwards down on to the pavement, a depth of at least ten feet, one of the flags on the top of the wall falling with him. Dr Gill was sent for, and came speedily to give his assistance, but he found the old man insensible, the back of his head being very severely cut. On regaining consciousness, Wallace complained of a severe pain in his chest and shoulders, while he had completely lost the use of his limbs. Deceased was con- scions from shortly after the accident up to the time of his death. The fall had crushed his breast and injured his spine. Dr Gill gave a certificate that deceased died from internal haemorrhage to the spine of the back. Deceased was unmarried, and was born at Rodderup Side. He has at different times acted as coachman to gentlemen in the neighbourhood, and had previously met with a serious accident, getting both his legs fractured from being ran over by a

carriage, during the time he held the situation of coachman to Joseph Dickinson, Esq., of Lovelady Shield.

Joseph Wallace married Jane Wells, 20th June 1805, at St Augustine's, Alston.
Children of Joseph and Jane Wallace:
John born 1st September 1805, 1st son of Joseph Wallis, Nentsberry miner, native of Knaresdale, by his wife Jane daughter of Joseph Wales.
Joseph born 16th February 1807, 2nd son of Joseph Wallis, Nentsberry miner, by his wife Jane daughter of Joseph Wales; buried 27th April 1807, at Alston.
Thomas born 29th May 1808, 3rd son of Joseph Wallis, Nentsberry miner, native of Knaresdale, by his wife Jane daughter of Joseph Wailes.
Mary born 3rd September 1810, 1st daughter of Joseph Wallis, Nentsberry miner, native of Knaresdale, by his wife Jane daughter of Joseph Wailes.
Elizabeth, born 30th September 1812, baptised 22nd November 1812, at Redwing Chapel, Alston.
Jane baptised 20th May 1815
Isaac baptised 6th July 1817
Joseph Wallace, baptised 17th October 1819
Richard baptised 6th January 1822
William baptised 13th February 1824
Hannah baptised 14th May 1826
Joseph Wallace of Pry Head, was buried 7th December 1831, aged 52, at Alston.
In 1841, at High Galligill, Jane Wallace, widow, farmer, aged 55, children, Isaac, lead miner, aged 20, Joseph, lead miner, aged 20, Richard, lead miner, aged 15, William, lead miner, aged 15, Hannah 14, Ann 4, and Thomas Wallace, independent, aged 65. In 1851, at High Galligill, Jane Wallace, widow, annuitant, aged 68, and granddaughter, Ann Wallace aged 16.
In 1851, at the Crown Inn, Alston, servant, Joseph Wallace, stable groom, aged 30.
In 1861, at Brown Side, Alston, Jane Wallace, lead miners widow, aged 78, and son, Joseph, lead miner, aged 35.
Jane Wallace died 2nd quarter 1863, registered at Alston.
In 1871, at Black Burn Banks, Alston, lodger, Joseph Wallace, lead mine labourer, aged 48.
16th January 1878, Administration of the personal estate of Joseph Wallace late of Alston in the county of Cumberland Lead Miner a Bachelor who died 5th October 1877 at Alston was granted at Carlisle to Elizabeth Kindred of Foul Loaning in the parish of Alston Widow the sister and one of the next of kin. Personal Estate under £100.
Probate 1909, Joseph Walton of Alston Cumberland lead miner died 5th October 1877 Administration Carlisle 30th September to Mary Hall widow. Effects £78 12s. Former grant at Carlisle January 1878.

DEATH OF MR JOHN GILL

We regret to announce the death of Mr John Gill, mining agent for the Earl of Hopetoun, leadhills Scotland. Mr Gill was native of this parish having been born in the village Garrigill, where he received his early education. At the age of 27, and while he was engaged as refiner at the mines of Nenthead, he was selected Mr Sopwith, then manager at Allenheads (to whom application had been made for the purpose) to fill the responsible position of representative of Lord Hopetoun's interests in the mines at Leadhills—a position which he ever

afterwards occupied. Lord Hopetoun was at the date of the appointment in minority, but Mr Sopwith's recommendation was unanimously approved by his advisers. During the long period of 31 years service to the Earl of Hopetoun, the deceased was held in the highest esteem by the family, evidenced by the invariable and never-failing courtesy and consideration shown at all times by his lordship. Mr Gill was no less esteemed by those whose province it was for him to supervise in the village, for the feeling which now pervades the inhabitants of the place at his loss is one of universal regret. He was considerate and liberal to those under him, but having all the while a strict and careful regard to the interests of his master. His business habits were characterised by method and punctuality, with untiring devotion to his work, which sociality and pleasure held only secondary place. Nothing in shape of a plan, a report, or other document bearing upon his office left his hand without a complete touch of finish about it, the result of accuracy and care. Mr Gill after his appointment at Leadhills set himself to the work of sell-improvement. and in this he evinced a perseverance and acquired degree of success which found their reward. No better evidence of the skill in lead mining engineering attained by the deceased can be quoted than the fact that he was frequently consulted by people at distances, —while he has for a long series of years annually reported on and advised in relation to one of the principal mines in our own district. In private Mr Gill was quiet and unassuming, spending the main part of his time, not involved in business, in his own family, in whom he was much bound up. He was fond of reading, and his literature was select and improving. In politics he was staunch Conservative. By virtue of his kindness and courtesy he had formed a large circle of friends in the district in which he laboured. The last visit to the mines made by the deceased was towards the end of August last when he accompanied the Earl of Hopetoun, to whom he explained the various workings and the system of mining in operation. Mr Gill died the 2nd inst. in the 59th year of his age, survived by a widow and seven children, four sons and three daughters to mourn his loss. The remains of the deceased were interred in the village churchyard on Friday the 5th. The funeral was a large one, and was attended by all the inhabitants who could avail themselves of being present, as well as by the officials connected with the mines both in Leadhills and the adjoining mining village of Wanlockhead, while many friends were there from distance. On Sunday last, an impressive funeral sermon was preached by the Rev. Smith, minister of the parish and village. — *Alston Herald*

John Gill married Esther Renwick, at St John, Garrigill, 3rd quarter 1847.

In 1851, at Hopetown Hall, Leadhills, Lanarkshire, John Gill, Mine surveyor and overseer, aged 31, his wife Esther 27, children, Ann 2, and Isaac 1.

In 1861, at Hopetown Hall, Leadhills, Lanarkshire, John Gill, Mine Agent, aged 41, his wife Esther 37, children, Ann 12, Isaac 11, Joseph 9, John 6, and Susanna 3.

In 1871, at Estella Cottage, Leadhills, Lanarkshire, John Gill, Mine Agent, aged 51, his wife Esther 47, children, Ann 22, John 16, Susanna 13, Thomas W 9, and Elizabeth A 7.

In 1881, at Estella Cottage, Leadhills, Esther Gill, widow, aged 57, children, Joseph, mining agent, aged 28, Susanna 29, and Thomas W, student of medicine, aged 19.

In 1891, at Rosevale House, Langholm, John Gill, medical practitioner, aged 36, and his mother, Esther Gill, widow, aged 67.

19th October 1877 (Newcastle Journal)

NORTH OF ENGLAND INSTITUTE ENGINEERS.

Yesterday, the North of England Institute of Mining and Mechanical Engineers had an excursion to Stonecroft and Greyside, and the Settlingstones Lead Mines near Newbrough, in Northumberland. The party numbering upwards of one hundred, left Newcastle by special train at quarter past ten in the morning, and proceeded to Fourstones station, on the Newcastle and Carlisle Railway, where they arrived after eleven o'clock.

THE PRUDHAM STONE

The party first visited the works, adjoining the railway station of W. Benson, Esq. the proprietor of the celebrated freestone and limestone quarries of that locality.

…

THE STONECROFT LEAD MINES

Another place interest visited were the Stonecroft Lead Mines, the property of the Greyside Mining Company, which was formed in 1851 by Mr Benson. The mines are situated about two and half miles to the west of the Railway Station, and are being actively and successfully worked. Here, and also Settlingstones mine's, situated in the immediate neighbourhood, guides were in attendance to conduct the visitors over the surface works and also through the workings of the mine. In the Stonecroft mine about 130 men are employed; and at the surface about 70, The visitors were conducted through the mine by Mr Ware the courteous and amiable manager of the mine, and Mr Wm. Lee. the principal foreman of the underground works. We found the matrix composed lead ore, carbonate of Iron, sulphate of barytes, iron pyrites, blend, carbonate of barytes and carbonate of lime; and varies in width from six inches up to 15 or 16 feet. There is a main east and west vein, and also south vein, which have been very productive for the last 23 or 24 years, and are still extremely productive, the most productive ground being found in the whin sill. The ore brought the surface is taken direct to hopper for grating, after which passes Blake's stone breaker, and thence to the crasher; after this it is taken direct the classifier for jigging, the shins passing at a lower level. The production marketable lead ore about is about 25 tons per month. At the surface is a pumping engine, 70in cylinder, 22ft beam, 10ft equal stroke; 21ft plunger; 53 fathoms lift; 3-8th strokes per minute; 558 gallons per minute; 177,444 gallons one foot high per minute; 12 inch bucket, 10 fathoms lift. The engines are of 56 horse power and consume 4-5ths lbs per horse power per hour. They are capable of working up to 250 horse power. The depth of the winding shaft from the surface is seventy fathoms; levels are driven off at 15, 30, 40, and 50 fathoms. Must of the ore dressing machines are driven by steam power; and water power is also used. The works above ground were pointed out by Mr Henry Milburn and Mr William Nixon, the washing masters.

THE SETTLINGSTONES MINE

This lead mine is also in the immediate vicinity, and was likewise visited. The party were received and conducted over mine by Messrs Alfred and Walter Hall, the lessees of the mine, which his Grace the Duke Northumberland is lord of manor. In this neighbourhood ore has been raised for many years. In the works by side of the burn at Settlingstones the ore is visible, and bears evident traces of having been worked the Romans. Mr John Hall. M.D., commenced working the mine 1790, and continued to do for some years, after which it was

abandoned, but was re-opened in 1833 by the Messrs A. and W. Hall, who have worked it continuously ever since. The principal pumping engine here is Cornish, 60 inches cylinder, working plungers of 18 inches diameter, and with 90 feet stroke. There is a 25 power condensing engine. The winding engine is 16-horse power condensing. One of the shafts is 100, another 75, and another 60 fathoms deep. The principal winding shaft Mr Winter's, where the pyrites are drawn from the workings of from 60, 70, and 80 fathoms lift. It is chiefly carbonate baryta. Between 2,000 and 3,000 tons of carbonate are annually produced, and are shipped principally to France and Germany. A little goes to America, and some is used in England for glassmaking and other industrial arts. The Chief production of baryta is found in two or three mines in the North of England; and here is one of the principal sources of supply. Almost the entire product of the British Islands is in fact within few miles of this place. The mine is also worked for lead ore. The run of the known vein through the royalty is about a mile and a quarter. The mine is situated in a very picturesque neighbourhood, close to the Roman Wall, and in the neighbourhood of that portion of the wall where recently was the great discovery of Roman coins in the well consecrated to the goddess Coventina, at the Roman camp at Proclitia, on the estate of Mr John Clayton. A large party the members visited the shrine, and the whole company afterwards assembled in the village of Newbrough. where they had luncheon provided by Mr Surtees, Innkeeper. Mr Benson occupied the chair, and various toasts having been proposed, the party proceeded to Fourstones Station, from thence special train brought them back to Newcastle. The weather throughout the day was exceedingly fine, and the excursion was greatly enjoyed.

20th October 1877 (Hexham Courant)
Deaths
At Alston, 10th inst. aged 43, John Cousin, coal miner.
In 1841, at Skelgill Rig, Thomas Cousin, lead miner, aged 45, wife Elizabeth (Vipond, married 25th November 1826, at Alston) aged 35, children Ann 11, John 9, Thomas 6, Hannah 4, and Mary 2.
In 1851, at Aimshaugh, Alston, Elizabeth Cousin, widow, washer woman, parish relief, aged 44, children John, lead miner, aged 19, Thomas, lead miner, aged 16, Hannah 14, Mary 13, Frances 9, and Joseph 6.
In 1861, at Leadgate, Alston, Elizabeth Cousin, lead miners widow, aged 54, John, lead miner, aged 28, Frances, dressmaker, aged 19, and Joseph, lead miner, aged 16.
In 1871, at Blackburn Mill, Alston, Elizabeth Cousin, miners widow, and farmer of 6 acres, aged 64, son John Cousin, lead miner, aged 37, and daughter Frances, aged 29. In 1881, at Roadside House, Alston, Joseph Cousin, lead miner unemployed, aged 36, and his mother Elizabeth Cousin, widow, housekeeper, aged 75. See 22nd March 1884
At Blagill, 5th inst., aged 77, Elizabeth, widow of John Scott, lead ore smelter.
In 1851 at Blagill, John Scott, lead ore smelter, aged 51, born, Northumberland, Knaresdale, his wife Elizabeth (Cousin, married 1st July 1826, Alston) 45, born Allendale, children Ann 23, John lead miner 20, Thomas lead miner 17, Mary 15, Isaac lead miner 12, Matthew 9, Rodger 7, Robert 5, Elizabeth 3, Hannah 3, Isabella 10 months, Matthew Lee, lodger, aged 11, lead miner.

John Scott snr., died 1st quarter 1860.
In 1861 Elizabeth Scott, widow, farmer of 18 acres, aged 55, children William lead miner 32, Elizabeth 14, Thomas lead miner 27, Isaac lead miner 22, Matthew lead miner 20, Rodger lead miner 17, Robert lead miner 15, Walter 9, Hannah 13, Isabella 11, and lodger Matthew Lee lead miner 21. In 1871 the family still at Blagill Elizabeth Scott, widow, farmer 66, unmarried sons, William lead miner 42, Walter lead miner 20, granddaughter, Elizabeth Scott 12, and servant Jane Spottswood 16.
At High Nest, 15th inst., aged 53, Mary, wife of Mr John White, lead miner.
In 1871 at Howes Hill, Garrigill, John White, lead miner 55, his wife Mary (Hetherington, married 10th December 1846, Alston,) aged 45, children William lead miner 22, Mary A 19, John lead miner 16, Joseph 12, and boarder Joseph Fawkes aged 6 years.
See 24th October 1891, and 12th January 1895

20th October 1877 (Alston Herald and East Cumberland Advertiser)
ALSTON.
NEW ORE-WASHING APPARATUS.—A new apparatus for washing lead ore, the invention of Mr David Burns, has been put into operation at the Haggs Mine. For a long period it has been a desideratum with mining engineers to produce machinery for the most perfect separation of the ore from the refuse with which it is combined at the least cost. The most approved forms of ore-washing machinery been for some time working with satisfactory results at several of our principal mines; but Mr Burns, who for some time turned his attention to the matter, thought that these had a greater amount of mechanical appliance and consequent wear and tear than was necessary, and that the end might be attained by less artificial and more natural means that, in short, the principle was at fault. With this idea he constructed his apparatus—an ingenious design on quite an original principle. Gentlemen practically acquainted with all the processes of lead ore dressing have expressed their approval of the principle as a decided advance on anything at present in use. The mechanical appliances were rather faulty, being only those with which Mr Burns has been experimenting. These, however, are easily made more perfect. Mr Burns is to be congratulated on having produced an apparatus which is to be a boon to mine owners, if not destined to supersede all other appliances for washing lead ore. We hear that it is his intention to apply for a patent, and has secured provisional protection for his invention.

26th October 1877 (Carlisle Patriot)
Deaths
At Glenridding, Patterdale, on the 16th inst., Mr Thomas Coward, smelter, aged 64 years.
In 1851, at Beck House, Grasmere, Thomas Coward, separator in lead mines, aged 37, his wife Ann (Stephenson, married 19th February 1842, at Windermere) aged 37, children, Margaret 8, William 6, Thomas 3, and James aged 1. Ann Coward died 2nd quarter 1855, registered, at Kendal.
In 1861, at Causeway House, Patterdale, John Coward, roaster of lead, aged 49, born Kendal, his wife Mary 37, born Braithwaite, children, born, Patterdale, James 18, lead miner, aged 18, Ann 11, Sarah 7, Frances 1, boarder, Thomas

Coward, widow, separator of lead, aged 46, and boarder James Coward 11(born Grasmere).
In 1871, at Greenside Shop, Glenridding, Thomas Coward, labourer at mines, aged 57.
James Coward aged 23, married Hannah Brown, at Patterdale 15th November 1873
At Greenside Mines, Patterdale, on the 16th inst., Edward, son of Mr Edward Pool, aged 18 years.
In 1851, at Greenside Smelt Mill, Edward Pool, labourer, aged 27, his wife Thomasin (Curry, married at Patterdale, 3rd August 1844) aged 24, children, Esther 4, Jacob 2, and Ann 1.
In 1861, at Mire Sike, Patterdale, Edward Pool, Ag. Labourer, aged 38, his wife Thomasin aged 36, born Allendale, children, Esther, 14, Jacob, 11, Ann 9, Jane 8, Mary 6, and Edward 2; all children born Patterdale.
In 1871, at Glenridding, Edward Pool, lead miner, aged 46, his wife Thomasin aged 41, children, Jacob, lead miner, aged 22, Mary 15, Edward 12, Sarah 9, Anthony 5, John 4, and granddaughter, Hannah Pool, aged 3.
In 1881, at Pendragon Cottage, Glenridding, Edward Pool, lead miner, aged 52, his wife Thomasine 57, children, Jacob, lead miner, aged 31, Sarah, domestic servant, 19, Anthony, lead miner, aged 16, John, lead miner, aged 14, and granddaughter, Margaret Pool 9.
Edward Pool died 3rd quarter 1891, aged 65.

27th October 1877 (Westmorland Gazette)
FATAL ACCIDENT AT PATTERDALE. —Last week a sad fatal occurrence took place at Greenside Lead Mines, to a young man named Edward Pool, about 18 years of age, who was a driver of waggons in the low level. Whilst following his vocation on the above day one of the waggons became detached, and ran against him, hitting him in the chest, and causing wounds from which he died almost immediately after.
In 1841, at Smelt Mill, Greenside, Glenridding, Jacob Curry, separator of lead and silver, aged 53, his wife Ann aged 52, children, Thomasin 15, and Jacob aged 11.
In 1841, at Glenridding, Patterdale, James Pool, farmer, aged 35, his wife Esther 35, children, Edward 15, Agnes 15, Mary 13, James 12, Anthony 9, Sarah 7, and Isabella 4.

9th November 1877 (Carlisle Patriot)
ALSTON RURAL SANITARY AUTHORITY.
The Inspector reported that he had inspected Nenthead, Garrigill, and district, and found all in good sanitary condition—most of the manure heaps had been removed, The well near Mr Story's shop was stopped. He believed the pipe had burst, and the water was flowing into a conduit. —Mr DICKINSON proposed that it be repaired at once. He thought it would be better if the Inspector got the road men to repair such things whenever they were found wrong. —The Clerk said the Sanitary Authority had nothing to do with the road men. Besides, if such orders were given, more money might be spent than was thought advisable, and then Mr Dickinson would be the first to grumble. —The Inspector said Mr Ridley had applied to have the opening into the millrace closed in the Butts. One of his children had fallen in on Saturday, and might have been drowned. —Mr ISAAC WALTON: Was it not agreed it should be closed? —The Inspector: It was, but the inhabitants petitioned the Authority to let it remain open until some other place was provided to deposit refuse.—Some discussion ensued as to whether it should be closed with a fixed grate or one to open. As it was thought inadvisable rubbish should be put there it was ordered to be closed with a fixed grate.

10th November 1877 (Hexham Courant)
Deaths
At Beldy, Garrigill, 3rd inst., aged 60, Thomas Watson, mining agent for the London Lead Company. For more than 20 years agent at the mines in Alston Moor.

1st December 1877 (Hexham Courant)

STONECROFT

Today (Saturday), the numerous body of men in the employ of the Stonecroft and Greyside Mining Company will receive notices that their employment will be terminated on the expiration of fourteen days. This is being done with a view to a reduction of the number of men at present employed at the Company's mines and also with a view to a reduction of wages to be paid to the men that may be employed after termination of the notices.

1st December 1877 (Hexham Herald)
Deaths
Nenthall, 14th ult. aged 6 months, Eldon, son of Hannah Cousin.

7th December 1877 (Carlisle Patriot)

ALSTON RURAL SANITARY AUTHORITY.

The Inspector reported that the part of the pipe where the water escaped above Mr Story's well had been discovered. The pipe had been laid through the mill burn without any protection; it had been injured, and the water was escaping into the burn. About 14 or 15 feet of new pipe was required, as well as some protection where the leaden pipe crossed the burn. —It was decided the leaden one should be enclosed in a metal pipe at that part. —A sad nuisance, caused by the filthy water from a conduit getting into the water pipe at Grisedale's Lane, was stated to have been rectified.

8th December 1877 (Hexham Herald)
Marriages
St Augustine's church, Alston, 29th ult. Mr Thomas Walton, Cocklake near Alston, to Miss Jane Snowdon of the same place.

15th December 1877 (Hexham Herald)
Alston
We understand a traction engine will shortly be used to convey materials from Alston station to Nenthead. As the route up Alston Street, is impracticable the engine will travel by way of Clarghyll and Foreshield.

15th December 1877 (Alston Herald and East Cumberland Advertiser)
ALSTON PETTY SESSIONS.
FRIDAY, Dec. 7th.—(Before the Rev O. James and T. H. Horrocks, Esq.)
THE STORAGC OF EXPLOSIVES.
Mr J. G. Millican made application on behalf of the London Lead Company, for leave to store explosives at a place called Small Cleugh, near Nenthead. The building had been erected according to Government design, and intended as a store for mixed explosives and gunpowder, to prevent the men being necessitated to keep these in their own houses. It was over seventy five yards from any dwelling house, and he believed it conformed, in every way, to the provisions of the Explosives Act. It was built according to provision C, to hold 2,000 lbs of gunpowder or an equivalent of mixed explosives.—Granted.
Deaths
At New Shildon, 6th inst. aged 46, Joseph Coates of Garrigill, Alston.
In 1851, at Seldom Seen, Garrigill, Matthew Coats, lead miner, aged 45, wife Elizabeth (Currah, married 3rd September 1829, Alston) aged 44, children Joseph, lead miner, aged 20, Mary 17, Matthew, lead ore labourer, aged 15, Hannah 13, Thomas 8, Jane 6, and Elizabeth 2.

In 1861, at Low Farnberry, Alston, Elizabeth Oliver, widow, housekeeper, aged 54, grandsons William Oliver 8, Jacob Oliver 5, and Thomas Oliver 3 years.
In 1871, at Bale Hill, Alston, Elizabeth Oliver, widow, formerly domestic servant, aged 64, grandsons, Thomas aged 13 and John aged 11.
At Alston, 11th inst., aged 9 months, Thomas William, son of Annie Gibson.

21st December 1877 (Carlisle Patriot)

ALSTON RURAL SANITARY AUTHORITY.

The Rev O. JAMES presiding. —The Clerk said he had received the accounts for the repairs of the water pipes. These accounts amounted to £13 3s, for which amount it would be necessary to issue a precept. In order to have a small balance, he had made the precept for £15. —The Inspector said all had been done to the water pipes that was thought necessary. The water was now a very good supply.

22nd December 1877 (Alston Herald and East Cumberland Advertiser)

SUDDEN DEATH.— Mrs Isabella Gill, aged 87 years, wife of Mr John Gill, brewer and spirit merchant, Alston, was found dead in bed shortly after six o'clock on Monday morning. Mrs Gill had been in a very weak state of health for a considerable time, and had been attended by Dr Gill. On Sunday night she retired to bed about eleven o'clock, with her daughter. In the morning, shortly after six o'clock, Mr Gill went into her room and found her dead in bed. Her daughter, who was sleeping with her, was unaware of what had taken place John Carrick, the coroner for East Cumberland, was immediately communicated with, but he did not think an inquest was necessary.

26th January 1878 (Hexham Courant)

TEESDALE

TRADE IN TEESDALE

Lead mining in Upper Teesdale forms the staple industry of the district, and it is satisfactory to note that at a time when universal depression of trade exists, the extensive mining operations of the London Lead Company are in fairly prosperous condition, the miners, as a class, receiving good remuneration, both in the workings in Teesdale and Weardale.

2nd February 1878 (Hexham Courant)

Deaths

At Nenthead, 29th ult. aged 73, Elizabeth Erwin, wife of Mr John Erwin, Blacksmith.

See 16th October 1880

At Crosslands, 28th ult. aged 1 year, Foster Dixon, son of Mr John Dixon, lead miner.

William Craig married Hannah Kindred, 9th March 1837, at St Augustine's, Alston.

In 1841, at Annatwalls, Alston, William Craig, lead miner, aged 25, his wife Hannah 30, and daughter, Elizabeth 1.

Hannah Craig, of Crosslands was buried 27th May 1845, aged 35, at St John's, Garrigill.
In 1851, at Crosslands, Alston, William Craig, widower, miner for spelter, aged 39, children, Elizabeth 11, Joseph 8, William 5, and servant, Mary Craig, house servant, aged 31.

John Dixon married Elizabeth Craig, 19th February 1859, at Alston.

In 1861, at Cross Lands, William Craig, widow, farmer and Spelter ore dresser, aged 49, sons Joseph, Spelter ore dresser aged 18, William, Spelter ore dresser aged 15, son in law John Dixon, lead ore miner, aged 26, married daughter Elizabeth Dixon 21, and granddaughter Hannah Dixon 1 year.
In 1871, at Crosslands, William Craig, widower, farmer of 16 acres, miner spelter works, aged 58, and son William, miner, spelter works, aged 25.
In 1871, at Cross Lands, Alston, John Dixon, lead miner, aged 37, his wife Elizabeth 31, children Hannah 11, Elizabeth 9, William 7, John Joseph 5, and Isaac 2 years.
In 1881, at Crosslands, William Craig, widower, farmer of 17 acres, aged 69.
Also at Crosslands in 1881, Joseph Craig, lead miner, aged 28, his wife Elizabeth 37, children, William 10, John George 7, and Hannah 4.
In 1881, at Sandhill, Alston, John Dixon, auctioneer, aged 47, wife Elizabeth 42, children Elizabeth 19, John Jos. lead ore washer, aged 15, Isaac 12, Alfred 9, and Mary Jane 7.

Probate 1883: Administration of the personal estate of John Dixon late of Sand Hill in the parish of Alston in the county of Cumberland Licensed Auctioneer who died 6 January 1883 at Sand Hill was granted at Carlisle to Elizabeth Dixon of Sand Hill widow the relict. Personal Estate £19 13s.
Probate 1887: The Will of William Craig late of Crosslands in the parish of Alston in the county of Cumberland who died 4th July 1887 at Crosslands was proved at Carlisle by Joseph Craig of Crosslands Farmer and William Craig of Sandhill in the said parish Builder, the sons the executors. Personal Estate £773 0s 6d. See 27th March 1875
At Nenthead, 24th ult., aged 17, Sarah Ann Hind, daughter of Mr James Hind, lead miner.
In 1871, at Cob End, Nenthead, James Hind, lead miner, aged 46, his wife Phillis (Teasdale, married 5th May 1859, at Nenthead) aged 44, children Sarah Ann 10, John 8, Phillis 5, and nephew George Hind lead miner aged 19.

9th February 1878 (Hexham Courant)
Deaths
At Alston, 4th inst., aged 32, Isaac White, lead miner.
In 1851, at Garrigill, John White, lead bouse washer, aged 52, his wife Jane (Parmley, married 3rd April 1834, Alston) aged 41, children, Joseph, lead miner out of employment, aged 28, Sarah 16, John, mines, aged 13, Ester 8, Isaac 6, Mary 4, and William 2.
In 1861, at Battle Green, John White, lead miner, aged 60, his wife Jane aged 50, children Sarah, dress maker, aged 25, John, lead miner, aged 23, Isaac, lead miner, aged 16, Mary 14, and William 11.
In 1871, at Rice Head, John White, proprietor and farmer of 43 acres of land, aged 72, his wife Jane 62, and unmarried children John, lead miner, aged 34,

Isaac, lead miner, aged 26, William, lead miner, aged 21, Sarah W. dressmaker, aged 36, and Mary, general servant, aged 24.

16th February 1878 (Hexham Herald)

STONECROFT MINES
SERIOUS ACCIDENT

On Monday, last, a serious accident occurred at the above mines, whereby two of the workmen named John Jordon and William Nevin narrowly escaped with their lives, they being seriously injured. The two men were descending a shaft at Greyside in the cage, with some wood, previous to which one of them requested the engineman to lower them gently, when it appears he had not attended to the caution and using the brake lost control, the cage being precipitated to the bottom with frightful speed. When taken up, Jordon was found to be severely injured on the leg and much shaken. Nevin was severely shaken. They were conveyed home and medical assistance being at once procured they were placed under the care of Drs Stainthorpe and Farmer, of Hexham, and we hear they are progressing as favourably as can be expected.

Deaths

At Alston, Bruntley Syke,12th inst, aged 79, Joshua Lowe, landed proprietor.
Hexham Union workhouse, 11th inst. aged 74, Mr John Robinson, Lead Ore Smelter.

In 1851, at Catton Pasture, Allendale John Robinson, smelter of lead ore, aged 47, born Scotby, Cumberland, his wife Hannah (Whitfield, married 31st December 1831, Allendale) aged 41, children Elizabeth 14, Mary 11, Nicholas 8, Thomas 5, and John 1. In 1861, at Catton Pasture, Allendale John Robinson, lead ore smelter , aged 57, his wife Hannah 52, children, Mary 21, Nicholas Agricultural labourer,18, Thomas lead ore dresser, 15, and John 11. Hannah died in 1864.
In 1871, John is at Bunkhouse, Allendale, widow lead ore smelter aged 67, with a housekeeper Ann Short aged 34.

23rd February 1878 (Hexham Herald)

SAD FATAL ACCIDENT AT GREYSIDE MINE

On Wednesday, an inquest was held at the office of the Stonecroft and Greyside Mining Company, near Newbrough, before Mr. L. M. Cookcroft, coroner for South Northumberland, on view of the body of John Jordan, shaftsman, 41 years of age who died on the 18th inst from injuries received in an accident at Greyside Mine on the 11th inst.

Mr. Atkinson, Government Inspector of mines, Mr Benson, Jnr., one of the owners, and Mr Ware, manager of the mine were present, and Mr Isaac Baty, Jnr., solicitor Hexham was also present on behalf of Robert Johnson the brakesman.

It seams that the deceased and another man named William Nevin were descending a shaft at Greyside in the cage, with about a hundredweight of timber, when through some cause the cage was precipitated to the bottom at great speed. When taken up both men were found to be injured particularly Jordan, who died from the effects of his injuries, as above stated, on Monday last.

The first witness examined was John Walton, joiner, Greyside, who deposed that the body, which the jury had inspected, was that of John Jordan, who lived

at Greyside, and was a shaftsman employed by the Stonecroft and Greyside Mining Company. Deceased was 41 years of age. Witness was present when he was brought up the shaft on the 11th inst. Jordan did not say anything to Johnson as to how the accident happened. He said he felt hurt outside. He did not remember having seen persons riding up and down the shaft. Jordan died on Monday, the 18th inst.

By Mr Atkinson: Deceased was brought up in the westernmost cage. To my knowledge, I have not seen a notice, either written or printed, at this shaft.

William Lee, deputy overman, Greyside, deposed that he was in the mine when the accident happened on the 11th inst. He was informed that the two men were injured, and he went to the bottom of the shaft, where he found John Jordan and Wm. Nevin. They were lying on the ground near to the cage. The cage was not injured. They thought the rope had broken, but he found on examination that the rope was not broken. He at once began to get the injured men out, and rode with the first one then the other in the other cage. When he got to bank he saw Jordan, but nothing was said. Johnson wound them up. Witness had been employed at the mines 18 or 19 years. He had seen a notice on the shear legs, forbidding any man to ride down the shaft. The last time he saw the notice was three or four months ago. Jordan had been shaftsman three or four years. No one was ever dismissed for riding. He had seen putters riding down the shaft in the last month, but he had not reported them, as he expected they had leave. The accident happened about eleven o'clock in the morning. He did not know that there was any work to be done in the shaft that day. They had authority to go on down the shaft when their services were required. He had frequently seen them ride in the shaft. He never knew them brake down that shaft before without the engine. He had known the cage let down the other shaft with the brake, when there had not been steam. Johnson was about twenty-two years of age. One cage counterbalances the other. The other was taken off for the convenience of getting the work out of shaft foot. His duties in the mine was to look after the putters, shaftsmen &c. The men were under his charge. He did not know they were going to ride at that time. He had seen them riding within a week before the accident. It was the duty of the brakesman to let the shaftsmen down if he was asked. Witness saw that there was timber in the cage in which the men went down. There was not a hundredweight of timber in the cage with the men. He knew that the steam was up. He considered that the shaftsmen had perfect authority to order the brakesman to let them down under any circumstances. He considered that a hundredweight of timber was not too much. He never knew the brakesman refuse to let the shaftsmen down. He often examined the shaft, and they repaired it. He never remembered seeing putters riding at this shaft. He had never reported them for riding, but he had named it. They had no rule as to the men riding with materials in a cage. There was no necessity for them to take the timber down the shaft; but there was no rule to that effect. The proper way of taking timber down was by strapping it on the cage. He did not think he would have gone down with that brake without the engine. Witness had been braked down No. 1 without steam, Johnson had been brakesman for some years, and there had been no complaints before. He had always braked him (witness) well. He had never had any complaints of his conduct. He thought the brakesman generally would leave to the discretion of the shaftsmen what they would take with them. The inquest was adjourned until half past twelve o'clock on Thursday, the 28th inst.,

for the purpose of having the evidence of Nevin, the other injured man, taken before the jury came to any conclusion in the matter.

2nd March 1878 (Hexham Herald)

SAD FATAL ACCIDENT AT GREYSIDE MINE
THE ADJOURNED INQUEST

On Thursday afternoon last, the adjourned inquest touching the death of John Jordan, shaftsman, who died from injuries received whilst at work in Greyside Mine on the 11th February last was held at the office of the Stonecroft and Greyside Mining Company, near Newbrough, before Mr. L. M. Cookcroft, coroner for South Northumberland. Mr Isaac Baty, Jnr., solicitor Hexham was present to watch the proceedings on behalf of the brakesman Robert Johnson. Mr. Willis, Government Inspector of mines, Mr. Atkinson Assistant Inspector and Mr Ware, manager of the mines, and Mr. Supt. Stephenson, of Hexham were also present.

William Nevin, who was in the cage along with the deceased at the time the accident happened. and who was accommodated with a seat, as he was still suffering from the injuries he received, was the first witness examined. He aid he was working in company with the deceased on the 11th of February. They commenced work about 6:30 a.m., and did a job at the shaft foot. They were let down the shaft all right. The then went to inspect, and came to the top about half-past 10 o'clock. They returned by the cage, and would be at bank about fifteen minutes. He told Johnson that they wanted to go down again, and they put two short pieces of timber into the cage. He told the brakesman to keep the engine in gear, and to let them cannily down, as they had two pieces of timber with them. Johnson said "Huts man." Witness called to him to let them down. He did not notice that the engine was in gear. He dropped them very quick for about eight fathoms, when they felt the brake. It did not stop them, but they continued to increase their speed until they got to the bottom. He had frequently been in the habit of going up and down the shaft. John Telford and he were let down the shaft that morning with the brake alone. Witness remarked to Telford that he thought very little of that kind of riding. He did not complain of that to Johnson. About a week before Johnson let Jordan and witness down with the brake, and when he came up he saw Johnson and told him that he had let them too quick down that morning. Johnson said nothing, but laughed. Between that time and the 11th ult. Johnson had several times let them down. The second cage was not worked on the 11th, because the men were going to draw "deads" from the bottom, and only one cage could work. Neither Jordan nor he had any quarrel with Johnson. Witness had told them of all the occasions he had complained. Lee was witness's master, but he did not make any complaint to him.

Mr Willis: You were let down a foot or two at a time occasionally in repairing the shaft, but were you ever brought up a foot or two?

Witness: No; we always finished as we went down.

Mr Willis: Have you seen other men occasionally riding in that shaft?

Witness: I have seen putters ride.

Mr Willis: Have you seen a notice that the men are not allowed to ride?

Witness: Yes, I have seen it.

Mr Willis: Was that put up because it was considered dangerous to ride?

Witness: I don't know that.

Examination continued by Mr Willis: Notwithstanding the notice witness considered that it is their capacity as shaftsmen they were at liberty to ride. On the morning of the 11th they had got about 5 stone of timber with them. After they got past the eight fathoms he found the cage running at great speed, and he made the remark to Jordan, We, were gone." He did not remember anything after that. He had been let down at other shafts with the brake when there was no steam up, he considered it safe at the other places.
By Mr Baty: About a week before Johnson let Jordan and he down to the thirty fathoms all right.
He had always before let them down with perfect safety.
Mr Cottenham Farmer, surgeon, Hexham, of the firm of Drs. Stainthorpe and Farmer, deposed that he attended Jordan after his accident. He saw him on the 11th, when he appeared to be suffering from shock. He had an extensive lacerated wound over the left elbow, exposing the bone. He had a fracture of the left patella, but not extending into the joint. These were the external injuries. His mind was clear; he complained of very little pain elsewhere. He examined him as well as he could. On the 12th he saw him and found him still suffering from shock, with a swelling of the left foot, due no doubt to the tightness of the bandage during the night; otherwise he was going on favourably. He saw him again on the 15th (Friday). They opened out the wound; everything looked favourable. He saw him again on Monday, the 18th inst., he was then in a state of collapse, and died the same day. He died most probably from inflammation setting in, and causing a clot of blood, which would reach the heart and bring on collapse or haemorrhage.
By Mr Baty: He might have had previous organic disease.
By the Coroner: He thought the injuries must have been the proximate cause of death.
Thomas Wilkinson, engineer of the mines deposed that he was about this No. 3 shaft when the accident occurred. Witness went into the engine house when the cage was being let down. Johnson was busy holding on to the brake. The engine was then out of gear. He worked the brake with his foot. Neither of them said anything. He did not know there were men in the cage. It was running amain *(sic)* when he went in; the drum was going quicker than usual. When it was stopped, he made the remark, "It was a bad job," meaning that he expected the rope would go down. He thought the brake had lost its power of action through the friction. He had not seen such a thing occur before that he was aware of. Johnson was holding with both his hands and feet to keep it down, that was to get a better purchase of it. He was endeavouring to do all he could to brake the cage. Johnson was under witness's orders, but he had never given him any directions as to the manner in which he had to let men down the shaft… It was left to his discretion. Witness would not consider it safe to let two persons down the shaft by brake power alone. That was an opinion he had formed before this accident occurred. He had never been let down by brake power only. He was not aware of men being let down by brake power. The brake would, without the engine, let down to the weight of about a ton. The cage and chains would weigh about 5 cwt., the two men say 14 stones each, so that all would be under a ton, and nothing wrong to brake. The brake was a very powerful and safe one. After the accident happened he noticed nothing wrong with the brake. He had never had a single complaint against Johnson. He had never seen men let down without the engine being in gear. He should have

found fault if he had seen it. If the men thought the brakesman was doing wrong they ought to have reported it. On Tuesday morning following the accident Johnson and witness examined the screw that ran through the drum, and found it was slightly unscrewed. Witness put that screw in to support it.
John Telford deposed that he was a putter, and was down the shaft when the accident happened. He was working at the foot of the shaft. He had ridden down with Nevin at half-past six o'clock. They stopped at the thirty fathoms, to let Nevin out, and he went down to the bottom level. The entire depth was about 42 fathoms. He could not tell how they were let down, but they went down very steadily. Jordan was at the shaft top and came down afterwards. The accident happened at about eleven o'clock. When about three or four fathoms from the bottom he heard the cage coming very hard. It beat on stone "deads" but as far as he could see the cage was not damaged. They got them out as soon as the rope came down. He had often ridden, although he knew there was a rule against riding. He had been let down by the brake alone, but he could not say when the last time was. On the occasions he had ridden, Johnson would be the brakesman, and he had gone down very steadily. He was told that riding was going to be stopped; he was stopped for a week or two. Mr Lee saw him ride after that, but never stopped him.
Robert Johnson, the brakeman, after having been cautioned by the Coroner that he need not say anything unless he chose to do so, was next examined. He said he had been a brakesman five years and a half, and was 22 years of age. He had charge of this engine for about nine months. He was attending his work on the morning of the 11th ult. when this accident happened. He had frequently been in the habit of letting persons ride when the engine had been out of gear. He had no orders or directions not to do so. He had never had any accident with this cage in this shaft before. He had let down two men before with brake power, but they had no timber with them that he knew of. He had his foot on the brake all the time in letting deceased and Nevin down. He never slipped his foot. He thought he had them under command for about 20 fathoms down. They were going to 30 fathoms. He drew them up a bit, as he found he was pressing too tight. To let them a bit further down he rather eased the brake, and then she went away. He had the treadle down on to the footboard. He noticed Wilkinson come in while he was busy holding it. He did not tell him that men were riding in the cage. He had never had any difficulty in stopping her before. He thought that the accident occurred by the lengthening shaft becoming unscrewed. Nevin asked him to let them down with the engine. He let them down by the brake because he saw no danger in it; he had let scores down that way. When he transferred to this shaft Thomas Potts explained the working of the brake to him, he had worked since then just as he was shown.
The Coroner, in addressing the jury, remarked that it would be unnecessary to go over the evidence they had taken. It was shown pretty conclusively that the death of Jordan had arisen from injuries caused by the manner in which he was let down the shaft on the morning of the 11th. The real point of issue was whether there had been any want of care and caution on the part of Johnson in letting him down. Any person who took upon himself an office requiring care and caution, and did not take the care and caution he ought, was responsible if any one was killed for manslaughter. It must, however, be shown that there had been carelessness and culpable neglect. Recklessness would make him responsible. If a person had been placed in a position in which he had to a

certain extent to exercise his own judgement as to the manner in which he performed his duties, and if he simply made an error of judgement, in believing it safe to let the men down in the way he had done, he was not responsible for such an error of judgment, if he was acting in a really careful manner. But if they thought Johnson had acted with gross negligence and a disregard of all consequences so as to make him culpably liable, then it was their duty, however unpleasant it might be, to return a verdict of manslaughter against him.
After a brief private consultation, the jury returned a verdict to the effect that Jordan had died from injuries accidentally received in Greyside mine on the 11th ult.
The 1841 census shows, at Allendale Town, Isabella Jordon (husband Joseph Jordon), grocer, aged 35, William Jordon (father Joseph) aged 15, Mary Jordon (father Joseph) aged 10, and John Jordon (father Thomas Fairlamb) aged 2 years.
In 1851 at Catton Toll Bar, Isabella Jordon, widow, aged 47, Toll Collector, born Warden, Northumberland, and son John aged 12.
The 1861 census shows Isabella & John still at the Toll Bar, Isabella a collector of tolls, & John a lead miner. Isabella died in 1863.
In 1871, at Clarks Cottages, Allerwash Village, John Jordan, lead miner, aged 34, born Allendale, wife Ann 26, children John 4, William 3, and Elizabeth 5 months (Elizabeth died in 1871)
James Jewel married Ann Jordon in 1879 at Hexham.
In 1881, at Swarthmoor, Ulverston, Lancashire, James Jewell, iron miner, aged 27, born Devon, his wife Annie aged 34, born Warden, Northumberland, children John 14, and William 13.
John Jordon, buried at Newbrough Church Yard, approximately 2 miles south east of Greyside mine.
A putter anyone who conveys the mineral from the face to the flat - or point where it is taken/hauled to the surface.
Shaftsman, responsible for the maintenance of shafts.

2nd March 1878 (Hexham Courant)

NENTHEAD
APPLICATIONS FOR WORK

On Friday, the “bargains” were let at Nenthead for the working of the London Lead Company’s mines. Most of our readers will be familiar with the principle on which the system is carried on, viz., letting a certain portion of the mine to two men, at so much per “bing” or otherwise. We may state that there were about seventy more men applied for work than were able to obtain it. No doubt, most of them were from Allendale and the neighbouring dales, but this is another proof of the stagnation in trade.

Deaths

At Garrigill Gate 16th ult. aged 4 days, Thomas Wilson, son of Mr Thomas Peart, lead miner.
In 1851, at Gate Head, John Peart, lead miner, aged 59, his wife Tamar (Stout, married 29th February 1816, Garrigill) aged 54, children George, lead miner, aged 34, Hannah, dressmaker, aged 30, Mary, milliner, aged 22, John, lead miner, aged 20, William 10, Thomas 6, and Joseph 5.
John Peart snr. died 4th quarter 1856.

In 1861, at Garrigill Gate, Tamar Peart, widow, house keeper, aged 65, children George, lead miner, aged 44, Tamar 37, John, lead mine agent, aged 30, grandsons William, lead miner, aged 20, Thomas, lead miner, aged 16, and Joseph, lead miner, aged 14.
Tamar Peart died 2nd quarter 1861.
In 1871, at Garrigill Gate, George Peart lead miner, aged 54, nephews Thomas, lead miner, aged 26, Joseph, lead miner, aged 25, and house keeper Mary Smith aged 25. In 1881, at Garrigill Gate, Thomas Peart, lead miner, aged 36, wife Mary (Smith, married 4th quarter of 1871) aged 35, children John G. 9, Jacob 7, and Albert 1 year.
In 1891, at Gate Head, Garrigill, Thomas Peart, Engine driver, aged 46, wife Mary aged 45, children John G. lead miner, aged 19, Albert 11, Jane 9, Tom 5, and Joseph 3. In 1901, at Gate Head, Thomas Peart, farmer, aged 56, wife Mary 55, children Albert, farmers son, aged 21, Jane A. 19, Tom, farmers son, aged 15, and Joseph, farmers son, aged 13. In 1911, at Gate Head, Thomas Peart, farmer, aged 66, his wife Mary 65, Jane Ann, dairy work, aged 29, and Joseph, farmers son, aged 23.
Thomas Peart, died 4th quarter 1919, aged 75, his wife Mary also died 4th quarter 1919, aged 74.

2nd March 1878 (Alston Herald)
Deaths
At Nenthead 19th ult., aged 10 months, John Anthony son of Mr Cowper Barron lead miner.
In 1851, at Whitehall, Nenthead, Robert Barron lead miner, aged 49, his wife Elizabeth 45, children Betsy 20, Hannah 18, Agnes 17, Robert 14, Mary Ann 12, Sarah 9, George 5, and Cowper 3.
In 1871, at Whitehall, Nenthead, Robert Barron lead miner, aged 69, his wife Elizabeth 65, children Betsy 40, George lead miner, 25, Cowper lead miner, 23, and grandchildren Henry lead ore washer 15, Elizabeth 13, and Margaret aged 2.
Cowper Barron married Isabella Brown in 1874, in Durham.
In 1881, at 93 Harvey Street, Byker, Cowper Barron aged 33, smelter in lead works, his wife Isabella aged 31, children Elizabeth 5, and Sarah 2, all born Alston.
In 1891 at 41 Belvedere Street, Byker, Cowper Barron, furnace stoker in lead works, aged 43, children Isabella 41, Elizabeth 15, Sarah R 12, and Robert C. 5 months.
See 22nd February 1873, 15th September 1877, 28th September 1878, and 19th June 1880.
At Blagill Hill Top, 26th ult., aged 39, John Hilton lead miner.
In 1851, at Blagill Hill Top, Thomas Hilton, landed proprietor, aged 51, his wife Ann 49, children Jonathan lead miner 23 (in 1881, Jonathan his wife Mary, and children George & Jonathan are living at 3 Vale Street, Elswick), children William lead miner 21, George lead miner 17, Thomas 14, John 12, Sarah 7, James 4, and Hannah 25.
John Hilton married Hannah Thompson, 27th May 1960, at Nenthead.
In 1871, at Whigelty, Alston, John Hilton lead miner, aged 33, his wife Hannah 37, children Annie 15, Sarah 7 (died 2nd October 1876, at Alston).

In 1881, at 25 Caroline Street, Hedworth Monkton, Jarrow, George Christie, engine driver, aged 24, born Scotland, his wife Annie 25, mother in law Hannah Hilton, aged 48, and brother in law Henry Hilton, aged 6.
In 1891, at 44 Kent Street, Hedworth Monkton, Jarrow, George Christie, engine driver, aged 34, his wife Annie 35, children Henry 15, Sarah 8, Frances 5, Mary 2, mother in law, Hannah Hilton, living on her own means, aged 56.

9th March 1878 (Alston Herald)

WORK AND WAGES AMONG THE MINERS OF NENTHEAD AND MIDDLETON.

As we intimated in a previous issue, the state of the mining trade in this district is like all other trades, not in the brightest position. This fact is further verified by the report that the men employed in the smelting mills at Nenthead and Middleton have received notice of a reduction in their wages. For some time past the London Lead Company have been having extra smelting facilities put in order at Nenthead. A new chimney has been built, and other requisite paraphernalia necessary for the proper smelting of lead are erected. This work was completed about a month ago, and through it several men employed as labourers about the mill, have been thrown out of work. We are now given to understand that about the commencement of this week the smelting hands at Nenthead and Middleton had notice given to them that their wages would be reduced. This no doubt, will take effect in a months time, as the men are paid monthly. ...

9th March 1878 (Hexham Herald)

ALSTON

A short time ago Mr Wm Walton, who is a native of Alston was presented with a testimonial subscribed by a few friends and the workmen employed at Medomsley colliery in the County of Durham, belonging to the Consett Iron Company, and at which he had for a great number of years been manager and overman. … The occasion of the presentation was the retirement of Mr Walton from the duties of Manager of the above colliery.
He had worked there for 30 – 40 years, on retirement he had moved to Whitley by the Sea. His family had previously resided in the Kings Arms Lane, Alston, a place they had left nearly 50 years ago.

Deaths

Allenheads, 4th inst, aged 17 months, Minnie, daughter of John and Elizabeth Ridley.
St Peter's Allendale, 4th inst. aged 68 years, John Heslop, upwards of 37 years teacher in St Peter's C.E. school.
In 1851, at Chapel House, St Peter's, Allendale, John Heslop, school master, aged 41, his wife Mary (Spark, married 3rd November 1836, St Peter, Allenheads) aged 40, Thomas 13, John 9, Joseph 7, and Mary A 2.
In 1861, at St Peter's School, Allendale, John Heslop, school master, aged 51, his wife Mary 51, children Thomas Green, school master, aged 23, John, jobbing labourer, aged 19, Joseph, jobbing labourer, aged 17, Mary Ann 12, and niece Margaret Sparke, landed proprietor, aged 23.

In 1871, at St Peter's, Allendale, John Heslop, school master, aged 61, wife Mary age 60, children Thomas G., school master, aged 33, John, iron stone miner, aged 29, and Mary Ann 22.
Mary Heslop died May 1872, registered at Hexham, aged 61.

St Peter's Church Yard, Allenheads

15th March 1878 (Newcastle Courant)
Green Hurth Lead Mine
Two new workings have recently been commenced at this mine. One is on a course of ore below the adit level which is yielding five tons of ore per fathom; and another is upon a newly discovered east and west vein, from the west of No. 1 north and south veins. Very little has yet been done upon this, but splendid lumps of lead ore (one of 14 lbs. or more in weight) are met with in soft and easy ground, and the vein extends for about a mile on its bearing in the company's sett, the whole of which is new and entirely unwrought ground.

16 March 1878 (Hexham Courant)

UPPER TEESDALE

DUBBY SYKE LEAD MINE

A new east and west vein has recently been cut at this mine; it is a large powerful vein and so well mixed with lead ore that the width of vein is taken to the bouse or team. It is very pleasing to find that some of the mines in this district are looking more cheerful after such a period of anxiety and depression, and especially that recent discoveries are in new and unwrought ground.

EMIGRATION FROM ALSTON TO QUEENSLAND

Several families from Alston and neighbourhood will we understand, start for Queensland on Monday next, others, not having been able to receive a passage in the same vessel, will follow next month.

Deaths

At Dykeheads, 9th inst. aged 60, Hannah Wallace, wife of Mr John Wallace, lead miner.

In 1841, at Cob End, Nenthead, Joseph Wallace, lead miner, aged 30, John Wallace, lead miner, aged 24, Adam Wallace, lead miner, aged 22, Matthew, lead miner, aged 18, and Mary Wallace 10.

In 1861, at Overwater, John Wallace, lead miner, aged 44, wife Hannah 43, children Mary, house maid, aged 15, John 13, Ellenor 8, Joseph 6, and Susanna 4. In 1871, at Dykeheads, John Wallace, lead miner, aged 54, wife Hannah 53, children Mary, servant, aged 23, John, lead miner, aged 21, Ellen, servant, aged 16, Joseph, labourer, aged 15, and Susanna 12.

John Wallace was buried 12th March 1879, aged 62, at Nenthead.

23rd March 1878 (Hexham Herald)

WEARDALE

FATAL MINE ACCIDENT. On Friday evening last (15th inst.), a very lamentable accident occurred at the Killhope lead mine, in Weardale. Thomas Harrison of Wearhead, lead miner, was at his work, and having just finished the charging of the shot, he inquired of his partner (*John Tindel*), who had gone back a short distance from the working, where he had put the "Match" when the shot immediately fired, striking the unfortunate miner about the face, and inflicting such injuries that he died about an hour after the accident. Deceased was a tall, fine young man, about 19 years of age and was much respected.

At Wearhead, in 1871, John Harrison lead miner, aged 46, his wife Mary 49, children Joseph lead miner, 24, Phebe A, 22, John lead ore dresser, 14, Thomas lead ore dresser, 12, George E. 9.

At St John's Chapel, 1871, William Tindale, head, unmarried, lead miner & farmer of 4 acres, aged 29; sister Frances aged 19, and brother John, lead miner aged 16 years.

30th March 1878 (Hexham Herald

Deaths

At Newcastle, Back Sandyford Place, 26th inst, aged 46, Mr Joseph Holmes late of Allendale Town, and for 30 years with Messrs Sopwith and Co. Cabinet makers.

In 1871, at Westgate, Newcastle, Joseph Holmes, cabinet maker, aged 39, his wife Jane A. 36 (born Morpeth), children William plumber, 15, James 12, Joseph 10, Christy 7, John 5, and Septimas 1.

6th April 1878 (Hexham Courant)
Deaths
At Beldy, Garrigill, aged 18, Peter second son of Mr Isaac Craig, miner.
William Craig married Thamer Graham, 12th September 1819, Alston.
William Craig of Middle Craig, Garrigill, was buried 14th July 1838, aged 44, at Garrigill.
In 1841, at Middle Craig, Garrigill, Tamar Craig, widow, aged 45, children William, lead miner, aged 15, Isaac, lead miner, aged 15, Jane 13, and Elizabeth 7. In 1851, at Red Brow, Tamar Craig, widow, aged 56, son Isaac, lead miner, aged 26, and daughter Jane 23.
In 1861, at Red Brow, Isaac Craig, lead miner, aged 36, his wife Ann (Moffatt, married 1st quarter of 1856) aged 29, sons William 3, and Peter 1.
In 1871, at Beldy, Garrigill, Isaac Craig, lead miner, aged 46, wife Ann aged 39, children William 13, Peter 11, and John Thomas 6. In 1881, at 23 Brougham Street, Penrith, Isaac Craig, retired miner, aged 56, wife Ann 49, sons William, drapers assistant, aged 23, John, mason, aged 16, boarder Thomas Cane Davidson, grocers assistant, aged 19, boarder William Goodfellow, drapers apprentice, aged 16, and domestic servant Tamer Milburn aged 17. Isaac Craig died at Penrith 3rd quarter 1886, aged 61.
In 1891, at Melomslow Rd, Didsbury, Lancs., William Craig, draper, aged 33, his wife Mary 37, sons William B 3, James E 1, mother Ann Craig, widow, aged 59, and domestic servant Emma Renshaw aged 48.

3rd April 1878 (Teesdale Mercury)
TO ENGINEERS, CONTRACTORS, COLLIERY OWNERS, MINING PROPRIETORS, AND OTHERS.

R. Marsden's patent 7-horse stone breaker, 15in. by 7in jaw, all complete, nearly new; 6-horse portable steam engine, 22ft saw bench, 4 saws and belt water wheel, 28ft diameter; 4ft 8in. breast 6ft fly wheel and shafts, crushing mill, fit with 3 pairs of rollers, complete; water wheel, 24ft diameter, 3ft 2in. breast, water boxes, chatt mill, complete water wheel, 12ft diameter, for German or Zenner Buddle, complete, in good order; water wheel, 8ft diameter, 13in. breast; 1 do., 6 feet diameter, 15in. breast; 1 do., 6ft diameter, 15in. breast; shafting for round buddle; washing tubs, slime pits and washing floors, double purchase winch, single do., wood dwelling house, stable, and store house, slated, in good condition; small wood house, 3 wood sheds over stone breaker, engine and saw mill, 500 yards of fence railing, 350 railing posts, cartwright's and other cut timber, 7 new sets of copper prickers and stemmers, 10 do., nearly new: office fixtures; 18 new shovels, 20 do. rakes, 350 pick shafts, 34 ladders, 29 barrows, 469 beech deals, Whimsey, 5ft 6in. drum, kibbles, 18 fathoms of zinc pipes, 164 do. air boxes, plate boring machine, 24 feet of boring rods, mining and smith's tools, anvils, vices, and bellows, brass taps and brass, rail plate and other nails, 76 metal pipes, steel drills and a quantity of chains, 20 cwts. of new iron, various sizes; 10½ cwts. of sheet iron, 19 cwts. of bolts and

bars, 34 cwts. of metal castings, &c., &c., &c. Sale to commence at 11 o'clock precisely.
N.B.—Healey Field is one mile from Bowley Station on the Stockton and Darlington Branch of the North-Eastern Railway, and 3 miles from the Benfieldside Station on the Consett branch of the North- Eastern Railway.
Catalogues can now be had on application to the Auctioneer.
Sale Office. Blackhill, County of Durham.

12th April 1878 (Newcastle Courant)
NORTHUMBERLAND QUARTER SESSIONS.
The Easter Quarter Sessions for the county of Northumberland commenced on Wednesday, at the Court House, Morpeth.

RATING APPEAL

Mr Greenhow and Mr Hamilton were for the appellant; Mr Wentworth Blackett Beaumont, M.P., and Mr Stevenson, for the respondents, the Churchwardens and Overseers of the parish of Allendale, in the Hexham Union.
Mr Greenhow, in opening the case, said it was an appeal against a poor rate made on the 16th of December last, rating the Allen Smelt Mill, a mill belonging Mr Beaumont in connection with his lead mines, near Allendale, at £1,056 gross, and £845 rateable value. The smelting mill was a very old one, and he believed it had been built a great number of years, and before 1863 it was always rated at £320 rateable value, in 1863 the valuation was increased by the overseers and appealed against, and on appeal it was fixed by the Sessions at £600 gross and £480 rateable value, that was to say, 20 per cent. taken off the gross valuation to ascertain the rateable value. Then that was afterwards raised to £510 rateable value, the increase being in consequence of 15 per cent. being deducted from the gross value instead of 20 per cent; and from 1863 until last December it stood at £600 gross and £510 rateable value. The Assessment Committee raised Mr Beaumont to £1,056 gross and £877 rateable value, that being 15 per cent. for repairs, that being objected to the only relief they got was 20 per cent. for repairs, instead of 15 per cent., which left them rated at £845 rateable value. That was a very large increase upon what they previously stood at from 1863 until the end of 1877, and he would show that instead of there being a reason for increasing the valuation of that smelting mill there were a number of reasons for decreasing it. The mill was a very old one indeed, and the repairs had become most onerous and heavy; and Instead of it being a comparatively new building now, it had become a very old one. The repairs had become a very serious matter, and had very much decreased the value of the mill. In addition, the mill was on a very old plan of construction. and there was a great deal of unnecessary extent is the buildings and in the plant. There were five miles of flue, which constituted a very expensive part of the apparatus to keep up, and the whole of that was now entirely disused. Moreover, for about eight weeks in every year the mills had to be knocked off work while the repairs to the flue were going on. All these things must be taken into consideration when anyone was coming to a decision as to what a hypothetical tenant would give now as the rental of a mill of that kind. The mill had deteriorated in value instead of being increased. The mill was situated near Mr Beaumont's mine at Allendale or Allenheads, and that mine had become very much into disuse, and most of the ore was got from Weardale. There was, therefore, no object for having a smelting mill at that place which there was formerly. The price of lead had

diminished £3 or £4 a ton than could formerly be got, and on the other hand the price of fuel had very much increased, which made the smelting business a much less profitable concern than it formerly was. It was perfectly absurd that, having stood all those years at £510, and reasons for diminishing instead of increasing the valuation having occurred in recent years, they should now be rated at the large rent of £845. He would call witnesses. who would prove that the rateable value of that mill, was something under £500 at the outside. Mr Johnson, manager of Mr Beaumont's smelting mill was called, and stated that the rateable value of the mill was £453; and Mr Dinning owner of a similar mill at Langley; Mr Bewick, engineer, and Mr Hedley, mining valuer, also gave evidence, and all estimated the rateable value at the outside below £500. For the respondents, Mr Dodd, who made the valuation for the Union, gave evidence and stated the calculation by which he arrived at his valuation. He estimated the rateable value of the mill, after deducting 15 per cent, for repairs, which would be considered sufficient, at £898, or after allowing 20 per cent off for repairs, at £845. Mr Joseph Scott, valuer, said he estimated the rateable value of Mr Beaumont's smelting mill at £953 8s. 0d., and Mr Dawson, who made his valuation in company with Mr Scott, gave a similar assessment.
The counsel on both sides having addressed the Bench, the Chairman said the Bench considered that the improvements at the mill and other circumstances had not improved the rateable value, and therefore they decided to sustain the appeal with costs, and put back the figures at which the mill was formerly rated, namely £510.

20th April 1878 (Hexham Courant)
Deaths
At Alston, 4th inst. aged 1 year, Mary Jane daughter of Mr John Lee miner.
At Nenthead, 9th inst. aged 54, John Bright, stone mason.
In 1871, at Nenthead, John Bright, lead miner, aged 47, wife Hannah (Indian, married 14th June 1851, at Nenthead) aged 43, children Robert 17, Isabella 9, John 7, and Thomas W. 4.
In 1881, at Holm Foots, Nenthead, Hannah Bright, lead miners widow, aged 54, children Robert, stone mason, aged 27, Isabella 19, and John, joiners apprentice, aged 17.
In 1891, at Holm Foots, Hannah Bright, widow, aged 63, children John, mason, aged 2, Mary 48, Frances, dressmaker, aged 46, Esther 36, Joseph, lead & zinc mine labourer, aged 41, Nicholas, lead & zinc mine labourer, aged 39, and mother Ann Robinson, widow, aged 72.

27th April 1878 (Hexham Courant)
Marriages
At Alston Wesleyan Methodist Chapel, 22nd inst., George Kindred of Bailes House to Margaret Walton, Town Hall, Alston.
In 1871, at Bailes House, Thomas Kindred, farmer of 170 acres, aged 58, his wife Elizabeth 53, mother in law Elizabeth Green, lead smelters widow, aged 86, children John, farmers son, aged 8, Thomas, farmers son, aged 20, Sarah Ann, farmers daughter, aged 17, George 13, and Mary 11.

ALLENDALE
DEATH OF A NATIVE OF ALLENDALE IN THE UNITED STATES.
We give below an account of the death of Mr Jacob Nattras, a native of Allendale, as it appears in “Our Messenger” a paper published at Mineral Point, Wisconsin:- Jacob Nattras was born in Allendale, Northumberland, England,

on the 2nd July 1802, and died at Gratiot, La Fayette County, Wisconsin, on the 13th September. He was converted, at the age of 42, during a great revival among the Primitive Methodist's in the North of England. In the year 1849, he emigrated to the United States with his wife and children, and others from the same community. He settled at Vinager Hill, and after a years residence he moved to Shullsberg, where he remained almost nine years. The remainder of his life he spent in the town of Gratiot. "
"The day before he died, with Bro. Matthews his nephew, I called to see him. We found him very week in body but his soul was filled with delight." ... He was interred in a cemetery about a mile North of Appel River.
Jacob (son of Thomas Nattrass & Ann Goodfellow) and his family travelled on the "Guy Mannering" leaving Liverpool on the 22nd May 1849, along with 50 others from the Allendale community. They arrived at New York 28th June 1849. See Appendices for further information.
The 1841 census gives at Elpha Green, Allendale, Jacob Nattrass, lead ore miner, aged 35, his wife Margaret (Nicholson, married 16th May 1839, St Peters Allendale) 25, children Thomas 3, and Hannah 1. The passenger list of the "Guy Mannering" gives the following members of The Nattrass family Jacob 45, Margaret 35, Thomas 25, Thomas 11, Hannah 9, John 6, Ann 3, and Jacob 9 months.

25th May 1878 (Hexham Courant)
Deaths
At Alston, 17th inst., aged 48, Hannah Dickinson, daughter of the late Thomas Dickinson, lead miner.
In 1841, Hannah Dickinson, widow, aged 48, son Robert, lead miner, aged 21, and daughter Hannah aged 10. Thomas Dickinson married Hannah Heslop 4th July 1812. In 1871 at the Butts, Alston Hannah Dickinson, widow, formerly dressmaker aged 78, and her daughter Hannah aged 39, innkeeper.
At Hudgill, 17th inst., aged 34, Robert Hymers, lead miner.
See 28th September 1878, and 12th March 1892

29th May 1878 (Teesdale Mercury)
DEATHS.
At Bryanston Square, London, on the 20th instant, aged 84. Octavius Wigram, Esq, formerly deputy governor and subsequently governor of the Lead Company. It seldom falls to the lot of provincial newspaper to record the death of a non-resident who, in his generation, has rendered more efficient aid in the promotion of the educational, religious, and material internals of the in habitants of the lead mining dales in the North of England. For about 40 yean Mr Wigram formed one of the annual deputations from the Company's Court in London, when he was invariably found devoted to the best interests not only of the shareholders, but of the numerous body of people connected with their established works, among whom his memory will long be cherished with grateful esteem.

1st June 1878 (Hexham Courant)
Deaths
At Alston, 25th ult. aged 16, Margaret Ann Peart, daughter of Mary Peart, deceased.

In 1871, Margaret Ann, aged 9 was living at Back Street Alston with her unmarried Aunt Ann Peart aged 35 a dressmaker.
At Whitehall, Nenthead, Mary Ann Pattinson aged 15 years, daughter of Matthew Pattinson, lead miner, deceased.

ALSTON
SCHOOL ATTENDANCE COMMITTEE

The Clerk said it would be well that the committee should consider what steps were to be taken with reference to the schools from which the London Lead Company had given notice of the withdrawal of their grants. The Chairman: There is no thought of having a School Board, is there? - Several Guardians replied in the negative, and thought a School Board was not required, as they apprehended little difficulty in supporting the schools voluntarily. - The Chairman: Then I suppose the schools will just have to take the course of the other schools. Mr J G Millican inquired if the schools could not be made self-supporting? Mr J J Millican thought Nenthead might, but he did not see how others, such as Tynehead could, as the population was so small, and the income from the schools could not easily be increased. The Lead Company grant to Nenthead last year was £176 16s. He thought, however, if the present schools could be got at a nominal rent, as he had a strong belief they could, they might still be made to pay without aid from the rates. Mr Bainbridge, with whom he had lately had some conversation, had recommended that the

committee should apply to the Lead Company's Court and endeavour to acquire the schools on as easy terms the schools might be had.
Not withstanding what was raised at the Schools Attendance Committee on Saturday, there appears to be a wide spread impression in the district that a School Board will be found necessary. Not only will the liberal grants of the London Lead Company towards education be sadly missed, but it is understood that our other principle landowners and mine proprietors contemplate withdrawing their grants. The contributions by the Lord's of the Admiralty, by Colonel Byng, and by Rodderup Fell Mining Company to Nent Hall, Tynehead, and Leadgate schools, respectively, may we understand, shortly be discontinued, and he will be a sanguine person who expects that all these schools can be considered without extraneous support.

Allendale

We understand the employees of W. B. Beaumont Esq. MP, at Allen Smelt Mill, have received notice of a reduction in their wages to the extent of twenty percent

Marriages

Alston Primitive Methodist Chapel, 25th ult. Mr Thomas Renwick, High Galligill, to Miss Jane Whitfield, The Brewery Alston.

Deaths

12th June 1878 (Teesdale Mercury)

MIDDLETON IN-TEESDALE

The Lead Company's School in Teesdale.

—We understand that the Lead Company, after fully discussing the question, have decided to withdraw the support which the various schools in Teesdale have hitherto received from this company. The company has done a great deal for education in the dale, chiefly, of course, for the benefit of the children of their own workmen. The present educational arrangement was established in 1818. But now as they say, that education has become a Government affair, they consider it no longer incumbent upon them to retain the responsibility of providing it. The Company's schools at Middleton and Nenthead therefore will have to be placed on a footing similar to that of other public elementary schools, and become self supported, whilst the subscriptions to the schools at Eggleston, Newbiggin. Forest, Harwood, Holwick, Lunedale, Mickleton, Romaldkirk and Cotherston will be discontinued.

The Death of Octavius Wigram, Esq., of London, haring recently been made known to the people of this dale, it is only right and just to convey the sentiments of the public in upper Teesdale, in the lead mining district, of the high esteem in which Mr Wigram was held by them, from his annual visits to this place over a period of forty years as a deputation from the London Lead Company, and subsequently governor of the same. He had formed a large circle of acquaintances, not deposing even to make his visits to the cottages of his humblest workmen. His name was known to every household, as was also his venerable appearance. He was ahead of the time in which he lived in the furtherance of education, so that when the new code of laws was passed in the Elementary Education Act of 1876, no improvements were required in the Lead Company's Schools, neither in the school accommodation nor in the efficiency of the teachers. Institutions which were calculated to elevate the moral and intellectual standard of the people at all times received his consideration and support. As to steering the affairs of the large and extensive works of the Lead Company, it is remarkable how they have been preserved from those vacillating impulses which characterize other companies. It is only necessary to add that the life and doings of Mr Wigram will ever be looked back upon with pleasing reflections by these who knew him.

15th June 1878 (Alston Herald)

Deaths

At Hill House, Alston, 11th inst., Robert Stagg aged 69 years.

In 1861, at Portland Square Plymouth, Robert Stagg (son of Joseph & Ruth Stagg) aged 52, landed proprietor, his wife Charlotte, aged 55, and son Robert aged 13, born, Ottery, St Mary's, Devonshire.

22nd June 1878 (Hexham Herald)

ALSTON
LOW WANWOOD MINE

This mine is being worked by the Alston Lime Company in conjunction with other gentlemen, we are glad to hear now gives every promise of being remunerative.

The vein which has just been cut promises a most abundant yield. Several pieces of ore, nine pounds and upwards have been extracted.

ALSTON
RURAL SANITATION AUTHORITY

(Referring to the London Lead Company withdrawing their subscription to the Company's schools the deputy Clerk said) As directed by the school attendance committee, he had written to the Lead Company's Court on the 3rd June, expressing the regret of the committee and the inhabitants of the district that they should have discontinued their support, stating the wish of the ratepayers to avoid the necessity for a School Board, and soliciting the use of their School House at a moderate rent. On the following day he received a letter acknowledging the receipt of his own. … He afterwards received intimation that the Court had decided to offer their school buildings for public sale.

There is no mention of this letter in the Court minutes but an earlier reference dated 23 April 1878 states:

Instructions left with Mr. Bainbridge by the deputation are confirmed and he is to carry them out without loss of time. (Notice for the schools to be discontinued, stop all school payments. This note pencilled in the margin of the minute book.)

29th June 1878 (Hexham Herald)

DUBBY SYKE MINE (DURHAM)

We had recently the pleasure of announcing the discovery, at this mine of a large promising looking vein well mixed with lead ore, and the matrix being chiefly Carbonate of Barytes. It is about 2 months since this discovery was made, and as it was cut in a rise from the adit level, about 100 feet from the surface, it was found impracticable to work the seam unless some means of ventilation were at once applied. The directors determined upon the most effectual means to communicate with the surface. For this purpose, a Fan Blast was procured and a rise through the vein proceeded with, and a shaft also commenced to be sunk from the surface to meet the seam. A communication was made between the two was made a few days ago and now the proper working of the seam will begin. ...

The veins of this property were formally worked at one fifth and one sixth dues or royalty; the dues are now one tenth. The mine has already a good cast road to the station, at Middleton Teesdale; and during the present summer, it will have the same to the station at Alston in Cumberland. ...

From the Mining Journal.

Deaths

Leadgate, Allendale Town, 14th inst aged 79, Mary relict of the late Thomas Martin.

In 1851, at Haggburn Gate, Thomas Martin, farmer of 90 acres & carrier, aged 53, his wife Mary 52, daughters Hannah, dressmaker, aged 26, Sarah 24, Isabella 14, and servant Robert Hogg, carter, aged 20.

Joseph Craig jnr. died 1st quarter 1919, aged 69.

Deaths

At Grassfield 2nd inst., aged 5 weeks, John James son of Isaac Richardson, lead miner.

See 11th April 1874, & 27th June 1874

6th July 1878 (Hexham Herald)

ALSTON

SCHOOL ATTENDANCE COMMITTEE

A letter announcing the intention of the London Lead Company to offer their school buildings at Nenthead for public sale, having been read, the Chairman inquired if nothing could be done by which these schools could be acquired on moderate terms. Mr Hutchinson thought it might be well to fix on managers who could treat with the Lead Company. If the sale was by auction then they might

bid. The Chairman said he saw no means of raising the money without a School Board. ... the Lords of the Admiralty had withdrawn the subscription of £10 from Nent Hall. ... Mr J. J. Millican undertook to write to Mr Bainbridge, the Company's head agent, and ascertain his opinion what was best to do.

Deaths

Leadgate Alston, 28th ult. aged 53, John Hymers, Lead Miner.

See 12th June 1875

3rd August 1878 (Hexham Herald)

Marriages

Nenthead, at the Primitive Methodist Chapel, 1st inst. Mr James Dickinson, to Mrs Ann Dryden, both of Nenthead.
See 17th November 1868, 11th February 1871, 29th April 1876, 6th June 1885 and 20th June 1885.

Deaths

Durban, Natal, Africa, June 19th aged 23, Thomas Hetherington, Joiner, late of Acomb and eldest son of the late Joseph Hetherington of Allendale.
In 1861, at Shield Ridge, Ninebanks, Joseph Hetherington, enginewright, aged 30, wife Margaret 35, children Mary 8, Thomas 6, Lucy 4, Joseph 1, and Jane 3 months.
Joseph died 3rd quarter of 1868, aged 37.
In 1871, at Shield Ridge, Ninebanks, Head absent, children Thomas Hetherington, Engine wright, apprentice, aged 16, Mary, dressmaker, aged 18, Lucy 14, Jane 10, Margaret 7, and William 4. In 1881, at Fore Street, Hexham, Margaret Hetherington, widow, house keeper, aged 56, daughter Margaret, dress maker, aged 17, and son William, draper aged 14.

In 1891, at Raby Street, Gateshead, William Hetherington, cabinet maker, aged 24, and mother Margaret Hetherington, widow, aged 66.

5th August 1878 (Northern Echo)

ELEMENTARY EDUCATION IN MIDDLETON-IN-TEESDALE.

A meeting of the ratepayers of this town- m ship was hold in the London Lead Company's Schoolroom on Friday evening last, to consider the steps necessary to be taken for the future elementary education of the children of the neighbourhood, consequent on the intended abandonment by the directors of the company of the substantial support heretofore rendered by them to the cause of education. The chair was occupied by Mr W. T. Bell, agent to the Duke of Cleveland. After a few preliminary remarks he called upon Mr R. W. Bainbridge, the superintendent of the Lead Company's works in the North, who read the correspondence that had been received from the company's Secretary in relation to the withdrawal of the support hitherto given by the company to the schools throughout their districts in Weardale, Alston Moor, and Teesdale. The company, at the instigation of Mr Stagg, erected in 1818 the school-room (now baths and washhouses), and for a period of sixty years had largely contributed to the cause of education throughout their extensive works. Their expenditure for several years past had been upwards of £700 per year, the charge to their workmen being at the nominal rate of one shilling per quarter, and to those outside their employment three shillings per quarter, with books, &c., found. Their school system was established long prior to the aid given by Government in the form of grants for educational purposes. Their arrangements were, and always had been, strictly of an undenominational character, the highest regard being paid to the rights of conscience of the parents whose children were undergoing education under their management. For a great number of years it was a rule of the company that the children should attend some place of worship on the Sabbath. It had also been an invariable rule in the company's concern that before any boy was taken into their employment, satisfactory proof should be forthcoming as to his educational attainments, attendance at day and Sunday school, and general character. In this respect several points in the present Education Act of the Government might be said to be a copy of the Lead Company's regulations enforced for a period extending upwards of half a century. This long-continued system has bell found to work admirably well, no complaint of any kind ever having been made against the slightest infringement upon the religious sentiments of any workmen or employee of whatever section of the Christian Church he might belong. The present school was erected in the year 1861, at a time when the company's lead mines were yielding large profits. The then governor of the court of directors, the late Mr Octavius Wigram, expressed the opinion of himself and colleagues that a more commodious and modernised building was desirable; and on a visit of the deputation from London about this time instructions were given that a school of a substantial character should be built, and he, Mr Bainbridge, was authorised to spend the sum of two thousand pounds on so laudable an object. A similar building in size and cost was also erected at their works at Nenthead, near Alston. These substantial proofs of the interest taken by the company in the educational welfare of these people, together with the handsome manner in which they have subscribed to outlying schools in the way of subscriptions and quarterage, have been highly appreciated, and their withdrawal will be equally deplored by all concerned.

Various causes have, no doubt, led to the notified intention of such withdrawal. Since the taking over of the educational arrangements of the country into the hands of the Government, and full provision made for the school training of every child in the kingdom, the company wish to be relieved of the responsibility of the charge in connection with the education in their several districts. Another reason; some few years ago the metalliferous mines of the kingdom became liable to the payment of poor rates, and which, as regards the Middleton township, their proportion is about one half, to the great relief of land and, house property. The wages paid by the company during the last few years have been good and regular, and the ability of their workmen to meet the education expenses of their families is better than it has been for some time. Considerations of this kind doubtless carry with them much weight and force. The schools at Middleton and Nenthead had for two years been under Government inspection. The former school's grant the first year was £220, and the second year £250; and the amount required to meet the school's expenses, after all sources of income were taken into account, was £40. He Mr Bainbridge had used his endeavours with the company's court to continue the present systema, with en increased charge of quarter pence to cover the above deficit, but had hitherto been unsuccessful. Mr Bainbridge was frequently cheered in the course of his address, and resumed his seat amid great applause. A desultory conversation took place as to the course to be adopted ender the circumstances, it being mentioned that the schools would pass out of the company's hands on the 24th inst. The following resolutions were passed without one dissentient:—1. That the best thanks and acknowledgments of the meeting be given to the directors of the London Lead Company for their past consideration and kindness in providing and supporting the cause of education in the district for the long period of sixty years, and that they be kindly requested to continue the same at an increased rate of one shilling per quarter per child, thus guaranteeing them against any financial loss in the future. 2. In the event of their not acceding to the above, then to ask them if they would grant the use of the school at a reasonable rental; and 3, If neither of the above requests were granted, what is the lowest figure at which they will be disposed to sell the school.—The Chairman and a committee were appointed to communicate with the directors, so that a reply might be had, if possible, at an adjourned meeting. The usual votes of thanks concluded the proceedings.

10th August 1878 (Hexham Herald)

ALLENDALE

We understand that Mr Beaumont's mines have got what is technically known as their bargains and that work will be resumed.

Deaths

West Allen, 25th ult. aged 34, Mr John Shield, *single, stone mason, Sinderhope.*

WEARDALE

QUARRY ACCIDENT AT FROSTERLEY.

A dreadful accident occurred at Bishopley Quarry, near Frosterley, on Monday afternoon, by which two men lost their lives and a third was seriously injured. About 2 o'clock in the afternoon a sudden fall of earth and stones took place burying two men and a boy. They were got out as quickly as possible, but so

injured that one of the men Joseph Ward, 35 years of age, died about 2 hours after being removed to his home; while the boy named James Peter Ward, 14 years of age, died within half an hour after the accident.

In 1871, at Frosterley, Joseph Ward, quarryman, aged 27, his wife Susannah 32, and daughter Mary A. 5 months.

In 1881, at Bridge End, Frosterley, Susan Ward, widow, aged 42, farmer of 12 acres, children Mary Ann 10, Martha Eliz. 8, and John Geo. 3 years.

MINE ACCIDENT IN WEARDALE

On Tuesday afternoon a man named John Ayton, 45 years of age, was crushed to death, by a fall of stone in the Whitfield Ironstone mine, Westgate, St John's Chapel. A block of stone weighing two tons, fell upon him and crushed him so terribly that it was found impossible to remove his clothes.

In 1861, at Bridge End William Douglas, iron miner aged 47, his wife Elizabeth 47, children Thomas, iron miner aged 24, John, iron miner aged 22, Sarah 18, Frances 14, Elizabeth 10, William 8, nephew John Aeyton iron miner aged 31, and nephew John Aeyton, blacksmith, aged 27.

24th August 1878 (Hexham Courant)

THE LATE MR JOHN MILLICAN, ALSTON.

The report of the death of Mr John Millican, of Church Croft Terrace, Alston, and which event occurred on Sunday morning last (18th), at his residence, aged 67 years, will we are assured, be received with feelings of deep and heartfelt sorrow, not only by his friends, but by the large numbers of people in the district of Alston. For some considerable time Mr Millican had been in failing health, but until a few days previous to his decease, he had been able to take carriage exercise. Previous to Mr Millican's resignation of his post as chief manager of the smelting works of the London Lead Company at Nenthead, and which post he had held for a very considerable time, his residence was at the village of Nenthead; on his retiring, however, from the duties he had so long and so efficiently discharged, some twelve or fourteen years since, he left Nenthead and took up his abode at Church Croft Terrace, Alston, but such was the hold taken of their hearts by the kindly interest he had ever evinced for the welfare of the mill workmen, and his correct and upright conduct and dealings with them in all the practical phases of their business connections, that they made the occasion of his retirement the time for presenting him with a testimonial that was intended and that did in some measure indicate their appreciation of his character, and testified to their sense of his goodness and worth. ...

John son of John Millican (Lead mining Agent) and Frances Tinniswood, born about 1811, baptised 18th July 1813, he married Sarah Liddle on 3rd January 1841, daughter of Joshua Liddle a miner. Sarah died 8th November 1843.

In 1851, at Nenthead John Millican, Widow, smelting agent aged 40, and his children, John George aged 9, and Frances Ruth, aged 7(died 25th June 1860, aged 16).

In 1861, John George Millican, aged 19, was a boarder, at Sandgate South, Penrith, working as attorneys clerk. In 1871, he was living at The Grove, Alston, aged 29, a attorney & solicitor, living with his wife Louisa J. (Stagg, married 21st July 1868 at the parish church Alston at the Parish Church, Louisa Jane daughter of the late Joseph D. Stagg Esq., of Middleton in Teesdale.) aged 27, and their son Ernest. John George acted as solicitor for

the London Lead Company, following the family tradition of working for that company.

Alston Municipal Cemetery

In 1861, at Nenthead, John Millican, smelting agent, aged 50, his wife Bridget 47, daughter Ellen 7, niece, Elizabeth S Walton13, and servant, Margaret Graham, house servant aged 17.
In 1871, at Church Croft Terrace, John Millican, aged 60, retired lead ore smelting agent & landowner, his wife Bridget (Richardson, married 23rd April 1852, at Alston) aged 57, and daughter Ellen, unmarried, aged 17. In 1881, Bridget and her unmarried daughter Ellen were living at McAdams buildings, Alston, in 1891, they were living at Croft House Terrace, Bridget died 5th May 1897.
Probate 1897, Bridget Millican of Croft Terrace, Alston, Cumberland, widow, died 5th May 1897. Administration Carlisle to Ellen Millican spinster. Effects £1638 9s 1d.
See 17th August 1844, 2nd September 1876, 5th April 1879, 8th February 1896, 26th June 1897, & 12th March 1898.

BLANCHLAND

FATAL ACCIDENT AT THE DERWENT MINES.

On Tuesday afternoon a sad accident occurred at the Derwent Mines near Blanchland, by which a young man named Robert Elliott, residing at Low

Whiteheaps lost his life. It appeared that three other miners, named respectively Elliot Jameson, John Wilkinson, and John Robinson, worked with the deceased in a part of the mine known as the Bottom Level of Jeffrey's Shaft. Being on the back shift, they only proceeded to their work about two o'clock in the afternoon, when arriving they immediately saw that one of the props supporting the "bunning" (*staging or landing, as found in shafts and also built across worked out stopes on which deads sometimes would be placed*) appeared somewhat bent. Before it could be repaired the roof, consisting of a large quantity of debris, fell down upon the unfortunate man Elliott, killing him on the spot. About 20 minutes elapsed before the body could be extracted, life being quite extinct. It was conveyed to Low Whiteheaps to await an inquest. The unfortunate young man is only 24 years of age, and has left a widow near her confinement.

At Hunstanworth, Durham, William lead ore miner, aged 54, his wife Margaret 53, children Thomas lead ore miner 26, Robert lead ore miner 17, John lead ore miner 15, and Michael 10. I suspect that Robert married Margaret Bell, of Hunstanworth (born about 1856) in 1873, Margaret Elliott, aged 25, lead miners widow, was living in Hunstanworth in 1881.

6th September 1878 (Newcastle Courant)

THE TEESDALE LEAD TRADE

Owing to the great depression in the lead trade, the London Lead Company have intimated to their superintendent their intention of discharging a large number of workmen, including pick men, mechanics, labourers and others. The precise number to be discharged is not yet known. The company one of the oldest in the United Kingdom, has long afforded employment for the great bulk of the inhabitants in Upper Teesdale. The announcement has cast quite a gloom over the neighbourhood. Some of the mechanics have already received their notices.

Marriages

At the Primitive Methodist Chapel, Alston, 31st ult. Robert Armstrong of Dykeheads, to Hannah Graham, Pry House.

I*n 1851, at Wellgill, Dykeheads, George Rutherford, lead miner, washer, aged 60, his wife Jane 50, children Isaac, lead miner, aged 22, Thomas, lead miner, aged 20, Hannah 12, James 9, stepdaughter Jane Vickers 27, stepson Jonathan Vickers, lead miner, aged 20.*

George Rutherford buried at Nenthead, 19th May 1857, aged 66.

In 1861, at Dykeheads, Thomas Rutherford, widow, lead miner, aged 30, children Robert 9, Rachel 4, Joseph 3, Isaac 2, and servant Hannah Armstrong, aged 25.

Baptismal records give the mother of Joseph and Isaac as Dinah; Dinah Rutherford of High Dykeheads, was buried at Nenthead13th December 1860, aged 24.

In 1871, at Dykeheads, Thomas Rutherford, lead miner, aged 41, his wife Hannah (Armstrong married , 23rd March 1862, at Nenthead) aged 35, children Robert, lead miner, aged 19, Rachel 14, Joseph 12, John 8, Thomas 7, and Elizabeth 3.

Thomas Rutherford, buried 24th July 1875, at Nenthead, aged 44.

Hannah Rutherford buried 27th August 1880, at Nenthead, aged 44.
In 1881, at Dykeheads, Robert Rutherford, lead miner, aged 29, his wife Hannah 29, children Thomas Will. 2, and Dinah 7 months; also brothers John Rutherford, lead ore washer, aged 18, Thomas Rutherford, lead ore washer, aged 17 (buried 30th March 1884, at Nenthead, aged 20), sisters Elizabeth Rutherford, house maid, aged 13, Mary Ann Rutherford 9, and Harriet Rutherford 6.
In 1891, at Lower Dykeheads, Robert Armstrong, lead miner, aged 39, his wife Hannah 39, children Thomas W 12, Dinah 10, John 7, Jane 4, and Isaac 2.
In 1901, at Wellgill, Robert Armstrong, lead miner, aged 49, his wife Hannah 49, children Thomas Wm, lead miner, aged 22, Dinah 20, John, lead ore washer, aged 17, Jane 14, Isaac 12, Watson 10, and Robert 6.
In 1911, at Mendrezo House, Villa Rd Consett, Hannah Armstrong, widow, aged 59, children Thomas William, coal miner, stone man, aged 32, John, coal miner, hewer, aged 27, Jane 24, Isaac, coal miner, putter, aged 22, Watson, coal miner, putter, aged 19, Robert, coal miner, driver, aged 16, grandsons John Hamilton Armstrong 4, and Robert Emmerson Armstrong 2.

Letters to the Editor

THE LEAD MINES

Sir, ... The suspension which prevails among the lead mines of Weardale, Allendale, and Rookhope, under Mr Beaumont, has been surprisingly quietly endured for two months. Of course, a part of the men are now being employed, but a greater number are unemployed, and those that are employed are being nearly wholly brought under what is called the "New System," which might be justly termed "payment by consideration." Under this system all the risks of the enterprise have to be borne by the men, who in consequence, if unsuccessful in finding ore, &c., frequently have to go for months with very little remuneration. Hence as miners are not capitalists, any sane person can see the consequence to these dales if the new system is finally adopted. Whoever was its author (Mr Beaumont said he did not want it) will also be the author of great loss to these dales. Under the old system the proprietor agreed to give his employees 15s per week, the unfortunate as well as the fortunate, properly following their employment, and they shared in the hazard of the enterprise, because if they did not realise it, they were indebted to the employer. The price of lead, it must be admitted, is somewhat low, but wages have been, and are correspondingly low. It is to be hoped that Mr Beaumont will not reward his lead miners with expatriation, after a life time of patient industry. ...

10th September 1878 (Carlisle Journal)

SHOCKING OCCURRENCE NEAR ALSTON

A sad accident happened at Alston on Thursday, whereby two brothers named respectively Thomas and Hugh Todd, and a son of the latter, named John Todd,

lost their lives. The two brothers were yeomen living on adjoining estates at Ayle and White Lea, and were engaged in burning lime assisted by the son a young man of about 20. It appears they had lighted the kiln on the previous day, and filled it to the extent of some fire or six feet. On the following morning it is conjectured that one of the unfortunate men had descended into the kiln for the purpose of levelling the stones, as is commonly done by lime burners. It is supposed that having been affected by the escaping gas the others had descended to his assistance, and were unable to ascend from the effects of the gases. The accident was not discovered until about one o'clock, when, the husband and son not having returned to dinner, the wife of Hugh Todd proceeded to the place, and was horrified to find the three men stretched lifeless in the kiln. Assistance was procured, and the bodies were drawn out, but life had apparently been extinct for some hours. The occurrence has cast quite a gloom over the neighbourhood.

In 1871, at White Lee, Kirkhaugh, Thomas Todd, widower, landowner of 100 acres, aged 83, sons, Thomas, farmers son, aged 60, Joseph, widower, farmers son, aged 1, William, farmers son, aged 49, and servant, Isabella Varty, aged 28.

In 1871, at Ayle, Kirkhaugh, Hugh Todd, woodman, aged 43, his wife Mary aged 46, and son John 13. In 1881, at Ayle, Thomas Walker, farmer of 230 aces, his wife Jane 37, son William, farmers son, aged 22, mother in law, Mary Todd, widow, retired farmer, aged 56, and wifes son, William Lee 10.

10th September 1878 (Carlisle Journal)

THE WATER SUPPLY OF ALSTON.

The following report relating to a scheme of water supply was laid before the Alston Board of Guardians at their last meeting: —

“Gentlemen,—I beg to submit to you my scheme for supplying water for drinking and domestic purposes to the town of Alston, with plans in illustration of it. At the present time water is conveyed to the town from a spring in the Springfield meadow, situated on the north side of the Garrigill Road, about 700 yards from the Townhead by means of a 3 inch stoneware socket pipes (enclosed in a dry culvert) as far as a tank at Back-o-Burn, from whence it is supplied to six wells in the town by 1½ inch and ¾ inch lead pipes. There are also two wells or troughs beyond the Townhead supplied by other sources. A stoppage place some time ago in the lead pipes near Back-o-Burn, and on examination it was found that the pipe passed over the bottom of a square culvert sewer, and that large stones which had been impelled down the sewer in stormy weather had crushed the pipe. At Grisell’s Lane the lead pipe passed through the back water of a sewer and for some time impure matter found its way into the pipe through a hole. In some cases where the pipes pass through coal ashes chemical action has taken place and the pipes have been reduced in thickness, thus endangering the purity of the water, for in the event of the flow above the weak places from any cause becoming stopped a vacuum is produced in these pipes and impure water from the outside naturally forces its way in. I mention these facts to show the dangers in which the townspeople are exposed through the present method of distributing water. I would say, however, that where the lead pipes pass through clay they are found to be in good condition. The number of wells now existing is not sufficient for the requirements of the town, more especially when the difficulty of carrying water in vessels up steep streets is

taken into account. My scheme is to lead water from the spring in Springfield Meadow which now supplies the town (marked A on plan) by 3 inch glazed stoneware socket pipes into a tank 10 feet square and 5 feet deep, to be situated at the western boundary of the field. This spring was gauged some time ago, and was found to yield over 100 gallons of water per minute, or six times as much as would be required for domestic purposes of the town allowing 15 gallons per head of the population per day. As however, in the event of a fire taking place a large quantity of water would be required to maintain a continuous flow through the hydrants, I propose to increase the supply by conveying water from the spring marked B on the plan into the tank in the manner shown. The spring is a copious one, and is used to supply a trough at Bankfoot. The water from these two springs would be delivered through a 4 inch main into a tank opposite the Grammar School 9 feet long, 2 feet wide, and 4 feet deep. The object of this tank is to reduce the head of water from there to the lower parts of the town, and thus lessen the pressure in the service pipes. The water will be conveyed to all parts of the town by 4, 3, 2 ½, and 2 inch cast iron socket pipes, jointed with lead and spun yarn, and coated with Dr Angus Smith's patent solution to prevent corrosion. I provide for the erection of 14 wells or fountains distributed in the following manner, viz. — 3 flush handle plate fountains at the Monument, opposite King's Arms Inn, and at the Market Cross; 2 circular wall fountains at Storey's Well and Back-o-Burn; 9 pillar wells with brackets for buckets, at Bankfoot, Townhead, Grissell's Lane (near Greyhound Inn), Lower Butts Aqueduct (near church Terrace), Blue Bell Inn, and Townfoot. The fountains I recommend for adoption are "Kennedy's Patent Waste Preventing Wells," supplied by the Glenfield Iron Company, Kilmarnock, in accordance with the plans supplied herewith, I provide for 15 hydrants (for extinguishing fires) to be placed in suitable positions throughout the town. I have gone minutely into the question of cost and find that all the works hereinbefore mentioned can be executed for £640. From this sum it is reasonable to expect that £50 at least may be deducted to allow for the value of the existing stoneware and lead pipes and fittings. No doubt many owners of property will desire to have water in their houses for baths and domestic purposes, and in the event of my scheme being adopted it would be well for all those persons who wish for service pipes to be put into their houses to have the work done when the mains are being laid, in order to save the cost of opening out and tapping the mains after they have been laid and the trenches filled in. The providing and laying of the services would have to be done at the expense of the owners or occupiers of the houses supplied, and the mains and branches are so laid out that the work can easily be done. The Workhouse is at present supplied with a super abundance of water from a spring in the Springfield Meadow by a line of 3 inch earthenware socket pipes which also supply five drinking troughs on the way. My estimate therefore does not include any provisions for this building, although I have shown on the plan how it can be supplied with water from the 4 inch main if thought desirable. For extinguishing fires the town should be provided with a hydrant stand pipe, 120 yards of 2 ½ inch tanned canvas or linen hose, a reel on wheel and axis, with tool box, telescopic ladder, and all fittings necessary thereto, which can be got for about 21 guineas. As only 2 perches of ground are required for the tank in the Springfield, the land question becomes of so little moment that I have taken no account of t in my estimate. The following is a copy of an analysis of a sample

of water from Springfield spring by the public analyst for the boroughs of Cardiff and Newport, Mon., expressed in parts per 100,000 with his report thereon: —

"Total solid impurity	26.000
Albuminoid ammonia	.003
Free ammonia	.0015
Nitrogen as nitrates or nitrites	.024
Previous sewage contamination	0
Chlorine	.86
Sulphates	very moderate
Magnesium salts	very moderate
Temporary hardness 15-9 Permanent hardness 6-5	22. 4 total
Remarks	perfectly clear

"This sample is a water of great purity. The solid matter consists almost entirely of carbonate of lime, and the less desirable mineral salts which are found in spring and drinking waters generally are present in minimum quantity. It contains only two traces of organic matter, and the water is in every respect well adapted for a town supply. The greater portion of the hardness be removed by boiling, and it is then well adapted for domestic purposes.

"(Signed) J. W. Thomas, Fel. Inst. Chem"

"I would say in conclusion that cast iron pipes can now be got at a very low price, and that lead also is cheap, the present would seem to be a very appropriate time for the works to be carried out.

"I am gentlemen, your obedient servant

"(signed) "G. A Lundie

"Associate of the Inst. of Civil Engineers, Member of the South Wales Institute of Engineers.

"Cardiff, September 5th 1878"

14th September 1878 (Alston Herald)

SAD ACCIDENT NEAR ALSTON.

A sad accident occurred on Thursday, at Rodderup Fell, Alston, whereby a boy named Joseph Bell, about 11 years of age, who is employed at the washing, he being in the mill thought he heard a queer sound in an adjoining room, and in the act of running to ascertain the cause got his foot betwixt two rollers which nearly severed his foot from his leg, and so great were the bruises that his leg has since been taken off just below the knee.

In 1881 at Over Burn, Alston, Hannah Bell, unmarried, laundress, aged 41, children Joseph, tailors apprentice, aged 14, Isabella 10, and Robert 4.

21st September 1878 (Hexham Herald)

NENTHEAD AGRICULTURAL SHOW

Nenthead may be now under a cloud; her mines are unproductive, extraneous aid has been withdrawn from her schools; and we understand that hence

forward many of the hardy miners will not find work in the district, but there is no murmuring, nor repining, no rattening, nor black legging, no indignation meetings to howl at the masters and glorify the men; the dalesmen are too shrewd; no trades union flourishes in Nenthead; but a cattle show does.

28th September 1878 (Newcastle Courant)

THE LEAD TRADE

The London Lead Company are about to reduce considerably the number of leads miners they employ at Nenthead and other mining stations in the hill districts in the west of Durham and Northumberland. The mills belonging to Mr W. B. Beaumont, M.P., at Alston and Allenheads are slack, and at the present time the importation of lead into the Tyne are very limited indeed.

28th September 1878 (Hexham Courant)

Marriages

At the Parish Church Alston, 21st inst. Mr Vipond Parmley, Garrigill, to Maria Davidson, Alston.

in 1861, at Mount Pleasant, John Davidson, lead miner, aged 35, his wife Jane aged 35, daughters Mary Ann 11, Rachel 9, Elizabeth 6, Jane Sarah 3, and Maria 1. In 1871, East Nattrass, John Davidson, farmer of 47 acres, aged 45, his wife Jane 45, daughters Elizabeth 16, Jane S 14, Maria 11, Susanna 9, Frances 6, and Aptavious 2.

John Davidson died 2nd quarter 1874, aged 48.

In 1881, at Nenthead Rd., Jane Davidson, widow, chapel keeper, aged 55, daughters Jane Sarah Bell, coal miners wife, aged 23, Fanny 17, Aptavius 12, and grandson William Bell 2.

In 1861, at Cowper Dykeheads, Garrigill, James Parmley, lead miner, aged 52, his wife Ann 45, children Thomas, lead miner, aged 22, Mary A 19, John, lead miner, aged 14, Vipond 11, and Margaret 8.

James Parmley died 4th May 1865, aged 56. See 16th May 1865

In 1871, at Hill Top, Garrigill, Ann Parmley, widow, seamstress, aged 56, son Vipond, lead miner, aged 21, and daughter Margaret, seamstress, aged 18.

In 1881, at Trumpet Terrace, Egremont, Vipond Parmley, iron ore miner, aged 31, his wife Maria 21, and son John 2.

In 1891, at Dickinson Rd, Darlington, Vipond Parmley, labourer in bridge yard, aged 41, his wife Maria 31, son John 12, and mother Ann Parmley, widow, aged 78. In 1901, at Carlton St, Darlington, Vipond Parmley, chipper iron & steel, aged 50, his wife Maria 42, and son John, printer compositor, aged 22.

Vipond Parmley died 1st quarter 1908, aged 57.

In 1911, at 65 Neasham Road, Darlington, Susannah Ward, widow, aged 48, sister Maria Parmley, widow, aged 51, daughter Maud Little, milliner, aged 22. See 11th October 1890

At the Wesleyan Methodist Chapel, Alston, William Hymers to Isabella Walton, both of Hudgill.

In 1881, at Hudgill, William Hymers, farmer of 33 acres, aged 28, his wife Isabella 22, sons John 2, Joseph 9 months , and lodger William Walton, widow, indoor farm servant, aged 86. In 1991, at Hudgill, William Hymers, coal miner, and farmer, aged 38, his wife Isabella 32, children John 12, Joseph W 10, Thomas P 8, Elizabeth 6, Charles 4, Mary Ann 2, and Robert W 7 months. In 1901, at Hudgill, William Hyners, farmer, aged 48, his wife Isabel

42, children John, coal miner, aged 22, Joseph, coal miner, aged 20, Thomas P. farm help, aged 18, Elizah 16, Charles 14, Mary A 11, Robert W 10, and Wilfred 8.
William Hymers died 2nd quarter 1908, aged 57.
In 1911, at Hudgill, Isabel Hymers, widow, farmer, aged 52, children Joseph William, coal miner, hewer, aged 30, Thomas Pratt, lead miner, aged 28, Charles, lead miner, aged 24, Mary Ann 21, Robert Walton, lead miner, aged 20, Wilfred, working on farm, aged 18, and domestic servant Mary Johnston aged 18.
See 25th May 1878, and 12th March 1892

Deaths

At Whitehall, Nenthead, 22nd inst, aged 76, Robert Barron, lead miner.
See 22nd February 1873, 15th September 1877, 2nd March 1878, and 19th June 1880.

28th September 1878 (Hexham Herald)

TEESDALE

The worst anticipations have been realised in connection with the depression in the lead trade in Teesdale, over one hundred miners and smelters having just been discharged by the Superintendent of the London Lead Company, on the letting of the quarterly bargains. It is also stated on good authority that the Company are about to cease exploring for lead on the Royalties, it being their determination to work the existing veins, with a diminished staff. In several parts of Weardale, and also Upper Teesdale, the outlook is gloomy. Many of the young men are about to emigrate.

28th September 1878 (Alston Herald)

NENTHEAD
BAD NEWS.

We understand, the London Lead Company intend closing their Cashwell Mine, and also contemplate materially reducing the number of workmen at Nenthead.

4th October 1878 (Newcastle Courant)

ALSTON.

Alston is best described as being similar to Mr Pickwick's impression of Park Street, Bath; it is very much like the perpendicular street a man sees in a dream, and which he cannot get up for the life of him. It is situated on the declivity of a steep hill, just at the confluence of the rivers Neat and South Tyne, and almost hemmed in by towering bleak and desolate fells. There is one long, irregular main street, roughly paved and partly flagged, but the houses appear to have been stuck down anywhere; many of them are of great age, some being dated 1629. In the market place is a quaint old covered-in building, called the Market Cross, very much out of repair, so much so that the gas lamp on the top cannot be lighted, the quadrangular roof being almost broken in. It formerly bore an Inscription stating that it was erected by Sir William Stephenson, Bart., who was born at Crosslands, in this parish, and Lord Mayor of London, 1764.
Architectural ornaments Alston can boast of none save a plain-looking Town Hall, opened in 1858, and which contains a news-room, library, a board room for meetings, and a savings' bank. The church dedicated to St. Augustine is

hidden in the back slums. It was restored, in fact, rebuilt from the foundation, in 1870. It consists of chancel, nave, aisle, and tower, and contains a bell brought from Dilston Castle, but which was cracked some little time ago when ringing at a wedding. The churchyard is closed for interments save for those who have vaults, but there is a neatly laid out cemetery at the west end of the town. There are several respectable shops, a brewery; a large cloth factory, giving employment to a number of men was burnt down a few months ago. There are several inns, and two very good hotels—the Blue Bell and the Golden Lion—both close by the railway station. Alston is well supplied with water by pants situated in different parts of the town, and which flows from a spring about half a mile distant. Gas is in the streets and houses. The Mechanics' Institute, in addition to a good library, possesses a cabinet of minerals and curiosities. The Grammar School was rebuilt by subscription in 1828. Saturday is the weekly market day, and fairs are held on the last Saturday in March, the last Thursday in May, the Friday next before September 27th, and the first Thursday in November.

Alston, in spite of its unpromising surroundings, is a pleasant and healthy place, and it is grossly libelled by the statement in a well-known handbook that it "is a dreary and desolate district." It is vastly different now to what it was at the close of the last century when a traveller described it as "a small market town meanly built, situated at the declivity of a steep hill, inhabited by miners. The fatigue of passing bad roads was in no wise alleviated by the scene which presented itself here. But in a narrow valley over which mountains frowned with a melancholy sterility and nakedness, the wind tempestuous, impending clouds stretching forth a dark and disconsolate curtain over the face of morning, rain beating vehemently against the windows, which were not able to resist the storm, a few trees standing near the inn tossed by the heavy blast which howled down the valley. Such were the objects which presented themselves to us at Alston."

We might be bold to challenge Derbyshire or even Cornwall to produce so peculiarly a wild spot as Alston Moor, where all that the earth produces is from its bowels, and where the people are so generally subterraneous. It was in those days almost inaccessible, few people cared to visit it, and those who did venture returned with dismal accounts of its desolateness. But the old market town, since then, has assumed a more cheerful and civilised appearance. It is no longer difficult of access; its rough broken roads have disappeared, and have given place to good turnpike roads.

In 1823 an Act of Parliament was obtained for making new roads from Alston to Penrith, Brampton, and Hexham, all of which were completed under the superintendence of Mr McAdam. The first stage coach, called the Balloon, that passed through Alston commenced running from thence to Penrith and Hexham along the new road in October, 1828. A branch line of railway, opened in 1852, now connects Alston with the main line between Newcastle and Carlisle at Haltwhistle.

The old town has been variously styled Alderston, Aldeston, Aldstone, Aldston, but it is now always designated Alston. It is a very good centre for excursions, and the various lead mines in the district will amply repay a visit. The main source of the prosperity of Alston must be ascribed to the lead mines; there are upwards of sixty in the parish, and it is stated that the mines in the neighbourhood of Alston and Weardale yield some 20,000 tons of lead per annum. Copper ore has frequently been found combined with lead. Amongst

other minerals got in the mines may be mentioned cobalt, phosphate, and sulphate of lead, zinc, tessellated ore, and pyrites of Iron. The lead ore got in those veins containing copper is generally very rich in silver. The chief portion of the minerals in the Alston district belong to the Commissioners of Greenwich Hospital, Leases are granted and the royalty consist in one seventh to one tenth of the produce of the mines. The yield of lead from the ore is about 70 to 75 per cent. The most prevalent stone in the mineral veins is spar, some specimens of which are very beautiful, displaying a variety of colours.

Alston Moor, that bold rugged part of Cumberland, separating Northumberland from Westmoreland, so well-known for its mines, mines which have been worked since the days of Norman Kings was once the property of the unfortunate Derwentwater family. In the 21st of Henry VI, it was held by Thomas Whitlow, who granted it to W. Stapylton and Mary his wife with whose daughter it passed in marriage to Sir William Hilton of Hilton, whose descendants possessed the Manor of Alston or Alston Moor, till the reign of James I., when it was sold to Francis Ratcliffe of Dilston in Northumberland, and continued in that family until the attainders of the Earl of Derwentwater, when with all the rest of the valuable, estates it was confiscated to the Crown, and then came into the possession of the Greenwich Hospital Commission. Between 1611 and 1616 the lands were let out upon leases for 999 years by Henry Hilton,

Whether Alston played an important part in the annals of the remote past is doubtful, but the Norman *(sic)* road called the “Maiden Way,” passed a little to the west of the town; its remains together with some camps are very distinct in several places. There St. Augustine and his forty companions are said to have come, and by the power of the cross, which they erected on the very summit of the mountain, they expelled all the fierce demons and changed its name from the Fields Fell to the present appellation of Cross-fell.

As previously mentioned, Alston gave a Lord Mayor to London, a gentleman, too who it is said never forgot his fellside home, nor the want of the out of-the-way town hemmed in by the steep mountains of Hartside and Cross-fell, but its greatest ornament was the late Hugh Lee Pattinson, who here in his native place discovered a new process of refining lead and extracting the silver. Then there was a Mr Jacob Walton (and by the way almost every other person in Alston is a Walton) who was connected with the lead mines and displayed a great amount of interest in the welfare of the miners. To his memory stands a marble monument at the comer of the street leading from the railway station. The late Mr Hugh Lee Pattinson is said to have married the prettiest girl around Alston, and her name was Phoebe Walton. Of her parents Dr Lonsdale says they were a hearty lot of fellsiders, were small landed proprietors, and long held the estate called “The Nest” Phoebe’s grandfather, John Walton, was a liberal minded jolly personage, who took a leading part in all the sports and fun of Alston Moor, and was known as “the old Cock of the Nest.” He held large shares in mines, and when he and his partners found a good vein of ore, they brewed a peck of punch in its honour, generally on the Saturday or pay nights of the miners. Unfortunately, this jollification of the laird’s was apt to extend over Sunday and Monday— nay, Tuesday sometimes witnessed his “homeward bound” —and then he feared to encounter the ruffled feathers of his “Nest” mate. Approaching very cannily the threshold by a small flight of steps, he would open the door of the house and cry “Mary, lass,” then throwing his cocked hat

into the kitchen, where he expected his spouse Mary would be sitting in the "doldrums," would ask, "is that welcome, Mary?" If there was no response after repeating the question, the silver-headed stick followed the cocked hat, and "Is that welcome then, Mary?" On the first trial of this mode of conciliation on the part of the "Old Cock," who had absented himself for three days, Mary was in no melting mood, and sat silently. Finding no welcome, jolly John picked up his head-gear and stick and returned to Alston for another carouse. This was a home lesson not lost on Mary, who, being appealed' to on similar occasions, would call to John, standing behind the door, "Come in wi' thee, thou ne'er- dee-weel, and hae some tea;" and all' was straight again.

A great event in former days was the arrival of the pay money in Alston. The miners were then paid once in three or six months, and the money, in gold and silver, was brought from Newcastle, protected by a strongly armed force, which was necessary across the wild hill country. There are some exceedingly pretty and interesting walks in the neighbourhood of Alston. There are quiet, picturesque scenes up the Nent. There are wide expansive views from Hartside, that lofty mountain fell rising above the Penrith road to the height of some 1,312 feet. Near it is Melmerby Scarr, which was once so intermixed with lead ore, that the rays of the setting sun falling upon it caused it to be seen at a great distance. Good pedestrians can climb to the top of Crossfell, or explore the source of the Tyne and the Tees.

5th October 1878 (Hexham Courant)

HAYDON BRIDGE SHOCKING DEATH OF A MINER AT STONECROFT.

On Wednesday, at noon, a shocking fatal accident occurred at the Stonecroft and Greyside lead mines near Fourstones, to a man named Robert Herdman, an underground banksman about 56 years of age. It seems that about half - past twelve o'clock on Wednesday Herdman was working in the 30 fathom level, banking, the men engaged in drawing up "deads" or refuse from the lower seam. He put his head over the shaft to call down to the men below to send up small "deads," no round. Just at that moment the cage descended striking him violently on the back of the head, and throwing him down to the bottom, a distance of about twelve fathoms. The top of the poor fellow's head was nearly cut away, and death must have been instantaneous. The deceased who was a steady, religious man, was just singing the hymn, "Jesus lover of my soul," a moment or so before calling to the men below, and remarked to the man who was working along with him that that was the hymn he liked best. He paused in his singing, called to the men below, and the next moment he was struck by the cage, precipitated to the bottom and killed. The deceased resided at Haydon Bridge, and his remains were removed to his home.

The inquest

The verdict was Accidental death, but the Company were criticised for not having a fence across the shaft, this being a breach of the Metalliferous Mines Regulation Act 1872, 35 and 36 Vic. rule 23, section 7; "by which it was provided that the top and all entrances between the top and bottom of every working or pumping shaft shall be properly fenced, but this shall not be taken to forbid the temporary removal of the fence for the purpose of repairs or other purposes when proper precaution is taken." The coroner did say that if there had been a fence it would not have prevented the accident.

In 1871, at Pandon, Haydon Bridge, Robert Herdman, Banksman, aged 49, born Chollerton, Northumberland, his wife Ann 39, children Dorothy 15, John 13, Thomas 10, Robert 9, Sarah A. 6, and William 3

Deaths

At Holmfoot, Nenthead, 30th ult., aged 53, Ann, wife of Robert Armstrong, lead miner.

Robert Armstrong was buried at Nenthead 13th November 1879, aged 57. See 15th November 1879 & 19th May 1883

NENTHEAD

SCHOOL MEETING

The London Lead Company have discontinued their support to the Nenthead school, a meeting was convened on the 28th ult. to take into consideration the best means for meeting the emergency. We understand the Company are willing to let the school for 12 months, and thus a School Board for the present is averted. The Company have generously conducted the school for fifty years, the workmen contributing 1s per quarter for each child, and others not belonging to the works 2s 6d per quarter. The new engagement will place children on an equality, with stationery, slates &c. An influential committee was appointed by ballot comprising, Messrs J. J. Millican, Jonathan Walton, Tinniswood Millican, Jacob Walton, Dr Don Bavand and Anthony Bolton.

MEDICAL UNION

The annual meeting of the Lead Company's Workmen's Medical Union for the Alston District was held in the Lead Company schoolroom on Saturday evening last.

NENTHEAD LEAD WORKS

DISMISSAL OF FIFTY HANDS

The usual quarterly bargains in connection with the London Lead Company works in Alston Moor, were let at Nenthead on Friday. Previous to the time of letting new bargains, it had become known that a reduction in the number of workmen would be made, and some uneasiness as to the extent and individuality of the reduction had been felt. Friday however set the matter at rest, when about fifty of the men were informed that there was no more need for their services. The men dismissed we understand, were many of them from Allendale, who had only been in the employ of the Lead Company for a short time, and others were men that had in the prosperous times of the past left the lead mines for the coal mines and other work, but who had, after the ebb of the tide of prosperity in pit work returned to the mines, and were not considered to have the same claim as the other workmen who had stuck to the works. One

thing we here of in connection with the matter and which we think reflects great credit on the company, is that the men dismissed have the privilege of going into the old workings, if they consider that they can find sufficient ore to remunerate them for their labour, and it is to be hoped that the men that are resident in Nenthead and neighbourhood, who are among the number dismissed will take advantage of the offer, and that they will meet such success as to tide them over the present crisis, or until they can find employment elsewhere.

NENTHEAD

School Meeting. The London Lead Company having discontinued their support to Nenthead school, a meeting was convened on the 28th ult., to take into consideration the best means of meeting the emergency. We understand the Company are willing to let the school for 12 months, and thus a School Board for the present is averted. The Company have generously conducted the school for 50 years, the workmen contributing 1s per quarter for each child, the others not belonging to the works 2s 6d per quarter, with stationary gratis. The new arrangements will place the children on an equality with respect to quarterage, 2s 6d per quarter, with stationary gratis. ...

ALSTON

RURAL SANITARY AUTHORITY.

The quarterly report of Dr Carson, Medical Officer of No. 2 district was read. The district was generally healthy and there was no epidemic disease. There had been a case of Typhoid fever at Silly Hole, but precautions had been taken to prevent its spread. The inhabitants of Hillersdon Terrace, Nenthead, were in the habit of placing ashes and other refuse against the walls of their houses, the heaps were unsightly, and might be obnoxious to health. He recommended that they be removed oftener. Mr J. J. Millican said the Lead Company removed their heaps once a week.

16th October 1878 (Teesdale Mercury)

LEAD MINING IN ALSTON MOOR. —Lead mining prospects in this district are exceedingly gloomy. Several mines are being abandoned altogether, and at others the number of men employed it being seriously reduced. At Cashwell, where a short time ago 40 or 50 hands were employed, the number has been reduced to half a dozen. We understand that last week the London Lead Company discharged 50 men at Nenthead, and 13 at Garrigill. The same company has greatly reduced the number of its employees at its Teesdale mines. We believe the whole of the lead raised at the W. B. lead mines is being stored, in the hope of a rise in prices.

18th October 1878 (Newcastle Courant)

ALSTON TO WEARDALE AND BACK

(BY A RAMBLER.)

A lovely autumn morning with a fine bracing breeze blowing, and a bright sun overhead in an almost cloudless sky, as leaving Alston I tramped along the good turnpike to Nent Head. The road is a pleasing one, as it winds through amongst the hills, and keeping, in some places, closely by the side of the river Nent; passing neat villas with their gardens and small plantations; white washed

houses and cottages with in many cases their windows filled with geraniums and other flowers; cultivated fields with stone walls piled up similar to those seen in the Peak district in Derbyshire; while away from the verge of cultivation stretched the wild moors all glorious in their bloom of heather.

Nent Head is a scattered, irregular sort of village, five, miles from Alston, situated at the foot of Kilhope (a hill towering high into the sky), and at the source of the stream from which it takes its name, and is almost closed in by the surrounding hills. The church, a modern erection, is dedicated to St. John, and I was told a small market is held on Thursdays. Many of the shopkeepers apparently deal in peculiar mixtures, one sign-board announcing its owner as a jeweller, blacksmith, grocer, saddler, and general dealer. But there is no mistaking the kind of industry carried on in this out-of-the-way village, for down by the side of the stream is an immense heap of mine refuse, which is daily being added to. Arriving at the extensive works belonging to the London Lead Mining Company, I found Mr Atkinson, the courteous manager; and on my expressing a wish to see through, he at once told a man off to show and explain to me the whole of the working. To an outsider it appeared a very simple though most interesting process. The ore, or as it is termed in the district, “yure,” with all the spar and other things adhering to it, just as it comes from the mine, is forced through a huge cylinder, from which it proceeds crushed into small particles; it is then forced into sieves, and is “jiggered,” or perhaps filtered will explain the meaning better, the lead being heaviest remains at the bottom of the sieve, while what is not pure lead or mixed either with spar or other ores is sifted out and passed into a smaller cylinder, where it is re-crushed and sent on to another row of sieves, until nothing remains but what appears to be a quantity of mud or sand; but even this is washed over and over again, until every particle of lead is abstracted from it. The whole of the working is carried on by water, and it has very often to be brought a considerable distance. The water required for Nent Head is stored in large reservoirs on the surrounding hills. These works and mines give employment to a number of men, but only last Friday at the quarterly bargains some 50 hands received notice of dismissal. They were, however, informed that they could go into the old lead works in search of ore if they considered it would be remunerative. I contrived to have a few minutes’ chat with Mr Atkinson; he was rather astonished at my tramping about the country; there had been no pedestrians in the neighbourhood since Lord Camperdown tramped the whole district a few years ago. When he visited Nent Head he was accompanied by the agent from Alston, who was fairly tired out, and could not understand the pleasure or necessity of so much walking. His Lordship had gone over Crossfell, taking Tyne Head on his way to Nent Head, which would certainly be rather a heavy tramp. Making inquiries as to public institutions in the village, I found that some years ago the lead mine proprietors established a school for the miners’ children; they opened a reading room and wash-houses, and appointed a surgeon; so some little credit is due to them for taking into account the welfare of the miners and their families.

Bidding adieu to Mr Atkinson, I made up Kilhope, and was then crossing the northern portion of the old British Alps, the Pennine range, or backbone of England, extending from Derbyshire to the extreme north of Northumberland. The aspect of the surrounding country was decidedly bleak and sterile; wide expanses of heathery or bare moorland, with huge fissures gaping on the slopes; piles of peat; broad sheets of discoloured water stored for the lead

works, with here and there a solitary white house with neither garden nor fence round it, only adding to the gloomy character of the scene. On reaching the top of the hill I turned to my left and soon arrived at the cross where three counties meet, then returning to the turnpike I made a hasty descent and presently arrived at Kilhope Mine. This is one of the few mines said to be paying at present. I found a number of men and boys at work, and a great pile of lead was lying in the yard waiting to be removed. On inquiry, I found it was conveyed by an engine (the wheel marks of which were visible on the road) to Allenheads. The road now became anything but dull—cottages and houses were close together, men were working on the roads, either mending them or breaking stones, and numbers of people were moving about, any quantity of tramps and people leading a nomadic life, of whom I may have something to say in a future paper. Passing through Lane Head, where, through the slack times, the miners being almost moneyless, the wayside public house called the Travellers' Rest was closed, the sign-board flapping lazily in the wind. Then through Heathery Cleugh and Cow's Hill, the latter a village with a good sized and respectable inn, from whence an omnibus runs to and from Stanhope, the nearest railway station, distant some sixteen miles. Continuing down the road which keeps close by the fast running stream, I soon arrived at Wear Head, a small village, most pleasantly situated, although lying rather low, just at the junction of the Burnhope Burn and Kilhope Burn, the united water afterwards bearing the name of the River Wear. There is a good view of the confluence of the streams from the bridge which spans the Wear. I found a very nice and comfortable little inn, with a chatty, good natured landlord. Returning to Heathery Cleugh, I endeavoured to obtain admittance into the church, but did not succeed, as I was unable to find the key, no one appearing to know where it was kept. The church, dedication of which I fancy is unknown, is a plain modern stone building, almost barn-like in its appearance, and is, I am told, very badly attended, as nearly every miner fancies he has a "call" to preach, and holds forth in his own house to a select few. If ever I am in the neighbourhood over a Sunday. I shall certainly make a point of attending one of these meetings. Further on the road I overtook the schoolmaster, and at his kind invitation I accompanied him to the Board schools. They are lofty, well ventilated, and comfortable. He told me that many of the children come great distances, and in all weathers; even severe snowstorms did not prevent their attendance, many of them coming over the dreary and trackless fells. Some 200 attend the schools. The children are tractable, remarkably civil and courteous, and vastly different from the wild rough children of the outlying districts of Northumberland. Continuing on my way, I overtook a number of miners leaving their work and returning home. They commence at 7 a.m. and finish at 2 p.m., strong, hardy, healthy, well-formed men most of them were, "with large and sinewy hands," and muscles "strong as iron bands." On questioning them, I was astonished to find that many of them were only eighteen or nineteen years of age, and yet, owing to their unhealthy occupation, very few live to any great age. They told me that the lead trade was in a very bad way. There was a general depression, such a gloomy outlook had not been for a very long time, many miners are out of employment and have been for weeks, and several of them think of emigrating, I was also told that most of the mines were going to be closed as things were so bad. I bad I noticed that along by the roadside the land was cultivated, and I found it was cut up into small pasture farms, and held by the miners. These farms they informed me all

belonged to Mr Beaumont, M.P., for South Northumberland. If all I heard is true Mr Beaumont is no more popular among the miners than he is in Tyneside; in the neighbourhood of Corbridge for instance, where he is endeavouring to close a public footroad used as such in the memory of the oldest inhabitant.
After passing Nent Head I overtook a miner who had worked some forty years in the neighbourhood. He had never been further than Alston, not even to Haltwhistle; of course, he had never seen the sea, nor had he any idea of its appearance. He had seen & train at Alston, but was never in one, wouldn't go in one, had certainty occasionally had a ride along the road behind an engine conveying lead to the smelt works. Winter and summer, in all weathers, he daily trudged back and forward to his work at Nent Head. He resided in a nice clean cottage on the road side; there were flowers blooming in the windows, and a-troop of children came rushing out to welcome him, and yet he could not tell me the name of his residence. He never got any letters, didn't think he could read them, I fancy he was as ignorant of the Alphabet as old Will Scott of Flotterton was owing to the high resolve of his father, that none of his family should ever be hanged for forgery. Just as the last slanting beams of the fast setting sun were gilding the higher parts of Alston, I got back to my comfortable quarters.

23rd October 1878 (Teesdale Mercury)
LEAD MINING IN ALSTON MOOR AND TEESDALE. —The prospects of the lead miners are looking a trifle brighter. The directors of Rodderup Fell mine met on Monday, and it was decided to resume sinking operations in the Whin. At Nenthead most of the miners recently paid off have availed themselves of the Lead Company's permission to seek for ore in the old workings, whether this work will prove remunerative is problematical; old miners accustomed to the workings, however, possess a greater advantage over newer hands. At Crossgill mine a considerable length of adit level is to be driven. We also understand there is a probability of about half the old workmen finding employment again at Cashwell, which at present is practically closed. The building trade alone appears to flourish in the district, in addition to Messrs. Askerigg's factory several large blocks of farm buildings are in course of erection. —In Teesdale, up to this date, about one hundred miners and smelters have been discharged. The Duke of Cleveland has determined to find employment for a number of the discharged men.

Marriages
At the Primitive Methodist Chapel, Nenthead, 11th inst., Mr Joseph Rutherford, lead miner, to Miss Sarah Jane Armstrong, both of Dykeheads, Nenthead.
See 5th April 1884

26th October 1878 (Hexham Herald)
LEAD MINING IN ALSTON MOOR
The prospects of the lead miners in this district are somewhat lightening. Most of the men recently discharged at Nenthead have availed themselves of the permissions given by the London Lead Company to search for ore in the old workings. Whether this work will prove remunerative is to be doubted though the company allows a fair price per bing; probably old hands accustomed to the workings may do fairly well. At Rodderup Fell, the directors have decided to

recommence sinking for the purpose of fully testing the ore bearing qualities of the strata underneath the Whin. At Crossgill mine some forty fathoms of additional adit level is to be driven. We understand that there is a probability of many of the old workmen being reemployed at Cashwell, which is now practically closed.

26th October 1878 (Alston Herald)

... the lent cash at Blagill mine was last Saturday reduced from three pounds per month to two pounds ten shillings. ...

9th November 1878 (Hexham Courant)

HEXHAM PETTY SESSIONS

BREACH OF MINES REGULATION ACT.

Thomas Ware, manager of the Stonecroft and Greyside Lead Mines, was summoned at the instance of Mr James Willis, her Majesty's Chief Inspector of Mines for this district, for that h, "being the agent of the Stoneycroft and Greyside Mines did unlawfully not properly fence the entrance between the top and bottom of a working shaft in the said mine, contrary to section 23 of the Metalliferous Mines Regulations Act, General Rule 7." Mr Isaac Baty, Jun., appeared for the prosecution, and Mr L. C. Lockhart for defendant. Mr Baty having briefly stated the case called Mr Willis, who spoke to visiting this mine at Stonecroft on the 3rd of last month, and inspecting a certain level leading to that mine, when he found the entrance to the shaft not fenced. – By Mr Lockhart: It was a new thing, since 1872, that intermediate levels should be fenced. - Mr Lockhart admitted on behalf of Mr Ware, that he had committed a breach of the regulation in question. It was fenced now, though it was not fenced at the time Mr Willis saw it. – The Chairman: When did this Act come into operation? – Mr Willis: It was passed in 1872 and came into operation in 1873. – Mr Lockhart (resuming) said that Mr Ware had conducted this mine for many years on the safest principles. He applied what safeguards the Legislature thought proper to enforce in the case of coal mines. The regulations in coal mines were that shafts should be fenced at the top and bottom. This new Act applied to lead mines what was applied to coal mines before, except that these fences should also be applicable to the intermediate openings. Hence it was that Mr Ware missed this new clause in the Act of Parliament. As far as Mr Ware knew he had done everything proper to be done. In this case it was not a level of a nature to suggest danger. He had now, however literally complied with the Act of Parliament. He thought that the Bench, looking at all the facts of the case, and seeing that it had not been done knowingly, would only inflict a nominal penalty. – The Chairman (to Mr Willis): Have you never given them any caution on the subject? – Mr Willis: No. – The Chairman: How long has this shaft existed? – Mr Willis: Many years. – The Chairman: You have not seen this shaft before? – Mr Willis: No. – The Chairman: Then they have been allowed to go on without a caution? – Mr Willis: Yes. – The Chairman: Has any life been lost through want of fencing here or anywhere else? – Mr Willis: Several in coal mine. – The Chairman: I meant at this mine? – Mr Willis said there was a life lost at this place a short time ago, but he could not say that it was in consequence of this fencing not being there. – The Chairman said that the justices had decided to inflict only a nominal penalty, but if another case of the

same nature came before them they would give the full penalty. Defendant would be fined 20s and costs.

2nd November 1878 (Hexham Courant)
Marriages
At Newcastle Register Office, 24th ult. Mr John Gill, to Miss Cora Doyle, both of Alston.
Robert Doyle married Isabella Greenwell on 14th May 1859, St Mary, Carlisle. In 1861, at Nottingham Cottages, Devon, Robert Doyle, Sapper R.E., born Ireland, his wife Isabella aged 23, born Alston, and daughter Cora M. under 1 month.
In 1871, at Sun Inn, Front Street, Alston, Blackett Greenwell, innkeeper, & animal preserver, aged 63, born Alston, his wife Mary (Smith, married 21st August 1834, Alston) aged 54, born Richmond, , daughter Isabella 29, born Alston, granddaughters Cora Doyle 10, born Plymouth, and Bertha Doyle 7, born Southampton. In 1881, at Brewery House, John Gill, brewer, aged 35, born Knaresdale, his wife Cora Mary 20, sons John Blackett 2, Arnold Reginald, 2 months, and sister in law, Bertha Doyle, dressmaker, aged 18. In 1911, at Guildford Place, Heaton, John Gill, traveller, wines & spirits, aged 66, his wife Cora Mary 49, sons John Blackett, mate mercantile marine, aged 32, George Arthur, clerk, aged 26, and Bertram Cyril, clerk, aged 24. Cora M Gill died 2nd quarter 1923, aged 62
Deaths
At the Felling, 26th ult. aged 68, Elizabeth Wallis, formerly of Alston Moor.
In 1851, at Low Felling, John Wallis, millwright, aged 37, sisters Elizabeth 40, and Jane, dressmaker, aged 30. In 1871, at St Johns Place, Felling, Elizabeth Wallis, unmarried, aged 60, and boarder John Wilson, labourer aged 22.

15th November 1878 (Newcastle Courant)
DEPRESSION IN THE TEESDALE LEAD TRADE.
NOTICE OF TEN PER CENT REDUCTION.
In consequence of the extreme depression in the lead markets the representatives of the Governor and Company, in Upper Teesdale, have just given notice of a further reduction in the miner's, smelter's, and other workmen's wages of 10 per cent. Already a large number of workmen have been discharged from the mines and quite a gloom has been cast over the higher part of Teesdale. For a long series of years the operations of the London Lead Company were practically unaffected by the fluctuations in trade, and the reverse now experienced is keenly felt by the great bulk of the inhabitants. Added to general commercial depression a large amount of sickness prevails in Middleton in Teesdale and neighbourhood, the mortality being high. No fewer than 17 fresh cases of Scarlet fever have broken out during the past week. Much distress in consequence exists.

DEPRESSION IN THE TEESDALE LEAD TRADE
NOTICE OF 10 PER CENT REDUCTION

In consequence of the extreme depression in the lead markets the representatives of the Governor and Company in Upper Teesdale, have just given notice of a further reduction in the miners, smelters, and other workmen's wages of 10 per cent. Already a large number of workmen have been discharged from the mines and quite a gloom has been cast over the higher part of Teesdale. For a long series of years the operations of the London Lead Company were practically unaffected by the fluctuations in trade and the reverse now experienced is keenly felt by the great bulk of inhabitants. Added to general commercial depression a large amount of sickness prevails in Middleton -in- Teesdale and neighbourhood, the mortality being held, no fewer than 17 fresh cases of Scarlet Fever have broken out during the past week. Much distress in consequence exists.

16th November 1878 (Hexham Herald)

ALSTON

The London Lead Company have given notice that after the 31st December 1878, they will cease to pay anything to Garrigill Curacy or to Nenthead living. The Company pays annually £45 to the Vicar of Nenthead and £30 to the Curate of Garrigill. ...

16th November 1878 (Alston Herald)

Deaths

At Alston 12th inst., aged 59, Joseph Carr lead miner.

In 1841, at Nenthead, Sarah Carr (Sarah Martindale married Thomas Carr, at Alston 29th September 1798, a burial of Thomas Carr aged 49 is recorded at Alston, dated 27th February 1823) widow, aged 65, Ralph lead miner 30, Anthony lead miner 25, Elizabeth 23, Joseph lead miner 20, and Hannah 18. The 1851 census shows at Nenthall, Sarah Carr, lead miners widow, aged 74, children Elizabeth 40, Anthony lead miner 32, Joseph lead miner 31, and grandson Thomas lead miner 15.

In 1861, at Nenthall, Joseph Carr, aged 41, his wife Mary aged 34, sons Ralph 8, William 7, Thomas 5, and Joseph 3.

In 1871, at Road Side House, Alston, Joseph Carr, lead miner & farmer of 14 acres, aged 49, his wife Mary 49, children Ralph lead miner 18, William lead miner 17, Thomas lead ore washer 15, Joseph 13, Elizabeth 7, John 5, Anthony 2, and Matthew 11 months. In 1881, at Ropery Cottages, Mary Carr, lead miners widow, aged 57, children Thomas, coal miner, aged 24, Joseph, coal miner, aged 22, Elizabeth 16, John, tailors apprentice, aged 14, Anthony 12, and Matthew 10.

30th November 1878 (Hexham Herald)

ALSTON LEAD TRADE

Ayleburn lead mine, a small one, has been closed. The chief mine in the district of the London Lead Company is situate at Nenthead, and matters are in such a gloomy state that a further reduction in mens wages is feared, will take place at the close of the present year. The sinking of a shaft at Rodderup Fell in the Whin, has, within the past few days, been let by tender, and it is stated that the

accepted tender was at the rate of £27 per fathom. The highest being about £80 per fathom the average rate for the work in ordinary good times would be about £70 per fathom.

7th December 1878 (Hexham Herald)

ALSTON

THE LEAD TRADE. Besides Ayleburn mine, Hudgill Burn Mine has also been closed lately. About ten men have been reemployed at Cashwell. At Rodderup Fell, the working shifts have been lengthened from seven to eight hours. Rodderup Fell Company following the example of the London Lead Company, have withdrawn their grant of £10 to Garrigill Curacy. The London Lead Company have ceased to pay the school fees of children in Nenthead district whose parents receive out-relief.

Poor Law, Workhouses & Outdoor Relief

The Alston, Garrigill & Nenthead Poor Law Union was set up in 1837 when the existing workhouse was enlarged, it had an elected Board of Guardians.

Mannix & Whellan, History, Gazetteer and Directory of Cumberland, 1847

Poor Law Union, which only extends over the parish, is governed by thirteen, and two ex-officio guardians. The workhouse is situated near the town of Alston, and is capable of accommodating 80 inmates, though in November 1845, there were only 38 paupers in the house, and the expense each averaged about 2s. per week. Mr. Thomas Nattrass is the acting overseer, Mr. John White, relieving officer, and Robert and Mary Armstrong, governor and matron.

Since the mid 1300's various Acts of Parliament were passed relating to the care of the poor and infirm such as the 1535 Act which required that "all Governors of Shires, Cities, Towns, Hundreds, Hamlets and Parishes shall find and keep every aged, poor and impotent Person, which was born or dwelt three years within the same limit, by way of voluntary and charitable Alms ... for as none of them shall be compelled to go openly in begging. And also shall compel every sturdy Vagabond to be kept in continual labour ... "and gave powers to apprentice children aged between 5 and 13. Voluntary contributions for the relief of the poor were to be collected by the justices of the peace and churchwardens.

In 1601 the Act: "An Act for the Relief of the Poore" was passed consolidating previous Acts, and introduced the "Poor Rate" it empowered parish overseers to raise money for poor relief from the inhabitants of the parish, according to their ability to pay. The poor-rate was originally a form of local income tax, but over time evolved into the rating system. The 1601 Act made provision for "setting the poor on work". It stated that the Parish had the responsibility to: "… set the poor on work, and also competent sums of money, for, and towards the necessary relief of the lame, impotent, old, blind, and such other among them being poor, and not able to work, and also for the putting out of such children to be apprentices, to be gathered out of the same Parish, according to the ability of the same parish …"
Relief known later as "outdoor relief" could be given by the Parish from funds collected, either in kind or money.

This did not generally include accommodation, this changed with Sir Edward Knatchbull's Act of 1722-3 " For Amending the Laws relating to the Settlement, Imployment and Relief of the Poor". It enabled workhouses to be set up by parishes either singly, or in combination with neighbouring parishes. It also established that the prospect of workhouse should act as a deterrent and that relief should only be available to those who were desperate enough to accept its regime.
The 1834 Act amended previous legislation and enabled the re-organising of 15,000 or so parishes of England and Wales into new administrative units called Poor Law Unions each run by a locally elected Board of Guardians. The funding of each Union and its workhouse continued to come from the local poor rate with each parish contributing in proportion to its poor relief expenditure over the previous three years. The Act also cut off completely all relief-money to the able-bodied. The aged, sick, or child paupers were compelled to enter workhouses where they were forced to perform labour which was often degrading, maintaining the principle of deterrent. This abolition of outdoor relief (out-relief) proved highly un-popular.
Previously out-relief usually in the form of bread, clothing, fuel, the payment of rent, or money, would be given to those in need who were not in the workhouse.

Due to manufacturing down turns it was often the case that there were insufficient places available in the workhouses.

This led to the 1842 ***Outdoor Labour Test Order:***
Article 1: *Every able-bodied male pauper receiving relief from any Parish within the Union, and not relieved in the workhouse, shall be relieved in the following manner : that is to say,—*

> *Half at least of the relief given to such pauper shall be given in food, clothing, and other articles of necessity.*
>
> *No such pauper shall receive relief from the Guardians of the Union, or any of their Officers, or any Overseer of any Parish in the Union, while he is employed for wages or other hire or remuneration by any person ; but every such pauper so relieved shall be set to work by the Guardians.*

Article. 11. *Provided always, that the regulations in article I shall not apply in the case of any able-bodied male pauper who shall come within any of the following descriptions : that is to say,-*

> *1st. Where such pauper shall receive relief on account of sudden and urgent necessity.*
>
> *2nd. Where such pauper shall receive relief on account of any sickness, accident, or bodily or mental infirmity affecting such pauper, or any of his family.*
>
> *3rd. Where such pauper shall receive relief for the purpose of defraying the expenses, either wholly or in part, of the burial of any of his family.*
>
> *4th. Where such pauper shall be confined in any gaol or place of safe custody.*

5th. Where any able-bodied male person shall not reside within the Union, but the wife, child, or children of such person shall reside within the same, the Guardians may afford relief to such wife, child, or children, according to their discretion.

The Local Government Act was passed on 27th March 1929 and came into effect on 1st April 1930 - a day which was to mark the end for all Boards of Guardians in England and Wales.
Although the workhouse was officially no more, many institutions carried on into the 1930s virtually unaltered. Poor Law Institutions became Public Assistance Institutions and were controlled by a committee of 'guardians'. Unfortunately, the conditions improved very little for the inmates.
The National Health Service Act of 1946 came into force on 5th July 1948. Institutions now came under the control of Hospital Management Committees under Regional hospital Boards but many still carried the stigma from their workhouse days.

11th December 1878 (Teesdale Mercury)
ALSTON: —The Lead Trade. —Besides Ayleburn Mine, Hudgill Burn has also been closed lately. About ten men have been re-employed at Cashwell. At Rodderup Fell the working shifts have been lengthened from seven hours to eight. Rodderup Fell Company following the example of the London Lead Company, have withdrawn their grant of £10 a year to Garrigill curacy. The London Lead Company have ceased to pay the school fees of the children in Nenthead district whose parents receive out relief.

14th December 1878 (Hexham Courant)
ALLENDALE
The lead trade prospects are very gloomy in Allendale, so far as the labouring classes are concerned. Notice has been given to the workmen engaged in the lead mines and smelt mill in Allendale and at Allenheads belonging to W B Beaumont Esq. MP that these works will be closed on and after the 28th of the present month. Not many months ago these places gave employment to some three or four hundred men although the greater proportion of these were dismissed some months ago, for at Allen smelt mill alone there used to be about 100 employed, which number latterly has been reduced to some thirty or forty. The total stoppage of Mr Beaumont's mines and smelt mill will increase the depression in trade which already exists in the district.

21st December 1878 (Hexham Courant)
ALLENDALE
Mr W B Beaumont gave £50 to his agent to buy coal that was to be distributed amongst his workers at Allen Smelt Mills.

21st December 1878 (Hexham Courant)
ALSTON
THE LEAD TRADE
Speaking of the closing of the lead mines in Allendale and other places, an Alston correspondent says, this will be a terrible blow to the prosperity of the two dales, as the mines employ several thousand workmen. The reasons which have induced Mr Beaumont to take this step are difficult to conjecture, as some

of the Weardale mines are exceedingly rich, in marked contrast to those on Alston Moor. Prices of lead are certainly low, and Mr Beaumont has several thousand tons stored, but this can scarcely be a sufficient reason for depriving the miners of the means of subsistence, as there is no doubt many of the mines pay even at present prices.

21st December 1878 (Hexham Courant)

HAYDON BRIDGE
LEAD MINING

As will be remembered by our readers a few weeks ago we intimated that notice had been given at the Langley Barony Lead Mine, Haydon Bridge, that all work would be terminated on the 14th inst. The result on expiration of this notice was that some 14 or 15 men and boys have been dismissed. The men dismissed are some dozen, out side men, and two or three boys employed as washers. The reason of this appears to be that a small pumping engine has been stopped, which supplied water for a part of the washing apparatus which was last erected, and we are also informed, that the mills belonging to the mining company in the Eastern part of the county, where all the lead is smelted, are not working right, and that some alterations have to be made, which necessitated the stoppage of smelting process for a short time. A week or two ago, the men employed at Stonecroft Mine had their wages reduced from 19s to 18s per week of five shifts. It is greatly feared that if the present hard frosts continue the work will be stopped at the washings at the Langley Barony Mine.

28th December 1878 (Alston Herald)

GARRIGILL
THE LATE MR THOMAS SHAW, SHIELD HILL.

Our obituary of today records the death on Sunday last (22nd inst) of the above named gentlemen. ... he passed away in the 74th year of his age. In the early part of his life Mr Shaw was closely connected with the mining interest, having for a considerable time, the chief, if not the entire management of Benty Field mine.

In 1841, at Shield Hill, Thomas Shaw, mine agent, aged 35; his wife Ann aged 30, children Thomas 8 (died 1849?), Robert 6, Mary 4 and Ann 1 year.
In 1851, at Shield Hill, Thomas Shaw, miner & occupier of lead and prospector, aged 46; his wife Ann (Smith, married Alston, 7th July 1831) aged 41, children Robert Walton drapers assistant 16, Mary 14, and Ann 10.
In 1861, at Shield Hill, Thomas Shaw, landed proprietor, aged 56, and his wife Ann aged 51, and unmarried daughter Mary aged 23.
In 1871, at Shield Hill, Thomas Shaw, widow, yeoman, and farmer of 4 acres, aged 66; also, his unmarried daughter Mary aged 33.
In 1871, Robert Walton Shaw is a Draper at Belle Vue, Medomsley Robert W Shaw, aged 36, his wife Margaret 38 (born Middleton in Teesdale), children stepson John Smith 15, Lilian Smith step daughter 12, Nancy A. Smith stepdaughter 9, Margaret E. Smith stepdaughter 6, and daughter Anne W. aged 1 year.
Robert W Shaw married Margaret Smith at Newcastle in 1866.

28th December 1878 (Hexham Herald)
Deaths
Bristol, Stapleton Road, 14 Cambridge Terrace, 20th inst. aged 70, Hayton Blacklock late of Nenthead.
In 1851 at Borringdon Cottage, Morly Clay, Shaugh Prior, Devonshire, Hayton Blacklock, clerk at the clay mines, 43, his wife Sarah (Hornsby, married 14th August 1834, at Alston) aged 37, children Thomas apprentice joiner 15, Isaac post boy 13, Joseph 11, John G. 9, Mary 7, Jane P. 5, John H. 2, and Sarah J. 6 months. Thomas, Isaac & Joseph born in Alston, the others at Shaugh Prior. They were living at Shaugh Priory at the time of the 1841 census also. The 1861 census shows the family at Shaugh Priory, in 1871 the census they are living at 16 West Grove, Ashley, Bristol, Hayton Blacklock commercial traveller, aged 62, his wife Sarah 56, Thomas carpenter 35, Jonathan carpenter 22, and Henry H, clerk carriers office 18. Sarah Blacklock died in 1886 Barton Regis, Gloucestershire.

4th January 1879 (Alston Herald and East Cumberland Advertiser)
ALSTON BOARD OF GUARDIANS
The fortnightly meeting of this Board was held on Saturday last; in the Board Room, Town Hall, when the members present were—Rev. O. James, J.P. (in the chair), Mr Joe. Armstrong, Mr Jonathan Carr, Mr Joshua Mulcaster, Mr Thos. Dickinson, Mr Adam Walton, Mr Isaac Walton, Mr Henry Walton, and Mr Jos. Walton.—The Clerk reported that the treasurer (Mr H. Whitfield) had received £73 4s on account of the lunatics for the last half-year, which would be placed to the account of the Board. The quarterly cheques were then signed. There were no relief cases to come under the consideration of the Board, and only one application for the payment of school fees, by a pauper, which was accordingly granted. The Clerk said that these orders for the payment of school fees had only been made up to the 31st Dec., so this order would have to be renewed at next meeting. —The School Inquiry Officer (Mr N. Walton) : Yes; they will all have to be renewed at next meeting.—The Board then proceeded with the annual distribution of the Fair Hill Charity. The Clerk laid before the Board a statistical statement of the receipts and expenditure of the Charity. For Alston, last year, there was a balance in hand of £30 18s 6¾d; proportion of charity, £44 12s 10d; distributed during the year, £12 5s; which left a balance in hand of £63 6s 4¾d; Garrigill—balance from last year, £10 0s 3½d; proportion of charity, £14 16s. 6d., which brought the whole amount up to £24 16s. 9½d; distributed during the year, £7; leaving a balance of £17 16s 9½d.—Mr Dickinson: How much was there distributed last year:—The Clerk, after referring back to his book, said that only about £20 had been distributed last year in both Garrigill and Alston.—The Relieving Officer said there were about fifty applicants for relief out of the fund.—The cases were then taken *seriatim*, and the merits of each having been duly considered, the applicants was awarded 10s or £1 according to their circumstances as known to the Board. There were fourteen applications from Garrigill, four of which were able-bodied parties, who had been out of work for some weeks, and had no means of support. £8 was distributed among them, leaving a balance of £9 16s in hand. There was only one applicant from the Nenthead district which was remarked upon by one of the guardians, when the Relieving Officer amounted for it by the fact that the Langhorn Charity had been dispensed to the poor people in that district, when there was a large

number of applicants. £26 had then been distributed. After the addition of one or two parties whom the guardians considered were needful parties, although they had not made application through the Relieving Officer, the Clerk stated that the amount expended for Alston was £24 10s, making £32 10s for the whole district.—The Clerk stated, with reference to the forming of bye-laws for proper enforcement of the Elementary Education Act, 1876, that he had looked up the subject, and he found that the guardians could not move in the matter without there was a requisition presented, signed by fifty ratepayers, and then the Clerk could cell a ratepayers meeting to put a resolution that bye-laws be adopted, and the Board moved upon it.—Mr Mulcaster considered that bye-laws were necessary. They had about twenty at Nenthead that were not paying school fees at all—The Chairman considered that they should give the matter their due consideration at next meeting.—Mr Dickinson proposed that the matter stand over for six months.—Mr H. Walton moved that it stand over for three months after next meeting.—The Chairman: We will say no more about it till it creeps up again. (Laughter.)—There was no sanitary business to transact with the exception of signing the quarterly cheques.

NENTHEAD.

BAZAAR AND CHRISTMAS TREE.—The Wesleyans of this place held a bazaar and Christmas tree on Christmas Day in the Lead Company's School-room to liquidate the debt remaining on the organ recently purchased for the chapel. The sale commenced at one o'clock, when a brisk business was done, until all the stalls were completely cleared of their goods. A brisk business was likewise done at the refreshment department. The entire proceeds for the day amounted to £40 17s, which was very satisfactory taking into account the depression in the lead trade and the state of the neighbourhood.

TEA AND FRUIT BANQUET.—The annual choir meeting in connection with the Primitive Methodist Chapel was held on Christmas Day in the chapel, and was quite as successful as in previous years.

In the evening a fruit banquet was held, the fruit consisting of oranges, apples, and sweets. The chair was occupied by Mr Thos. Wilkinson, sen., of Nenthead, who entertained the company with a very amusing speech. Th meeting was addressed by Messrs John Hill, Jun., and Jonathan Rutherford, of Nenthead, the addresses being practical and appropriate for the occasion. The entire proceeds were for the choir funds.

18th January 1879 (Hexham Courant)

Marriages

At the Primitive Methodist Chapel, Alston, 12th inst. Mr John Place to Miss Diana Hall, both of Alston.

In 1851, at Low Skelgill, John Place, lead miner, aged 58, his wife Elizabeth (Proud, married 7th December 1822, Alston) aged 48, children Joseph, lead miner, aged 24, Thomas, lead miner, aged 21, John, lead miner, aged 17, and Elizabeth 10.

John Place died 2nd quarter 1854.

In 1861, at Low Skelgill, Elizabeth Place, widow, farmer of 60 acres, aged 58, children Thomas, lead miner, aged 30, John, farmers son, aged 27, and Elizabeth 20.

In 1901, at Low Skelgill, John Place, farmer, aged 67, his wife Dianah 54, Isabella 33, Tom, cartman 30, Mary 19, John Wm, cartman, aged 16, and Eliza 13.
John Place died 22nd March 1904, aged 70, his wife Diana had died November 10th 1903, aged 56

Deaths

At Hundy Bridge, Garrigill, 11th inst. aged 42, Jane Law, daughter of the late John Law, lead miner.
John Law married Hannah Armstrong 16th March 1826 at Alston.
Hannah Law died ?

In 1841, at High Spency Croft, Garrigill, John Law, lead miner, aged 40, wife Sarah (Pattinson, married 10th February 1834, at Alston) aged 30, children George 14, William 13, John 10, Elleanor 9, Jane 5, and Joseph 1 year.
In 1851, at High Spency Croft, Garrigill, John Law, lead miner, aged 52, wife Sarah aged 41, children George, lead miner, aged 24, William, lead miner, aged 22, John, lead miner, aged 20, Jane 15, Sarah 8, Ann 5, and Matthew 2.
In 1861, at High Spency Croft, Garrigill, John Law, lead miner, aged 62, his wife Sarah 51, daughters, Sarah 18, and Anne 15.
John Law died 4th quarter of 1864.
In 1871, at Hundy Bridge, Garrigill, Sarah Law, widow, farming 14 acres, aged 61, and daughter Jane, servant, aged 30.
In 1881, at Hundy Bridge, Garrigill, Sarah Law, widow, farming 14 acres, aged 71, and daughter Annie, dairy maid, aged 28.
Sarah Law died 4th quarter 1885, aged 76, registered at Alston.

WEARDALE

FATAL ACCIDENT NEAR ST JOHN'S CHAPEL

A miner named Thomas Chesters, residing at Bolts Burn, near St John's Chapel, returning home on Saturday night in company with his son, accidentally fell into an old coal depot about 12 feet deep and was killed. When found he was lying on his back in an insensible state and only lived three quarters of an hour after having been taken out.

ALSTON BOARD OF GUARDIANS

FAIR HILL CHARITY MATTERS.

The CLERK stated that the balance of the charity money due to Mr Davis, the Grammar School Master was £26 19s 5d; previous payment, £20; making a total of £46 19s 53. Balance due to Mr Dent, Garrigill schoolmaster, £8 8s 2d; previous payment, £5; total, £13 8s 2d.—Mr VIPOND remarked that the master of the Grammar School had, according to his agreement, to pay sixpence a quarter as rent for the school. It had not been paid for some time, but the Committee thought it ought to be deducted for this year at any rate. They only wished to carry out the agreement in order to have control over the school.—The CLERK: It is a mere nominal thing; the relieving officer ought to ask him.—Mr A. WALTON: I would ask him if he returned it again; it is merely to have command over the school.— The relieving officer was ordered to ask the master for the payment when he received his payment out of the charity funds.

RURAL SANITARY AUTHORITY

DR. CARSON'S REPORT as follows —

Salvin Lodge, Alston, 10th January, 1879.

To the Rural Sanitary Authority. Gentlemen, I beg to hand you my annual report for the year ending Dec. 31st, 1878, with a summary of the action taken for the prevention and spread of disease. The inspection of the district has been carried out systematically at certain periods, as occasion might require; and have found no nuisance of a serious nature to exist likely to injure public health. Visited Nenthead and Garrigill Gate during the months of January, February, and March. Found all in good sanitary state with the exception of a few dung heaps, which I instructed the owners to remove. Since then complied with. Whooping cough very prevalent during this quarter, five cases having proved fatal, these being the first deaths recorded since the year 1873. Free from other epidemics. April 9th. Fatal case of typhoid fever occurred at Beldy, Garrigill. On inspecting the premises found the drains in a very satisfactory condition. Ordered disinfectants to be freely used. Same date—visited Garrigill Gate—found all in a healthy state. May 14th. Two cases of typhoid fever reported in Garrigill Gate. On visiting the place found drainage &c., in good order. The same applies to the neighbouring dwellings. May 27th and June 3rd. Inspected Nenthead and adjoining hamlets. Gave instructions to have some drains flushed and new ones constructed where found requisite. On visiting the places shortly afterwards, found my recommendations in general carried out, whooping cough which had been prevalent for some months has now entirely disappeared. Sept. 9th and Nov. 25th. Visited Nenthead. A road channel out of repair which obstructed the flow of refuse water from the adjoining property. Spoke respecting the same, when he agreed to have it put into proper working order. With the above exception found the village very satisfactory. Sept. 11th and Nov. 26th. Garrigill

Gate and outskirts in good sanitary state. The aggregate deaths for the year number 52, being at the rate of 17 per thousand, consisting of 30 males and 22 females, showing an increase of 2.3 per thousand as compared with last year. Births—76, being 53 for Nenthead and 23 for Garrigill.

I am gentlemen, Your obedient servant, STEWART CARSON.

Medical Officer of Health for No. 2, or High District.

The Inspector of Nuisances (Mr Dixon) said that he had visited Nenthead and Garrigill and found all in a fair sanitary condition. He had no nuisance to report the Board.

Whooping cough, also sometimes referred to as pertussis, is an infection of the lining of the respiratory tract. Whooping cough is highly infectious. The condition is caused by a bacterium called Bordetella pertussis, which can be passed from person to person through droplets in the air from coughing and sneezing.

The condition is known as whooping cough because the main symptom is a hacking cough, which is often followed by a sharp intake of breath that sounds like a 'whoop'.

Whooping cough usually affects infants and young children. However, adults can also sometimes develop the condition. Whooping cough tends to be most severe in young infants and, in rare cases, it can be fatal.

In the 1950s, there were more than 100,000 reported cases of whooping cough in England and Wales. However, with the introduction of an immunisation programme during the 1950s, the number of confirmed cases of whooping cough is now very low.

Before immunisation against whooping cough began in the 1950s, there was an epidemic of the condition every three to four years in the UK. As a result, 80% of children developed whooping cough before they were five years of age. (www.nhs.uk)

GARRIGILL.

THE LATE MR WM. HUTCHINSON, OF GARRIGILL. —The funeral obsequies of Mr Hutchinson were performed at Garrigill on Monday last, when he was followed to the grave by a large and respectable company deeply in sympathy with the bereaved relatives, and many mourning the loss of a true friend as well as of a public benefactor. To some who looked round the burial ground, a fresh grave with the sod upon the top of the mound and the earth at the sides is though but newly turned over would be observed. That grave, we understand, contained the body of Mr Christopher Armstrong, of Ashgillside, who was interred a few days previously—a man of blameless life and consistent character, and yet cut down with the dew of his youth on his brow, and though spending the whole of his life at Ashgillside, he was not unknown to fame in certain circles seeing that he was one of the Armstrong's, of Ashgillside, so famed for their breed of black faced sheep, and for which they have got some of the best prizes at the largest cattle shows in the country.

Deaths

Ashgill, 4th inst. aged 38, Christopher Armstrong.

In 1841, at Ashgill Side, Christopher Armstrong lead miner aged 40, his wife Addah (Armstrong, married 9th December 1826, at Alston) aged 39, children Mary 10, William 8, John 4, and Christopher 1 year.

Christopher Armstrong senior died in 1847.

In 1851, at Ashgill Side, Addy Armstrong, widow, occupier of small farm, aged 43, children Mary 21, Wm 18, John 13, Christopher 11, Thos 7, and Elizabeth aged 5.
In 1861, at Ashgill Side Adeline Armstrong, miners widow, aged 54, children John lead miner 23, Christopher lead miner 21, Thomas lead miner 17, and Elizabeth aged 15 years.
In 1871, at Ashgill Side, Garrigill, Adeline Armstrong, farmer of 20 acres, aged 56, her unmarried sons Christopher, farmers son, aged 31, and Thomas lead miner, aged 27.
Loaning Head, Garrigill, 9th inst aged 58, William Hutchinson.

LEADGATE (ALSTON)

MUTUAL IMPROVEMENT SOCIETY.—This Society is now in a very prosperous condition, numbering over thirty members. The annual meeting, presided over by the President of the Society, Mr Isaac Walton, was held on the 10th inst., in the School Room, when the members and a large number of their friends partook of tea before the meeting, and supper after it. After the ordinary business was transacted the members had a very amusing discussion, the question being whether is celibacy or matrimony the happier state? As a matter of course the bachelors were defeated by a large majority. The ordinary meetings are held once a fortnight and are well attended, the subjects chosen for discussion or papers to be read are always of a very instructive and interesting nature. The second part of the lecture lately given by the Rev W. Nall, B.A., in connection with this society, will be given shortly.
LEADGATE SCHOOL.—Mr Pennethorne, H.M. Inspector of Schools, accompanied by Mr Hunter, his assistant, visited this School on Wednesday last, for the inspection of the children. Formerly this along with other schools in the parish were annually examined in the month of June, but the month has now been altered to January, the school year ending on the 31st Dec.
